A&S	AAS	AAS	1060	Introduction to African American Studies	Lecture	3	0		N	U10		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Unlike most established disciplines, there is to be a lack of consensus among Africana Studies scholars as to what exactly is African American/Afro-American/Africana/Pan African/Black Studies, and/or what constitutes the nature and scope of the discipline. The National Council for Black Studies, the leading organization of Black Studies professionals in the world, defines it as a discipline that investigates African peoples' experiences from the perspective of their interests, aspirations, possibilities, and envisioned destinies. Experiences that range from the earliest human civilizations to the tragic era of enslavement, colonization, forced migration, displacement and the reconstruction of African peoples humanity and life ways.								
				This introductory course investigates the foundation, nature, scope, and structure of African American/Africana Studies in American Universities. The course will basically explore various descriptions, definitions, and meanings of the discipline/field, as well as approaches to understanding its interdisciplinary, multidisciplinary, and trans-disciplinary nature; survey major disciplinary literature written about it, and the perspectives advanced by scholars. The course also critiques and systematically outlines essential components of and/or arguments advanced about, for, or against the discipline. Finally, a comparative exploration of the interrelationship between African American/Africana Studies, Area Studies, and Ethnic Studies, as well as some emerging intellectual developments in Africana Studies research, teaching, and service activities will help guide us later into the semester as we engage in our focused discussions and discoveries of a satisfactory definition of the discipline, and an operational description of its basics and essentials.								
A&S	AAS	AAS	1100	Introduction to African American Literature	Lecture	3	0	2HL; PHTC	N	U10		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Focuses broadly on African American literature from work of the 18th century to contemporary writings with the intention of providing the student with an introduction to the topic. Reading poetry, short fiction, the novel, and other forms of writing, the course will explore such questions as how black writers address African American literary inheritance and production. A final paper will afford the student the occasion of applying a critical approach to literary texts. Topics may include slave and freeman and free woman narratives, the Harlem Renaissance, and the postmodern black novel. The aim of the course is to equip the student with a strong academic knowledge of African American literature in its cultural and historical contexts.								
A&S	AAS	AAS	1500	Africana Media Studies	Discussion	4	0	2HL; PHTC	N	U10		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Africana Media Studies is an introduction to the Africana experience (primarily in the U.S) through media. This course is designed to enable scholars the opportunity to explore, critique and understand images, stereotypes, myths and counter-imaging of the Africana experience. Contemporary as well as historic notions of race, class and gender through the prism of media will be examined.								
				In the exploration of these various themes attention will be paid to the social, political, and economic contexts that have shaped the media. The media includes, though not limited to radio, television, film, newspapers and the internet.								
				This course will attempt to include all aspects of the media to facilitate the examination of the Africana experience. However primary attention will be given to television, film and radio. The course will follow a loose chronological approach from early media to contemporary media. While the primary focus is on Africana media it does not preclude discourse on other related media studies issues, it is however the emphasis for this course.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Intended to help create a campus environment where sensitive subjects can be discussed in a spirit of open, scholarly inquiry and intellectual rigor and with respect for different viewpoints. (Ford Foundation Difficult Dialogues RFP, 2005 at: http://www.fordfound.org/news/more/dialogues/index.cfm?print-ver)								
				Students in this problem-based discussion and writing course will examine race in America through the lenses of law and religion. Working on teams and using a variety of resources, students will investigate five issues spanning from the founding of the country to present day New Orleans. Analyzing past and present historical events, students will gain insights into both the progressive and repressive roles that law and religion can play in creating and resolving difficult human problems. Students who take this class will become "bridge-builders" in their communities; people who bridge the gulf between groups that sometimes perceive themselves as being divided, when they have far more in common than that which may be the subject of a "difficult dialogue."								
A&S	AAS	AAS	2020	African American History II, 1876 to late twentieth century	Lecture	3	0	2SS; PSBS	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Examines a series of topics (economic, demographic, social, cultural and political) in African American history from 1876 to the late twentieth century. The evolution of race relations is an important component of this course, but the major emphasis will be placed on the internal experiences of ordinary African Americans, within the framework of larger socioeconomic and political processes in U. S. history. In addition to providing topical perspectives (e.g., work, family, and religion), the course will pay close attention to chronology and change over time.								
A&S	AAS	AAS	2100	Slave Narrative and Freeman/Freewomen Fiction of the 18th and 19th Centuries	Lecture	3	0	2HL; PHTC	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Will cover the African American slave narrative, from the eighteenth to the nineteenth centuries, along with free-woman and free-man writings of the later nineteenth century and possibly the early twentieth century. Readings typically include works by such authors as Frederick Douglass, Harriet Jacobs, William Wells Brown, and Solomon Northup. The course will consider contemporary debates surrounding the question of authenticity as well as current views of how slave narratives merit aesthetically. The course also interrogates questions pertaining to how the slave narrative challenges conventional notions of autobiography and how the early black novel confronts received and developing notions of the U.S. novel.								
A&S	AAS	AAS	2110	African American Literature II: Black Writing of the 20th and 21st Centuries	Lecture	3	0	2HL; PHTC	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Focuses on 20th- and 21st-century writings by African American authors with a view toward gaining an understanding of the enormous wealth of literature black writers produced during the periods in question. The course will start with the Harlem Renaissance and the Black Modernist phase, then move on to the Black Arts period, and conclude with contemporary African American literary writing. Typically, the course will read texts by writers including Langston Hughes, Zora Neale Hurston, Richard Wright, Ralph Ellison, Claude McKay, and Toni Morrison.

A&S	AAS	AAS	2250	History of the African American Worker	Lecture	3	0		N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: African-American workers have had a profound effect on U.S. labor and its history. This course will examine the transformation of the African-American working class from the post-Civil War period through the late twentieth-century. African American workers and their community organizations played an integral role in shaping the American working class experience from the maturing industrial period through post-industrial period of U.S. history. We will analyze the changing relationship between capital and labor, employers and employees while evaluating the shifting meanings of "owners" and "workers" over time. Through the lenses of race, gender, and sexuality we will also analyze the developments in African American working-class culture and politics.								
A&S	AAS	AAS	2500	Blackness and the Arts	Lecture	3	0	2HL; PHTC	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Soph or Jr or Sr Introduction to the idea of a black art by focusing on a number of different kinds of art practice that enact the idea of race (e.g., film, video, fine art, new media, television, photography, literature). Develop skills in the critical study of black art as a historiographical, cultural, and political craft. Topics are chosen to provide a wide breadth and scope of black visual and expressive culture.								
				The course is interdisciplinary by design and necessity. Encourages a shift of hermeneutics from the black life world to black visual and expressive culture in the terms of blackness. This means repurposing the study of black art in ways other than fidelity to the social category of race and an ethics of positive and negative representation that tacitly encourages the idea of film as cultural policy. Details a commitment to how new paradigms for form and aesthetics, historiography, and intertextuality constitute blackness as the unfinalizable encounter between the idea of race and the idea of art rather than blackness as merely sociology.								
				The approach of this course is primarily that of visual culture and post-structuralist work devoted to difference. In this way, the method is twofold. Firstly, this is an introduction to the idea of race as enacted in the arts and an introduction to critical theory.

				Focuses on the extraordinary yield of interwar period (c. 1915-1940) African American authors, placing the literary study in the context of political and cultural history. The course will explore such questions as how the renaissance may be seen in terms of modernist aesthetics and transnational culture. Also of interest will be the question of the renaissance and radical politics. The class will consider the Harlem Renaissance, what's more, vis-à-vis the sexual and gender revolution of 1920s. Typically readings will include works like Langston Hughes's The Weary Blues, Zora Neale Hurston's Their Eyes Were Watching God, Claude McKay's Home to Harlem, Alain Locke's The New Negro, Nella Larsen's Passing, and Jean Toomer's Cane, along with criticism on the Harlem Renaissance. Students will write a critically researched paper and be administered essay exams. The aim of the course is to equip the student with a strong academic knowledge of Harlem Renaissance literature in its historical context.

		COURSE DESC:		REQUISITE:								
				Soph or Jr or Sr								
				Black Men and Masculinities is an interdisciplinary course that examines the diverse experiences of black men and the public discourses about black masculinities primarily in the U.S. The major thrust of the course is to examine how the gendered social order influences black men's actions and the way black men perceive themselves, other men, women, and social situations. We will use an intersectionality perspective to explore the relationships between multiple dimensions of social relations and inequalities: gender, race/ethnicity, class, and sexual orientation. We will also consider how black masculinities are produced in various physical/social sites. This course evaluates the prospects for social change in how black men think, feel, and act. It addresses issues such as: black male socialization and boyhood/guyland culture, the black male body image, black male friendship, black male sexuality and fertility, black men's experiences as fathers and their involvement in volunteer and paid youth work, male aggression and violence, the social construction of masculinities in different historical and cultural contexts, and men's movements and networks.

				<p>ELIGIBLE GRADES: GEC1: A-F REQUISITE: Soph or Jr or Sr</p> <p>COURSE DESC: The class is an intensive study of a specific topic/theme of Black visual and expressive culture. The course will be structured around this specific topic/theme to illustrate the methods and traditions of black visual and expressive culture. The content of the course will rotate but always address the relationship between art practice and the idea of race. Such topics might include feminist art, the racial grotesque, Chester Himes and the noir tradition, passing and the black embodiment index, historical consciousness and Civil Rights America, hip-hop modernism, or an analysis of one literary text (Ralph Ellison's Invisible Man or Ishmael Reed's Mumbo Jumbo) and its influence of black visual and expressive culture.</p> <p>The purpose of this class is to promote a rigorous sense of blackness as entailing a negotiation with the necessary, creative tensions between art and distinct modalities of black visual and expressive culture. In other words, this course redraws the lines of influence, appreciation, allusion, causality, reference, and exposition by recognizing the importance of ambiguity over prescription.</p> <p>The approach of the class is most immediately informed by the work of Darby English (How to See a Work of Art in Total Darkness), Kobena Mercer (Annotating Art's Histories series), and Kimberly Benston (Performing Blackness: Enactments of African American Modernism). This body of literature represents a focus on black visual and expressive culture as a critical art informed by the history of African Americans but not utterly reducible to that history. Therefore, the course frames the respective topic or theme as a multi-discursive aesthetic and cultural practice. In this way, the method will be that of visual culture and black studies.</p>

We will build a consciousness of the Africana experience in independent filmmaking with particular emphasis on independent filmmakers from the United States. This aim will be achieved by examining the body of work produced by independent filmmakers from the early 1900s up until present day.</p> <p>In addition to the study of the film diegesis, this course will explore aesthetic and theoretical issues relative to the development of an independent Black cinema. Black cinema describes a specific body of films produced in the African Diaspora which shares a common problematic (Yearwood, 2000, p5). Further this course will examine the social dynamics at work during the various stages of Black independent cinema, which has served as a counter to Hollywood's limited portrayal of the Africana experience.</p> <p>This class is guided by interactive discussion and analysis of films screened.</p>

		COURSE DESC:		REQUISITE: Will take a look at different approaches to civil and human rights in selected developed and developing countries. There will also be a review of theory of justice and political consequences in chosen countries. A substantial part of the fourteen week semester will be used to examine the injustices of the past apartheid system of South African and comparing it to the struggle to end Jim Crow segregation in the United States. In addition, the Armenian genocide, the Rwandan genocide, and the Republic of the Congo genocide will be briefly reviewed and comparisons made. The course will also take a look at the attempts of ethnic cleansing in a number of different parts of the world. Our first review will start in our backyard with a look at how the Native Americans in the U.S. were subjected to a sophisticated genocide perpetrated by the U.S. government and the people of America. Racial injustices suffered by people of color in the United States are interconnected with injustices perpetrated on other people of color throughout the world.

		COURSE DESC:		REQUISITE: 6 Hours Tier II Social Sciences or Education Some scholars, educators and parents suggest the educational system in the United States, is designed to prepare individuals for access and inclusion into this society and also to intelligently participate in a democratic republic. Others have suggested the educational system is means of social control, both a passive and active way of maintaining the structural hegemony of inequality already present. Whatever the case may be, the debate of how to best empower and educate Africana people has been active since before 1865. This seminar will provide an overview of this discussion as well as some of the major factors contributing to the topic. Seminar in African American Education explores, critiques and examines the journey of African descendants in the United States in their quest for education. This course will examine two major historical features of this experience, how Africana people have sought to educate themselves and how the larger culture has attempted to educate them. Within this examination this course will attempt to explore both positions advanced by scholars, educators and parents as well as other developments in the field of education relating to Africana people.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		What does it mean to be a black child in America at the beginning of the 21st century? We will consider how the meaning of childhood changes over time, place, and social context for African Americans. By moving children to the center of focus, we will see that there is no singular definition of African American childhood, but instead many different ways in which African Americans experience childhood and adolescence. Typically African American children are only studied as victims or perpetrators of social problems, but in this course we will consider African American children in many additional contexts. We will begin by examining the meaning(s) of childhood and adolescence and how they have changed over time. Throughout the course we will see how African American children's lives are shaped by broader systems of inequality. We will also examine how African American children are active in the construction of their own peer cultures and popular culture, as well as why the relationship between Black youth and popular culture is routinely viewed as problematic, and how African American children are discussed within the popular press. Finally, we will examine how public policies shaping African Americans children and adolescents' lives are formulated and how they sometimes serve to replicate various inequalities.								
A&S	AAS	AAS	4500	The History of Black Women in Popular Culture	Lecture	3	0		N	U30		0

		COURSE DESC:		Focusing on the history of ideas and approaches that have shaped and defined our understanding of Black families. This course offers an interdisciplinary approach to the study of African American social and family life. You will be introduced to historical and socio-cultural circumstances that affect the Black family and the diverse nature of Black culture. The purpose of this course is to focus on the Black family as a social institution. You will understand and appreciate the strengths of the Black family by being expose to a variety of challenges they face. This course will also attempt to heighten awareness and sensitivity to the contemporary problems affecting the Black family and thus help discover and evaluate social policies and programs geared towards Black families. Specifically, the course will provide a sociological perspective for understanding and analyzing topics and challenges that impact the Black family. The discussion is also designed to encourage and stimulate critical thinking beyond "common sense" interpretations of the Black family.

		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:							
		COURSE DESC:		PR What does it mean to be a black child in America at the beginning of the 21st century? We will consider how the meaning of childhood changes over time, place, and social context for African Americans. By moving children to the center of focus, we will see that there is no singular definition of African American childhood, but instead many different ways in which African Americans experience childhood and adolescence. Typically African American children are only studied as victims or perpetrators of social problems, but in this course we will consider African American children in many additional contexts. We will begin by examining the meaning(s) of childhood and adolescence and how they have changed over time. Throughout the course we will see how African American children's lives are shaped by broader systems of inequality. We will also examine how African American children are active in the construction of their own peer cultures and popular culture, as well as why the relationship between Black youth and popular culture is routinely viewed as problematic, and how African American children are discussed within the popular press. Finally, we will examine how public policies shaping African Americans children and adolescents' lives are formulated and how they sometimes serve to replicate various inequalities.

Students will also examine Supreme Court cases that helped to foster further desegregation of America's public schools. Finally, students will learn how other Americans have benefited from the legal paths forged by African Americans in their struggle to obtain the Constitutional rights to which all Americans are entitled.

		COURSE DESC:		For nonmajors. The brain creates behavior in part via multiple chemical messenger (neurotransmitter) systems that serve specific functions such as mood alteration and arousal. Recreational and psychoactive medical drugs work by mimicking these natural messenger systems, and thus help elucidate the behavioral functions of different neurotransmitter classes. Reviews nervous system structure and chemical signaling pathways and then survey the major classes of psychoactive drugs, including alcohol, opium, cocaine, amphetamines, nicotine, caffeine, marijuana, the hallucinogens, and the antidepressants. Particular attention is paid to the biological bases of their effects.

		COURSE DESC:		Humans have always been interested in animal behavior. During our early history, much of that interest was based on practical need. Today studies of animal behavior help us understand our own behavior as well as our interactions with all other animals. Explore both how and why some animals migrate, live in groups, fight, have mating preferences, provide parental care, and communicate. Lectures will address some controversial issues in animal behavior, such as "Do animals have emotions?" Provides you with a new way of thinking about, observing, and interacting with the animals.

		COURSE DESC:		An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson's disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson's disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.

		COURSE DESC:		The purpose is to train Master's and Ph.D. level graduate students in the Department of Biological Sciences in molecular and cellular aspects of human tissue structure and function. This course is also intended to train graduate students to teach in the microanatomy laboratories offered in a standard medical curriculum. Complements graduate courses in clinical gross anatomy and provides credit for students pursuing a Master's or Ph.D. in Biological Sciences. A formal and structured approach to training students in microanatomy of human tissues and will be taught in conjunction with anatomy-based courses in the Department of Biological Sciences, including Clinical Gross Anatomy I (Back and Extremities), Clinical Gross Anatomy 2 (Thorax, Abdomen, Pelvis, and Perineum), and Clinical Gross Anatomy 3 (Head and Neck).								
				Lectures and laboratory exercises will involve examination of prepared slides and discussion of molecular and cellular composition of the basic tissue types and organs of the human body, as well as an introduction to pathology. Each laboratory will address a specific area and associated clinical questions and correlates that will require discussion among students.								
				In addition to weekly quizzes and practical examinations covering the course material on cell and tissue architecture and introductory pathology, students will be required to formally develop and present detailed audio-visual demonstrations of selected histopathological specimens to graduate students and graduate faculty within Biological Sciences.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Fr or Soph								
		COURSE DESC:		Provides a broad overview of the archaeology of the Mediterranean world from the time of the Old Kingdom in Egypt (3rd millennium BC) to the early Byzantine period (6th century AD). Organized around iconic structures from the main cultures and time periods covered. Each site will be used individually as a vehicle for studying broader aspects of the society that produced it. Explores why it is particularly significant and representative of that society. Questions include: Why were lists of "wonders" made in the first place? What was the political significance of creating a "wonder"? What effect did the original Seven Wonders have on the monuments that came later? What effect did the wonders have on the modern imagination and the archaeologists devoted to rediscovering them?

		COURSE DESC:		This course provides an introduction to Greek society and culture through investigation of its material culture and the archaeological contexts in which they are found. It explores the history of Greek archaeology and different approaches to investigating particular kinds of material evidence. The course examines the growth and collapse of complex civilization in Bronze Age Greece, the reemergence and growth of city-states from the Early Iron Age, and the development and spread of Hellenic cultural institutions to the Near East and Italy.

		COURSE DESC:		Explores the material remains from the Roman world and of the information they provide about Roman society. Among other things, examines sculpture, painting, coinage, and architecture to learn how Romans at various levels of society used objects, images and built structures to make statements about themselves. Examines how these messages differed from one part of the empire to another. Teaches how to look at and 'read' objects and images. Special emphasis placed on methodologies used to interpret them.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course surveys the major developments in the material culture of the region known to scholars as the ancient Near East, including the eastern Mediterranean, Mesopotamia, Anatolia, and Persia, from the emergence of complex societies through the arrival of Alexander the Great (ca. 800 BCE - 300 BCE). It also introduces students to the main archaeological methods used in discovery and documentation of the material cultures of this period and region.

		COURSE DESC:		The course introduces students to the main archaeological sites, methods and types of material specific to each period and region of Egypt. We investigate the components of Egyptian civilization in each period from the first settlements in the 10th millennium to the period of foreign domination in the 1st millennium, in terms of conservation of social and religious hierarchy and innovation in adapting and transforming new ideas.								
A&S	CARS	CARS	2050	Archaeology and the Bible	Lecture	3	0	2HL	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course focuses on the intersection of material culture and the writings of the Judeo-Christian Bible within the broader framework of interpreting texts and the material record. The course introduces students to archaeological methods as well as to the critical study of texts. This approach involves the examination of coherence and divergence between historical documents and material culture, and it also involves the examination of advantages and limitations of both types of data. The regional and chronological focus is the eastern Mediterranean of the first half of the first millennium BCE, although reference will be made to the second millennium BCE and to the turn of the Christian Era. In addition to major political developments, course also includes what the material and textual evidence report about the lifeways of Iron Age people in the Eastern Mediterranean. Finally, the course reflects comparatively on cases and issues in Historical Archaeology outside the main regional and chronological focus of the course.								
A&S	CARS	CARS	2100	Classical Athens	Lecture	3	0	2HL	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Focuses on the people of the Greek city of Athens during an extraordinarily creative period of history--the century and a half from 480 B.C to 323 B.C--when the Athenians undertook the world's first democratic experiment. Examines textual sources (literature, philosophy, history, speeches and public documents) and archaeological sources (architecture, sculpture, painting) for the light which they shed on the ancient Athenians' political, intellectual, and artistic problems, concerns, and achievements. Explores how the Athenians dealt with those fundamental questions about life that face all thinking humans in a democracy.

		COURSE DESC:		In this course we look at life and thought in ancient Rome from Augustus through Marcus Aurelius (30 BC - AD 180) based on material, documentary, and literary sources. We investigate humanistic questions across cultural boundaries. The primary focus is on how the inhabitants of Rome lived and what they thought about fundamental issues such as: How did elites and the common people function in a hierarchical society? What was the role of religion? of education? of art? How did Romans deal with death? What ultimately made life worth living for an ancient Roman? We will study the political lives of Roman elites, the rituals of daily life, and the art and architecture that made up the environment in which these people lived. These issues are then compared with our own attitudes in modern America in an attempt to understand differences and commonalities shared by human beings in different cultures.								
A&S	CARS	CARS	2120	Ancient Jerusalem: From Solomon to Suleiman	Lecture	3	0	2CP	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Attempts to approach the city of Jerusalem and the complex interaction of political, social, and above all religious realities that continue to define the city. The course focuses on Jerusalem as a mythic as well as a historical entity; attempts to disentangle some of the threads that make Jerusalem the rich tapestry of meaning it has become. It does this by a careful reading of textual material from Jewish, Christian, and Islamic sources, as well as of archaeological and art-historical data. The course focuses especially on the Temple Mount as a site of religious practice, transformation, myth, and conflict because of the long shadow it casts over the traditional landscape of Jerusalem.

