				This course is intended to give students an overview of the two contributing cultures and their musics found in this country, from the songs of rural Appalachia and New England to the African music brought by the slaves; to the musics that grew out of those traditions, from the popular musics of the cities to the songs of Latin Americans and European minorities. We will trace the way these musics live in the modern city, in the academic world and in contemporary music society. (Nettl, 1976)								
				The student will be introduced to the study of music as a manifestation of human need and a representation of culture. The course uses music as an index to understand American culture while it introduces the student to various concepts in the field of ethnomusicology. (Nettl, 1976)

FAR	THAR	<b>THAR</b>	<b>2120</b>	<b>Mindfulness and Creativity</b> ELIGIBLE GRADES: GEC1: A-F REQUISITE: COURSE DESC: Mindfulness refines the quality of our attention to the present moment. In this course, students cultivate presence and explore the creative process through meditation, collaborative practice and research. They develop a daily mindful practice through experiential learning and doing. Practices include Yoga, Mindfulness Based Stress Reduction exercises, and various forms of meditation. Students apply mindfulness to their own creative process and work on a creative project of their choice. The course emphasizes the creative process over the final project, developing awareness of how mindfulness informs the creative process. Students cultivate creative collaboration and critical analysis by analyzing a work of art in teams. They research the historical and cultural context of the work and devise a short group project based on their findings. Readings might include texts by Anne Bogart, Chogyam Trungpa, John Cage, Mihaly Csikszentmihalyi, Dr. Kabat-Zinn, Sharon Salzberg, Julia Cameron and Liz Lerman's Critical Response Theory. 		COURSE DESC:		Within the entertainment industry multiple methods of automation technology are being utilized for the purpose of moving onstage design components including scenery, stage properties, lighting, sound and projection surfaces for the purpose of changing the visual landscape of the stage throughout the production. For these multiple systems used in the area of stage automation to be useful, they must be reliable, repeatable, and often programmable to enable changing travel distances/ length of time to travel scenarios. Automation is enabling large scale scene changes to occur within the natural rhythm of performance; eliminating the need to endure long interruptive transitions between scenes that negatively impacts the production.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: ES 3620								
		COURSE DESC:		Resiliency has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications.								
GVS	ES	<b>ES</b>	<b>4630</b>	<b>Climate Change Mitigation, Adaptation and Resilience Policy</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: ES 3620								
		COURSE DESC:		This course introduces students to the study of climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gas emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors.								
GVS	ES	<b>ES</b>	<b>4640</b>	<b>Risk, Climate Security, and Community Engagement</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: ES 3620 or GEOG 3580 or GEOG 4520								
		COURSE DESC:		Climate change and other rapid environmental changes create risk to communities, infrastructure, and human security; managing these climate-related risks requires understanding of the community, its risk perception, and collaborative communication and management planning. Students characterize risk to communities from climate change and explore risk perception theory and methods to manage threats to human security. Students discuss concepts of justice and equity in risks to human security, risk management, and communication. Students explore these particular climate change and environmental challenges through the multidimensional and interdisciplinary lens of human security.								
GVS	ES	<b>ES</b>	<b>4710</b>	<b>Bioenergy: Science, Policy, and Business</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land managements, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems.								
GVS	ES	<b>ES</b>	<b>4720</b>	<b>Energy Systems and Policy</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Energy systems are undergoing rapid change due to resource constraints, market forces, local, state, national, and international policy, and environmental impacts. Public administrators have a need to understand the implications of energy systems and the policies that govern them. This course presents traditional and emerging energy systems and how policy affects these systems.								
GVS	ES	<b>ES</b>	<b>4730</b>	<b>Environmental Entrepreneurship</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		Students gain an understanding of key problems, root causes, and potential entrepreneurial solutions relevant to selected contemporary environmental challenges. Students apply interdisciplinary perspectives to identify, analyze, and evaluate environmental issues, measure impacts, and establish criteria for effective remedies. The course reviews key environmental challenges within selected areas (with topical themes chosen from contemporary issues in environment, health & well being, education, economic development, and other timely topics.) as well as fundamentals of social entrepreneurship to enable students to design and present enterprise development models for market-based social ventures seeking to deliver such remedies. Students learn how to pitch venture proposals to address criteria evaluating efficacy, feasibility, sustainability, and potential "return on investment" for both financial and social/environmental impacts.								
GVS	ES	<b>ES</b>	<b>4740</b>	<b>Strategies for Resilient Agriculture</b>	Lecture	3	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: ES 3620								
		COURSE DESC:		Agricultural production systems comprise a fundamental sector of the economy, of which many policy makers have only specialized knowledge based on single commodities. Students gain an overview of the diverse portfolio of agricultural products that drive essential systems in the United States, and the major challenges that exist for achieving resiliency in the agricultural sector. Students explore food, livestock, fiber, and fuel crop management and associate supply chains that are complex systems influencing social, environmental, and economic resilience.								
GVS	ES	<b>ES</b>	<b>4832</b>	<b>Sustainability Implementation Practicum</b>	Seminar	3	6		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:								
		COURSE DESC:		This course involves students in a critical analysis of the Ohio University Sustainability Plan and community-based projects that support the Office of Sustainability's mission. Students are engaged in the exploration of contemporary environmental initiatives, leadership, professionalism and local issues. Implementation of effective projects and feasibility studies to advance institutional sustainability efforts provides students the opportunity to make meaningful changes within their campus and community. This course's focus allows students the opportunity to better define sustainability and the role it plays in their lives, enhance skills that encourage sustainable behaviors and make positive contributions to their health, the natural environment and the local community.

