Home > Racks > Microtube Racks

Microtube Racks

With transparent lids to shield against contamination, microtube racks provide optimum stability to small contained samples and allow one handed operation. Offered in an assortment of colors and placement matrixes, the stackable models save precious working space. Cavities are alphanumerical labeled or surfaces are frosted for smear-resistant labeling to improve sample identification. The microtube racks are compatible with robotic filling equipment and may be steam autoclaved for sterile repetitive use.