		COURSE DESC:		REQUISITE:								
				Focuses first on Alexander himself, a man who became a myth even before his death. Next examines the Hellenistic world, the world that Alexander created out of his conquests. Alexander's conquests helped spread Greek civilization over the whole of the eastern Mediterranean. Many of the issues that people living in this world confronted are still relevant today: the nature of celebrity, for Alexander was arguably the first celebrity; the challenges of emigration, of living in a society that was culturally and ethnically diverse, of assimilating a foreign culture, and living under an autocracy.								
A&S	CARS	CARS	2140	Human Aspirations Among the Greeks and Romans	Lecture	3	0	2HL; ACSW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				Is it enough to merely live? This course introduces students to how ancient authors and thinkers explored deep questions about life and the human condition, exploring their views of what it means not only to live, but to live well. Studying famous classical works of drama, literature, history, philosophy, and religion, the course explores what it means to be human, and how great thinkers have described the human experience and the goals to which humans aspire. These writers believed that the world does not get better through random chance, but by deliberate action that grows out of carefully reasoned beliefs about how life should be. This course explores how these aspirations arose in the ancient Greek and Roman worlds, how they developed over time, and how they still shape much of modern thought about humanity and the human condition. The course has no prerequisites.

		COURSE DESC:		REQUISITE:								
				This course examines the rise and fall of the Athenian Democracy and the Roman Republic, placing particular emphasis on understanding the social, political, and cultural attitudes and developments that contributed to the development and collapse of these types of government. Because both types of government conveyed substantial political power and responsibility to the citizenry as a whole, the course takes a broad interdisciplinary approach to understand the views and experiences of the people who lived under these governments. Focusing on ancient sources, the course seeks to understand how ancient Greeks and Romans described and conceived of their types of government, and how they understood the erosion and collapse of those governments. The course uses a wide range of evidence, including architecture, art, drama, history, literature, and philosophy.

Food security, human fertility, sense of community, relation to the gods and proper social order are all themes that reappear in the myths, literature and art of these major civilizations.

				This course surveys the visual and architectural material culture of the ancient Middle East, defined loosely as the geographic region stretching from Anatolia to Iran--including Mesopotamia and the Eastern Mediterranean. It spans the time period ranging from the emergence of civilization in the fourth millennium BCE to the arrival of Alexander the Great in the 4th century BCE. After an orientation to history, geography, and archaeological practice, we examine regional and chronological trends in content and style, definitions of and relationships between "art" and architecture, scholarly approaches to text-image relationships, and the role of archaeology and the understanding of provenance and provenience in the study of visual material culture in these periods and places. We conclude with a look at the role of this material in the creation and development of modern national narratives and identities.

				This course studies original Greek and Roman stories in English translation and compares them with modern films on the same subject, asking how aspects of the human experience have remained the same, and how they have changed. The role of creativity in the interpretation and reinterpretation of these stories is also an important focus, exploring how retellings of ancient stories creates new meanings for modern audiences. Students are introduced to several schools of literary theory, including Aristotelian, feminist and queer theory, historicist, and postcolonial.

				What does it mean to believe in ghosts? How do people who cast hexes, perform a Black Mass, or hold séances understand their actions and experiences? Designed to address these kinds of questions, this course is a survey, from the perspective of religious studies, of beliefs about ghosts, demons, and supernatural phenomena throughout history and around the world. In their readings, films, and lectures, students will look at ghost traditions from North India, Hawaii, and Europe; exorcism in the U.S., Sri Lanka, and Tibet; demonology in Buddhism, Hinduism, and Zoroastrianism; and witchcraft in England, Italy, and Niger. They will also examine the scientific claims of parapsychology, the practice of necromancy, and accounts of people who report being attacked by evil spirits in their sleep.

				This course explores the dramatic change from pagan to Christian religion and culture in the late Roman Empire during the 4th through 6th centuries. From the 1st to 3rd centuries, Christianity was changing from a Jewish sect as it spread throughout the cities of the Roman Empire. Paganism had a huge impact on Christianity, and in turn Christianity reshaped the society and government of the late Roman Empire. Sources include writings from ancient historians, Church fathers, Christian and pagan apologists, philosophy, art and archaeology.

				Introduction to serious, informed discussion of basic intellectual issues in religious belief. One of two Difficult Dialogues courses offered by the Department of Classics and Religious Studies to encourage thoughtful and productive discussion of historically contentious topics. Discussions concerning religious beliefs are notoriously difficult. They have often devolved into disputes, which have divided families, sundered friendships, and even fueled wars. Experience in navigating difficult dialogues concerning, we believe, transfer into the more generalized skill of productive discussion concerning virtually any difficult topic. So, this class is concerned specifically with learning to think through difficult religious topics and more generally with learning to think through any difficult and contentious topic.

Students develop thoughtfulness and engagement with beliefs that are rooted in different religious or secular humanist traditions outside of their individual experiences. During the course, students draw on perspectives from intellectual and religious history, cultural analysis of religions, and contemporary religious dialogue. Students search for understanding of others whose beliefs are rooted in different religious or secular humanist traditions. Students are asked to engage in disciplined, self-critical thinking. Students draw on methods and content from intellectual and religious history, the philosophy of religions, and contemporary religious dialogue.

For most of us the phrase "science and religion" calls to mind abstract debates over the nature of the universe, the existence of God, or the nature of humanity. And while these topics have fascinated intellectual elites for centuries, they can seem far removed from the experiences of most people in the present day. This is a Difficult Dialogues course which examines the relationship between science and religion, and the intimate and communal lives of people globally and throughout history. We consider how these knowledge systems have been defined in the context of global colonialism and empire and ask how they continue to shape expectations for political engagement, intimate relationships, and identity. Topics include secularism, sexual ethics, immigration, environmental protection, and healthcare.

Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shari'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also place 'insider' perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that 'humanity consider from what it is created'.

		COURSE DESC:		Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors--the 'ulama', lay activists, social movements--responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context--Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by 'political Islam'--but also the politics of Islam, and what the implications are for a wider globalized modernity.

		COURSE DESC:		How can a book that seeks to justify extreme violence inspire a man whose name is synonymous with peaceful protest? To answer this question, we will examine the life and thought of M. K. Gandhi through the lens of religion, focusing on the text that served as one of his chief inspirations, the Bhagavad Gita. The Gita is an ancient philosophical poem in which the god Krishna convinces the reluctant warrior Arjuna to initiate a war that will annihilate most of the human race. But to Gandhi, this text was the blueprint for the most successful nonviolent resistance movement in history, the campaign to free India from British control. By reading the Gita and works by and about Gandhi, students will examine the confluence of religion and politics that gave rise to Gandhi and to modern India.

				Surveys the main theoretical orientations that have guided the study of religions within the Humanities and Social Sciences as these fields have developed since the 18th century within the academic institutions of Europe and the United States. Begins with early Enlightenment thinkers who were responding to the wars of religion and the rise of rationalism and empiricism. Continues with 19th and early 20th century scholars who confronted the impact of industrialization, nation-state formation, bureaucratization, technologization, and most of all, the colonization of entire societies and cultures beyond Europe. To listen in on discussions about religion among U.S. and European thinkers during these three centuries is to become privy to the struggles of North Atlantic societies with 'the disenchantment of the world,' that is, the loss of faith in a transcendent purpose connected to a larger divine will. After surveying the classical theories, examines the impact of decolonization on the inherited Enlightenment assumptions concerning religion. Discussion today has raised substantial doubts that the category of 'religion' is of any real empirical or analytical use. Instead, many theorists argue that the inherited conceptions of 'religion' are nothing more than a mask that obscures and justifies Western domination. Other theorists, however, have argued the 'religion' concept is still useful if corrected for its biases. Explores this debate and tries to arrive at one's own conclusions about whether the religion concept is still helpful.

This resurgence of religion as a political and social force responds to a widespread and profound concern at the failure of modernity and secular nationalism to bring prosperity and provide meaning for life. Looks at the New Age Movements and Liberation Theology in the 1960s, movements generally called fundamentalist that arose in the 1970s, and militant movements that justify the use of violence that have emerged in the last two decades. Research paper on a major thinker or contemporary movement in one of the great world religious traditions--Hinduism, Buddhism, Judaism, Christianity, and Islam required.

We ask questions about the ways these categories function to integrate or disintegrate individual personalities, authorize and undermine social hierarchies, and shape the way we think and act in ways that are often hidden. Above all, we seek to comprehend the ways in which myth, ritual and symbol do not belong solely to ancient or non-industrial cultures but are present and active in almost every aspect of our world today.

We will study religious ideology and its role in shaping social life, the many ways in which women exercise authority in religious traditions, the ways in which women have been innovative in those traditions, and the ways in which women have reinterpreted and re-appropriated patriarchal texts and structures. Students will apply the insights gained in this examination to a project of their own choosing, which should result in a research paper. Students will also have opportunities to increase their understanding of their own religious choices and of religious phenomena more generally.

				This course studies the nature and practice of religion in the ancient Greek and Roman world. It explores how Greeks and Romans conceptualized the divine and its interaction with human spheres of activity. Particular attention is given to the practice of ancient religion, the rituals, priesthoods, festivals, and ceremonies through which humans engaged in religion, and the underlying concepts that gave shape and meaning to these practices. Attention is also given to related topics such as ancient philosophical critiques of religious practice, to the intersection of religion and magic, and to the ways in which Greeks and Romans reacted to new or foreign religious ideas, practices, and beliefs and to parallels with contemporary responses to encounters with other religions.

				Examines technological developments in Graeco-Roman world within a chronological framework so that the advances in technology can be related directly to broader changes in the Mediterranean world from the 7th century BC to the 4th century AD. Examines a variety of different types of technology including coinage, building construction, water management, agricultural/food production, terracotta, glass, metallurgy, shipbuilding, and warfare. Students look at ways in which the societal needs framed technological developmental at different times and places, as well as ways that new technologies affected the societies in which they occurred. A major goal is to examine the role of technology in the Mediterranean basin as the organization of society moved from the Greek city-state to Hellenistic kingdoms to the Roman Empire.

		COURSE DESC:		REQUISITE: WGS 1000 or Soph or Jr or Sr								
				This course will explore the main sources of information about women in the related Mediterranean cultures of Greece, Rome and Italy, from c. 1000 BC to the 4th c. AD. Although these cultures are quite distinct in many ways, there are all patriarchal societies with an agricultural base for the economy. Women's roles were tied to reproduction and care of the household, and women were seen as less publicly productive, and therefore inferior to men. The ways in which women were categorized as 'not men' cannot be understood without analyzing what it meant to be a man in these societies, in particular a free citizen adult man. The evidence we will consider includes economic and legal texts, literature, religious texts and funerary inscriptions, as well as archaeological evidence. In particular, we will look at the representations of women in epic, love poetry, drama, law cases, art and archaeology. Most texts and art works were created by men, and present the male view, both positive and negative, of women's roles in society, so the course will also focus upon the culturally defined gender biases in the sources, and on feminist methodologies devised to clarify and interpret these biases.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course looks carefully and critically at how concepts of sex, gender, and sexuality are used in the Bible and later biblical interpretation as a fundamental means of shaping and reshaping the interpreter's world. Students encounter and examine such topics as gender construction, sexual orientation, taboos, sex work, idolatry, family relations, abortion, cross-cultural marriage, slavery and trafficking, erotic literature, and sexual violence, among others. The course also engages modern writing about the construction of sex and sexuality in our look at biblical texts.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		In the eyes of the Greeks, the city and the sanctuary were the two institutions that best defined their culture. Introduces the central role that citizenship, civic institutions, religion and sanctuaries played in the city-states of Ancient Greece by tracing the architectural and social history of Greek cities and sanctuaries over a thousand year period. Focuses on a wide range of cities and sanctuaries, paying special attention to ancient Athens as an innovator in both civic institutions and temple development.								
A&S	CARS	CARS	3510	Aegean Bronze Age Archaeology	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		The Aegean civilizations of Mycenaean Greece and Minoan Crete were discovered only since 1870, and were the first to be analyzed and interpreted solely from archaeological remains. Explores the material evidence to trace the development of these complex Bronze Age cultures in the Aegean, while studying the early excavators starting with Schliemann and Evans. Reviews different types of material remains, and the different, often conflicting strategies used to collect and interpret them. Focuses on the development of Aegean civilizations from the appearance of the first agricultural communities in the Neolithic period (6000 B.C.) to the widespread destruction and subsequent economic decline at the end of the Bronze Age (1100 B.C.).

		COURSE DESC:		This course is intended for all CARS majors as a capstone covering the topics of magic, witchcraft, and sorcery in classical civilizations as well as in the world's religious traditions, past and present. Engaging with primary and secondary sources, archaeological data, historical narratives, and comparative studies, students develop an inclusive humanistic view of the range of subjects taught in the department by looking at them all through the prism of magic. Magical beliefs, objects, and practices covered in the course may include the Salem Witch Trials, Greek curse tablets, Sanskrit mantras, Egyptian amulets, Islamic alchemy, Jewish Kabbalah, and sex magic. This course also emphasizes the development of oral presentation skills.

A&S	CARS	CARS	5030	Political Islam	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:	PR						
		COURSE DESC:		Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors--the `ulama', lay activists, social movements--responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context--Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by 'political Islam'--but also the politics of Islam, and what the implications are for a wider globalized modernity.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Introduces the 'mystical' dimension of Islam, known as Sufism. Begins by probing key terms such as 'Sufism,' 'asceticism,' and 'mysticism.' Then traces the emergence of Sufism during the formative period of the Islamic political and religious systems. Bulk of course explores contemporary manifestations of Sufism in diverse locations ranging from South/Southeast Asia and Central Asia to Africa, the Middle East, Europe, and the United States.

		COURSE DESC:		Introduces Buddhist doctrines, practices and institutions. Focuses on the spread and development of Buddhism across Asia and beyond, with an eye toward examining how foundational Buddhist ideas and practices have taken shape in specific places and in particular historical contexts. Selectively surveys the foundational teachings, history and diversity of Buddhism, from the lifetime of the Buddha in fifth century BCE India to contemporary Buddhist communities in Southeast Asia, East Asia, and North America. Along the way, considers some important questions raised and addressed in the critical study of religion.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		COURSE DESC:		Since the end of World War II new movements have arisen in every major religious tradition. This resurgence of religion as a political and social force responds to a widespread and profound concern at the failure of modernity and secular nationalism to bring prosperity and provide meaning for life. Looks at the New Age Movements and Liberation Theology in the 1960s, movements generally called fundamentalist that arose in the 1970s, and militant movements that justify the use of violence that have emerged in the last two decades. Research paper on a major thinker or contemporary movement in one of the great world religious traditions--Hinduism, Buddhism, Judaism, Christianity, and Islam required.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		COURSE DESC:		This course aims to explore the overlapping categories of myth, ritual and symbol and understand their role in creating systems of meaning, both local and cross-cultural. We ask questions about the ways these categories function to integrate or disintegrate individual personalities, authorize and undermine social hierarchies, and shape the way we think and act in ways that are often hidden. Above all, we seek to comprehend the ways in which myth, ritual and symbol do not belong solely to ancient or non-industrial cultures but are present and active in almost every aspect of our world today.

		COURSE DESC:		This course focuses on the chemical principles involved in small molecule drug discovery, design and development. The organic chemistry of drug design and drug action is studied in detail. Starting from strategies for finding a lead compound through optimizing target interactions and drug efficacy, to ultimately bringing the drug to market, the impact of each step on the drug design process is discussed. Drug design tools and approaches such as combinatorial chemistry, molecular modeling, structure-activity-relationships and other strategies are analyzed in detail along with selected topics in the medicinal chemistry of both classic therapeutic agents and newer therapeutic breakthroughs.

A&S	CHEM	CHEM	5840	Forensic Chemistry I: Arson, Explosives and DNA	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Survey topics, which are not included in CHEM 4870 or law enforcement technology (LET) courses, relevant to the modern crime lab. These topics will be focused on arson and explosives analysis and DNA analysis. The DNA section will survey the techniques and instrumentation used in the identification, extraction, and analysis of DNA obtained from forensic evidence with an emphasis on electrophoretic methods of analysis. Topics include the identification and extraction of blood stains, DNA analysis by restriction fragment length polymorphisms, PCR amplified length and sequence polymorphisms, STR systems, Amelogenin markers, Y-chromosome markers and mitochondrial DNA sequencing. Electrophoretic techniques and statistical interpretation of data will also be covered. Other topics may also be included.

A&S	CLWR	CLAR	3640	Craft and Technology in the Roman World	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Examines the relationship between the development of technology and political/economic factors that affected changing attitudes and desires of the Roman people in different parts of the Roman Empire. Explores the tools and processes used for making objects, building structures, and supplying water and food to urban masses as well as the organization of labor that makes such accomplishments possible. Various types of modern analysis are discussed to show how advances in technology affect our understanding of the ancient world. Counterpoints made with Classical Greek and Hellenistic cultures since many technologies were borrowed by the Romans. Modern parallels also discussed.								
A&S	CLWR	CLAR	3660	Archaeology and Art: Contexts and Controversies	Lecture	3	0	2HL	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		The course focuses on the archaeological context of selected objects usually described as examples of Greek art. It examines where they were found, what significance they had in the culture that produced them, how they were excavated, how they have been conserved and what ethical issues surround the modern conservation and acquisition of them. Each object has its own story yet also fits into a larger context. Above all, this is a course that emphasizes the importance of establishing clear methodologies and its purpose is to provide students with tools to explore the contexts of objects, ultimately on their own. What questions do they need to ask? To what types of sources can they reliably turn for information? How might they interpret the ethical arguments raised by the excavation and acquisition of some objects? The core material for the course will comprise twenty objects. Chronology will provide the organizational principle for the study of the objects. The focus of each class will be a single object; readings will discuss some aspects of its context and part of the in-class presentation will provide comparative material/objects.

A&S	CLWR	CLWR	5330	Islam	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:							
		COURSE DESC:		PR Introduces Islam as a religious and cultural system. Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shari'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also place 'insider' perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that 'humanity consider from what it is created'.

				ELIGIBLE GRADES: GEC1: A-F REQUISITE: 8 Hours in (AAS or ANTH or CLAS or HIST) and Sr only COURSE DESC: What was it like to be a slave in the Roman world? No first hand account describing slavery which was written by a slave has survived. To understand what a slave's life was like we are forced to reconstruct slavery from the materials that do survive. These include: descriptions of slavery and slaves by the slave owners; literature which features characters who are slaves; archaeological remains which illustrate the conditions of slavery. An important concern will be the special demands made in the reading and interpretation of texts that are over two-thousand years old. Finally, the experience of African-American slaves in the 18th and 19th centuries, a period more richly documented than the Roman, helps us to imagine much more about the Roman institution than what we could infer from the ancient sources alone.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course is an in-depth exploration of novel policy issues confronting economists today. It considers cutting-edge issues in economics that are relevant to public policy. It explores divergent thought on the issue and considers strengths and weaknesses of differing policy objectives and related proposals. There is a special emphasis on the role innovation can play in addressing these issues. While topics and analysis stem from economics, the course also provides a setting for students to engage in critical thinking by identifying innovative solutions to cutting-edge problems.								
A&S	ECON	ECON	2200	Introduction to Economic Data Analysis Using Python	Lecture	3	0	2AS	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course introduces programming and statistics to students from different majors and teaches techniques that apply across many disciplines. No prior programming or statistics experience is necessary. The course introduces students to Python programming language to develop the ability to apply economic analysis and prediction techniques to real-world scenarios through working with real-world data sets. Topics covered include data types, tables, sequences, visualization, causality and experiments, testing hypotheses, estimation, prediction, and inference for regression.								
A&S	ECON	ECON	2300	Society, Technology and Economic Growth	Lecture	3	0	2SS; ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		In this course students examine the interactions between society and technology and the implications of the principles of the new economic growth theory. New economic growth theory is explored as a component of the history of economic thought. Special attention is paid to how the introduction and spread of new technologies occur in an endogenous manner. Synergies between technology and society have the potential to produce positive economic and social change. Students examine the hypothesis of possible synergies and the evidence to date for or against.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course explores the connection between the modern energy sectors and environmental policies focusing on sustainable economic outcomes. Students engage with the concept of sustainability from an economic perspective. Students learn the current trends affecting energy sectors and how these trends impact sustainable environmental targets. Key environmental policies related to energy sectors are understood with respect to their economic benefits and costs. The critical, two-way interactions between sustainable energy sector outcomes and environmental policies are explored.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				This is an introductory course on the global and local food economy. The class includes an overview of global food production and agriculture with particular focus on the developing regions of the world. Topics range from an examination of the inter-relatedness of economic growth, population growth, and environmental degradation to analyses of food security, agricultural policies, and innovations relevant to the food economy. Introductory economic theory provides the backdrop used to analyze these complex, multidisciplinary issues. The class includes a field component with visits to local farms and food distribution networks.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				The course explores health disparities from an economic point of view. The term health disparities in health economics refers to differences in health across two groups of people. The course applies economic theory to analyzing public policy issues regarding differences in health outcomes. We explore why health disparities occur and how economic policy could be used (or could not be used) to correct for these disparities. Topics include social and economic determinants of health and discrimination in health care.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:				Jr or Sr				
				This course is an introduction into behavioral economic theory and methods as they pertain to concepts of altruism, generosity, and giving. The course will contrast economic theories that predict selfish behavior to those that attempt to explain kindness and generosity. Recent research in behavioral economics shows a plethora of surprising and often, conflicting evidence on the existence of altruism. Students will become familiar with the altruism literature and related economic experiments and games. The role of humanitarianism in society will be explored as students perform service learning projects with local non-profit organizations. Students will learn project evaluation techniques to give insight into effective philanthropy.

				Through critical reading, students consider how texts that ask "What if?" encourage us to rethink approaches to science, technology, and/or the structures of society, which may include broader questions regarding the status of the human and nonhuman. Students explore the topics, concerns, and forms of fiction that fall under the broad umbrella of speculative, such as science-fiction, fantasy, horror, alternate history, and others. Students apply principles of literary analysis to a variety of texts that may include novels, short stories, poetry, and other speculative genres/media.

				ENG 1510 or 1610 or 151A or 152 or 153 or 153A or 153B Addresses works of literature from a rhetorical perspective, viewing different literary texts as situated within a time and culture. Students analyze different texts as examples of social action. Sections might focus on specific literary genres such as the novel, short fiction, drama, poetry, the memoir, etc., or they might use a mixture of genres. The course engages students in formal and informal writing, writing to learn, critical reading, and critical thinking. This course can serve as one of the core course requirements for the Writing Certificate.

