

General Ledger Chart of Accounts: Object Segment

The Object Segment:

- Defines what kind of transaction is taking place
- Categorizes values by account type for Assets, Liabilities, Fund Balance, Revenues, Expenses and Transfers
- Object Segment values are the same across planning units

The first digit of an Object represents the major groupings shown below:

Segment Value	Type of Account
<i>Balance Sheet</i>	
1xxxxx	Assets
2xxxxx	Liabilities
3xxxxx	Fund Balances
<i>Income Statement</i>	
4xxxxx	Revenues
6xxxxx	Funding Transfers
7xxxxx	Expenses
8xxxxx	Investment Transfers

- Assets – 1XXXXX
 - Represent something of value owned by the University
 - Examples are Inventory, Petty Cash or Accounts Receivable
- Liabilities – 2XXXXX
 - Represent the University’s obligations
 - Liability object codes are not commonly used by departments in charging financial activity
 - Examples are Accounts Payable and Taxes Payable
- Fund Balances – 3XXXXX
 - Represents the difference between Assets and Liabilities on the Balance Sheet
 - It’s a computed balance – no transactions are made against these object codes
 - Fund balance types are Unrestricted, Temporarily Restricted and Permanently Restricted
- Revenues – 4XXXXXX
 - Revenues are Income
 - Examples are Tuition, Lab Fees and Sales and Services
- Funding and Investment Transfers – 6XXXXX and 8XXXXX
 - Both types of transfers identify the movement of funds for specific activities or expenses within the University or planning unit
- Expenses – 7XXXXX
 - Money spent on a good or service
 - Examples are payroll, supplies, travel and maintenance

Segment Lookup Dashboard Page

The Segment Lookup Dashboard details available Object Codes and their descriptions. To search for or export a list of Object Codes, first navigate to the Segment Lookup section of the Lookups tab in the Finance dashboard in OBI. Select Object and then click on Apply.
