The course emphasizes the creative process over the final project, developing awareness of how mindfulness informs the creative process. Students cultivate creative collaboration and critical analysis by analyzing a work of art in teams. They research the historical and cultural context of the work and devise a short group project based on their findings. Readings might include texts by Anne Bogart, Chogyam Trungpa, John Cage, Mihaly Csikszentmihalyi, Dr. Kabat-Zinn, Sharon Salzberg, Julia Cameron and Liz Lerman's Critical Response Theory. FAR	THAR	THAR	2140C	Theater in Education GEC1: A-F REQUISITE: This is an experiential-participatory class that includes a pedagogical and service-learning component. Students will learn fundamental acting techniques, improvisations and theater games appropriate for the elementary school population. We explore methods that cultivate the imagination, creative collaboration, and the expressive use of body and voice toward developing story and character. We align each exercise with specific learning outcomes, and have the opportunity to apply those learned teaching skills in educational and outreach settings. Elements of production are introduced (material, venue, design, fundraising and marketing), and applied to organizing an informal public performance. The class revolves around the transformative power of theater, and how it can enrich lives and support curriculum.	Studio	3	0	2FA	N	U30		0
FAR	THAR	THAR	2150	Performing Patient Care: Immersive Healthcare Theater GEC1: A-F REQUISITE: This course equips students enrolled in healthcare-related majors with skills in patient communication and advocacy necessary to work professionally in the 21st century. Through exercises in improvisation, active listening, and scene work, this course helps future healthcare professionals develop their human-centered, social competencies, including empathy, compassion, and cultural humility. 		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		The capstone course is designed to identify and implement the core competencies in clinical and translational research defined by the National CTSA consortium. Key thematic areas will be covered in a seminar format and each student will engage in a capstone experience that involves applying these competences to a relevant problem in translational biomedical sciences from first a disciplinary and then from an interdisciplinary perspective. Since the course also aims to improve the ability to communicate, the capstone project will be presented both as a written report with recommendations, and as an oral presentation.

GVS	ES	ES	4610	Resilience Theory and Practice	Lecture	3	0		N	U30		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Resiliency has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications.								
GVS	ES	ES	4630	Climate Change Mitigation, Adaptation and Resilience Policy	Lecture	3	0		N	U30		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: This course introduces students to the study of climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gas emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors.								
GVS	ES	ES	4640	Risk, Climate Security, and Community Engagement	Lecture	3	0		N	U30		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Climate change and other rapid environmental changes create risk to communities, infrastructure, and human security; managing these climate-related risks requires understanding of the community, its risk perception, and collaborative communication and management planning. Students characterize risk to communities from climate change and explore risk perception theory and methods to manage threats to human security. Students discuss concepts of justice and equity in risks to human security, risk management, and communication. Students explore these particular climate change and environmental challenges through the multidimensional and interdisciplinary lens of human security.								
GVS	ES	ES	4710	Bioenergy: Science, Policy, and Business	Lecture	3	0		N	U30		0
				ELIGIBLE GRADES: GEC1: A-F								
				COURSE DESC: Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land managements, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems.

GVS	ES	ES	6850	Capstone: Resilient Infrastructure and Communities ELIGIBLE GRADES: GEC1: A-F REQUISITE: COURSE DESC: Resilience theory has emerged as an approach for understanding how systems are able to thrive through rapid, often unexpected change. Managing for resilience is key in preparing for some of the greatest challenges that society faces including climate change, globalization, and rapid urbanization. In this capstone, students analyze the risk and vulnerability of a community, organization, or infrastructural system to unexpected change and develop strategies to improve the community or organization's resilience. Students critically evaluate the resilience preparation at a local, state, regional, and national level to highlight both best practices and lessons learned. They then select a system in which they are most interested; infrastructure, urban centers, community plans, ecological systems, organizational, and others. Students engage with organizations and communities to develop a resilience plan for that system with a focus on improving sustainability, human security, and resilience.	Lecture	3	0		N	G40		0

		COURSE DESC:		Entrepreneurship education, in the sense of focusing on the creation of new economic entities centered on a novel product/service, has been, until recently, relatively rare. At Ohio University, a pedagogy has been developed focused on inter-disciplinary team-based projects that result in new venture formation and long-term success for the newly-founded companies and the University that developed the research and technologies which are the basis for many of the companies. The curriculum is structured such that students from the disciplines of science, medicine, engineering, communication, and business can be engaged and participate.