		COURSE DESC:		Our readings, film screenings, discussions (oral and online), research and composing will be focused on relations between people and the environment, primarily but not exclusively, in our regional environment. We will explore mountaintop removal coal mining in Appalachia, the natural history of the region's forests, industrial food systems and "locavore" (agri)culture. Our approach will be "ecological" in the sense of attempting to understand our complex interrelationships with the natural and artificial systems we rely on and of which we are a part. We will take a similar approach to environmental rhetoric and use rhetorical analysis as the main means of mapping connections among informative, persuasive, and creative discourse on these topics.

		COURSE DESC:		Rhetoric and law were interdependent in Ancient Greece. This course introduces students to rhetorical concepts and appeals that remain critical to the practice of American law as they arise out of western rhetorical history. Legal concepts from other cultures will provide further context. The course will also introduce rhetorical analytical methods for understanding the textual features of law and policy through concepts such as stasis theory, audience, appeals, and common ground. Assignments might include rhetorical analyses of legal documents, presentation of legal cases, analyzing an important legal decision, analyzing the impact of particular laws on issues of race, class, gender, orientation or disability. Students will study written rhetorical and textual features of legal genres.

		COURSE DESC:		Explores the discourses, theories and practices of ecologically-oriented movements, genres, and intellectual areas that are influencing English Studies. Examines a range of ecological positions, including mainstream environmentalism, deep ecology, ecofeminism, and social ecology. Our method will be to discuss and practice criticism of literary and cultural texts, including rhetorical studies of ecological texts, rhetoric, and popular culture expression. Course study will employ rhetorical theories as a productive tool for identifying recurring motifs, conflicts, concepts, and material realities at stake in artistic and rhetorical expressions about the ecology and human relations within it, and how writers and film makers make strategic appeals to specific audiences. Topics may include issues of representing nature, the separation of nature and culture, relationships between place and identity, issues of development, technology, indigenous cultures, and environmental justice. Our readings will include book excerpts, environmental writing, and rhetoric, fiction, poetry, visual, and online texts.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Tier I English						
		COURSE DESC:		The course focuses on the rich literary tradition of Ireland. For such a small country, Ireland boasts some of the biggest names in literary history, including four Nobel Prize winners: George Bernard Shaw, W.B. Yeats, Samuel Beckett and Seamus Heaney. This class focuses on introducing students to the rich literary tradition of Ireland beginning with an examination of Irish myths and legends as well as examining texts from the Irish Literary Renaissance through the twenty-first century. Irish literature is haunted by its political, linguistic and cultural history as well as the geography of Ireland itself, and therefore, this course explores the shaping influences of politics, language, culture and geography alongside the exploration of examples of Irish literature. Readings include early Irish legends and myths as well as texts from the nineteenth through the twenty-first century. Some of the authors explored in this course include W.B. Yeats, Lady Gregory, Edna O'Brien and Seamus Heaney.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Students read texts from the Anglo-American literary canon and examine adaptations of or "answers" to those texts created within the context of entirely different cultures, some of which were the objects of English/European cultural influence or dominance. Discussion and written assignments focus on the revision, transformation, or decentering of the primary literary work when "read" or revised by creative artists from outside of the Anglo-English cultural tradition. The culturally-diverse adaptations of canonical texts might take the form of literature, film, or any other creative artifact (such as a graphic novel); students analyze the connections between paired texts in order to identify the contradictions within their foundational assumptions and value systems and develop strategies to interpret and appreciate the creative achievements of distinct cultures.

		COURSE DESC:		This course examines the relationship between law and literature, beginning by focusing on their similarities in techniques and goals before moving to an exploration of how they approach questions of justice, morality, and fairness in very different ways. The course will explore how law and literature perform complementary yet often opposing functions in culture and society. Our readings in literary texts will explore the various ways that literature and law interact, as literature will be observed both to illuminate the workings of justice and its assumptions for readers as well as addressing flaws in legal systems, often turning readers against the laws that govern them and challenging citizen-readers to demand that their laws actually be just and equitable.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Sr only						
		COURSE DESC:		What is the literacy crisis? Our environment bombards us with increasing amounts of information: images, words, text. Those who speak of a literacy crisis assert that a large portion of the United States' population is overwhelmed by rising demands made on them and handicapped by inadequate literacy skills.								
				This problem can be demonstrated by the poor performance of students on international tests of reading and writing, and employers' charges their workers cause accidents and decrease production because of limitations in their reading and writing skills.								
				To assess the validity of these claims, this course reviews the historical development of literacy; the personal and professional applications of literacy; the power of literacy to effect change within the developing world; the educational strategies employed by U.S. schools to foster literacy skills; and the performance of students and workers on reading and writing tasks. The course also addresses the tensions that complicate efforts to establish a definitive standard for writing and reading skills. Some of these tensions arise from the evolving nature of reading and writing skills and from the demands made by various activities and professions on these same skills. Beyond the tensions produced by changes within literacy itself, other changes might arise from employers' efforts to acquire the most highly skilled workers at the lowest possible wage.								
				Students critique the arguments for and against the existence of this crisis and suggest responses based on their views. Students also study literacy practices within their areas of study and propose solutions to literacy problems that arise within their disciplines.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Sr only						
		COURSE DESC:		This course explores American detective fiction and film noir, a term that refers to certain "black" or darkly-lit American films of the 1940s and 1950s. It will examine classic examples of detective fiction and film noir as well as more contemporary examples of neo-noir. Although the emphasis will be on the aesthetic character of the texts under discussion, we will also investigate their historical and socio-cultural conditions of possibility as well as related issues of race and class, gender and sexuality, nation and ethnicity.

		COURSE DESC:		Detailed regional study of physical geography of Ohio and its cultural landscapes, settlement patterns, and economic development. The course examines the physical and human foundations of Ohio geography by focusing on the many natural features and circumstances that make up the physical base of the state of Ohio and the cultural and economic influences of human behavior and observe the impact of human populations on Ohio's landscape.								
A&S	GEOG	GEOG	2400	Environmental Geography	Lecture	3	0	2AS; ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Geographic survey of environmental processes and physical and socio-political aspects of environmental change (especially climate change) and the possible solutions to environmental problems based on contemporary sustainability science and technologies. Topics covered include resource availability and use, pollution of air, water, and biosphere, energy problems, interactions of humans with plant and animal communities, climate change, and sustainability planning. Students explore multiple scientific inquiry methods, consult multiple sources of information, and use both qualitative and quantitative data collection and analysis methodologies to develop a comprehensive perspective of human-environment relationships.								
A&S	GEOG	GEOG	2500	Introduction to City Planning	Lecture	3	0	2SS; ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Cities are complex networks of transportation, housing, economic activity, social systems, infrastructure systems, natural features, and more. This course describes these networks and provides a broad introduction to cities and to the field of urban planning. Students explore the factors that have shaped the city, those that support the modern metropolis, and ideas that are inspiring the cities of the future. Students also analyze urban systems critically and become more informed consumers of their urban environment. The course draws on examples of innovative city planning in Ohio and throughout the world with a particular emphasis on communities seeking to craft livable and sustainable places. Students complete five field-based assignments that require them to assess some aspect of the community: hometown analysis, housing assessment, comparative transportation modes, park observation, water system analysis, and historic district assessment. Students must collect data, make inferences from their observations, and back up their conclusions about the systems with logical arguments.

		COURSE DESC:		This course will explore the physical and human geographies of the African continent as well as geographic approaches to understanding the ways in which humans interact with their environment. The course will cover many themes in African geography and explore approaches to understanding patterns of social and environmental change. We will go over the broad macro picture of continental patterns in major thematic areas (e.g., the political map, economic patterns, major ecological zones) and also examine issues related to environmental variability and social inequality in the local and regional contexts. Topics covered include, climate change and heritage, pastoralism and climate change adaptation, health and development, wildlife conservation, livelihoods and sustainability, migration and development, international land acquisitions and roots of conflict. Students will also learn how to make effective research presentations.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	GEOG 1200 or GEOG 1310 or GEOG 2400 and (Jr or Sr)						
		COURSE DESC:		This course focuses on the political, economic, and social drivers of water access in a globalized world. These factors are examined using case studies in developed and developing contexts in relation to uncertainties of climate change. Course topics include water privatization, scarcity, pollution, urbanism, indigeneity, the state, habitat, and human displacement. Social and environmental justice dimensions of these themes are explored and analyzed.

		COURSE DESC:		An examination of severe and unusual weather, mesoscale meteorology, atmospheric stability, and radar meteorology.								
A&S	GEOG	GEOG	4080	Dynamic Meteorology I	Lecture	3	0		N	U30		75
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: GEOG 3010 and MATH 3400 and PHYS 2051								
		COURSE DESC:		PR Exploration of the physical forces responsible for atmospheric motions. Topics covered include the wind vector; fundamental and apparent forces; the geostrophic wind; the thermal, mechanical and thermodynamic energy equations; balanced flow; vertical motion and the thermal wind; vorticity; and the vorticity and divergence theorems.								
A&S	GEOG	GEOG	4090	Dynamic Meteorology II	Lecture	3	0		N	U30		75
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: GEOG 4080								
		COURSE DESC:		PR Continuation of Dynamic Meteorology I, with a focus on mid-latitude atmospheric dynamics. Examines the process of a developing mid-latitude cyclone from genesis to lysis, and the interplay between vertical motion, horizontal advection, temperature, and (to some extent) moisture. An investigation of atmospheric dynamics in the planetary boundary layer, where friction must be considered, concludes the course.								
A&S	GEOG	GEOG	4110	Advanced Physical Geography	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: GEOG 1100 and (Jr or Sr)								
		COURSE DESC:		A topics course of focused study on a specific physical geographic theme.								
A&S	GEOG	GEOG	4130	Arid Lands Physical Geography	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: (GEOG 1100 or GEOL 1010) and (Jr or Sr)								
		COURSE DESC:		Integrated approach to the physical geographic processes that combine to create the distinctive landscapes of arid regions with an emphasis on their landforms and landforming processes.								
A&S	GEOG	GEOG	4170	Landscape Ecology	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: (Jr or Sr) and (GEOG 1100 or P BIO 2090 or BIOS 2750 or BIOS 375)								
		COURSE DESC:		Landscape Ecology is an applied science that focuses on the development, consequences, and management of environmental pattern - the spatial distributions of species and the environment resources upon which they depend. This course explores the reciprocal relationship between pattern and process: how pattern is created on the landscape, its implications for populations, communities, and ecosystems, and how spatial pattern changes through time. The specific role of humans in creating and altering landscape pattern is examined.								
A&S	GEOG	GEOG	4280	Community Geography	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 4 hours in GEOG and (Jr or Sr)								
		COURSE DESC:		This course offers a unique combination of collaborative mapping, spatial understanding of community issues, and interaction with and participation in the community from the bottom up, as engaged members of the Athens community. Students will be introduced to real-world problems and best practices, and encouraged to explore creative solutions. Community geography helps students better understand the spatial nature of these issues, how to evaluate both local and global forces which transform communities, and assists them with evaluating actionable solutions which promote sustainability at the local level. This course is designed to engage students with the Athens area, to build collaboration between students, residents and community groups, and to develop marketable skills and expand student awareness of community issues.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	GEOG 1200 or 1310 or WGSS 1000 and (Jr or Sr)						
		COURSE DESC:		This course explores frameworks linking gender and the environment and examines how they have influenced the practice of development in various geographic contexts. Case studies are drawn from Africa, USA, Latin America, and Asia. Topics include gendered access to resources, health and inequality, men and masculinities, the body and the environment, non-governmental organizations, and grass root organizing. This course also includes a significant focus on effectively developing, supporting, and communicating research findings in written and oral forms.								
A&S	GEOG	GEOG	4470	Natural Resource Conservation	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	GEOG 2400 and (Jr or Sr)						
		COURSE DESC:		Themes in American environmental history, resource conservation and management, and contemporary environmentalism.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	(GEOG 1200 or 1310 or 3210 or SOC 1000) and (Jr or Sr)						
		COURSE DESC:		Examines migration theory, global and domestic patterns of human migration, and their implications for the environment and development. Focus on geographic approaches to understanding the causes and development consequences of migration, including transnational and return migration. Explores migration in numerous cultural contexts and examines migrant experiences through written work and first-hand experiences.								
A&S	GEOG	GEOG	4520	Environmental and Sustainability Planning	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in GEOG and (Jr or Sr)						
		COURSE DESC:		An introduction to how urban planning tools can be used to support the natural environment and promote local and regional sustainability. Outlines strategies for meeting important biodiversity, water resources, hazard mitigation, working landscape, waste management, and air quality goals. Connects environmental planning with supportive topics such as environmental policy and governance, sustainability and climate action planning, environmental justice, and environmental assessment.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in GEOG and (Jr or Sr)						
		COURSE DESC:		Explores the development of planning concepts, theory, and practice. It introduces urban and regional planning in the U.S. through its historical and contemporary contexts. Examines the social, economic, political, cultural, and technological factors that influence human landscapes and the profession of planning.								
A&S	GEOG	GEOG	4560	The Just and Sustainable City	Lecture	3	0	1JE	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	(GEOG 1200 or 2400) and (Jr or Sr)						
		COURSE DESC:		A critical examination of the role of nature and political economy in the sustainable development of urban environments in the context of social and environmental justice. Topics studied include the relationship between urbanism and nature, environmental justice, compact versus sprawling development, slums in developing world cities, urban agriculture as a solution to urban hunger, toxic lawn ecologies, uneven urban forests and parks, vulnerability to urban climate changes, brownfield redevelopment and the specter of gentrification, and the role of animals in the city, among other topics. These topics are studied in both developed and developing world contexts. Students taking this course will also be asked to evaluate urban sustainability initiatives related to these topics with concepts of social and environmental justice in mind.

A&S	GEOG	GEOG	5170	Landscape Ecology	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Landscape Ecology is an applied science that focuses on the development, consequences, and management of environmental pattern - the spatial distributions of species and the environment resources upon which they depend. This course explores the reciprocal relationship between pattern and process: how pattern is created on the landscape, its implication for populations, communities, and ecosystems, and how spatial pattern changes through time. The specific role of humans in creating and altering landscape pattern is examined.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Systematic and thematic survey of spatial and cultural patterns associated with ethnicity and ethnic groups in the United States. Emphasis on historical and spatial patterns of immigration, the experience of ethnic groups in American plural society, and ethnic contributions to American life.								
A&S	GEOG	GEOG	5210	Population Geography	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Survey of global population concerns emphasizing contemporary patterns of population change, fertility, international migration, and the impact of these on the environment and economic resources. Examines critiques (feminist/equity) of population change as a development problem and explores development consequences and human experiences of migration. Examines the political nature of population change by exploring multiple perspectives on population change and socio-environmental change. Teaches students to confront their own preconceived notions of fertility, migration, and consumption, and develop greater curiosity about the causes and consequences of demographic change.								
A&S	GEOG	GEOG	5220	Geography of Religious Space and Place	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Systematic and regional survey of religious cultural landscapes of the world in comparative perspective. Emphasis on religion as a cornerstone of culture and its manifestations in the cultural landscape. Focus on sacred space and place, pilgrimage, and holy sites in selected religious belief systems.								
A&S	GEOG	GEOG	5250	Political Geography	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Political Geography is a critical examination of the spatial expression of geopolitics. Topics covered include formation of the state as a sovereign space, nationalism in discourse and practice in both current and historical contexts, the relationship of neoliberalism to globalization and devolution in both developed and developing-world contexts, and the linkages between global and local scale political processes, especially regarding electoral politics.								
A&S	GEOG	GEOG	5260	Urban Geography	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Geographical survey of the processes and forms of urban settlements. Examines urban origin, urban system, urban spatial structure, suburbanization, urban planning, (de) industrialization, inner-city decline, gentrification, entrepreneurial politics, cultural economy and globalization. This course includes significant writing and revision.								
A&S	GEOG	GEOG	5270	Geographies of Social Justice	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This class provides a geographic analysis of social relations, social identities, and social inequalities. The course examines the geographies of social justice from the perspective of distinct identity groups (including race, gender, class, sexuality, ability, and nationality). We discuss the way that place plays a role in constructing and giving meaning to these identity groups. We explore the role of social justice as it relates to various geographic themes, particularly focusing on: the constitution of public and private space; housing, homelessness, and the meaning of home; memorialization; urban structure and design; gentrification; the use of public space; mobility; geographies of fear; and resistance.								
A&S	GEOG	GEOG	5280	Community Geography	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Knowing the geography of one's community, from the distribution of parks and schools to the location of healthcare and social services providers to the assessment of walkable downtowns and neighborhoods, is a hallmark of an engaged citizenry. Community Geography examines a variety of place-based challenges and opportunities that are found within and between communities through the lens of geo-spatial analysis. It engages students in real ways through documenting, evaluating and mapping the community they live in and care about. University-community partnerships are built from the bottom up around social issues such as income inequalities, food insecurity, educational disparities, limited access to transportation and healthcare, and more.								

This course offers a unique combination of collaborative mapping, spatial understanding of community issues, and interaction with and participation in the community from the bottom up, as engaged members of the Athens community. Students will be introduced to real-world problems and best practices, and encouraged to explore creative solutions. Community geography helps students better understand the spatial nature of these issues, how to evaluate both local and global forces which transform communities, and assists them with evaluating actionable solutions which promote sustainability at the local level. This course is designed to engage students with the Athens area, to build collaboration between students, residents and community groups, and to develop marketable skills and expand student awareness of community issues.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: This course will explore the physical and human geographies of the African continent as well as geographic approaches to understanding the ways in which humans interact with their environment. The course will cover many themes in African geography and explore approaches to understanding patterns of social and environmental change. We will go over the broad macro picture of continental patterns in major thematic areas (e.g., the political map, economic patterns, major ecological zones) and also examine issues related to environmental variability and social inequality in the local and regional contexts. Topics covered include, climate change and heritage, pastoralism and climate change adaptation, health and development, wildlife conservation, livelihoods and sustainability, migration and development, international land acquisitions and roots of conflict. Students will also learn how to make effective research presentations.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		A cross-cultural examination of the ways in which human cultural values, traditions, and discourses are manifested, constructed, and materialized in the cultural landscape. Focuses on an examination of how the concepts of culture and cultural landscape have evolved over time within the discipline of human geography, with an emphasis on current post-structural conceptualizations. Synthesizes the connections between spatial organization, the social/cultural construction of place, and social power within the context of relevant social and literary theory. Traces and examines connections between cultural, environmental, economic, and political processes. Examines ways in which social discourse is materialized in the cultural landscape.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	No credit if taken after GEOL 2830						
		COURSE DESC:		An introduction to the forces affecting our planet's surface and interior features. Topics include the origins of volcanoes, earthquakes, and mountain belts along with the ways they impact people's lives. Topics also include the roles of landslides and streams in shaping the Earth's surface, and the formation of earth materials and mineral resources. Intended for both science and nonscience majors seeking a nontechnical overview of the Earth's always changing and sometimes dramatic geology.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course is an introduction to the systematics, anatomy, physiology, ecology, evolution, and extinction of dinosaurs and other Mesozoic life, as well as a review of the science of paleontology and basic Earth history during the Mesozoic including climate, geography, tectonics, mass extinctions, and other major geologic events. The course begins with an introduction to the sciences of paleontology and geology including an overview of the theories of plate tectonics and evolution, geologic time, relative and absolute age dating, and the fossil record. The history of the science of paleontology is explored as well as the different methods and techniques employed by modern paleontologists to ask and answer scientific questions about ancient life including dinosaurs. Additional topics focus on the physical, biological, and chemical conditions of the Mesozoic world and a general introduction to dinosaurs including their classification, anatomy, physiology, and behavior. The three major groups of dinosaurs, the Ornithischia, Sauropoda, and Theropoda, are discussed in detail in addition to other major components of Mesozoic ecosystems including marine reptiles, pterosaurs, mammals, insects, and plants. The course concludes with an overview of the evolution of terrestrial and marine ecosystems during the Mesozoic and the causes and effects of the end Cretaceous mass extinction.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Sustainability of water resources is complicated because groundwater and surface water are connected, and the use of water resources should be in a manner that can be maintained for an indefinite time without causing unacceptable environmental, economic, or social consequences. The course emphasizes the importance of water resources and its sustainable development in the 21st Century. Students will learn fundamental concepts and theories related to the occurrence, movement, storage, quality, and sustainability of water resources. They will also be exposed to real-world issues of water resources sustainability, e.g., water risks, contamination, remediation, health, economics and disputes;the water-energy nexus water security; and efforts to improve sustainability of water resources.

		COURSE DESC:		In second year geology, you are starting to build a breadth of knowledge in the geological sciences. More importantly, you are starting to learn the material which will make you a practicing geoscientist. All subjects are related and interconnected; you must now build on the knowledge learn in previous courses. An introduction to the basic concepts of rock-forming processes in igneous and metamorphic environments. This includes concepts related to identification, classification and origin of volcanic rocks, igneous intrusions, and metamorphic rocks associated with plate collisions, burial and intrusions. More importantly, you will gain an overview and understanding of the fundamental geologic processes that form these rocks. While what we (mostly) see at the Earth's surface is sedimentary units; the mantle and major portions of the Earth's crust have been formed and modified by igneous and metamorphic activity. Therefore, an understanding of these activities is essential as a starting point for understanding the Earth. Also, the processes that formed these rocks are exciting and fun to study!

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: GEOL 3120 or 3150								
				An introduction to the classification, distribution and characteristics of metallic and industrial ore deposits. The course emphasizes the geologic conditions and environments leading to the formation of various ores, and examines economics of ore deposits, mining methods, hazards, and remediation techniques. The tectonic settings of ore deposits are considered within the context of the plate tectonic paradigm, and we will discuss ore deposits with respect to geologic time and changes to the Earth system. Laboratory assignments focus on identifying common economic minerals, exploration practices, and ore characterization techniques.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: GEOL 3201								
				Radiogenic and stable nuclides are a critical tool for dating materials, understanding planetary differentiation, and tracing provenance and process in all spheres of the earth. This course examines the theory and application of isotope geochemistry to a broad range of geologic topics. Radiometric isotope techniques (dating and geochemical tracing) are introduced through a discussion of atoms, isotopes, and radioactive decay systematics, followed by systematic discussion of a number of specific systems (e.g., uranium-lead). Applications of stable isotopes to investigating volcanism, and meteoric-hydrothermal systems are discussed. Concepts of mass-balance, mixing theory, and open and closed systems are introduced.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Radiogenic and stable nuclides are a critical tool for dating materials, understanding planetary differentiation, and tracing provenance and process in all spheres of the earth. This course examines the theory and application of isotope geochemistry to a broad range of geologic topics. Radiometric isotope techniques (dating and geochemical tracing) are introduced through a discussion of atoms, isotopes, and radioactive decay systematics, followed by systematic discussion of a number of specific systems (e.g., uranium-lead). Applications of stable isotopes to investigating volcanism, and meteoric-hydrothermal systems are discussed. Concepts of mass-balance, mixing theory, and open and closed systems are introduced.