GVS	ES	ES	6850	<b>Capstone: Resilient Infrastructure and Communities</b>	Lecture	3	0		N	G40		0
				ELIGIBLE GRADES: GEC1: A-F REQUISITE: COURSE DESC: Resilience theory has emerged as an approach for understanding how systems are able to thrive through rapid, often unexpected change. Managing for resilience is key in preparing for some of the greatest challenges that society faces including climate change, globalization, and rapid urbanization. In this capstone, students analyze the risk and vulnerability of a community, organization, or infrastructural system to unexpected change and develop strategies to improve the community or organization's resilience. Students critically evaluate the resilience preparation at a local, state, regional, and national level to highlight both best practices and lessons learned. They then select a system in which they are most interested; infrastructure, urban centers, community plans, ecological systems, organizational, and others. Students engage with organizations and communities to develop a resilience plan for that system with a focus on improving sustainability, human security, and resilience.

		COURSE DESC:		A communications plan is an important part of an organization's daily operation. Additionally, for public and nonprofit organizations in particular, the activities in the plan should support overall communications goals in ways that help raise money, create change, recruit talent, and promote mission-related goals and objectives. As a living document, it frames the way both internal and external audiences perceive the organization; and since many nonprofits have limited staff and financial resources available for communications activities, it is even more important that these resources be deployed as strategically as possible. This course offers an overview of communications concepts and media activities in ways that will help students develop a strategic communication plan focused on emphasizing a commitment to organizational mission; building trust among internal and external audiences; clarifying organizational priorities; and generating public value.

		COURSE DESC:		No credit for this course if taken after DSI 2860 This course is designed to provide students with an in-depth study of American Deaf culture and the American Deaf community from the multidisciplinary perspective. It is an introduction to topics such as cultural identity, core values, group norms, communication, language as well as significant contributions made by Deaf people to the world community. Designed for students who may or may not have had any previous experience or exposure, this course will answer some of the most commonly asked questions about the Deaf community and its rich culture. Views and perspectives of and from the Deaf community will be explored along with the implications of cultural differences when the Deaf and hearing worlds overlap. The oppression experienced by the Deaf community and the impact hegemony has had on the attitudes, values, and beliefs of both the hearing and D/deaf community will be examined.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011								
		COURSE DESC:		Deals with application of physiological principles to the study of disease and injury, with particular attention to cellular injury, inflammation and repair, and immunity. Emphasis on implications of pathophysiology for physical therapy evaluation and treatment. General principles of pathophysiology will be applied to specific examples in class. Subsequent courses in this curriculum will assume a working understanding of the concepts presented in this class. Will also prepare the student to treat patients with select systemic conditions, whether or not those conditions are the primary reason for physical therapy referral. Emphasis will be placed on identification of the patient with systemic pathologies requiring further consultation or referral to other healthcare providers.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011 and PT 7012 and WARNING: No credit if taken after PT 7110								
		COURSE DESC:		This survey course of medical physiology provides students with an overview of basic cellular processes and their impact in disease models in several key organ systems: integumentary, renal, genitourinary (GU), hepato-biliary, and gastro-intestinal (GI). In-depth examination of the physiology of diabetes is included as an example of a multi-system disorder. Emphasis is placed on the role of the physical therapist in applying signs and symptoms in the differential diagnosis of musculoskeletal conditions within the scope of PT practice from those arising from impairments of other systems.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7111								
		COURSE DESC:		This course provides the theoretical foundation for physical therapy evaluation and treatment of patients with cardiopulmonary conditions. Course content includes examination, evaluation of systems and clinical laboratory values, assessment and physiologic monitoring, discharge planning, determining patient equipment, and combating the effects of bed rest and deconditioning. Specific emphasis will be placed on evaluation, treatment, and management of the cardiovascular and pulmonary patient across all spectrums of care.								
HSP	RCS	<b>PT</b>	<b>7130</b>	<b>Differential Diagnosis and Acute Care in Physical Therapy</b>	Lecture	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7111								
		COURSE DESC:		Provides students with an overview of topics from a cellular to a systems level. Gastrointestinal, genitourinary, hepatobiliary, renal, endocrine, and metabolic systems will be covered. Additionally, the role of physical therapy in acute care and the Intensive Care Unit (ICU) will be covered. For each topic area or system, the student will be presented with the pathophysiology focused at the cellular and tissue level. The role of physical therapists in differential diagnosis, by recognizing the signs and symptoms associated with impairments of the systems, will be presented. Prepares the student to identify the patient with systemic pathologies requiring further consultation or referral to other health care providers.