An overview of the relevant implementation factors and processes necessary to transmit innovative programs and practices to mental health, social services, juvenile justice, education, early childhood education, employment services, and substance abuse prevention and treatment.								
GVS	GVS	MPA	5660	Strategic Communication and Outreach for Non-Profit Management	Lecture	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		A communications plan is an important part of an organization's daily operation. Additionally, for public and nonprofit organizations in particular, the activities in the plan should support overall communications goals in ways that help raise money, create change, recruit talent, and promote mission-related goals and objectives. As a living document, it frames the way both internal and external audiences perceive the organization; and since many nonprofits have limited staff and financial resources available for communications activities, it is even more important that these resources be deployed as strategically as possible. This course offers an overview of communications concepts and media activities in ways that will help students develop a strategic communication plan focused on emphasizing a commitment to organizational mission; building trust among internal and external audiences; clarifying organizational priorities; and generating public value.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: C or better in EXPH 2280								
		COURSE DESC:		This course is intended for individuals who have been certified in first aid, cardiopulmonary resuscitation (CPR) and automated external defibrillation (AED) use. The topics covered in this course will include a review of the skills and knowledge of first aid, CPR and AED. Re-certification will be issued for successfully passing all components of the course.								
HSP	AHSW	EXPH	3200	Biomechanics	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: C or better in BIOS 2030 or (3010 and 3015)								
		COURSE DESC:		This course provides an understanding of basic biomechanical principles. This is an introduction to Biomechanics, and will cover such topics as basic kinematics, basic kinetics, biomechanics of human motion at different sites in the body, linear kinematics, angular kinematics, linear kinetics, angular kinetics, and human motion in a fluid medium.								
HSP	AHSW	EXPH	3205	Biomechanics Laboratory	Laboratory	1	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: EXPH 3200 or concurrent

		COURSE DESC:		REQUISITE:	IHS 2210 and HLTH 4200							
				This course introduces different approaches to health systems strengthening in low and middle income countries (LMIC), including monitoring and evaluation, continuous quality improvement, community health workers, health workforce development and research capacity building. A case based approach is used to evaluate the extent to which health systems address health equity in a sustainable manner. Students explore how transdisciplinary research can convert health research to action and policy. The class examines contextual and cultural explorations of different LMIC settings that act as facilitators and/or barriers for high performance in LMIC settings.

		COURSE DESC:		This course is designed to provide students with an in-depth study of American Deaf culture and the American Deaf community from the multidisciplinary perspective. It is an introduction to topics such as cultural identity, core values, group norms, communication, language as well as significant contributions made by Deaf people to the world community. Designed for students who may or may not have had any previous experience or exposure, this course will answer some of the most commonly asked questions about the Deaf community and its rich culture. Views and perspectives of and from the Deaf community will be explored along with the implications of cultural differences when the Deaf and hearing worlds overlap. The oppression experienced by the Deaf community and the impact hegemony has had on the attitudes, values, and beliefs of both the hearing and D/deaf community will be examined.

HSP	RCS	HSLS	6410	Dysphagia GEC1: A-F REQUISITE: COURSE DESC: Basic knowledge of normal and deviant swallowing disorders due to neurological and structural impairments. Major topics include assessment and management of the wide range of swallowing disorders managed by speech-language pathologists.	Lecture	3	0		N	G50		0
HSP	RCS	HSLS	6520	Experimental Phonetics GEC1: A-F REQUISITE: COURSE DESC: Speech communication involves the generation of sounds by a speaker from some internal linguistic representations and the interpretation of sounds by a listener. Explores how linguistic representations are implemented by the speaker to generate sounds and how the acoustic signal is perceived by the listener to uncover linguistic representations.	Lecture	3	0		N	G50		0
HSP	RCS	HSLS	6730	Diagnostic Audiology GEC1: A-F REQUISITE: COURSE DESC: Presents fundamental and advanced audiological procedures for the diagnosis of conductive, cochlear, and eighth nerve disorders of the auditory systems. Lab experiences will provide hands-on experience with current test protocols and equipment.	Lecture	3	0		N	G50		0
HSP	RCS	HSLS	6731	Advanced Diagnostic Audiology GEC1: A-F REQUISITE: HSLS 6730 COURSE DESC: Presents advanced audiological procedures for the differential diagnosis of auditory disorders including those of the central auditory system and facial nerve as well as procedures for constructing and evaluating assessment protocols. Lab provides hands-on experience with current test protocols and equipment.	Lecture	3	0		N	G50		0
HSP	RCS	HSLS	6740	Hearing Aids GEC1: A-F REQUISITE: HSLS 6730 and 6770 COURSE DESC: Fundamental aspects of hearing aid form, function, fit, and verification are introduced. Topics germane to hearing aid dispensing such as counseling, prescriptive gain, fitting strategies, programming, and trouble shooting are discussed and practiced.	Lecture	3	0		N	G50		0
HSP	RCS	HSLS	6749	Electrophysiologic Assessment GEC1: A-F REQUISITE: HSLS 6730 COURSE DESC: Electrophysiologic measurements applied to human auditory system function focused on the use of auditory evoked potentials.	Lecture	3	0		N	G50		0