		COURSE DESC:		In second year geology, you are starting to build a breadth of knowledge in the geological sciences. More importantly, you are starting to learn the material which will make you a practicing geoscientist. All subjects are related and interconnected; you must now build on the knowledge learn in previous courses. An introduction to the basic concepts of rock-forming processes in igneous and metamorphic environments. This includes concepts related to identification, classification and origin of volcanic rocks, igneous intrusions, and metamorphic rocks associated with plate collisions, burial and intrusions. More importantly, you will gain an overview and understanding of the fundamental geologic processes that form these rocks. While what we (mostly) see at the Earth's surface is sedimentary units; the mantle and major portions of the Earth's crust have been formed and modified by igneous and metamorphic activity. Therefore, an understanding of these activities is essential as a starting point for understanding the Earth. Also, the processes that formed these rocks are exciting and fun to study!

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This is a survey on war in world history from ancient kingdoms and empires to present-day conflicts. These themes are central: war and the state; war and society; war and culture; war and trade; and conflict resolution. In the twenty-first century, the definition of "war" has broadened from our modern understanding as an armed conflict between states. Today, war is better defined as an armed conflict between organized groups, which includes states, terrorist groups, militias and warlords, and crime syndicates. "World," too, has taken on broader meaning: it is not simply a geographic term, but connotes connections between states and people. Studying war in history allows students to consider how societies have responded to change under duress, how technology has spread across the globe, how empires were built and how they collapsed, how ancient empires became modern states, and how modern culture emerged from the rubble of wars.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course offers students an opportunity to critically explore the historical connections between Middle East history and other parts of the world. Structured as a chronological survey spanning the period of 600-1990 AD, the course covers events and processes related to developments in politics, economics, social organization, religion, science and technology, and culture. It highlights key moments in which dynamics in the Middle East shaped other parts of the world. Equally important are those moments in which developments in other parts of the world helped shape the region. The survey draws on connections between the Middle East and multiple other regions: Africa, South Asia, Southeast Asia, Europe, and the Americas.

This course both engages contemporary concerns and provides an historical account of the ideas and patterns of practice that shaped western and world economic culture from the sixteenth to the end of the twentieth century. It challenges students to understand capitalism less as a hegemonic, clearly-defined force, but rather as a multi-faceted concept that has, throughout history and in our own time, informed the beliefs and actions of kings, philosophers, economists, producers, consumers, and citizens. 		COURSE DESC:		This course explores the evolution of scientific ideas from the work of the ancient Greeks to the medieval world of European and Arabic scientists to participants in the Scientific Revolution of seventeenth-century Europe. The course examines how pre-modern scientists explored all facets of their existence: the natural world, the cosmos, the "races of man," and the relationship between celestial bodies and natural phenomena. This course introduces the topics of scientific investigation and the methods used to explain the natural world from the time of the early Greeks to the death of Isaac Newton and investigates how scientific inquiries and explanations developed as a result of changing social, political, and economic contexts in the pre-modern era. The first half of the course explores how ancient and medieval scientists sought to explain the workings of the natural world, the divine, and humankind's role in the world. The second half focuses on the period known as the Scientific Revolution (1450-1750) when ancient and medieval concepts of nature were challenged, reinvented, and discarded in favor of the new science characterized by the modern scientific method and experimentation

A&S	HIST	HIST	3002	Colonial British North America ELIGIBLE GRADES: COURSE DESC:	Lecture	3	0		N	U30		0
				GEC1: A-F REQUISITE: Soph or Jr or Sr Covers North American history from initial British settlement to the conclusion of the French and Indian War. In this time British colonies evolved into increasingly mature, stable societies. Demographic and economic expansion made possible a prosperous and relatively egalitarian society, which in turn affected the legal and political settlement. Yet, amidst all these promising developments, African slavery and the dispossession of Native Americans became ever more deeply entrenched. Examines the expansion of the British American empire and the costs this empire exacted. Topics covered include: pre-Columbian Native American societies, early English settlement, the Caribbean, comparative colonial development, trade, political culture, gender relations and the construction of family, witchcraft, war, migration, evangelical awakenings, urbanization, consumption, and slavery.

				GEC1: A-F REQUISITE: Soph or Jr or Sr This class examines the founding and early decades of the United States, an era that continues to weigh heavily in American politics, thought, and culture. Students examine the country's revolutionary origins and the constitutional framework created in the 1770s and 1780s through its expansion across the Continent in the 1840s. They examine how diverse peoples of European, African, and Native American ancestry struggled to coexist and accommodate one another in North America. The course explores the developments and lasting legacies of institution building, slavery, debates over political economy, westward expansion, (including its effects on Native and African-Americans), the nation's place on the world stage, and the emergence of competing parties and ideologies during the Jacksonian period.

A&S	HIST	HIST	3293	World of Late Antiquity: Culture and Society in the Late Roman Empire	Lecture	3	0	2CP	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Beginning in the third century, the mighty Roman Empire began its slow but inevitable decline and fall, brought to a decisive end by the barbarian invasions of the late fourth and fifth century, epitomized by the sack of Rome by Goths in 410 and Vandals in 455, and terminated with the deposition of the last western emperor in 476. That is one vision of the period sometimes called Late Antiquity. The other vision sees the transformation of classical culture, closely related to the emergence of Christianity, and diverse political and social changes that would live on long after the imperial political order disappeared in the west. This course will take account of both these visions, with a strong preference for continuity over decline. Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.

		COURSE DESC:		Present-day Chinese political, intellectual, and cultural leaders frequently claim that China has the longest continuous history of any nation in the world. Implicit in this statement is the argument that an appreciation of the deep Chinese past is necessary for any considered understanding of contemporary China. This course provides a narrative of that past by tracing the history of pre-dynastic and dynastic China from antiquity to the early modern era. The continuities and discontinuities between different historical periods are emphasized. The course concludes with a re-evaluation of what the Chinese past reveals about the Chinese present.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		From the end of the Scientific Revolution to contemporary debates surrounding human-made climate change, this course examines key themes in the history of science since the 18th century. It treats science as both an evolving set of practices and methods as well as a body of knowledge, including developments such as thermodynamics, evolutionary biology, germ theory, the periodic table of the elements, and discovery of the human genome. It also considers apparently unsuccessful developments, such as phrenology, catastrophism, and Lamarckianism. Students will learn about the socially-contingent nature of science, the relationship between science and politics, and the efforts made to divide science from pseudoscience.								
A&S	HIST	HIST	3520	Roman Law & Society	Lecture	3	0	2CP	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Historical introduction to Roman law, interpretation of legal sources, and especially the role of law in Roman society and culture. Chronological focus is on the Empire through the age of Justinian. After a survey of the origins of Roman law, lectures and readings use legal sources to look in two directions: downwards to the way law affected social life; upwards to how politics and governance affected law. Attention will be given throughout to how the nature of different types of legal evidence affect our interpretation of the purpose and effectiveness of law. Specific topics of focus will include the bearing of law on marriage and family life, slavery and freedom, surveillance, and religion.								
A&S	HIST	HIST	3521	Medieval Law & Society, 500-1000	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		Beginning with the end of the western Roman Empire in 476, this course surveys major legal systems emerging around the Mediterranean and western Europe over the next 500 years. The legacy of imperial Roman law affected all these systems, whose own legacies would endure for centuries. Featured in the survey are the reforms of Justinian and the Corpus Iuris Civilis, early Frankish law, the Visigothic Code, the formation of Islamic jurisprudence, Carolingian legal reforms, and Anglo-Saxon law before the Norman Conquest. Focal topics allow comparison between different legal systems and the societies they affected, e.g. sources of legal authority (human and divine, oral and written); status and rights of women; slavery and minority groups; vengeance and restitution. Students analyze these topics through case studies, based on primary sources in translation.

		COURSE DESC:		What is life, and where did it come from? This course presents a historical survey of how people have attempted to answer that question since 1800, by situating the revolutionary impact of Victorian British naturalist Charles Darwin and the theory of evolution in its age. Beginning with key moments in the development of evolutionary theory, the course then explores its reception in Britain, Europe, and Asia. Emphasis is on the social and historical context of ideas as well as controversies and religious disputes, the relationship between ideas and the public especially through popular media, and the various uses of evolutionary ideas in wider arguments about humanity and society. It concludes with a consideration of how historical debates on evolution resonate with debates in the present.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	(Soph or Jr or Sr) and Warning: not credit if taken after HIST 369N						
		COURSE DESC:		Studies ethnic cleansing as a central issue in European history - including Europe's colonies. Ethnic cleansing (for much of the 20th century termed "population transfer" or "expulsion") was a policy initiated by numerous great and minor powers from the beginning to the end of the 20th century and provides important perspective on the development of human rights law and state and nation building (and empire breaking) throughout this time. Also considers how the legacy of ethnic cleansing lives on in international relations, politics, the arts, and the popular attitudes and culture of the victims and perpetrators of ethnic cleansing, and their relations toward one another and in the broader international community.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		The ideas of ancient East Asian philosophers, thinkers, and mystics offer us surprising insights into life in the 21st century. In this interdisciplinary capstone course, we read and discuss the foundational texts of the East Asian tradition (including, but not limited to, the classic works of Confucianism, Daoism, and Buddhism). We look at these writings as historical documents which need to be placed in the context of their times, as creative works to be analyzed as literature, and as living philosophical texts which contain ideas that resonate with our own lives.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Senior and 9 credit hours in History						
		COURSE DESC:		History is the past. It also is how we remember and tell about the past. In this seminar-style course, we explore different approaches to history. Narrative, or story-telling, remains the oldest and still most common way of describing the past. But alternatives are to be found, not only among professional historians, but curators, artists, and filmmakers. Understanding the relationship of humans to their past has occupied some of the greatest of historians and philosophers and sparked debates over monuments, museums, and textbooks. This course surveys some of these approaches to history and considers the possible future of history.								
A&S	HIST	HIST	4500	The New Deal and Its Challengers, 1933-1945	Seminar	3	0	3; CAP	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Sr and HIST 2010 and 6 additional hours in History						
		COURSE DESC:		This course examines the political economy of the New Deal, the broad program of relief, recovery, and reform that President Franklin Roosevelt's Administration implemented in response to the Great Depression. It surveys the reaction to these unprecedented government efforts across the political spectrum, with an emphasis on the New Deal's most articulate critics. And it considers how Roosevelt's major domestic and foreign policies influenced the direction of both liberalism and conservatism in the United States from the decade of the thirties through the end of World War II.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Soph or Jr or Sr						
		COURSE DESC:		This course examines international problems of peace and war on worldwide scale since World War II, with a focus on international organizations and alliances. Topics include global balance of power and ideologies, nuclear weapons, strategy and diplomacy, economics, and postcolonial states and societies as well as representations of the Cold War in film, art, and literature.								
A&S	HIST	HIST	4770	Perspectives on the Holocaust: Sources and Interpretation	Seminar	3	0	3; BSL; CAP	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Senior and (HIST 3281 or 3681 or HIST 3682 or HIST 3770) and an additional 6 credit hours in History, for a total of 9 credit hours						
		COURSE DESC:		This seminar-style course introduces students to working closely with, researching, and writing and speaking about Holocaust-related sources. After a brief overview of the Nazi period and the Holocaust, discussions focus on five major themes: the diversity of Jewish experience during the Holocaust; gender and the Holocaust; the perspectives of perpetrators and bystanders/enablers; comparisons between diaries and memoirs in order to explore how memory influences understanding of past events; and representations of the Holocaust in literature and the arts since 1945. Students also develop their skills in academic writing, research and textual analysis, and public speaking, and participate in complex debates about past events and their impact on the present.								
A&S	HIST	HIST	4800	What is History in the Twenty-First Century?	Seminar	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Student must have at least 9 credit hours above HIST 2010						
		COURSE DESC:		This course explores the interaction between the contemporary world and the study of history. It introduces students to the application of historical skills in a variety of settings including government, non-profit work, business, and media, and in historical institutions like museums, historical sites, libraries, and historical societies. Students study and practice how to responsibly engage in historical preservation, research, and interpretation, through a variety of media. Special emphasis is placed on the financial, ethical, political, and interpretive challenges and opportunities that historians face while engaging diverse audiences in a contemporary context.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Using a comparative global perspective, explores the interactions between Europe, Africa, and the Americas during the age of European oceanic expansion. Covers Spanish, Portuguese, French, Dutch, and English empires and societies, Native American societies and interactions with Europeans, African societies, the rise of the slave trade and growth of African-American identity. Other topics include migration, the Columbian exchange, war, trade, religion, piracy, gender, and metropolitan authority. Encourages comparison between empires, cultures, and geographical regions even as it appreciates how intertwined and entangled these histories sometimes could be.								
A&S	HIST	HIST	5002	Colonial British North America	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Covers North American history from initial British settlement to the conclusion of the French and Indian War. In this time British colonies evolved into increasingly mature, stable societies. Demographic and economic expansion made possible a prosperous and relatively egalitarian society, which in turn affected the legal and political settlement. Yet, amidst all these promising developments, African slavery and the dispossession of Native Americans became ever more deeply entrenched. Examines the expansion of the British American empire and the costs this empire exacted. Topics covered include: pre-Columbian Native American societies, early English settlement, the Caribbean, comparative colonial development, trade, political culture, gender relations and the construction of family, witchcraft, war, migration, evangelical awakenings, urbanization, consumption, and slavery.

		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:							
		COURSE DESC:		PR	This class examines the founding and early decades of the United States, an era that continues to weigh heavily in American politics, thought, and culture. Students examine the country's revolutionary origins and the constitutional framework created in the 1770s and 1780s through its expansion across the Continent in the 1840s. They examine how diverse peoples of European, African, and Native American ancestry struggled to coexist and accommodate one another in North America. The course explores the developments and lasting legacies of institution building, slavery, debates over political economy, westward expansion, (including its effects on Native and African-Americans), the nation's place on the world stage, and the emergence of competing parties and ideologies during the Jacksonian period.

A&S	HIST	HIST	5293	World of Late Antiquity: Culture and Society in the Late Roman Empire	Lecture	4	8		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Beginning in the third century, the mighty Roman Empire began its slow but inevitable decline and fall, brought to a decisive end by the barbarian invasions of the late fourth and fifth century, epitomized by the sack of Rome by Goths in 410 and Vandals in 455, and terminated with the deposition of the last western emperor in 476. That is one vision of the period sometimes called Late Antiquity. The other vision sees the transformation of classical culture, closely related to the emergence of Christianity, and diverse political and social changes that would live on long after the imperial political order disappeared in the west. This course will take account of both these visions, with a strong preference for continuity over decline. Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.

		COURSE DESC:		Present-day Chinese political, intellectual, and cultural leaders frequently claim that China has the longest continuous history of any nation in the world. Implicit in this statement is the argument that an appreciation of the deep Chinese past is necessary for any considered understanding of contemporary China. This course provides a narrative of that past by tracing the history of pre-dynastic and dynastic China from antiquity to the early modern era. The continuities and discontinuities between different historical periods are emphasized. The course concludes with a re-evaluation of what the Chinese past reveals about the Chinese present.

		COURSE DESC:		The extraordinary transformations in contemporary China are a focus of fascination, anxiety, and confusion both inside and outside of China. Though seemingly sudden, these changes have deep roots in Chinese history. This course presents a narrative of that past by tracing the history of the late imperial and the post-dynastic eras. The course concludes with an examination of present-day China.

A&S	HIST	HIST	5520	Roman Law & Society	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:	Historical introduction to Roman law, interpretation of legal sources, and especially the role of law in Roman society and culture. Chronological focus is on the Empire through the age of Justinian. After a survey of the origins of Roman law, lectures and readings use legal sources to look in two directions: downwards to the way law affected social life; upwards to how politics and governance affected law. Attention will be given throughout to how the nature of different types of legal evidence affect our interpretation of the purpose and effectiveness of law. Specific topics of focus will include the bearing of law on marriage and family life, slavery and freedom, surveillance, and religion.							
A&S	HIST	HIST	5521	Medieval Law & Society, 500-1000	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:	Beginning with the end of the western Roman Empire in 476, this course surveys major legal systems emerging around the Mediterranean and western Europe over the next 500 years. The legacy of imperial Roman law affected all these systems, whose own legacies would endure for centuries. Featured in the survey are the reforms of Justinian and the Corpus Iuris Civilis, early Frankish law, the Visigothic Code, the formation of Islamic jurisprudence, Carolingian legal reforms, and Anglo-Saxon law before the Norman Conquest. Focal topics allow comparison between different legal systems and the societies they affected, e.g. sources of legal authority (human and divine, oral and written); status and rights of women; slavery and minority groups; vengeance and restitution. Students analyze these topics through case studies, based on primary sources in translation.

A&S	HIST	HIST	6700	Learning and Teaching World History for Graduate Students	Seminar	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		World History is a comparatively new, or at least newly redefined and newly important, field of teaching, research, and writing in our discipline. Many history graduate students have never studied it, or have been introduced to it only in cursory or piecemeal fashion, yet are increasingly called upon to refer to it, utilize its findings and insights in their own work, and . . . teach it. One obvious goal is to provide a quick and broad-brushed overview of the basic content of World History. Covers major periods in world history from the beginning to the present, highlighting major global changes and their interconnectness. A second goal is to develop a sensitivity to and critical sense about such fundamental matters as structure, generalization, and perspective in World History. Considerable time is spent discussing these, and emphasizing areas in which comparative study is and is not appropriate. A third goal is to introduce some of the major themes and issues that attract debate among world historians these days, and to appreciate the strengths and weaknesses which they pose. This attention to current historiography, especially in a new field, is critical for showing the differences and similarities between today's World History and other perspectives on the study of the past. Along the way, we will consider some strategies for coming to terms with the welter of information and opinion in this often unwieldy field, and for approaching it in ways that are useful to learning and understanding what it has to offer to the study of other varieties of history. A final aim is to introduce graduate students to the many challenges and approaches to teaching this subject. The intent is not only to prepare graduate students for teaching their own World History surveys, but to suggest ways in which they can incorporate global perspectives into their own scholarship and into a variety of possible teaching assignments. Students follow common readings and individual readings, and produce weekly papers on these readings, which are discussed intensively in a seminar setting. The final portion is devoted to students producing an original syllabus for an undergraduate course in World History (either Before 1750 or Since 1750), of sufficient quality to be used in the classroom. This intended to better prepare our graduates to enter the real teaching world of today, in which most will be asked at one time another to talk about and teach World History, and in which having taken a course like this can be a critical factor in an academic job interview.

We will examine how the Jewish people and their religion emerged in Biblical times, and how Jewish culture has evolved and flourished for 3,000 years. We will look at the many varieties of "Jewishness," as well as the impact the Jews have had on their non-Jewish neighbors. Students will learn about largely unrecognized aspects of Jewish culture. From Christianity to communism, from American humor and music, the Jews have bequeathed a rich and diverse heritage to humanity.

We will trace its evolution from the Yiddish culture of the 19th- century shtetl all the way to 21st-century cinema and television, where Woody Allen, Jerry Seinfeld, Mel Brooks, and others have made American humor Jewish and Jewish humor American. We will probe the significance of the schlemiel, the schlimazel, and the schnorrer, and why these cultural archetypes which emerged centuries ago in Eastern Europe still have such resonance today.

A&S	HIST	T3	4104	God and Science in the Western World	Lecture	3	0	3	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Sr only								
		COURSE DESC:		This interdisciplinary course examines the relationship between religion and science in the Western world, with a particular focus on the era from sixteenth until the late nineteenth century. It is a subject which has vexed historians for nearly a century and a half. Historians originally conceived of religion and science as inherently antagonistic forces which were necessarily at war with one another. The so-called "warfare school" argued that the history of modern science was the history of the science's gradual, indeed, inevitable victory over religion. Others, however, have countered that religion and science were often allies. Still others have contended that the relationship between religion and science cannot adequately be described in terms either of conflict or harmony. Their relations were, instead, complex and can only be appreciated properly when considered in their particular, contingent historical contexts. Students will be forced to grapple with these conceptual models as we cover the broad sweep of religio-scientific development in the Western world, with particular emphasis on the period from 1500 until 1900. We shall also zero in on particular topics Galileo's trial, Newton's alchemical experimentation, Hume's attack on the miraculous, Darwin's theory of evolution, and the Wilberforce-Huxley debates, for instance, which illuminate the distinctive relationship between religion and science in the Western world.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours Tier II Social Sciences or Humanities and Sr only								
		COURSE DESC:		This senior-level capstone course is designed to allow students to bring together the skills they have acquired in college and use them to study a specific, yet interdisciplinary subject. The folklore of espionage intersects the study of history, political science and espionage studies, folk memories and lore, and film and literature criticism. Examines the subject in a roughly chronological format, using films, television shows and novels to illustrate each development of spy folklore, especially as it interacts with espionage history.

		COURSE DESC:		This course provides an overview and appreciation of Middle-Eastern, African, and Asian languages and their cultures, and allows students the opportunity to explore those languages and cultures they most wish to engage with. The course focuses mainly on Arabic, Chinese, Japanese, and Swahili, the languages taught in the Linguistics Department. But the course also looks at other languages such as Hebrew, Wolof, Zulu, Thai, Vietnamese, Malay, Indonesian and Korean. As such, the course provides a taster of the languages that can be studied intensively at Ohio University and the belief systems that underlie them. At the same time, the course provides students who do not seek intensive language instruction, the chance to learn basic language and cultural skills and sensitivities needed for travel and work in Africa and Asia.