		COURSE DESC:		An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and recreative. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities.

		COURSE DESC:		This course uses interdisciplinary, team-based problem solving to introduce OHIO Honors students to the foundations of the three honors engagement pathways: leadership, community engagement, and research and creative activity. The activities and product align with a relevant university-related health and wellness initiative, as will be defined. Students work in an interdisciplinary team to research the campus context and needs related to the initiative topic, propose a relevant project, test and refine the proposal, and execute it. Lectures provide academic background on the topic and introduce students to a variety of problem-solving methods, such as evidence-based practice, systems thinking and design thinking, a creative, empathy-driven process for developing user-friendly solutions to everyday challenges people encounter. The lab sections guide students through the practical application of these problem-solving tools, help to explore ideas from lecture, and provide time and space for the team to work on the project.

		COURSE DESC:		This course introduces students to fundamental principles of ethical community engagement that begin with an understanding of how first to engage with a community through the identification and elevation of its assets. Students are asked to reflect on their perceptions of communities with which they have no previous relationships, encouraged to interrogate the factors that have influenced those perceptions, and challenged to expand their understanding of those communities through research and engagement with community members. Through that process of self-reflection, students also are challenged to consider ways of engagement that are mutually beneficial to themselves and their community partners. In addition, this class explores the tension associated with navigating structural and cultural differences to find common goals and create partnerships that facilitate the achievement of community partners' missions as well as academic expectations for the students.

Students gain the culture-general skills and critical thinking to explore and understand both their own culture and the culture of their host country. Through class discussions and homework assignments, students apply the general ideas and concepts discussed in the course to their particular host country. The development of an informed cross cultural perspective is essential if students are to have a transformative learning experience and gain the maximum academic, cultural and social benefit from their academic experience abroad. The cross cultural course component is complemented by a course segment focused on teaching students the skill set required to successfully navigate the logistics of study abroad.

				Citizen or participatory journalists are making differences throughout the world, enjoying some of the same exposure and reach as professional journalists working for traditional news outlets. INST3600/5600: Global Citizen Journalism will examine this social movement and place it in its real-world context. It will also help train and educate potential citizen journalists on how the journalism process works. On one hand, this course will serve as a media literacy primer, explaining how journalists choose their stories, sources, and reach their audience. On the other, it will help students understand how to take advantage of the information explosion the Internet has created to share their own stories and help combat the spread of 'fake news.'

				Jr or Sr This course introduces students to the norms, practices, and structures underlying global collective order. It examines shifts from governments to governance in the management of international affairs, as well as the policy debates and coordination challenges these entail and the core theoretical concepts we use to understand them. How has increasing interdependence shaped the ways in which modern states and non-state actors identify and respond to collective goods and harms? The course begins with a consideration of new risks and rewards created by contemporary globalization in areas of security, aid and development, trade and finance, and human rights. We consider who 'wins' and 'loses' in the international system by addressing issues of power, authority, and legitimacy as well as the changing roles of states, formal and informal institutions (e.g. The UN, WTO), NGOs, and transnational corporations. We conclude by examining the formation an 'international community' and assessing its capacity in responding to collective challenges such as poverty and inequality, trans- and sub-national political violence, economic regulation, cyber, energy, and environmental security, and humanitarian intervention.