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Provide students with current knowledge about the primary theoretical positions about specific language impairment (SLI) in children. The seminar examines the different theoretical assumptions underlying various models of SLI and evidence supporting each model.								
HSP	RCS	HSLS	8964	Advanced Topics in Auditory Prostheses	Seminar	3	0		I	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Provides overview of basic research and its clinical implications in cochlear implants and other auditory prostheses including intraneural implants, auditory brainstem implants, midbrain implants, and optical stimulation of auditory neurons. Discusses clinical issues with cochlear implants. Provides experience and troubleshooting with the newest hardware and software used in clinical cochlear-implant programming.								
HSP	RCS	HSLS	8965	Single Subject Research in HSLS	Seminar	3	0		I	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Provides students current knowledge about the value and importance of a range of single subject research designs in Hearing, Speech, and Language Sciences. Seminar is reading intensive. Students will facilitate and participate in roundtable discussions regarding the types of single-subject designs and the threats to reliability and validity associated with different single subject designs.								
HSP	RCS	HSLS	8966	Beginning Communicators	Seminar	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Provides current knowledge about the development of communication skills of very young children as well as the assessment and intervention of early communication deficits.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Provides students current knowledge and issues related to reliability and validity of contemporary issues in augmentative and alternative communication. Students will describe challenges related to subject selection in AAC research.								
HSP	RCS	HSLS	8968	Grant Writing in HSLS	Seminar	3	0		I	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Provides students with information about the importance of grantsmanship as a core ability required of academic-research faculty. Focuses on the content and process of strong, competitive grant writing, and presents an overview of a wide variety of potential funding mechanisms in Hearing, Speech, and Language Sciences.								
HSP	RCS	HSLS	8969	Lexical Acquisition in Children	Seminar	3	0		I	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Provides students with detailed information about typical lexical (semantic) development, how the mental lexicon is organized, theoretical explanations of word learning, and word learning difficulties in children. Both theoretical and clinical perspectives will be provided. Seminar is reading and discussion intensive.								
HSP	RCS	HSLS	8970	Research Critique in HSLS	Seminar	3	0		I	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Permission required						
		COURSE DESC:		Evaluate peer-reviewed research in Hearing, Speech, and Language Sciences, including background information and motivation, methods and procedures, results (statistical schemes), and discussion (data interpretation and contextualization of results).								
HSP	RCS	HSLS	8971	Language Disorders of Form: Assessment and Remediation	Seminar	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:

Kinematic and kinetic motion analysis will be integrated into the evaluation process.								
HSP	RCS	PT	7110	Clinical Science: Pathophysiology	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011								
		COURSE DESC:		PR Deals with application of physiological principles to the study of disease and injury, with particular attention to cellular injury, inflammation and repair, and immunity. Emphasis on implications of pathophysiology for physical therapy evaluation and treatment. General principles of pathophysiology will be applied to specific examples in class. Subsequent courses in this curriculum will assume a working understanding of the concepts presented in this class. Will also prepare the student to treat patients with select systemic conditions, whether or not those conditions are the primary reason for physical therapy referral. Emphasis will be placed on identification of the patient with systemic pathologies requiring further consultation or referral to other healthcare providers.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011 and PT 7012 and WARNING: No credit if taken after PT 7110								
		COURSE DESC:		PR This survey course of medical physiology provides students with an overview of basic cellular processes and their impact in disease models in several key organ systems: integumentary, renal, genitourinary (GU), hepato-biliary, and gastro-intestinal (GI). In-depth examination of the physiology of diabetes is included as an example of a multi-system disorder. Emphasis is placed on the role of the physical therapist in applying signs and symptoms in the differential diagnosis of musculoskeletal conditions within the scope of PT practice from those arising from impairments of other systems.								
HSP	RCS	PT	7120	Cardiopulmonary Conditions in Physical Therapy	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7111								
		COURSE DESC:		PR This course provides the theoretical foundation for physical therapy evaluation and treatment of patients with cardiopulmonary conditions. Course content includes examination, evaluation of systems and clinical laboratory values, assessment and physiologic monitoring, discharge planning, determining patient equipment, and combating the effects of bed rest and deconditioning. Specific emphasis will be placed on evaluation, treatment, and management of the cardiovascular and pulmonary patient across all spectrums of care.