		COURSE DESC:		This course answers many of the questions that people usually ask about language. Are some languages more complex than others? Are some languages more beautiful than others? Is it easier for a child to learn a second language than an adult? Do women talk more than men? Are people that use bad grammar slovenly? These and many more questions will be answered by looking at what the empirical study of language tells us. Many of the answers will surprise you. By the end of this course, you will have a much better idea about what is a language myth and what is the real nature of language.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Soph or Jr or Sr								
		COURSE DESC:		This course examines cultural similarities and differences through the prism of language. Etymology and the mapping of world language families reveal how cultural practices are transmitted through language and how loan words reveal patterns of world trade, migration, and colonialism. Differing semantic classification systems of kinship, food, emotions, etc., and varying conceptual metaphors of space and time show how cultures map the same real world experiences differently. Cultures also vary in terms of speech acts - greetings, apologies, compliments, etc., and how they mark social relationships through address terms - honorifics, pronouns, and nicknames, etc. Ultimately, this course seeks to illuminate the complex inter-relationship of individual, linguistic and cultural identity.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course provides an introduction to the causes of language endangerment and death and how languages can be revitalized and sustained. The course explores what constitutes an endangered language and which languages out of the 7,000 languages spoken in the world are most under threat. It focuses on the most endangered languages: the indigenous languages spoken by the national and tribal minorities of the Americas, Africa, Asia, and Oceania, and the marginalized European languages of the Irish and the Basques, and explores the factors that contribute to their endangerment and the ways in which we can help these languages survive and thrive.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Soph or Jr or Sr								
		COURSE DESC:		This course examines the interaction of language and technology. Technology has transformed our access to written text from stone tablets to parchment and from paperbacks to Kindles. How much has the ease of access to written text increased literacy? And how much has the ease of access to written text, especially electronic text, diminished our capacity for the sustained reading a novel requires? This course examines these issues and many more including the emergence of texting as a new language form, how speech recognition devices like Alexa may be tools for surveillance, and whether robots will replace language teachers.

A&S	LING	LING	4600	Introduction to Phonetics	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: LING 3500								
		COURSE DESC:		Phonetics is the study of the sounds of language. The purpose of this course is to familiarize students with the theoretical principles of this field and the methods by which it is studied. With the presence of computers containing sound cards and free software for acoustic analysis, it is now possible for students to become active participants in their acquisition of phonetic concepts. Therefore, in addition to learning from readings, lectures, discussions, and assignments, students have several opportunities to analyze the speech of themselves and others.

The students learn how to analyze syntactic patterns of English objectively and how to express them in grammatical terminology.								
A&S	LING	LING	4701	Grammar and Syntax	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: LING 3500								
		COURSE DESC:		This course familiarizes students with philosophical foundations and theoretical argumentation of Chomskyan generative grammar known as the Principles and Parameters Approach with some reference to its later development called the Minimalist Program. The approach is explanatory as well as descriptive. Students learn how to develop theoretical hypotheses to account for syntactic phenomena and how to improve the accounts by continuous testing and revision of the hypotheses. They are also introduced to seminal research papers written on first and second language acquisition in the theoretical framework of Chomskyan syntax.

		COURSE DESC:		English for Specific Purposes (ESP) refers to the branch of language teaching and research in which course content and teaching approaches are derived from an analysis of language use in a specific context. In contrast to general purposes language courses, in which purpose is broadly defined, ESP courses are designed to prepare learners with the specific language requirements they need in order to participate appropriately in particular academic, occupational, and professional communities. This course surveys the literature that has contributed to the growth of the field of ESP and examines the key theories, principles, and ideas that form the basis of current approaches to ESP. Included in the course are more practical questions of needs analysis, curriculum design, materials development, and assessment.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	9 hours in Linguistics and Sr						
		COURSE DESC:		The course examines historical varieties of English as well as contributing forms of Scots and Scots Gaelic. More specifically, the course traces the development of contemporary varieties of English, especially those varieties recognized in the Appalachian and southern Ohio regions. Coursework emphasizes synchronic variation and diachronic change as primary elements of language analysis while also highlighting contributions of the languages of Scotland to varieties of American English. Students examine data, interpret texts and apply knowledge of multiple language forms to documentation tasks both inside and outside the classroom.

		COURSE DESC:		This course allows students to develop their own understanding of English grammar as well as explore and practice techniques to help non-native English speakers (NNESs) develop their own grammar. This includes the form, meaning, and use of several of the major grammatical structures NNESs commonly study as well as best practices within teaching. Students of this class gain experience with explaining, teaching, coaching, and assessing various grammatical structures in addition to gaining insight into current theories in L2 grammar instruction. The role of World Englishes in grammar education and communicative competence is explored as well.

		COURSE DESC:		Introduces learners to Swahili vocabulary and grammar. These are used as the foundation for promoting the four skills of reading, writing, listening and speaking. Emphasis will be on promoting the learners' ability to express themselves, describe their daily experiences and engage in basic conversations. Although East African texts (reading passages, music and poems) will be used to promote learners' understanding and appreciation of Swahili language and culture, non East African texts in Swahili might be sparingly used to achieve certain objectives. While the main focus of the course will be on enriching the students understanding of African culture through the learning of Swahili, students are expected to relate the Swahili culture with their everyday experiences. Learners will be involved in a semester long portfolio project comprised of biographical information about their everyday activities, or activities of other people, whether actual or fictional with an intention of applying all aspects of the materials covered in class. Specific information on this will be provided in the syllabus.

		COURSE DESC:		This is the second course of two-semester first-year sequence. A continuation of 1110 covering the different types of nouns in Swahili. By now, students will have covered all the noun classes and will begin to see their relevance to various aspects of Swahili grammar. It will become clear that once you know the class of noun in question, the grammar can easily be derived from a consistent pattern. Learners will also broaden their vocabulary and they will be able to engage in more complex dialogues. Although some dialogues will be tailored to accomplish grammatical ends, Also do dialogues for the sake of it in order to promote confidence in oral communication. Learners are encouraged to pay attention to the way the sample dialogues are structured and try to model their dialogues along similar lines. Learners are encouraged to test your skills to the limit without focusing too much on grammatical mistakes. The best language learners are the adventurous people who are willing to test anything they have learned, even when they do not do it correctly. In addition, listening tasks and lab work will be assigned to ensure that students are increasing their knowledge of Swahili. Some time will be set aside to do pronunciation drills to ensure that learners get their pronunciation right. To promote reading skills, the instructor will introduce some basic Swahili booklets to be used as class readers. Attempts will also be made to invite classroom guests who will speak in Swahili in order to give learners a chance to listen to accents other than their instructor's. A lot of the classroom exercises will involve conversation with a colleague. Attempts will be made to ensure that students speak with different people in each speaking task. Finally, updating of portfolio will continue. Material from new topics must be integrated into the students' portfolio in a creative way.

		COURSE DESC:		First course of two-semester intermediate-level sequence. Although this course will rely on the basic knowledge learned in the previous year, it is designed to take the learner deeper into Swahili structure and grammar as well as deepen their understanding and appreciation of Swahili culture. The reading passages will be longer, the written compositions longer, and the concepts more abstract. Promoting communicative competence is the main goal of this course. Students will be expected to develop their abilities in debating and expressing abstract ideas and concepts. Students will also begin working on group or individual projects that demonstrate their understanding of East African cultural issues. Students will also be encouraged to make the connections or draw comparisons between East African and American culture. In addition, students will be expected to try to integrate their majors with what they are learning in class.

Focuses at discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. In addition, learners are exposed to various elements of Swahili culture through authentic texts. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructors. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes practical application of Swahili in the learner's field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

		COURSE DESC:		In this course, we will explore the interface of language and culture. Language is a symbolic system through which we communicate our experience of the world to others. Culture is a set of beliefs and actions through which we, in concert with others in a community of practice, enact a common understanding of our experiences of the world as they are now, as we understand them to have been in the past, and how we imagine them to be in the future. The context of culture that this course uses to illustrate the connection between language and culture is that of sport. Sport is a community of practice in which language is used to report on sporting events, express opinions, and express support for a team through chants, etc. We are interested in how language is used in the specific culture of sport and how it expresses both individual, group and national identity. By the end of this course, students will be better able to understand how culture is expressed through language.

The courses are taught through an inquiry approach that focuses on problem solving and discussion. Key themes of Elementary Topics in Mathematics I include 1) explaining and justifying standard and alternative algorithms for basic arithmetic operations on whole numbers, rational numbers, and integers that are learned in grades preK-5; 2) students' construction and critique of their own ideas and others' ideas; and 3) using manipulatives to represent and justify algorithms. Topics include counting and cardinality, the development of the base-10 number system, properties of and operations on natural, whole, signed, rational, and irrational numbers; and number theory. Satisfies Tier I requirement for elementary education majors only. Does not apply to Arts & Sciences Natural Science requirements.

		COURSE DESC:		This is a continuation of MATH 1101. Elementary Topics in Mathematics I and II develop mathematical topics usually taught in grades preK-5 to a depth required for future elementary and middle grades educators (and related fields) to establish professional expertise. The courses are taught through an inquiry approach that focuses on problem solving and discussion. Key themes include 1) explaining and justifying standard and nonstandard algorithms for basic arithmetic operations learned in grades preK-5; 2) students' construction and critique of their own ideas and others' ideas; and 3) using manipulatives to represent and justify algorithms. This emphasis on the standard algorithms for basic operations taught in K-8 mathematics and their comparison to children's invented algorithms allows students to engage with the cultural aspects of mathematics and see how our approach to computation and teaching mathematics reflects our greater access to technology and our evolving values of broader society. The mathematical content is focused on topics of fundamental importance for understanding, reasoning about, interpreting, and constructing arguments with quantitative data. The specific topics include ratios and proportional reasoning, algebraic reasoning, functional and non-linear relationships, and measurement. Properties of two-dimensional and three-dimensional geometric objects are explored including area, congruence, similarity, symmetry and translations. Foundational ideas of probability and statistics are addressed including data displays, measure of central tendency, comparing populations and samples, experimental and theoretical probability, and relationships in bivariate data. Does not apply to Arts & Sciences Natural Science requirements.

		ELIGIBLE GRADES:		GEC6: CR,	REQUISITE:	MATH 1500 or concurrent PR, F						
		COURSE DESC:		The course is a co-requisite course for MATH 1500 (Introductory Statistics) for students who need extra support. It is taken concurrently with MATH 1500 and provides just-in-time support/review of concepts and skills needed to successfully complete MATH 1500. Topics include, but are not limited to: number forms, special notations, graphing points and lines, evaluating expressions, solving basic equations, working with charts and diagrams, and set operations. Additionally, this course will include further examples, activities, and use of technology to supplement learning with topics directly from the MATH 1500 class.								
A&S	MATH	MATH	2110	Introductory Geometry for Middle School Teachers	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	(MATH 1300 or 1322 or 1350 or 2301 or Math placement level 3) and any education major.						
		COURSE DESC:		This course prepares prospective teachers to teach mathematics to children in grades 4-9 and is appropriate for middle childhood education and other education majors. It focuses on the geometry and measurement topics covered in the Common Core State Standards for grades 4-9. The course also addresses how some of these topics develop in secondary grades to give prospective teachers a sense of the mathematics they will be preparing students to learn later. The course is taught through an inquiry approach that focuses on problem solving and discussion and is designed to encourage exploration and explanation of mathematical ideas. This course will cover visualization, angles, geometric shapes and three-dimensional figures and their properties, some constructions with straightedge and compass and with technology, transformational geometry, symmetry, congruence, similarity, measurement (especially length, area, and volume), converting measurements, principles underlying calculations of areas and volumes, why various area and volume formulas are valid, the behavior of area and volume under scaling, uses of right angle trigonometry and various technologies to aid in teaching geometry. Students will be expected to develop and prove or disprove conjectures about geometric figures. Construction of proofs will involve exploration, discovery, conjecture, and certification of reasoning. Topics will be addressed to develop a deep conceptual understanding of geometry and measurement needed for teaching this content to grades 4-9 students. Students will experience and grapple with how geometry can describe and interpret problems from various circumstances in the real world.								
A&S	MATH	MATH	2120	Number and Algebra for Middle School Teachers	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Education Majors only						
		COURSE DESC:		Develops mathematical topics usually taught in grades 4-9 to a depth required for future middle grades mathematics teachers to establish professional expertise. The course is taught through an inquiry approach that focuses on problem solving and discussion. Key topics addressed include 1) explaining properties of the natural numbers (parity, primes, factorization, divisibility, converting to other bases, modular arithmetic); 2) explaining and justifying standard and alternative algorithms for basic arithmetic operations on whole and rational number learned in grades 4-9; 3) understanding different meanings of and uses for rational number (fractions, ratios, and proportions); and 4) explaining and using ideas of algebra (with an emphasis on graphing, solving, and modeling with linear, quadratic, and exponential functions).

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	(B or better in MATH 1350) or (C or better in 1300 or 1322) or (Math placement level 3)						
		COURSE DESC:		First course in calculus and analytic geometry with applications in the sciences and engineering. Includes basic techniques of differentiation and integration with applications including rates of change, optimization problems, and curve sketching; includes exponential, logarithmic and trigonometric functions. Calculus is the mathematical language used to describe and analyze change. The course emphasizes how this abstract language and its associated techniques provide a unified way of approaching problems originating in disparate areas of science, technology, and society, highlighting how questions arising in different fields are connected to the same fundamental mathematical ideas. No credit for both MATH 2301 and 1350 (always keep 2301).

		COURSE DESC:		REQUISITE:								
				An axiomatic approach to Euclidean geometry. A core batch of theorems of Euclidean geometry are proven, and interesting geometric problems are solved using the axioms and theorems. Additional concepts and techniques -- such as similarity, transformations, coordinate systems, vectors, matrix representations of transformations, complex numbers, and symmetry -- are introduced as ways of simplifying the proofs of theorems or the solutions of geometric problems. Hyperbolic geometry is introduced from an axiomatic standpoint, primarily to illustrate the independence of the Parallel Postulate. Computers are used to produce dynamic drawings to illustrate theorems and problems.

Prior experience with computer software and computer algebra systems, such as Matlab and basic computer programming skills are required.								
A&S	MATH	MATH	5620	Linear and Nonlinear Optimization	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		The course introduces solution methods, theory and applications of linear and nonlinear optimization problems. The focus is on the mathematics of efficient optimization algorithms, such as Simplex method and steepest ascent. Applications include production planning, financial models, network problems, game theory.								
A&S	MATH	MATH	5630	Discrete Modeling and Optimization	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Modeling and solving real-life problems by discrete optimization techniques. The discrete models include integer programming, dynamic programming, network optimization problems. Applications in large economic systems, scheduling, voting theory, telecom and transportation networks are discussed.								
A&S	MATH	MATH	5680	Quantitative Foundations for Bioinformatics	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Bioinformatics is the science of extracting biologically relevant information from large sets of biomolecular data. The course will introduce students to the mathematical models, statistical techniques, and algorithms on which this process is based.								
A&S	MATH	MATH	5700	Introduction to Topology	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	MATH 5301

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	MATH 5222						
		COURSE DESC:		G-sets. Orbits and stabilizers. Orbit decomposition formula. Permutation groups. Alternating groups. Simple groups. Composition series. Jordan-Holder Theorem. The Sylow Theorems. Fundamental theorem of abelian groups. Solvable and nilpotent groups. Rings of power series and Laurent series. Division rings. Prime and maximal ideals in a ring (not necessarily commutative). Nil radical. Rings of quotients of domains (not necessarily commutative). Artinian and Noetherian rings and modules. Hilbert Basis Theorem. Completely reducible modules. Semi-simple Artinian rings. Free, projective, and divisible modules. Tensor product of modules and algebras. Polynomial rings. Irreducible polynomials. Quotient rings. Eisenstein Criterion. Algebraic extension. Algebraically closed fields. Splitting fields. Normal and separable extensions. Finite fields. Fixed fields. Fundamental Theorem of Galois Theory. Solvability by radicals. Constructability by ruler and compass.

A&S	MATH	MATH	6231	Coding Theory I	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	MATH 5230						
		COURSE DESC:		A mathematically rigorous survey of Error-Correcting Codes with emphasis on their parameters and their algorithmic efficiency for coding and decoding. Reed Solomon Codes, Goppa Codes, Reed Muller Codes, Algebraic Geometry Codes. Coding and Decoding based on Fast Fourier Transform algorithms. This course surveys various approaches to the structure theory of convolutional codes. They are considered as vector spaces over fields of Laurent expansions, as modules over rings of polynomials and as graph codes. All necessary algebraic background beyond linear algebra is presented in the class, including concepts related to modules over principal ideal domains and ideas regarding trellises and other relevant types of graphs.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MATH 5302 or 5310								
		COURSE DESC:		A graduate course in complex analysis focused on classical results for analytic and harmonic functions. Many of the techniques explained in the course, e.g. integrals along paths and the residue theorem, are useful in applications. Topics will include: Analytic and harmonic functions, Cauchy's theorem and Cauchy's integral formula, classification of singularities, and entire functions.								
A&S	MATH	MATH	6320	Functional Analysis	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MATH 6301 and (MATH 5330 or 6302)								
		COURSE DESC:		An introduction to the basic results of functional analysis in the setting of Banach and Hilbert spaces. Key topics include the weak and weak* topologies, distributions, and an introduction to the Spectral Theorem. Theorems covered include the Hahn-Banach theorem, the Principle of Uniform Boundedness, the Closed Graph theorem, and the Open Mapping Theorem.								
A&S	MATH	MATH	6330	Fourier Analysis	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MATH 6301								
		COURSE DESC:		A graduate course in Fourier Analysis focused on classical results for Fourier series and Fourier transforms. Standard techniques explained in the course, e.g. representations of functions by Fourier series, forward and inverse Fourier transforms, are useful in applications. Topics will include: Fourier series on $[-\pi, \pi]$, Bessel inequality, convergence theorems, the Fourier transform, and the inverse Fourier transform.								
A&S	MATH	MATH	6400	Ordinary Differential Equations	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MATH 5400 and (MATH 5302 or 5330)

		COURSE DESC:		This course offers an introduction to German cinema from its beginnings to the present. Through discussion of key films, students gain an understanding of the historical development of German cinema and its relation to relevant historical, political, and cultural contexts and related artistic movements. Students develop their German language proficiencies through assigned readings, participation in class discussion, and completion of writing assignments, many of which entail revisions. Students acquire skills in the analysis of cinematic form. Proceeding chronologically, the course is structured around representative films, screened outside of class. Class time is devoted to lectures and class discussion.

		COURSE DESC:		A study of a controversial and resonant creation of Western literature: the first of Dante Alighieri's tripart Divine Comedy, The Inferno. Dante's medieval masterpiece relates his epic journey through the afterlife, spanning the entire cosmos. Dante's multiple-leveled Hell is located in the center of the earth and peopled with demons, his political enemies and contemporaries. Students "pass through" the afterlife, participating in it, thus fulfilling the poet's original intent in writing his blockbuster poem. They wrestle with timeless questions about culture, right and wrong behavior, the nature of evil, the possibility for spiritual improvement, and the experience of true happiness. The turbulent world of Dante's medieval Florence has surprising parallels with our own time, including runaway inflation, personal and political accountability, the breakdown of family values, and self-indulgence.

		COURSE DESC:		Part of the Food Studies curricular theme, this course introduces French gastronomy and analyzes its importance in French culture. It investigates the practice, expressions, and skills that constitute the 'Gastronomic Meal of the French', added to the Intangible Cultural Heritage of Humanity by UNESCO in 2010. Starting with the creation of the restaurant in Paris in the 19th century, we will examine the development of French gastronomy as described in the literature of the time, as well as its encoding in food texts. This course analyzes the specificity of French food and French concepts such as 'terroir'. It examines the evolution of French gastronomy, its increasing importance in French culture, and its influence worldwide. Students will also explore the underlying reasons for the changes in French gastronomy, as well as the French reactions to these changes.

		ELIGIBLE GRADES:		GEC7: CR, F, REQUISITE: NC								
		COURSE DESC:		Academic English Test Taking Strategies is a part-time level integrated course in English as a Second Language for students who are also permitted to take one or two academic courses simultaneously. Four hours of classroom instruction (one hour a day, four days a week) are designed to provide students with high-level language skills development, with a specific focus on academic test-taking strategies for successful academic performance. Language skills are integrated and will include reading, listening, speaking, writing and grammar. Test-taking practice and strategy development will focus on open and closed-book exams, timed objective exams (including standardized tests), as well as both short-answer and full-essay exam formats.								
A&S	OPIE	OPIE	5808D	Issues Through Film	Lecture	3 to 4	24		N	G10		0
		ELIGIBLE GRADES:		GEC7: CR, F, REQUISITE: NC								
		COURSE DESC:		Students in this part-time level five session per week course (ordinarily four contact hours plus two hours viewing the assigned film) will work to improve speaking, reading, and writing as well as listening skills through a study of some of the traditional themes of USA cinema, and of movies that exemplify those themes.

		ELIGIBLE GRADES:		GEC7: CR, F, REQUISITE: Permission required or TOEFL: 500 and Comp:4 NC								
		COURSE DESC:		Through this OPIE Bridge -level elective class, students will read classic and/or contemporary authentic works of fiction or non-fiction. They will analyze and discuss the books, use various strategies to improve their comprehension and vocabulary, learn about the socio-cultural contexts in which the books are set, and write several papers, both academic and creative, on the content and themes of the books. The books may vary from semester to semester. While particular topics and contexts will be examined depending on the books used, the books will serve as a basis to discuss cross- cultural themes and topics as well.

		ELIGIBLE GRADES:		GEC7: CR, F, REQUISITE: Permission required NC								
		COURSE DESC:		In this course, students read extended academic reading passages about selected traditional American mainstream values (individual freedom, self-reliance, equality of opportunity, competition, material wealth and hard work), including their development and influence on various aspects of American life. They analyze and discuss the texts, applying reading strategies to improve their comprehension. Students further expand their knowledge of the course content through a variety of activities, including guided observation tasks, speaking with Americans, in-class discussion, small-group projects, and watching movies.

		ELIGIBLE GRADES:		GEC7: CR, F, REQUISITE: NC								
		COURSE DESC:		Academic Combined Skills 1 is a bridge level integrated course in English as a Second Language for students who are also permitted to take one academic course. Eight hours of classroom instruction (two hours a day, four days a week) focus on the development of academic English language skills including reading and writing, study skills, and academic performance skills needed for success in an academic program in the U.S. Students will increase their ability to paraphrase, summarize, and synthesize information from articles and academic texts. They will increase their ability to use a variety of grammatical patterns and structures to express original ideas in writing and to edit their written work. Listening and speaking will also be addressed.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	PBIO 2090						
		COURSE DESC:		A survey of the complexity of plant physiological and structural adaptations that relate to their ecological performance. The class is structured to combine lectures, discussions and a hands-on lab approach to exploring the physiological and anatomical adaptations of plants to their environments. Labs will introduce students to state-of-the-art instrumentation and technology which are used to 1) assess biotic and abiotic factors affecting plants and 2) use instrumentation to quantify plant physiological responses to their environment. Students work in groups and actively use knowledge and skill taught in lecture and labs to perform student led ecophysiological experiments.

				This course covers the fundamental principles and concepts of soil and ecosystem ecology. The course will provide a foundation on the physical and chemical environment (i.e. soils) that mediates plant function. We then cover basic concepts in ecosystem ecology followed by the mechanisms (via biogeochemistry and ecological stoichiometry) that drive or limit ecosystem function, including temporal and spatial patterns. We will then integrate this information at several scales and discuss consequences of ecosystem function on human wellbeing. The lab portion will integrate concepts discussed in lecture, but emphasize analyzing soil and vegetation for metrics of ecosystem function. Data from the lab will be analyzed to investigate the influence of soil and plants on ecosystem-level processes.

		COURSE DESC:		Aims to demonstrate fundamental principles and concepts of biochemistry, physiology, microbiology, and plant biology through beer brewing. The practice and study of fermentation first defined the field of biochemistry and combines skills/concepts taken from microbiology (yeast cultivation; inhibition of bacterial growth by hops and ethanol; assay of bacterial contamination), biochemistry (an understanding of aerobic vs non-aerobic respiration and glucose metabolism, lipid oxidation, enzyme kinetics and assay as in starch degradation by amylases and protein degradation by proteases), physiology (the effects of alcohol on the body), and plant biology (barley and hops cultivation, harvesting and malt production; the contribution of plant tannins to beer flavor). This course combines a series of lectures, labs and field trips to the Plant Biology Gardens to demonstrate the concepts invoked in lecture. This course exploits a general public interest in alcohol and its production to demonstrate fundamental scientific concepts using a hands on approach. As many students seem unaware of how alcohol interacts with the body in the long term, this course also informs students about the devastating effects of alcohol abuse on the body and society. As such this course outfits students with a wide range of key scientific concepts coupled with practical skills.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: This course covers the fundamental principles and concepts of soil and ecosystem ecology. The course will provide a foundation on the physical and chemical environment (i.e. soils) that mediates plant function. We then cover basic concepts in ecosystem ecology followed by the mechanisms (via biogeochemistry and ecological stoichiometry) that drive or limit ecosystem function, including temporal and spatial patterns. We will then integrate this information at several scales and discuss consequences of ecosystem function on human wellbeing. The lab portion will integrate concepts discussed in lecture, but emphasize analyzing soil and vegetation for metrics of ecosystem function. Data from the lab will be analyzed to investigate the influence of soil and plants on ecosystem-level processes.

				ELIGIBLE GRADES: GEC1: A-F REQUISITE: Tier II completed and Sr only								
				COURSE DESC: The proposed integrative course examines plants utilized commonly as food in a selected region of the world from a variety of perspectives including their biology and evolution, geographic origins and historical development, chemical properties related to their use, agriculture and harvesting, food products utilizing these plants, and how cultures have been modified by food plants. Students will learn how regional environmental conditions and topography, land use, political and ethnic groups, economics, and infusion of other cultures have dictated the food plants now utilized in particular areas within the region under study. Each week, food plants will be introduced and discussed both within a geographic context (e.g., Rhineland of W Germany and adjacent Belgium; and E Germany and Moravia) and a functional or product-based context (e.g., fermentation, grapes and wines; and cereal grains, salt and preservation methods).

		COURSE DESC:		REQUISITE: Advanced topics in Classical Mechanics and applications to classical behaviors of solids, fluids, and fields. Hamiltonian Mechanics (Canonical Transformation, Action-Angle coordinates, Poisson Brackets, Hamilton-Jacobi Theory, Canonical Perturbation Theory, Integrability and Chaos), Continuum Mechanics of elastic solids (strain and stress tensors, elastic waves), Hydrodynamics (Conservation laws and Euler's equations, Viscosity and Navier-Stokes equations, Vorticity), Classical theory of fields.								
A&S	PHYS	PHYS	6011	Statistical Mechanics 1	Discussion	5	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Addresses the equilibrium and non-equilibrium behaviors of systems with large numbers of particles or degrees of freedom. It will begin with a review of ensembles and partition functions to treat classical and quantum, non-interacting, non-relativistic systems obeying Boltzmann, Fermi and Bose statistics. A brief discussion of the extension to relativistic particles, as well as a description of interacting classical and quantum systems (e.g. using cluster and virial expansions) will be provided. Mean-field theories, phase transitions and critical exponents will then be treated. Some non-equilibrium phenomena, including the Boltzmann equation and transport coefficients, will also be discussed. Additional topics which may be covered include: an introduction to renormalization-group methods; continuum-model descriptions (hydrodynamic description) for classical and quantum systems; stochastic processes, e.g. random walk and master equation; and an introduction to disordered systems.(hydrodynamic description) for classical and quantum systems; introduction to disordered systems.

A&S	PHYS	PHYS	7421	Physics of Amorphous Materials	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		An advanced course surveying aspects of disordered materials, including theory, simulation and experimental aspects. Topics will include the characterization of disorder and comparisons to experiments probing structure, such as diffraction and nuclear magnetic resonance. Classical liquids and the phenomenology of glasses and the glass transition is discussed. Methods for creating computer models are covered in detail, along with case studies of particular systems. Theory of electronic structure, including electronic localization, vibrations of amorphous materials, atomic and charge carrier transport are discussed and the course closes with a survey of applications.								
A&S	PHYS	PHYS	7461	Methods in Condensed Matter Theory	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Selected theoretical and/or computational methods applied to classical and quantum condensed matter systems. Methods discussed may include density-functional theory, ab-initio molecular dynamics, Monte Carlo techniques, perturbative renormalization group methods, non-equilibrium Green's functions, bosonization, etc. Applications will be to classical and quantum liquids, strongly correlated materials, glasses, surface phenomena, etc.								
A&S	PHYS	PHYS	7501	Particles and Nuclei 1	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Experimental and basic theoretical aspects of nuclear physics. Topics covered will include: overview of basic nuclear models of light and heavy nuclei, nuclear mean-field theory, inclusion of residual interactions, collective modes of motions, deformations of nuclei. Also covers nuclear physics at extremes of stability and/or nuclear astrophysics.								
A&S	PHYS	PHYS	7502	Particles and Nuclei 2	Lecture	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Experimental and basic theoretical aspects of Particle Physics. Topics covered will include: Relativistic kinematics, Symmetry properties, Bound states (meson and baryons), Feynman calculus, Quantum Electrodynamics, Electrodynamics and Chromodynamics of quarks, weak interactions and electroweak unification and gauge theories. Hadronic physics, neutrino physics and/or relativistic heavy-ion physics will also be covered.								
A&S	PHYS	PHYS	7511	Applied Nuclear Physics	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Acquaints the student with the most important aspects of nuclear technologies: nuclear power, isotope production, nuclear medicine, industrial applications, and nuclear security issues. The required tools to achieve a good understanding of these subjects are: understanding of passage of particles through matter, accelerator technology, beamline optics, and nuclear data (cross sections, masses, structure data). The class would be required for the 'Applied Nuclear Physics' M.Sc. degree, and it would be recommended for any student taking a M.Sc. or Ph.D. degree in nuclear or particle physics.								
A&S	PHYS	PHYS	7561	Contemporary Nuclear Theory: The Study of Strongly-interacting Matter	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Theoretical topics in contemporary nuclear physics. Emphasis will be on giving students calculations to complete which promote understanding of issues at the forefront of contemporary research. Areas to be discussed may include: lattice QCD, models of hadron structure, the nucleon-nucleon interaction, ab initio calculations of light nuclei, the electromagnetic structure of hadrons and light nuclei, factorization in QCD, parton distribution functions, modification of pdfs in the nuclear environment, predictions for heavy-ion collisions, properties of strongly interacting matter at high densities and temperatures.								
A&S	PHYS	PHYS	7562	Particle Theory	Lecture	2	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Discussion of current topics at the frontiers of particle theory, with an emphasis on performing calculations which promote understanding. Topics covered may include: non-Abelian gauge theory, the Standard Model, Field Theories on a Lattice, Supersymmetry, and Introductory String Theory.								
A&S	PHYS	PHYS	7601	Nonlinear Science	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		Introduces the students in the basic concepts and theoretical foundations of nonlinear science. Examples will be drawn from various disciplines, including physics, chemistry and biology. Includes an introduction into bifurcation theory, chaos theory, synchronization phenomena, dynamic instabilities, self-organization, and pattern formation in spatially distributed systems. Combines lectures, demonstrations and computational exercises using conventional software and will be team-taught.

		COURSE DESC:		Consists of presentations of original research and topics of current interest by experts in the fields pertaining to nuclear and particle physics. Journal club where graduate students present and discuss selected refereed scholarly journal articles in the field of nuclear and particle physics under the guidance of faculty. All graduate students in nuclear and particle physics are required to attend.								
				First year graduate students enrolled in this class are only required to attend the journal club, not the research seminar. First-year graduate students are not expected to present research articles. Because of their reduced participation, first-year graduate students qualify for only one credit hour.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Tier I Quantitative skills						
		COURSE DESC:		Introduces students to the science of energy production, use and the subsequent consequences. Introduces students to the Laws of Thermodynamics: conservation of energy; limits on efficiency. Various energy sources will be investigated and their use and impact discussed. The sources discussed may include: solar; fossil fuel; nuclear; wind; hydro, biomass. The teaching method is primarily through exposition of concepts, the analysis of problems and the use of in-class questions. Assessment of students will involve students demonstrating both their abilities in quantitative and qualitative analysis of problems.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	4 Hours in (CHEM or GEOL or PHYS or PSC)						
		COURSE DESC:		An exploration of ideas relating to the possibility that life exists elsewhere in the universe, both on planets and moons within our solar system, and within other planetary systems. The course begins by considering our planet's formation and the conditions which may have led to life appearing here, then moves outward. Students will learn the scientific basis of the age of the Earth and the Universe and the physical conditions necessary for planets around other stars to harbor life as we know it. Astronomical observations are discussed regarding what we know about extrasolar planets.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		This course gives science education teachers direct experience in creating effective science projects so as to give them the experience necessary to mentor grades 5-12 science students. Students in this course learn to practice science by collecting and analyzing experimental data to solve a self-generated scientific question. Students will be able to apply these skills to produce primary scientific research for science fair projects. Topics include the creation of science project ideas and hypotheses, literature research, planning of experimental protocols and controls, data collection, interpretation of results, construction of conclusions, and organization of oral and written presentations.								
A&S	PHYS	T3	4151	Entropy and Human Activity	Lecture	3	0	3	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: Sr only	Examines the application of the concept of entropy to human society as a whole, through the critical reading and discussion of works by advocates of multiple energy sources, using the viewpoints and patterns of inquiry of several disciplines. Energy is conserved, but most physical processes transform available energy into forms less readily available (thereby "increasing entropy"). Several topics in the physical sciences are presented in some detail to provide adequate technical background. World population and per capita consumption are increasing exponentially. Burning fossil fuels creates toxic byproducts and accelerates global warming. Extractive industries (e.g., agriculture and mining) reduce the natural resources available to future generations. Can we expect solar or nuclear power to "save the day?" Should humanity change priorities to minimize increases of entropy? To what extent can physical principles sensibly be generalized so far? These and other questions provide a focus to our inquiry.							
A&S	PHYS	T3	4155	Music Instruments and Physics	Lecture	3	0	3	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:	Review of the basic physical principles of sound production, musical sounds and hearing. The more common musical wind instruments are examined using the physical principles developed in the first part of the course. Modern instrument size, shape and construction materials are explored. In the second half of the course, students will build simple musical instruments based on calculations made in class. They learn to play their instruments and evaluate their musical qualities.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Course begins by giving students an introduction to the ways politics has been historically understood, and continues to discuss the ways it is understood in the discipline of political science. As the course continues, students will spend significant time exploring alternative understandings of politics in terms of current political events, parties, movements, revolutions and struggles in the U.S. and globally.								
A&S	POLS	POLS	2000	American Politics, Policy, and Administration	Lecture	3	0	2SS; ACNW	N	U30		25
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course introduces students to American politics, policy, and administration by investigating how public policies are formulated and implemented. Under a conventional view of the politics-administration dichotomy, political factors such as political party and public opinion significantly dominate the entire phase of policy formulation. Governmental bureaucracies are supposed to faithfully implement public policies that political decision makers enact. During recent decades, governmental bureaucracies have been more heavily involved in policy formulation as well as policy implementation. This course surveys the historical and contemporary principles of democracy and bureaucracy. Students consider the ideal relationship among politics, policy, and administration. Students also evaluate the significance of political culture and its effects upon policy formulation and implementation.

A&S	POLS	POLS	3230	African American Politics in Theory and Practice ELIGIBLE GRADES: GEC1: A-F REQUISITE: 3 Hours in POLS COURSE DESC: The course examines the experiences of African Americans in the American political system. It focuses on the historical and contemporary status of African Americans in American politics. African American politics in the post-civil rights era constitutes a major part of the course. African American political mobilization and participation, racial representation and leadership, partisan politics, and public policymaking are key topics. The course centrally details the influence and presence of African Americans within American political institutions. A defining theme of the course is an evaluation of the nature and evolution of African American politics within the context of a theoretical and practical paradigm which principally focuses on governmental institutions and political behavior. A&S	POLS	POLS	3750	Politics and Film	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in POLS								
		COURSE DESC:		For many political scientists and theorists, politics involves an ongoing conversation over the meaning and distribution of power in our lives. A major part of the discussions and debates are the various forms of entertainment that many times attempt to represent the world around us through film, music, and other media. Examines the diverse ways that politics, power, and film intersect and co-constitute one another. Investigates how race, sex, class, gender and other identity formations are represented in film, attempting to discern how images either perpetuate or resist dominant societal norms.

A&S	POLS	POLS	4010	American Constitutional Law	Lecture	3	0	BER	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in POLS								
		COURSE DESC:		This course is a study of Supreme Court decisions and other public documents from the Founding to the present day. Topics will trace the development of constitutional doctrine regarding the authority of state and federal governments to regulate the economy and to protect civil rights. This course approaches the politics of constitutional interpretation with a particular focus on the generation of various theories of equality that promote social equality or limit the authority of the state to respond to social conditions.								
A&S	POLS	POLS	4015	Constitutional Politics	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 9 Hours in POLS								
		COURSE DESC:		The United States Constitution confers authority on the various branches of government in order to empower the federal government. At the same time, the Constitution is designed to restrain public officials in their exercise of institutional power to prevent abuse of government power. In Madisonian theory, the separation of powers system works when one branch challenges another in its exercise of power. Those who challenge another may be motivated by politics or partisanship, but they couch their challenge in constitutional language. Hence 'constitutional politics' serves as conflict that is healthy for the American constitutional order. The system is in trouble when public officials fail to engage in conflict; if one branch asserts excessive power and another branch does not challenge it, then the system runs into the danger of tyranny, which James Madison defined as the accumulation of powers in one branch. Course examines historic and recent constitutional issues to assess whether each branch has lived up to its responsibility of checking the others. If any branch has been remiss, we will explore why.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: POLS 1010 and 2000								
		COURSE DESC:		Many studies of American elections are premised on the actions of individual voters (as well as potential voters and non-voters). Introduces the classics in the field of voting behavior research, along with recent studies that attempt to stand on the shoulders of these earlier works. Focuses on these two primary questions: a) why do people vote; b) how do they decide for whom to vote? One guiding concern is the issue as to whether voting behavior is self-interested or whether it reflects societal norms. Analyzes patterns of voting behavior in order to better assess American democracy and the manner in which it operates.

A&S	POLS	POLS	4225	Law and Colonialism	Seminar	3	0	BLD	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Jr or Sr						
		COURSE DESC:		This course focuses on how law was a central instrument of European and American colonial projects during the 19th and 20th centuries. Students explore how the imposition of colonial law affected colonized societies and their preexisting legal systems; they also examine how western fears and apprehensions vis-à-vis 'native' societies affected western law and society in turn. Academic texts as well as a sampling of novels, poetry, plays, and movies provide students points of entry for tracing how law helped establish and manage colonial projects and ideology. This course has an experiential component: students engage in archival research to increase their knowledge about colonialism; they also complete a research paper on a primary source to hone their skills in assessing who a primary source was written by, for whom, and to what end.

		COURSE DESC:		Studies efforts by state and non-state actors to organize and institutionalize international politics. Considers classical explanations for why states cooperate to form international institutions, and how these wield authority in a world of sovereign states. Examines the rise of non-state actors, including international non-governmental organizations (INGOs), terrorist networks, and transnational religious organizations. Specific cases discussed, including: the United Nations; the European Union, ASEAN, and other regional organizations; and various INGOs.								
A&S	POLS	POLS	4565	International Human Rights	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Jr or Sr						
		COURSE DESC:		Studies human rights as a vehicle for moral and legal change in international politics. Considers various ways of thinking about what human rights are and how they work at the international level. With a focus on the United Nations system, the course assesses problems and debates concerning the implementation and enforcement of human rights. Addresses difficult questions such as: How well do treaties work in promoting human rights? How can human rights be enforced in the absence of higher authority? And what role do non-state actors play? Considers case studies in a variety of issue-areas, such as: the use of torture, war crimes, indigenous rights, women's rights, and the right to development.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 hours in POLS or (Jr or Sr)								
				This course draws upon a variety of interdisciplinary materials that examine the ethics of humanitarianism as an expression of global civil society, a mechanism of global governance, and an instrument of power and politics. Students explore various ethical perspectives and methods employed within the global humanitarian system and within humanitarian studies. The course is organized around a specific set of themes that: (1) question the parameters of ethical decision-making in the global humanitarian system (2) unsettle prevailing norms of humanitarian practice; (3) disrupt the politics legitimated by various humanitarian appeals; and (4) uncover the multitude of humanitarian ethics and sensibilities that shape social interactions across the global North and South. Throughout the semester, we explore the entanglements of humanitarianism in religious faith, aid economies, imperialism, human security, and military intervention across different contexts.								
A&S	POLS	POLS	4650	Global Media Politics	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 hours in POLS or (Jr or Sr)								
				This course studies mediated communication in global politics, including both the impact of mass media on the foreign policies of states and the more recent use of social media by state and non-state actors. Readings and discussions address the role of mediated communication in public opinion, political mobilization, citizenship, identity, global justice, and democratic deliberation. The course uses historical and contemporary case studies germane to the study of international politics, including major wars, revolutionary movements, breaches of state secrecy and cybersecurity, Internet freedom, and efforts to promote global political dialogue. Students consider both tendencies of mediated communication to sow enmity and conflict and opposing trends toward universal connectivity and transnational citizenship.								
A&S	POLS	POLS	4700	Democratic Theories and Practices	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 Hours in POLS								
				Placing contemporary democracies in both historical and comparative context, examines the relationship between legitimacy, authority, participation and voice. Central focus is the 'edges' or boundaries of democracies: is there a private realm at the edge of democracy? How is it established? What is democracy's jurisdiction? There are margins within and outside of a democratic community, where lines between insiders and outsiders are drawn and redrawn. How do location and membership shape our practices of democratic responsibility? What is the relationship between injustice and democracy?								
A&S	POLS	POLS	4705	The Politics of Rights	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 Hours in POLS								
				There are few legal, normative, and political issues more important than the efforts and struggles surrounding rights. It could be argued that the emergence of democratic political systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and struggles. The varied origins of rights narratives will be explored, as well as the controversies over the extension and effectiveness of rights to diverse populations. Students think critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: POLS 2700								
				Examines contemporary political and social theories that have been critical of historically hegemonic ideas and regimes. Begins with theories that assume a relationship between knowledge and power, and also between theory and practice. Includes expansive concepts of politics that go beyond government. Theories such as Marxism, psychoanalysis, structuralism and post-structuralism, deconstruction, feminism, anarchism, animal rights, critical race theory and postcolonial theory may be examined.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 Hours in POLS								
				Explores the intertwined character of power and resistance. In the process, gain both an understanding of forms of power and resistance in everyday life, and to use such an understanding to negotiate the power in our own lives. Also explores how power is not only prohibitive, but productive; and attempts to figure out what that means for our quests to live good lives and to experience freedom.								
A&S	POLS	POLS	4730	Animal/Human/Machine	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: POLS 2700 or permission required								
				Political theorists are concerned with concepts of political agency. How does political action occur? Who can be political? What are the terms of political discourse? During the past 10-15 years, a "post-humanist" discourse has emerged. This has come from two main sources. First, a whole host of studies in psychology and biology have challenged the idea of human exceptionalism (i.e. the idea that humans are a unique animal). In study after study, things once thought to be unique to humans are found in animals (use of tools, communication of relatively complex ideas that some call language acquisition, emotions, laughter, lying, making war, etc.). This is not coming from animal rights, but from science itself. Second, technology and experiments with artificial intelligence, computers, social networking, sex-change surgery, artificial insemination, etc. have challenged us to find new ways to conceptualize thought and the body. These also challenge what it means to be human. Given that an assumption about the stability of the category "human" has been the principle anchor for all theories of politics up till now, these scientific discussions pose important problems for politics, and consequently, for political science.								
A&S	POLS	POLS	4738	The Politics of Race in Global Context	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 Hours in POLS								
				Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in POLS including 2700						
		COURSE DESC:		Race plays a central role in shaping American national identity, political institutions, and distribution of resources. Beginning with the perspective that race is central to the U.S. political order, this course pays special attention to American political, economic, and legal institutions as products and sources of racial formation. This course investigates how politics and policy continually reproduce racial inequality and difference in the U.S. context and additionally analyzes how movements for racial equality and democracy likewise shape American politics. We explore the politics of race across four topics in contemporary American politics: climatological and health crises, immigration policy, elections and voting, and policing. The course additionally emphasizes speaking and listening through student co-led roundtables designed to hone students' public speaking, presentation, and discussion-directing skills.								
A&S	POLS	POLS	4740	Sexuality and Queer Theories	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in POLS						
		COURSE DESC:		Explores intersections of gender and sexuality with other primary forms of identity including but not limited to race, ethnicity, religiosity, class and culture. Queer theorizing explored both as a critical tool and as a resource for a more transformative alternative politics.								
A&S	POLS	POLS	4751	Critical Race Theory	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Examines, analyzes, and theorizes race and racism from a critical and politicized perspective. This rich theoretical perspective points out that racism is still a pervasive part of contemporary societies, and seeks out effective ways to challenge racism's existence and impact on various groups and societies. Examines Critical Race Theory as a theoretical and political alternative for understanding and criticizing racism in contemporary settings. Critical Race Theory critiques perspectives that claim far-reaching progress has been made combating racism. Challenges students to think in new ways about contemporary manifestations of racism. Explores innovative ways to challenge the widespread prevalence of racism.								
A&S	POLS	POLS	4752	The Politics of Intersectionality	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Examines the emergence and prevalence of 'intersectionality' as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, but whose sex and class status are privileged according to societal norms and expectations.								
A&S	POLS	POLS	4753	American Whiteness	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Engages Critical Race Theory and Critical White Studies in order to better understand how 'whiteness' perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants' motivations to assimilate into whiteness, and by learning how politicians and governmental bodies have protected the interests of white Americans by inscribing white privilege into public policies. Investigates white American public opinion on political issues, their attitudes about people of color, as well as what they think about their own racial group and racial identity. Discusses the normative quality of white racial identity, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.								
A&S	POLS	POLS	4754	Black Political Thought	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Surveys various ideological traditions that have inspired the political visions and agendas of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contests. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.								
A&S	POLS	POLS	4755	Latinos and Politics	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Assesses whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of vision, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		There are few issues in contemporary politics more important than human security. There are also few forms of oppression and discrimination more important than racism. Yet, envisioning and seeing the various ways that racism leads to vast and deep human insecurity have generally been neglected as political problems and inquiries. Addresses racism and racial violence as human security issues, encouraging students to search out creative ways to reduce the varied hostile environments that emerge from racist forces.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Seeks to conceptualize, explore and explain the complex relationships between race and the creation, implementation and evaluation of public policy. First half offers overview of some dominant theories of public policy, including rational actor models, institutionalism, policy framing and agenda-setting, causal stories, and policy networks. Second, applies these theories in order to complete a more in-depth examination of policy areas that have either implicitly or explicitly institutionalized racial difference and/or disadvantage. Focus will be comparative; though substantial examples drawn from the United States and the industrialized world, also draws insights from developing contexts as necessary.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 Hours in AAS or 6 hours in POLS or 6 hours in WGS						
		COURSE DESC:		Explores multiple arenas of interracial transgressions. Explores the complexities of interracial transgressions by analyzing the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of interracial relationships, transracial contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	6 hours in POLS or (Jr or Sr)						
		COURSE DESC:		This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present: Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	POLS 2700 and WGSS 1000						
		COURSE DESC:		Explores feminist work as both a vital critical perspective and a source of alternative and transformative visions. Examines mechanisms and manifestations of patriarchy as they play out across fields of struggle--cultural, social, economic, as well as traditional political spaces. The relationship between patriarchal forms of oppression and other practices of domination--race, sexuality, class, or ethnicity based critically analyzed. Normative visions generated from feminist perspectives explored as alternatives to patriarchal orderings.								
A&S	POLS	POLS	4805	Political Science Fiction	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	9 Hours in POLS including (POLS 2000 or 2300 or 2500 or 2700)						
		COURSE DESC:		Science fiction holds a mirror to the norms, rules and institutions that exist in the contemporary political world, engaging in fundamental comparisons about the way the world is, how it came to be, and what alternatives may exist for the political future. Examining and analyzing the prominent themes and issues in these fictional worlds sheds light on past, present, and future political phenomena of our real one. The course examines works of science fiction (both literature and film) side-by-side with political analyses of a variety of topics: state- and nation-building, war and peace-building, citizenship, race, gender, bio-ethics, revolution and rebellion, the military industrial complex, capitalism and democracy. For example, fiction works that may be used in the course include Foundations, Game of Thrones, the Hunger Games, World War Z, the Handmaid's Tale, Battlestar Galactica, Star Trek, etc. Science fiction literature and film are points of departure for a more substantive focus on these and other important issues in contemporary politics.