HSP	RCS	PT	7130	Differential Diagnosis and Acute Care in Physical Therapy	Lecture	3	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: PT 7111								
				COURSE DESC: Provides students with an overview of topics from a cellular to a systems level. Gastrointestinal, genitourinary, hepatobiliary, renal, endocrine, and metabolic systems will be covered. Additionally, the role of physical therapy in acute care and the Intensive Care Unit (ICU) will be covered. For each topic area or system, the student will be presented with the pathophysiology focused at the cellular and tissue level. The role of physical therapists in differential diagnosis, by recognizing the signs and symptoms associated with impairments of the systems, will be presented. Prepares the student to identify the patient with systemic pathologies requiring further consultation or referral to other health care providers.								
HSP	RCS	PT	7140	Pharmacology in Physical Therapy	Lecture	2	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: PT 7111

				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: Permission required and enrollment in a major within the College of Health Sciences and Professions.								
				COURSE DESC: Medical imaging course which covers plain x-ray, MRI, functional MRI, CT scan, positron emission tomography (PET) scan, and ultrasound as related to rehabilitation.								
HSP	RCS	PT	7300	Clinical and Professional Orientation in Physical Therapy	Lecture	1	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: Admission to the PT program								
				COURSE DESC: This course is designed to introduce students to some of the professional role responsibilities and the processes and requirements for clinical education experiences. Beginning with profession expectations and history of the profession, the course provides foundational information on physical therapy practice. The students will begin their Professional Development portfolio. The latter portion of the course is focused on preparing the student for clinical experiences in the curriculum.								
HSP	RCS	PT	7301	Clinical and Professional Orientation in Physical Therapy	Lecture	2	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: Admission into the PT program								
				COURSE DESC: This course introduces students to professional role responsibilities and the profession's core documents. Clinical education processes and requirements are discussed. Health Insurance Portability & Accountability Act (HIPAA), Bloodborne Pathogens, and Tuberculosis Transmission and Prevention trainings are completed. Foundational information related to legal, ethical, and professional behaviors, professional communication and cultural competence, and the history of the profession is provided. Students are also introduced to the Program's Professional Development Portfolio.								
HSP	RCS	PT	7310	Professional Communication and Documentation	Lecture	3	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: PT 7030								
				COURSE DESC: Provides foundational information on physical therapy practice including history, roles and responsibilities within the continuum of care and emphasizes professional communication, documentation skills, cultural competency, and educational practices for clients and families.

Emphasis will be placed on clinical decision making and psychomotor skills required to apply these physical agents in a safe and effective manner.								
HSP	RCS	PT	7652	Pain Education and Management Fundamentals for the Physical Therapist	Lecture	2	0		N	G50		0
			ELIGIBLE GRADES:	GEC1: A-F REQUISITE: PT 7041 and 7042								
			COURSE DESC:	Navigates the learner towards a path of understanding and managing complex and chronic pain conditions. Pain processing models are reviewed, the influences and contributing factors to the pain experience are discussed, and the clinical skills needed to successfully manage pain-related disability and suffering are introduced. By the end of the course, learners are ready to apply this framework within clinical settings and be equipped to use thought challenging techniques to address unhelpful pain-coping strategies, motivational interviewing skills to promote self-efficacy, a graded activity approach for exercise progression, a graded exposure approach to reduce pain-related fear of movement, and mindfulness-informed teaching approach to cultivate body awareness and pain acceptance.								
HSP	RCS	PT	7655	Integumentary Care in Physical Therapy	Lecture	2	0		N	G50		0
			ELIGIBLE GRADES:	GEC2: A-F, REQUISITE: PT 7651

				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: PT 7721 and PT 7722								
				COURSE DESC: This course focuses on the physical therapy evaluation and treatment of spinal conditions (SIJ, lumbar, thoracic, and cervical) as well as TMJ dysfunction from an evidence-based perspective. Conservative approaches, surgical, and non-traditional approaches to spinal assessment and care will be discussed.								
HSP	RCS	PT	7732	Clinical Applications for the Spine	Lecture	3	0		N	G50		0
				ELIGIBLE GRADES: GEC2: A-F, REQUISITE: PT 7721 and PT 7722								
				COURSE DESC: This course emphasizes the development of clinical evaluation and treatment skills used by the physical therapist in the care of clients with spinal pain (sacroiliac joint, lumbar, thoracic, and cervical) or jaw dysfunction. Critical thinking and differential diagnosis skills are developed in conjunction with the assessment and treatment process. Evaluation and treatment are presented in the context of the contemporary healthcare and reimbursement systems.

HSP	SPH	CFS	3601	Human Sexualities	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Jr or Sr						
		COURSE DESC:		An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and recreative. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities.

		ELIGIBLE GRADES:		GEC7: CR, F, NC	REQUISITE:	OHIO Honors Program						
		COURSE DESC:		HC 2400 introduces students to the fundamental principles that will guide their experiences in the OHIO Honors Program. The course explores in depth the three pathways (community engagement, research & creative activity, and leadership) offered in the program, identifying relationships among them as well as the distinguishing features of each pathway. Class discussions, guest speakers, reflections, and out-of-class experiences prepare students to identify opportunities to enhance their education and curate a collection of curricular and co-curricular experiences that align with their interests, values, and goals.								
HTC	HTC	HC	2401	OHIO Honors Engagement Lab	Lecture	1	0		N	U30		0
		ELIGIBLE GRADES:		GEC7: CR, F, NC	REQUISITE:	OHIO Honors Program						
		COURSE DESC:		This project-based course provides students with an opportunity to explore the three OHIO Honors Program pathways - community engagement, research/creative activity, and leadership - in an applied context. Students are assigned to small, interdisciplinary groups, and each group works with a campus or community partner on a defined project over the course of the semester. In-class lectures focus on ethical approaches to each of the three pathways in addition to the theoretical foundations of experiential learning and interdisciplinarity.

		ELIGIBLE GRADES:		GEC5: CR, PR, F	REQUISITE:	Students in the OHIO Honors Program and WARNING: No credit if taken after HC 2410						
		COURSE DESC:		This course uses interdisciplinary, team-based problem solving to introduce OHIO Honors students to the foundations of the three honors engagement pathways: leadership, community engagement, and research and creative activity. The activities and product align with a relevant university-related health and wellness initiative, as will be defined. Students work in an interdisciplinary team to research the campus context and needs related to the initiative topic, propose a relevant project, test and refine the proposal, and execute it. Lectures provide academic background on the topic and introduce students to a variety of problem-solving methods, such as evidence-based practice, systems thinking and design thinking, a creative, empathy-driven process for developing user-friendly solutions to everyday challenges people encounter. The lab sections guide students through the practical application of these problem-solving tools, help to explore ideas from lecture, and provide time and space for the team to work on the project.

HTC	HTC	HC	2600	Introduction to Ethical Community Engagement	Seminar	1	0		N	U30		0
		ELIGIBLE GRADES:		GEC7: CR, F, NC	REQUISITE:	OHIO Honors Program						
		COURSE DESC:		This course introduces students to fundamental principles of ethical community engagement that begin with an understanding of how first to engage with a community through the identification and elevation of its assets. Students are asked to reflect on their perceptions of communities with which they have no previous relationships, encouraged to interrogate the factors that have influenced those perceptions, and challenged to expand their understanding of those communities through research and engagement with community members. Through that process of self-reflection, students also are challenged to consider ways of engagement that are mutually beneficial to themselves and their community partners. In addition, this class explores the tension associated with navigating structural and cultural differences to find common goals and create partnerships that facilitate the achievement of community partners' missions as well as academic expectations for the students.

				ELIGIBLE GRADES:	GEC7: CR, F, NC							
				COURSE DESC:	This course introduces students to fundamental principles of ethical research and creative activity. Students are asked to reflect on their perceptions of how research and creative activity contribute to new knowledge and insights, encouraged to interrogate the factors that influence those perceptions, and challenged to expand their understanding of how individuals can ethically contribute to these endeavors through a multidisciplinary perspective. Through this process of self-reflection and peer discussions, students also are challenged to consider ways that their engagement in research/creative activity can be mutually beneficial to themselves, their field, and the greater public. In addition, this class explores the tensions associated with navigating the research/creative process, including interrogating personal, social, and cultural values, applying rigorous, systematic processes, and properly citing/acknowledging others' works to ensure that the knowledge and insights gained are rigorous, ethical, and contribute to the existing body of knowledge.

		COURSE DESC:		This course deals with the theory and practice of living and studying in other cultures and is designed specifically for students preparing to participate in one of OHIO's education abroad programs. Students gain the culture-general skills and critical thinking to explore and understand both their own culture and the culture of their host country. Through class discussions and homework assignments, students apply the general ideas and concepts discussed in the course to their particular host country. The development of an informed cross cultural perspective is essential if students are to have a transformative learning experience and gain the maximum academic, cultural and social benefit from their academic experience abroad. The cross cultural course component is complemented by a course segment focused on teaching students the skill set required to successfully navigate the logistics of study abroad.