		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:							
		COURSE DESC:		PR This course is a study of Supreme Court decisions and other public documents from the Founding to the present day. Topics will trace the development of constitutional doctrine regarding the authority of state and federal governments to regulate the economy and to protect civil rights. This course approaches the politics of constitutional interpretation with a particular focus on the generation of various theories of equality that promote social equality or limit the authority of the state to respond to social conditions.								
A&S	POLS	POLS	5015	Constitutional Politics	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:							
		COURSE DESC:		PR The United States Constitution confers authority on the various branches of government in order to empower the federal government. At the same time, the Constitution is designed to restrain public officials in their exercise of institutional power to prevent abuse of government power. In Madisonian theory, the separation of powers system works when one branch challenges another in its exercise of power. Those who challenge another may be motivated by politics or partisanship, but they couch their challenge in constitutional language. Hence 'constitutional politics' serves as conflict that is healthy for the American constitutional order. The system is in trouble when public officials fail to engage in conflict; if one branch asserts excessive power and another branch does not challenge it, then the system runs into the danger of tyranny, which James Madison defined as the accumulation of powers in one branch. Course examines historic and recent constitutional issues to assess whether each branch has lived up to its responsibility of checking the others. If any branch has been remiss, we will explore why.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Many studies of American elections are premised on the actions of individual voters (as well as potential voters and non-voters). Introduces the classics in the field of voting behavior research, along with recent studies that attempt to stand on the shoulders of these earlier works. Focuses on these two primary questions: a) why do people vote; b) how do they decide for whom to vote? One guiding concern is the issue as to whether voting behavior is self-interested or whether it reflects societal norms. Analyzes patterns of voting behavior in order to better assess American democracy and the manner in which it operates.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course focuses on how law was a central instrument of European and American colonial projects during the 19th and 20th centuries. Students explore how the imposition of colonial law affected colonized societies and their preexisting legal systems; they also examine how western fears and apprehensions vis-à-vis 'native' societies affected western law and society in turn. Academic texts as well as a sampling of novels, poetry, plays, and movies provide students points of entry for tracing how law helped establish and manage colonial projects and ideology. This course has an experiential component: students engage in archival research to increase their knowledge about colonialism; they also complete a research paper on a primary source to hone their skills in assessing who a primary source was written by, for whom, and to what end.

		COURSE DESC:		Focuses on the process of democratization in historical and comparative perspective. Topics include historical and contemporary debates over the definition of democracy and the ethics of democratic and authoritarian government; how to qualitatively and quantitatively "measure" democracy; the major theories of democratization, democratic transition, and consolidation; trends in authoritarian efforts to limit or prevent democratization; the theory and practice of institutional design in new democracies; case studies of successful and failed democratization.								
A&S	POLS	POLS	5497	Capitalism and Democracy	Seminar	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Examines the interaction between the economy and politics in a comparative context focusing on domestic issues and linkages, which in political science is called comparative political economy. Today most economies have a significant share organized along market capitalist lines, and these market capitalist economies are heavily shaped by the regime type whether democratic or non-democratic and variations within each sub-type, so comparative political economy is about capitalism and democracy or the lack thereof. Analysis takes a theoretical approach that emphasizes competing frameworks including liberalism, Marxism, and neo-mercantilism. Issues examined include welfare state politics, varieties of capitalism, market failure and the state, embedded capitalism, the role of business among others. Also examines the unique challenges facing less developed countries.								
A&S	POLS	POLS	5550	International Law	Seminar	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:

		COURSE DESC:		Studies the contribution of international law to order, power, and justice in international politics. Explores historical origins and current problems in the field, with attention to classic debates over the sources, purposes, and interests associated with international law. Places formal aspects of law (centered on the United Nations and the International Court of Justice) within the wider context of global governance, including the influence of customary international law and the work of non-governmental organizations. Discussions and readings include critical perspectives on international law as a vehicle of power in a world of inequality.

		COURSE DESC:		Studies efforts by state and non-state actors to organize and institutionalize international politics. Considers classical explanations for why states cooperate to form international institutions, and how these wield authority in a world of sovereign states. Examines the rise of non-state actors, including international non-governmental organizations (INGOs), terrorist networks, and transnational religious organizations. Specific cases discussed, including: the United Nations; the European Union, ASEAN, and other regional organizations; and various INGOs.								
A&S	POLS	POLS	5565	International Human Rights	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Studies human rights as a vehicle for moral and legal change in international politics. Considers various ways of thinking about what human rights are and how they work at the international level. With a focus on the United Nations system, the course assesses problems and debates concerning the implementation and enforcement of human rights. Addresses difficult questions such as: How well do treaties work in promoting human rights? How can human rights be enforced in the absence of higher authority? And what role do non-state actors play? Considers case studies in a variety of issue-areas, such as: the use of torture, war crimes, indigenous rights, women's rights, and the right to development.

A&S	POLS	POLS	5640	Global Humanitarianism	Seminar	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course draws upon a variety of interdisciplinary materials that examine humanitarianism as an expression of global civil society, a mechanism of global governance, and an instrument of power and politics. This course is organized around a specific set of themes intended to: (1) unsettle prevailing norms of humanitarian practice; (2) disrupt the politics legitimated by various humanitarian appeals; and (3) uncover the multitude of humanitarian sensibilities that shape social interactions across the global North and South. Throughout the semester, we explore the entanglements of humanitarianism in religious faith, aid economies, imperialism, human security, and military intervention across different contexts.								
A&S	POLS	POLS	5650	Global Media Politics	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course studies mediated communication in global politics, including both the impact of mass media on the foreign policies of states and the more recent use of social media by state and non-state actors. Readings and discussions address the role of mediated communication in public opinion, political mobilization, citizenship, identity, global justice, and democratic deliberation. The course uses historical and contemporary case studies germane to the study of international politics, including major wars, revolutionary movements, breaches of state secrecy and cybersecurity, Internet freedom, and efforts to promote global political dialogue. Students consider both tendencies of mediated communication to sow enmity and conflict and opposing trends toward universal connectivity and transnational citizenship.								
A&S	POLS	POLS	5700	Democratic Theories and Practices	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		COURSE DESC:		PR Placing contemporary democracies in both historical and comparative context, examines the relationship between legitimacy, authority, participation and voice. Central focus is the 'edges' or boundaries of democracies: is there a private realm at the edge of democracy? How is it established? What is democracy's jurisdiction? There are margins within and outside of a democratic community, where lines between insiders and outsiders are drawn and redrawn. How do location and membership shape our practices of democratic responsibility? What is the relationship between injustice and democracy?								
A&S	POLS	POLS	5705	The Politics of Rights	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		COURSE DESC:		PR There are few legal, normative, and political issues more important than the efforts and struggles surrounding rights. It could be argued that the emergence of democratic political systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and struggles. The varied origins of rights narratives will be explored, as well as the controversies over the extension and effectiveness of rights to diverse populations. Students think critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Examines contemporary political and social theories that have been critical of historically hegemonic ideas and regimes. Begins with theories that assume a relationship between knowledge and power, and also between theory and practice. Includes expansive concepts of politics that go beyond government. Theories such as Marxism, psychoanalysis, structuralism and post-structuralism, deconstruction, feminism, anarchism, animal rights, critical race theory and postcolonial theory may be examined.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Explores the intertwined character of power and resistance. In the process, gain both an understanding of forms of power and resistance in everyday life, and to use such an understanding to negotiate the power in our own lives. Also explores how power is not only prohibitive, but productive; and attempts to figure out what that means for our quests to live good lives and to experience freedom.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Political theorists are concerned with concepts of political agency. How does political action occur? Who can be political? What are the terms of political discourse? During the past 10-15 years, a "post-humanist" discourse has emerged. This has come from two main sources. First, a whole host of studies in psychology and biology have challenged the idea of human exceptionalism (i.e. the idea that humans are a unique animal). In study after study, things once thought to be unique to humans are found in animals (use of tools, communication of relatively complex ideas that some call language acquisition, emotions, laughter, lying, making war, etc.). This is not coming from animal rights, but from science itself. Second, technology and experiments with artificial intelligence, computers, social networking, sex-change surgery, artificial insemination, etc. have challenged us to find new ways to conceptualize thought and the body. These also challenge what it means to be human. Given that an assumption about the stability of the category "human" has been the principle anchor for all theories of politics up till now, these scientific discussions pose important problems for politics, and consequently, for political science.								
A&S	POLS	POLS	5738	The Politics of Race in Global Context	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.								
A&S	POLS	POLS	5739	Politics of Race	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Race plays a central role in shaping American national identity, political institutions, and distribution of resources. Beginning with the perspective that race is central to the U.S. political order, this course pays special attention to American political, economic, and legal institutions as products and sources of racial formation. This course investigates how politics and policy continually reproduce racial inequality and difference in the U.S. context and additionally analyzes how movements for racial equality and democracy likewise shape American politics. We explore the politics of race across four topics in contemporary American politics: climatological and health crises, immigration policy, elections and voting, and policing. The course additionally emphasizes speaking and listening through student co-led roundtables designed to hone students' public speaking, presentation, and discussion-directing skills.								
A&S	POLS	POLS	5740	Sexuality and Queer Theories	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:

		COURSE DESC:		Explores intersections of gender and sexuality with other primary forms of identity including but not limited to race, ethnicity, religiosity, class and culture. Queer theorizing explored both as a critical tool and as a resource for a more transformative alternative politics.								
A&S	POLS	POLS	5750	Politics and Film	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		For many political scientists and theorists, politics involves an ongoing conversation over the meaning and distribution of power in our lives. A major part of the discussions and debates are the various forms of entertainment that many times attempt to represent the world around us through film, music, and other media. Examines the diverse ways that politics, power, and film intersect and co-constitute one another. Investigates how race, sex, class, gender and other identity formations are represented in film, attempting to discern how images either perpetuate or resist dominant societal norms.								
A&S	POLS	POLS	5751	Critical Race Theory	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:								
		PR										
		COURSE DESC:		Examines, analyzes, and theorizes race and racism from a critical and politicized perspective. This rich theoretical perspective points out that racism is still a pervasive part of contemporary societies, and seeks out effective ways to challenge racism's existence and impact on various groups and societies. Examines Critical Race Theory as a theoretical and political alternative for understanding and criticizing racism in contemporary settings. Critical Race Theory critiques perspectives that claim far-reaching progress has been made combating racism. Challenges students to think in new ways about contemporary manifestations of racism. Explores innovative ways to challenge the widespread prevalence of racism.

A&S	POLS	POLS	5752	The Politics of Intersectionality	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Examines the emergence and prevalence of 'intersectionality' as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, but whose sex and class status are privileged according to societal norms and expectations.								
A&S	POLS	POLS	5753	American Whiteness	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Engages Critical Race Theory and Critical White Studies in order to better understand how 'whiteness' perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants' motivations to assimilate into whiteness, and by learning how politicians and governmental bodies have protected the interests of white Americans by inscribing white privilege into public policies. Investigates white American public opinion on political issues, their attitudes about people of color, as well as what they think about their own racial group and racial identity. Discusses the normative quality of white racial identity, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.								
A&S	POLS	POLS	5754	Black Political Thought	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Surveys various ideological traditions that have inspired the political visions and agendas of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contests. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.								
A&S	POLS	POLS	5755	Latinos and Politics	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Assesses whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.								
A&S	POLS	POLS	5756	The Politics of Visibility	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of vision, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.								
A&S	POLS	POLS	5757	Race, Violence and Human Security	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		There are few issues in contemporary politics more important than human security. There are also few forms of oppression and discrimination more important than racism. Yet, envisioning and seeing the various ways that racism leads to vast and deep human insecurity have generally been neglected as political problems and inquiries. Addresses racism and racial violence as human security issues, encouraging students to search out creative ways to reduce the varied hostile environments that emerge from racist forces.								
A&S	POLS	POLS	5758	Race and Public Policy in Comparative Perspective	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Seeks to conceptualize, explore and explain the complex relationships between race and the creation, implementation and evaluation of public policy. First half offers overview of some dominant theories of public policy, including rational actor models, institutionalism, policy framing and agenda-setting, causal stories, and policy networks. Second, applies these theories in order to complete a more in-depth examination of policy areas that have either implicitly or explicitly institutionalized racial difference and/or disadvantage. Focus will be comparative; though substantial examples drawn from the United States and the industrialized world, also draws insights from developing contexts as necessary.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Explores multiple arenas of interracial transgressions. Explores the complexities of interracial transgressions by analyzing the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of interracial relationships, transracial contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present: Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Explores feminist work as both a vital critical perspective and a source of alternative and transformative visions. Examine mechanisms and manifestations of patriarchy as they play out across fields of struggle--cultural, social, economic, as well as traditional political spaces. The relationship between patriarchal forms of oppression and other practices of domination--race, sexuality, class, or ethnicity based critically analyzed. Normative visions generated from feminist perspectives explored as alternatives to patriarchal orderings.

A&S	POLS	POLS	5805	Political Science Fiction	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Science fiction holds a mirror to the norms, rules and institutions that exist in the contemporary political world, engaging in fundamental comparisons about the way the world is, how it came to be, and what alternatives may exist for the political future. Examining and analyzing the prominent themes and issues in these fictional worlds sheds light on past, present, and future political phenomena of our real one. The course examines works of science fiction (both literature and film) side-by-side with political analyses of a variety of topics: state- and nation-building, war and peace-building, citizenship, race, gender, bio-ethics, revolution and rebellion, the military industrial complex, capitalism and democracy. For example, fiction works that may be used in the course include Foundations, Game of Thrones, the Hunger Games, World War Z, the Handmaid's Tale, Battlestar Galactica, Star Trek, etc. Science fiction literature and film are points of departure for a more substantive focus on these and other important issues in contemporary politics.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PR								
		COURSE DESC:		Political questions are interwoven throughout the discourse and practice of sustainability. Is there a difference between sustainability and sustainable development? Is environmental sustainability the paramount goal, or should natural capital be sacrificed to pursue economic prosperity and social equity? Analyzes the inherent ambiguities of the three dimensions of sustainability--environmental, economic and social sustainability--and the political challenges associated with achieving sustainability at the local, national and global scales.

		COURSE DESC:		Sustainability challenges of the 21st century require us to meet the needs of the present while safeguarding Earth's life-support systems on which the welfare of current and future generations depends. These challenges call for the reinvention of citizenship. Conventional models of citizenship are inadequate for tackling the social, economic, and environmental dimensions of sustainability problems; do not match the realities of social-ecological systems; and provide little guidance for addressing equity within and between generations. In this multidisciplinary course students will investigate changing citizenship norms; the core principles of sustainability citizenship; and the practice of sustainability citizenship in the private and public spheres from the local to the global levels.

		COURSE DESC:		Choices and Happiness synthesizes research from different areas of psychology and related fields (e.g., marketing, economics, nutrition) addressing our quest for happiness within an imperfect cognitive decision making system. The course elucidates judgment biases and errors that prevent us from making better life decisions, from poor food choices to the perils of overusing social media. Choices and Happiness is a deep exploration into the science of self-control, goal attainment, and maintenance.								
				Students explore facets of problematic decision making such as planning fallacies, procrastination, and multi-tasking. Research in the psychology of judgment touches upon judgment fallacies that contribute to unhealthy life patterns in many areas, such as erroneous beliefs about the costs of eating nutritious foods. The class uses a decision architecture approach to address the development of systems that enhance well-being in different life domains.

		ELIGIBLE GRADES:		GEC4: A-F, REQUISITE: PSY 6310 CR, PR								
		COURSE DESC:		An in depth discussion on the nature of concepts, concept learning, and categorization behavior in humans and non-human animals. The prominent paradigms on the nature of concepts (e.g., concepts as rules, exemplars, prototypes, boundaries, and structures) will be discussed in detail in light of key empirical findings in the human and non-human animal categorization literature. The major competing models, such as the context model, GCM, ALCOVE, MPM, CIM, and MINC will be compared and contrasted in the context of other cognitive facilities such as attention, similarity assessment, discrimination, perception, and memory.

		ELIGIBLE GRADES:		GEC4: A-F, REQUISITE: PSY 6310 CR, PR								
		COURSE DESC:		Formal modeling is an essential research tool in cognitive psychology and cognitive science. In this seminar we shall discuss and critically evaluate a wide variety of key formal models and modeling approaches to cognition (e.g., algebraic, geometric, analytic, qualitative, statistical, probabilistic, computational, connectionist, dynamical, structural, and process). We shall do this with three goals in mind: 1) to become aware of the wide range of modeling techniques at our disposal, 2) to achieve a basic understanding of these techniques and the modeling process in general, and 3) to get us to start thinking strategically and analytically about how to construct an effective formal model (i.e., one that predicts and explains our empirical results). Discussions will assume no previous modeling background.								
A&S	PSY	PSY	7510	Advanced Social Psychology	Seminar	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PSY 6310 PR								
		COURSE DESC:		The main goal of this course is for graduate students to gain expert knowledge about the psychology of social psychology, including social cognition, social relationships, and social behavior. This will be accomplished via lecture, and through reading classic and contemporary works in this area. One manifestation of students' mastering the material is their ability to take over the class for an hour and lead a class discussion on a selected topic. A final paper is required to demonstrate their mastery of the material; this involves either a critical review of one of the topics covered in the course or a research proposal on the topic. Upon completion of the course, students should be in a position to design research related to the psychology of social psychology and should also be able to teach this material to undergraduates.

		COURSE DESC:		Survey of traditional and current theories of motivation. Focus on older learning theories from the classical, operant and observational learning perspectives, and update these with more current thinking on cognitive processes. Integrate older findings with current research on goals. Discuss practical ways to increase motivation in specific areas.								
A&S	PSY	PSY	7621	Organizational Psychology: Organizational Behavior	Seminar	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC4: A-F, REQUISITE: CR, PR								
		COURSE DESC:		Individuals are complex systems behaving within complex organizational systems. This course will explore in depth the motivational, affective, and cognitive subsystems of humans, and how they are affected by and affect leaders, groups, and organizations. Attention will be paid to understanding the operation of the systems and the consequences of applications and interventions on these systems. The boundaries of the field's knowledge of these issues are explored and students are expected to describe how they could add to the field's knowledge store either empirically, theoretically, or both.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	9 hours in (ENG or PSY) and Sr only						
		COURSE DESC:		Human responses to war are examined both from the subjective perspective of creators of literature of war and from the objective perspective of psychologists who study individual and group behavior in times of conflict. Topics include the nature of individual and organized aggression, perception of the enemy, disillusion and disenchantment, obedience to authority, the irony of war, victimization, and alternatives to war.