INST	INST	INST	3600	Global Citizen Journalism	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		Citizen or participatory journalists are making differences throughout the world, enjoying some of the same exposure and reach as professional journalists working for traditional news outlets. INST3600/5600: Global Citizen Journalism will examine this social movement and place it in its real-world context. It will also help train and educate potential citizen journalists on how the journalism process works. On one hand, this course will serve as a media literacy primer, explaining how journalists choose their stories, sources, and reach their audience. On the other, it will help students understand how to take advantage of the information explosion the Internet has created to share their own stories and help combat the spread of 'fake news.'								
INST	INST	INST	3700	Global Governance	Seminar	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Jr or Sr						
		COURSE DESC:		This course introduces students to the norms, practices, and structures underlying global collective order. It examines shifts from governments to governance in the management of international affairs, as well as the policy debates and coordination challenges these entail and the core theoretical concepts we use to understand them. How has increasing interdependence shaped the ways in which modern states and non-state actors identify and respond to collective goods and harms? The course begins with a consideration of new risks and rewards created by contemporary globalization in areas of security, aid and development, trade and finance, and human rights. We consider who 'wins' and 'loses' in the international system by addressing issues of power, authority, and legitimacy as well as the changing roles of states, formal and informal Institutions (e.g. The UN, WTO), NGOs, and transnational corporations. We conclude by examining the formation an 'international community' and assessing its capacity in responding to collective challenges such as poverty and inequality, trans- and sub-national political violence, economic regulation, cyber, energy, and environmental security, and humanitarian intervention.

		COURSE DESC:		In this course, students learn about complex global challenges that demand multiple and interdisciplinary solutions. These include human trafficking, challenges faced by refugees, climate change, loss of biodiversity, food insecurity and others. We use a global perspective to understand the extent of these problems, and focus our attention on how local communities around the planet come together to address them. As part of this consideration of human agency, we spend time learning about key local activists, their work, and the strategies they employ. We also evaluate ways in which the activities of such local communities can receive broader support. This course provides students with training on how to make effective oral presentations.

		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				Citizen or participatory journalists are making differences throughout the world, enjoying some of the same exposure and reach as professional journalists working for traditional news outlets. INST3600/5600: Global Citizen Journalism will examine this social movement and place it in its real-world context. It will also help train and educate potential citizen journalists on how the journalism process works. On one hand, this course will serve as a media literacy primer, explaining how journalists choose their stories, sources, and reach their audience. On the other, it will help students understand how to take advantage of the information explosion the Internet has created to share their own stories and help combat the spread of 'fake news.'								
INST	INST	INST	5700	Global Governance	Seminar	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F								
		COURSE DESC:		REQUISITE:								
				This course introduces students to the norms, practices, and structures underlying global collective order. It examines shifts from governments to governance in the management of international affairs, as well as the policy debates and coordination challenges these entail and the core theoretical concepts we use to understand them. How has increasing interdependence shaped the ways in which modern states and non-state actors identify and respond to collective goods and harms? The course begins with a consideration of new risks and rewards created by contemporary globalization in areas of security, aid and development, trade and finance, and human rights. We consider who 'wins' and 'loses' in the international system by addressing issues of power, authority, and legitimacy as well as the changing roles of states, formal and informal Institutions (e.g. The UN, WTO), NGOs, and transnational corporations. We conclude by examining the formation an 'international community' and assessing its capacity in responding to collective challenges such as poverty and inequality, trans- and sub-national political violence, economic regulation, cyber, energy, and environmental security, and humanitarian intervention.

		COURSE DESC:		This class takes place in Ecuador and introduces students to the concept of global service-learning. Students learn about different models and philosophies of service-learning and work collaboratively on a community-identified service project in an under-resourced community in Ecuador. Students explore what it means to be a global citizen and gain an understanding of service-learning in local and international contexts. Students engage in critical thinking about community development, civic engagement, power, privilege, and poverty and how these themes relate to global service-learning.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F								
		COURSE DESC:		The first course of the Open Book Project elective series explores issues of social justice and inclusion in medicine. Grounded in Rita Charon's (2007, 2017) narrative medicine methodology, the Open Book Project elective (OBP1) introduces preclinical medical students to a unique framework for understanding, interpreting and interacting with the lived experiences of others; skills and techniques for empathy building, self-reflection, and connecting to others at a deeper, humanistic level; and an approach to clinical practice in which narrative sensibilities inform how physicians listen to and provide care to their patients. Through practice in the process of close reading, radical listening and expressing our own stories, narrative medicine facilitates relationship building and a deeper understanding of physicians and patients alike. Students will participate in two sessions of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum.

		COURSE DESC:		The Open Book Project (OBP2) elective course builds upon the skills introduced in OBP1 while focusing on issues of social justice and inclusion in medicine. The Open Book Project elective (OBP2) deepens and expands preclinical medical students narrative medicine skills of close reading, radical listening and expressing their own stories. Students will engage with new selections of art, poetry, prose, and other works. Students will participate in one session of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum.