		COURSE DESC:		The overall objective of this course is to address how membership in specific social identity groups including ones that are based on the social categories of race, gender, sexuality, religiosity, socioeconomic status as well as others is related to physical and mental health. This course will provide an interdisciplinary framework for understanding the relationship between health and social identity group memberships. The disparities that exist in health status for many groups will be explored as well as how factors such as microaggressions, prejudice, stigmatization, poor access to and barriers to care as well as policies contribute to these disparities. Concurrently resiliency factors and intervention strategies to reduce such disparities will be reviewed.

A&S	SOC	ANTH	1010	Introduction to Cultural Anthropology	Lecture	3	0	2CP; ACNW; FIE	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				Students learn about the core concepts used in cultural anthropology and how anthropologists study human cultures and societies. Consideration is given to the relevance of anthropological theories, methods, and ethics in the context of contemporary culture change, taking into account processes of colonialism, globalization, and development. Students gain an appreciation of the broader goals of cultural anthropology to record cultural patterns and behaviors, represent a variety of voices and perceptions, explain cultural processes, and demonstrate a fundamental understanding of human diversity.								
A&S	SOC	ANTH	2010	Introduction to Biological Anthropology	Lecture	3	0	2NS; ANW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				This course covers topics on human evolution and modern human diversity, focusing on humanity's biological roots and modern appearance. To understand the present human physical and social condition, we must understand our evolutionary past. This course reconstructs this past utilizing data from the primate fossil record as well as comparative evidence from modern monkeys and apes. This is a science course based on evolutionary biology. At the end of the course, students will better understand where humans fit into the animal kingdom, as well as how those characteristics that make humans unique may have evolved. The course addresses: the place of humans within the mammalian evolutionary lineage; evolutionary theory; human population genetics; behavior of monkey and apes; and human evolution and modern human diversity.

				This course approaches photography and film as modes for representing and interpreting culture. The course examines the genre of ethnographic cinema and its relationship to wider discussions about documentary and nonfiction film. The course also considers the place of the photo essay in anthropological scholarship. Building on this dual foundation, students apply theories and methods from visual anthropology to produce a multimodal (visual and verbal) ethnographic essay with a clearly defined visual approach. Combining photography and ethnography, students generate primary-source images to anchor an original social analysis through careful and critical attention to the ethics and politics of images in anthropological research and representation.

		COURSE DESC:		This course approaches photography and film as modes for representing and interpreting culture. The course examines the genre of ethnographic cinema and its relationship to wider discussions about documentary and nonfiction film. The course also considers the place of the photo essay in anthropological scholarship. Building on this dual foundation, students apply theories and methods from visual anthropology to produce a multimodal (visual and verbal) ethnographic essay with a clearly defined visual approach. Combining photography and ethnography, students generate primary-source images to anchor an original social analysis through careful and critical attention to the ethics and politics of images in anthropological research and representation.

		COURSE DESC:		This course explores the complexity of contemporary social problems and the claims-making process through which scientists, journalists, activists, politicians, and agents of other media forms identify, contest, and seek solutions for social problems in everyday life. Special attention is paid to the ways in which claims-makers and social movement architects socially construct arguments by drawing on data sources and using strategic rhetorical styles to influence audiences. The causes and consequences of these definitional processes are examined using multiple social problems.								
A&S	SOC	SOC	2020	Exploring Careers in Sociology	Lecture	2	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course helps students explore career paths in a broad array of fields relating to sociology, sociology-criminology, and sociology-prelaw. Sociological training prepares students for a wide variety of career options, and many organizations--corporate, non-profit, and public--rely on social science research methods to assess goals and operations, solve workplace problems, improve information-gathering processes, design and implement policy, locate and apply for grants, and to increase market share. Sociology majors are well equipped to evaluate problems holistically, analyze the risk and benefits associated with decision-making, and implement changes that improve systemic outcomes. In SOC 2020, students assess their skills, explore professional interests, forge network contacts, learn about grants and grant writing, and learn how to document and communicate their sociological training and expertise in ways that employers find valuable. Students also learn about opportunities for advanced study in graduate programs or law schools, and explore and practice skills needed for successful application to these programs.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course explores how people collectively give meaning to social situations, and how people's thoughts, feelings, and behaviors are influenced by the actual, imagined, and implied presence of others. Topics include reality as a social construction; processes of socialization; the role of social interaction, language, and reference groups in the development of the self; how norms, identities, values, roles, and situations influence the individual; emotional labor and how individuals negotiate stigmatized social identities; and social psychological dynamics in relation to race, gender, class, and sexualities. Students will use critical thinking to analyze and evaluate collective constructions of meaning and their own social identities and perceptions of situations.

A&S	SOC	SOC	2200	Introduction to the Family	Lecture	3	0	ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course examines the family system in the United States and across cultures, including the ways family structures both reinforce and challenge gender roles. Sociological and gender-based theories of the family are explored as well as the complex relationships among marriage, parenting, work, and family. Students use critical thinking and ethical reasoning to investigate these relationships and consider issues of family policy. Varieties of family experience are considered, with special attention given to issues concerning competing definitions of the family.								
A&S	SOC	SOC	2300	Social Inequalities and Social Change	Lecture	3	0	2SS; ACNW; FIE	N	U30		25
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course is a comprehensive survey of the sources, meaning, and consequences of social inequality in its multiple forms including age, class, gender, poverty/wealth, race/ethnicity, sexuality, and spatial dimensions. The course connects these forms to social change processes that can be both a source of and solution to inequality. Whether it is collective action, culture, development, the environment, globalization, population, social institutions, or social structure, social change has many sources, providing an arena for social inequality to play out and intersect in its various forms. In its breadth the course promotes critical analysis of the dynamics and presence of social inequality and social change in the larger society and everyday lives of students. Using a social injustice framework and an informed sociological imagination, the course is intended to prepare students for additional study in more focused and advanced topics in inequality.								
A&S	SOC	SOC	2310	Sociology of Health and Health Care	Lecture	3	0	ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course uses a sociological perspective to explore issues of health, illness, and health care among diverse populations in contexts of social inequality. It examines social and cultural patterns of health and illness, the influence of the social environment on health behavior, social inequality and health status, medical education, the social organization of health care delivery in the United States, comparative health care delivery systems, complementary and alternative medicine, emerging social issues raised by new medical technologies, and health care policy. Students use critical thinking and ethical reasoning to evaluate and address inequalities in the practice of United States health care, including disparities in health care delivery, power dynamics in the physician-patient relationship, the ethical obligations of physicians, and discrimination in health care practice based on class, gender, race, and sexualities.								
A&S	SOC	SOC	2330	Sociology of Sport	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: SOC 1000								
		COURSE DESC:		A sociological examination of sport in the United States and its social organization as a major American institution. The course will examine the nature of sport, its social functions, and attempt to situate it in the wider contemporary and historical context of our society. Focus on topics such as: sport and socialization, violence/deviance in sport, sport and academic institutions, gender and race in sport, and the business of sport.								
A&S	SOC	SOC	2380X	Global Social Change	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		What is driving global social change? How does social transformation occur? This course uses the tools of sociology to explore the complex ways that contemporary politics, economics, culture, technology, and protest movements are transforming our increasingly interconnected world. We begin by exploring how theories and research from sociology and related fields can help us make sense of these important global changes. We then turn to explore the dynamics of social change from five different perspectives, including politically-driven change, economically-driven change, culturally-driven change, technology-driven change, and change driven by popular global protest and social movements. Along the way, we will consider a wide range of social issues and urgent social problems, including the effects of neoliberalism, the politicization of COVID-19 and other epidemics, the interplay between religion and law, how social media is transforming civic engagement, and movements for gender recognition and equality. Our course concludes by considering new forms of social movements that call for innovative solutions to the challenges of our changing global world.								
A&S	SOC	SOC	2400	Breaking the Law	Lecture	3	0	2SS; ACNW; FIE	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This interdisciplinary course explores central questions about law, crime, justice, social change, human rights, globalization, and technology in the new global era. The dominant global forces that have defined the 21st century have massively transformed law and legal frameworks, at both local and global levels. How is violence enacted through law, and how is law's violence resisted, challenged, and overcome? What is law's role in relation to patterns of discrimination and marginalization that produce social suffering and vulnerability? In relation to global human rights regimes and international justice mechanisms? In relation to inequalities in access to health care and other basic human goods? How are our understandings of our own bodies, lives, and futures shaped by law?

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	SOC 1000						
		COURSE DESC:		This course examines the structures and decision processes of agencies that deal with crime and people involved in the United States criminal justice system, including criminal justice personnel, people apprehended and convicted of crimes, and victims of crimes. An emphasis is placed on how criminal justice practice is based on politically derived public policies and the use of discretion by criminal justice personnel. Students use critical thinking and ethical reasoning to analyze the practice of these agencies. Topics include but are not limited to criminal law, policing, court systems, sentencing, and corrections.								
A&S	SOC	SOC	2610	Deviant Behavior	Lecture	3	0	ACNW	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Examines theory and research concerning the social processes through which behaviors and statuses come to be defined as deviant, individuals become identified as deviants, and social control practices are directed toward perceived deviants. Also investigates how individuals and groups manage deviant labels, embrace deviant identities, and use deviant behavior to challenge social norms and produce social change. Case studies of specific forms of deviant behavior, including criminality, substance abuse, and mental illness, will be explored.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	SOC 1000						
		COURSE DESC:		This course explores the gendered nature of crime and criminal justice in the United States from a sociological perspective. Students investigate gendered pathways into criminal offending; gendered patterns and behaviors of offending and ceasing offending; gendered patterns and behaviors of victimization; gendered organization, behaviors, and experiences of policing, prosecution, punishment, and incarceration; and gendered work, behaviors, and representation within justice professions. The course employs sociological theories and methodologies that emphasize the social construction of gender, social structure and social inequality, and the intersections between gender, sexuality, race, class, and age.

		ELIGIBLE GRADES:		GEC1: A-F				REQUISITE: 6 Hours in SOC including 1000				
		COURSE DESC:		This course explores the causes and consequences of inequalities in power, privilege, and opportunities, which characterize the class structure of most societies. Students investigate how social forces shape where people are positioned in society and what resources they have access to. Students also consider how other social positions, including race, ethnicity, nationality, religion, gender, and sexual orientation, work together with class to create intersecting systems of oppression and privilege. Students analyze the role of ideology and contemporary media in legitimizing and sustaining unequal treatment, and explore how social inequality shapes their own lives and opportunities. Students evaluate the role of social movements and public policy efforts to address inequality and create lasting structural change.

		ELIGIBLE GRADES:		GEC1: A-F				REQUISITE: 6 hours in SOC including SOC 1000				
		COURSE DESC:		Access to Justice examines how structural inequalities lead to regional, national, and global justice gaps. The course investigates needs and problems confronted by communities; disparities in access to information and legal resources; how groups perceive and employ the justice system; representation and inclusion within the legal profession; and the attainment of substantively just outcomes. The course then explores strategies to address these concerns, including approaches traditionally employed by the legal profession and innovative legal, social, technological, and architectural solutions designed to bridge gaps between communities and justice.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE: 6 Hours in SOC including 1000								
				In this course, students investigate immigration in the United States and around the world. Students first explore the history of sociological research on immigration to the United States, as well as the sociological theories that help us understand why people migrate to other countries. We then consider diverse topics such as settlement patterns, education, identity, language, the second generation, religion, and integration. Students apply these topics to issues of public policy, addressing the shortcomings of past and present policies and considering potential future solutions based on social science research. Finally, students explore the challenges of global migration, especially in relation to social stratification.

		COURSE DESC:		REQUISITE: SOC 2600								
				This course invites students to combine sociological reasoning with ethical theory to analyze and respond to ethical concerns prevalent in the practice of law, criminology, and criminal justice. Sociological reasoning allows students to analyze the contexts in which ethical problems arise and assess the impact of social inequality and institutional discrimination. Ethical theory provides frameworks for decision-making and evaluating appropriate responses to situational dilemmas faced by policy-makers and justice practitioners. Topics explored will include ethical issues in the making of law and public policy and ethical decision-making by actors practicing in justice institutions. Students will investigate contemporary cases of judicial misconduct, police brutality, treatment of prisoners, and the use of experimental drugs in executions, among many other topics.

A&S	SOC	SOC	5325	Access to Justice	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				Access to Justice examines how structural inequalities lead to regional, national, and global justice gaps. The course investigates needs and problems confronted by communities; disparities in access to information and legal resources; how groups perceive and employ the justice system; representation and inclusion within the legal profession; and the attainment of substantively just outcomes. The course then explores strategies to address these concerns, including approaches traditionally employed by the legal profession and innovative legal, social, technological, and architectural solutions designed to bridge gaps between communities and justice.

A&S	SOC	SOC	5640	Law in Societies	Lecture	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC4: A-F,								
		COURSE DESC:		REQUISITE:								
				CR, PR								
				Explores the fundamental roles that law plays in organizing contemporary social life. Considers various ways of understanding law's complex presence: how law shapes and enables routine social interaction, how law constructs differences among people and their actions, how law mediates and enforces power relationships, and how law matters for the kind of societies we have. Our inquiries will examine official legal institutions and actors, but the class will emphasize how law works as a complex array of norms, symbols, discourses, and practices that infuse and shape all aspects of social life, from everyday social interaction to social movements and official legal institutions and actors. The course draws from the U.S. experience as well as historical, international, and transnational perspectives.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	ACCT 3040						
		COURSE DESC:		This course covers the analysis of data as it pertains to accounting professionals. The focus of this course includes both analytic techniques for decision making and the examination of big data involving accounting information. Hands-on experiences develop skills with select software tools used in data analytics for accounting professionals. This course challenges students to think critically about whether and how data improves business performance, creates opportunities, and/or creates risks. In-depth discussion and skill development is concentrated on analysis and use of the data acquired. Students gain experience with the technology used for data analysis in the accounting profession. Project-oriented computer-based assignments are used in this course to enhance a student's knowledge and skills. Please keep in mind that this is not a computer course. However, it does require extensive use of the computer as a tool.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: QBA 1720 or 1721 or 2010								
		COURSE DESC:		Business Analytics is the use, analysis, and interpretation of data to drive decision-making. This course teaches students how to apply problem-solving processes to a variety of business situations, think critically and analytically, and understand how to analyze the internal and external environments of business organizations. Students in this course gain an understanding of how analytical methods are used to help to manage today's organizations. In addition, students use software that is commonly used in business to summarize and make inferences about data in order to support decision-making through data analysis.

		COURSE DESC:		Modern businesses can benefit by analyzing information stored within datasets. Predictive analytics is a form of analysis that aims to discover trends or patterns within datasets. The mathematical relationships that are found are used to make proactive, future-based, data-driven decisions. Predictive analytics is an important field of study because techniques that are used can find complex relationships that experts may overlook, or may not know at the time of the analysis. This course covers a variety of predictive analytics techniques and theories from the viewpoint of various business applications. To achieve the course learning objectives, students utilize software tools that are commonly used in business to develop, test, and apply continuous, classification and clustering models.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: Admission to MBA program PR								
		COURSE DESC:		Students are asked to view organizations from the perspective of the top management team. In particular, the course will address approaches to assessing the organization, analyzing its context, and setting an effective overall direction for it.								
COB	MGT	MBA	6390	Predictive Analytics	Lecture	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: Admission to COB graduate or certificate program or permission PR								
		COURSE DESC:		Predictive analytics encompasses a variety of statistical and machine learning techniques and applications within business environments. The primary goal of this course is to discover and apply relationships found within historic datasets in order to make predictions about the future or otherwise unknown events. In this hands-on course, students are introduced to concepts related to constructing, testing, and applying predictive models in various business settings. From this perspective, students utilize software tools in order to conduct an analysis of continuous, classification, and clustering models.								
COB	MGT	MBA	6395	Business Intelligence	Lecture	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: Admission to COB graduate or certificate program or permission PR								
		COURSE DESC:		This course provides a broad overview of business intelligence and data management including database fundamentals, business intelligence approaches, data management/data governance strategies, data mining and other business/data analytics techniques. Our primary emphasis will be on the managerial perspective, focusing on how you can design, implement and leverage business intelligence systems and strategies in a management role.								
COB	MGT	MBA	6400	Sales Leadership	Lecture	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Admission to COB graduate or certificate program or permission								
		COURSE DESC:		The course gives students a complete picture of the scientific principles and issues revolving around the management of a field sales force regionally and internationally. Accordingly, the course deals with discussing the sales function and its relationship with a firm's marketing program, crafting a sales strategy, and setting sales objectives. It also focuses on performing important decisions such as recruiting, hiring, training, compensating salespeople, and implementing a sales program. Cases based on real-world situations and a sales management simulation are employed so that students practice applying tools and frameworks in their own decision-making processes.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: MBA 6395, 6420, and Admission to College of Business graduate or certificate program								
		COURSE DESC:		Data is often either structured or unstructured. Unstructured data presents a challenge because standard techniques commonly used in business analytics cannot be used to discover meaningful patterns, relationships, and other insights that could be useful when solving business problems. In this course, students learn advanced techniques while using software that commonly used in practice in order to overcome the problems associated with unstructured data.								
COB	MGT	MBA	6500	Sales Analytics	Lecture	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Admission to COB graduate or certificate program or permission								
		COURSE DESC:		The course focuses on building hard/quantitative skills sales professionals need in order to make decisions both inside their firm and at the customer interface. Specifically, the course builds skills in the areas of strategic account identification/selection, calculating customer-centric metrics such as customer lifetime value (CLV), customer risk analysis, customer acquisition and retention metrics, sales forecasting and opportunity management, performance analysis, sales resource allocation, and analyzing and evaluating sales territories. Students use datasets and software to make decisions about important problems sales professionals face in their work. Cases based on real-world situations are also employed so that students practice the application of theoretical knowledge.								
COB	MGT	MBA	6525	Ethics in Leadership	Seminar	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: Admission to COB graduate or certificate program or permission								
		COURSE DESC:		Provides students with an introduction to key concepts related to business ethics, placing a special emphasis on issues that arise in the global environment. Important decision-making frameworks are introduced, and the strengths and weaknesses of these frameworks are discussed. Cases based on real-world situations are employed so that students can practice applying ethical frameworks in their own decision-making processes.								
COB	MGT	MBA	6560	Analytics for Executives	Lecture	3	6		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: Admission to COB graduate or certificate program or permission								
		COURSE DESC:		This analytics course is designed for today's business executive seeking competitive advantage through leveraging analytics across the organization. Students will adopt the executive's vantage point as they address progressing an organization through analytics maturity as well as making the most effective investments in people, data, systems, and organizational structure. Planning the analytics project lifecycle, developing a data-driven culture, personnel management, and opportunity identification will be addressed. Students will prepare to harness analytics from the executive point of view within the context of application from corporate to non-profit organizations.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Admission to MBA program								
		COURSE DESC:		New Venture Planning is designed to engage MBA students in a process of ideation, business model generation, market validation and venture pitching. The course begins by engaging students in a process of ideation. During this step in the process the class is introduced to a range of different ideation techniques and uses them to generate a large number of venture opportunities. Ideas generated go through a screening process and teams are formed around the leading venture ideas as assessed by the class. Teams are then introduced to the business model canvas and then develop initial business models for their ideas. Next, student teams in a "lean launch" process. During this stage teams engage in validation research to confirm and amend their initial business models and provide supporting customer and other validation for their intended approach. Finally, student teams develop their pitches, trade shows, pitch decks and other materials and engage in a "shark tank"-like competition to propose their ventures to prospective investors. The class is a "learning by doing" and "problem-based learning" class. Students are expected to engage on a full-time basis for the duration of the class and the class is designed to give MBA students an accelerator-like experience.

		COURSE DESC:		In this course, students apply descriptive, predictive, and prescriptive analytics to support decision-making within a competitive business environment. Throughout the course, students compete in a simulation that is based on the manufacturing industry. While competing in this environment, students generate and collect data from the simulated environment. With this data, students are asked to apply a variety of analytics in order to support decisions that are made within the simulation. Students present their analytical findings to their teammates and the team has the option of using the results of the analysis to augment their decisions within the simulated environment. Based on the nature of the simulated environment, students are able to view and reflect upon the results of their strategic and tactical approaches that they took within a competitive business environment.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course is for entrepreneurs building the courage to create, and risk making mistakes in their quests for true innovations in products, services or processes. You will solve problems in uncertain and dynamic environments. Creativity is the central focus, which might be defined as applying your mental ability and curiosity to discover something new, the act of relating previously unrelated things. More specifically, we focus on capitalist creativity. This means that we must apply a Business Model framework to your creativity. We demand that your solutions be profitable (have a potential to be profitable) and reflect bottom-line practicality. More importantly they must create value. We provide challenging places to fully engage your brain to discover patterns to produce breakthrough ideas that solve business problems.								
COB	MGT	MGT	3780	Lean StartUp Accelerator	Seminar	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course provides real world, hands-on learning on the process of actually starting a company, applying the Lean StartUp methodology. Our goal, within the constraints of a classroom and the time available is to create an entrepreneurial experience with all of the pressures of an early stage start-up. The class is designed to give you the experience of how to work as a team and turn an idea into a company. You will talk to customers, partners and competitors as you encounter the uncertainty of the start-up process. You will practice evidence-based entrepreneurship as you learn how to use a business model to brainstorm each part of a company and customer development to get out of the classroom to see whether anyone other than you would want/use your product or service. Finally, based on the customer and market feedback you have gathered, you will use agile development to rapidly iterate your product or concept to build/design something customers would actually buy and use. Completion of this course is necessary for teams who wish to compete for admission to Ohio University's Innovation Engine Accelerator mentoring program, grant and investment funding opportunities via TechGROWTH Ohio and admission to other mentoring and funding opportunities designed to help start ventures at Ohio University.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MGT 5001 or concurrent								
		COURSE DESC:		This course examines the principles of judgment and choice in the face of uncertainty. Students are introduced to normative (i.e., how best to decide) and behavioral decision making (i.e., how do we decide). The latter approach recognizes that people use various tricks (i.e., heuristics) that simplify cognitive processing. While these serve well in some instances, they may also become traps that lead to poor results in others. Extensive study of bias helps students to recognize these tendencies and become better decision makers following a third approach known as prescriptive decision making (i.e., how should we decide).