		COURSE DESC:		The Open Book Project (OBP3) elective course builds upon the skills introduced in OBP1 and OBP2 (prerequisites) while maintaining a focus on issues of social justice and inclusion in medicine. The Open Book Project elective (OBP3) expects students to apply and demonstrate narrative competencies and develop group leadership skills. During the OBP3 students have the opportunity to author and facilitate sessions that apply the principles of narrative medicine learned in OBP1 and OBP2 focused on issues of social justice and inclusion. This course draws upon content in the Chronic Illness course, asking them to apply a narrative lens and, in this way, augments the clinical content delivered during their second year curriculum. Students will participate in one session of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum.

		COURSE DESC:		The purpose of this course is to provide an early research experience for students who have successfully completed the Year 1 medical school curriculum. This course will complement the current Patient-Centered Continuum (PCC) and Clinical Presentation Continuum (CPC) curricula currently offered by the College of Osteopathic Medicine. It will also better prepare the students to fulfill future research requirements, such as those in the CORE (Centers for Osteopathic Research & Education) and/or residencies and fellowships. Published research has shown that early research exposure for medical students improves their future attitudes and interest in research (Ley & Rosenberg, 2007), increases their productivity as physicians (Zier, Friedman, & Smith, 2006), better trains medical students to critically assess medical literature (Guillory & Sharp, 2003), and can help to interest medical students in research and academic careers (Solomon, et.al., 2003).

		ELIGIBLE GRADES:		GEC5: CR, PR, F	REQUISITE:	Heritage College student, permission required						
		COURSE DESC:		The purpose of this course is to provide the student with an opportunity to develop and enhance their knowledge and skills at the level of a beginning to intermediate researcher. The student, under the guidance of their research mentor, designs and execute an original research project as part of their preclinical medical training.								
				Original research is designed specifically to allow a flexible approach for students to obtain first-hand experience on the design, development, and/or completion of activities that span a range of research topics, including but not limited to: basic science, clinical science, human subjects/patient based research, epidemiology, and health systems science.

		COURSE DESC:		Family Medicine is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in family medicine through faculty- and learner-directed study. Additionally, course topics are reinforced through rotation-specific clinical experiences.								
				Throughout this course, students work to acquire and demonstrate the foundational knowledge and basic skills necessary to practice family medicine. They explore the attitudes and behaviors that enable excellent patient care, consider the principles underlying this field and discuss the value of family medicine as an integral part of any health system.

				ELIGIBLE GRADES:								
				COURSE DESC:								
				This course is a one-year rotation, during the third year of medical school, situated within a rural or urban underserved family medicine practice and providing exposure to the continuity of primary care across the continuum of the inpatient and outpatient settings. It exposes the student to the breadth of family practice including medical care of all ages, as well as enhances the student's ability to provide continuity in care. This rotation also exposes the student to the collaboration of health care entities in the community, practice, management, practice quality improvement, and possibly research. It also provides exposure to the direct supervisory role of the physician CNP/PA/MA relationships. Overall, the goal of this rotation is to allow the student to develop rural/urban primary health care training by developing a continuity practice of their own under the direction of their supervisory site director. With this knowledge and experience, a better understanding of the scope of rural/urban underserved primary health care is achieved.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: Completion of HCOM Year 2, including OCOM 7902 and 8005 PR, F								
		COURSE DESC:		Medical and Surgical Subspecialties is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in subspecialty patient care locations and aims to expose the primary care committed individual to specialty care. Upon completion of this course, the student is prepared to make educated referrals, and establish and maintain co-management relationships with other health professionals.								
OST	OST	OCOM	8284	Elective - Clinical Simulation in Medical Education	Seminar	4	0		N	M60		0
		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: Year 4 Osteopathic Medical Student PR, F								
		COURSE DESC:		Clinical simulation in medical education is a two-week, blended course that integrates biomedical, social, clinical, and health systems science into the simulated clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in case development, clinical practice guidelines, and learner assessment through faculty- and learner-directed study.								
				Additionally, course topics are reinforced through rotation-specific experiences such as planning and performing medical simulation. Students will gain a basic understanding of the principles of medical simulation through a combination of self-study guides and hands-on experience. The student will work under the supervision of the Simulation Director and Simulation Staff.

OST	OST	OCOM	8911	Elective - Global Health	Clinical	4 to 24	24		N	M60		0
		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F								
		COURSE DESC:		The purpose of this rotation is to provide an opportunity for the student to explore issues in the delivery of health services in other countries. This rotation is not intended to transform the student into a specialist, but rather it is to provide a survey of the specialty. Students will need to use a logical and appropriate clinical approach to the care of patients in a developing country setting, utilizing locally available resources, and applying principles of evidence-based decision-making and problem-solving. These experiences are designed not only for students considering careers in international health, but for increasing the understanding of any future physician practicing in the United States who may care for patients from other countries. The experience is also designed to deepen the awareness of all participants regarding the determinants of health and illness and diverse methods of approaching health problems in settings with varied cultural, socio-economic and political characteristics. These experiences help students develop sensitivity to health disparities and their causes, including health, social, economic and environmental factors.

		COURSE DESC:		The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher in preparation for engaging in an actual research study. This course is available for the student who wants to design and participate in specially selected research addressing questions derived from osteopathic clinical practice and philosophy under the direction of basic science or clinical faculty.								
OST	OST	OCOM	8942	Research Elective - Critical Literature Review	Research	4 to 6	6		N	M60		0
		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F								
		COURSE DESC:		The purpose of this elective rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. This rotation provides a broad overview of critical review of literature via hands-on experience. In hospital and ambulatory settings (as appropriate), the student is expected to encounter a variety of experiences that may lead to a clinical question answerable through the conduct of an extensive and critical review of the literature. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, understanding basic statistical results and interpretation, human subject protection, manuscript writing, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of a critical literature review and to practice problem- solving skills.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F								
		COURSE DESC:		The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. To accomplish this, the rotation provides an opportunity to write a case report and submit it for publication. A case report is defined as an account of the signs, symptoms, diagnosis, treatment and follow-up of a patient that follows an unusual or noteworthy case presentation. A case report can consist of a single-case study or a multiple-case study (N<11). In hospital and ambulatory settings (as appropriate), the student potentially may encounter unique or rare illnesses/diseases or treatment and therapy. To achieve the rotation objectives, the student is expected to apply the concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, be familiar with human subjects protection and its implication on collection of patient information, write the paper following a target journal's submission guidelines, and submit the manuscript for publication as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of scholarly work and to practice problem-solving skills. The student should enroll for the research rotation only after they have found an acceptable case to report; the rotation should not be used to locate a case to report upon.

UNC	MSC	MSC	2910	Leader's Training Course (LTC)	Internship	4	0		I	U10		0
		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: Permission required and Soph only								
		COURSE DESC:		Leader's Training Course (LTC) is four weeks of intense classroom and field training held in the summer at Fort Knox, Kentucky. By transforming yourself through this rigorous training, you will qualify for enrollment in the Army ROTC Advanced Course. At LTC you experience the Army firsthand by developing your potential in the most important of ways-mentally, physically and emotionally. You will be grouped into squads where you will gain experience in all leadership roles-culminating in verbal and written feedback on your improvement. You will also receive a stipend, transportation to and from Fort Knox, housing and meals. The first phase begins with Physical Training (PT) and Drill and Ceremony (D&C) which instill self-discipline and prepare you for the rigors and challenges of the upcoming weeks. The second phase builds on the basics Cadets have learned by extending into adventure training in the field. Combat Water Survival Training, rappelling, land navigation and marksmanship training provide physical challenges that test Cadets individually while developing teamwork skills. In the third phase, Cadets learn squad-level operations by taking part in demanding field exercises.								
UNC	MSC	MSC	3010	Small Unit Leadership And Operations I	Lecture	3	0		I	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Permission required								
		COURSE DESC:		Explores the theory of managing, group dynamics, and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students will have a strong understanding of structure, process, and behaviors required of leadership. Examines various leadership styles and techniques as they relate to advanced small unit tactics and problem solving. Familiarizes students with a variety of topics such as land navigation, field craft, five battle drills, troop leading procedures, operations orders, risk management, and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience. Students will also need to brief superior and subordinates on a wide range of topics. Students are given maximum leadership opportunities in weekly labs. A two-hour per week lab, three one-hour sessions of physical training a week, and a weekend field training exercise are required.

UNC	MSC	MSC	3910	Leader Development and Assessment Course	Internship	4	0		N	U30		0
		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: MSC 3020								
		COURSE DESC:		CR The mission of the Leader Development and Assessment Course (LDAC) is to train U.S. Army ROTC Cadets to Army standards and to develop leadership and evaluate officer potential. This is accomplished through a tiered training structure using light infantry tactics as the instructional medium over a 28 day period. The Warrior Forge training program is sequential and progressive. It starts with individual training and leads to collective training, building from simple to complex tasks. This building-block approach permits integration of previously-learned skills into follow-on training. This logical, common-sense training sequence is maintained for each training cycle. Every day at LDAC is a day of training. Some of the major training events include the Army Physical Fitness Test, land navigation, weapons training, confidence building, and small unit leadership evaluations.