		COURSE DESC:		The Clinical Anatomy Immersion allows all entering Heritage College students, regardless of their curricular track, to begin their training together, immersed for roughly 5 weeks in clinically-oriented study of human gross anatomy. At the core of the course are the laboratory activities. Students will participate in 4, 3-hour gross anatomy labs each week. These activities involve dissection of human cadavers, imaging studies, and discussion of clinical anatomy in an interactive laboratory setting. The structure of the human body is presented in a clinically relevant manner, providing correlations of normal anatomy to common disease states. The ultimate goal is to enhance clinical reasoning in the context of human gross anatomy. A few key lectures will provide background for the lab studies

		COURSE DESC:		This one-week course will introduce students to Patient Centered Primary Care medical practice, and will incorporate active learning principles. On the first day of the block, students will be introduced the "5 Cs of patient-centered primary care". These concepts will be emphasized over the next 5 days and be the basis for all of the learning activities. Additionally, there will be a doctor-patient communication thread of activities that build students' skills throughout the week, culminating in a patient interview, and a reflective paper on that experience. This course provides protected time outside of class for students to learn and prepare for in-class hands-on activities that incorporate that knowledge into tangible skills.

		ELIGIBLE GRADES:		GEC5: CR, PR, F	REQUISITE:	Offered only to OUCOM 1st Year students						
		COURSE DESC:		Fundamentals in Clinical Osteopathic Medicine 1 and 2 are a series of courses devoted to assisting students in developing clinical skills necessary to work towards mastery of the AOA Core competencies. Fundamentals in Clinical Osteopathic Medicine 1 is a sixteen week course. The focus is on History and Physical (H&P), Osteopathic Manipulative Medicine (OMM) skills and Clinical and Community Experiences (CCE). Integral to all of these areas are psychosocial skills. Other components will guide the student in learning specific psychosocial and psychomotor skills, as well as reinforce the importance of an evidence-based approach to the clinical application in the practice of medicine. The format of the course incorporates clinical lab sessions, utilizing peers or simulated patients for practice in obtaining history and performing physical examinations. On occasion, learning activities will utilize real patients. Clinical cases in the concurrent Biomedical Sciences course are structured to foster learning objectives that enhance History and Physical exam skills. An ongoing thread in this course is the Problem Oriented Medical Record (POMR) and medical progress notes (SOAP notes) tools students need to develop and maintain excellent documentation of clinical encounters. The OMM lab component for this course is taught to PCC students in conjunction with the students in the CPC curriculum. Students will be assigned to one or more clinical faculty for 8 four-hour experiences per quarter to be given an opportunity to practice their developing clinical skills. They will also be assigned to community agency preceptors for 2 four-hour experiences per quarter in order to develop an understanding of the roles of non-physician personnel and health care services provided outside the hospital/physician's office. Objectives and activities for each community agency experience are available on the CCE website.

				COURSE DESC:	This six-week Neurology course offers students the resources and environment for learning the basic structure and function of the nervous system and the application of this knowledge to clinical cases of headache, altered consciousness, weakness, movement disorders and altered cognition. The cases encourage the student to develop neurological diagnostic skills based on principles of neuroanatomy, neurophysiology, neuropharmacology, neuropathology, infectious disease, and epidemiology. The skills of history taking and physical examination are reinforced in laboratory sessions on the neurology examination. Mastery of clinically relevant neuroanatomy is facilitated in lab sessions devoted to brain dissection. The cases also lead students into considerations of the psychosocial management, pharmacological treatment, OMM, surgery intervention, and rehabilitation of patients with neurological disorders.

		COURSE DESC:		This five-week Endocrinology and Metabolism course presents an opportunity for students to delve into the major endocrine systems in the body, including the pituitary, thyroid, parathyroid adrenal and pancreatic glands. Students explore the regulatory mechanisms of the hormones secreted by these glands and the metabolic effects elicited by these hormones. A major focus of the course is the clinical relevance of hormonal signaling on bone metabolism, growth, and carbohydrate, lipid and amino acid metabolism. Hormonal control under normal physiological conditions is contrasted with disease states such as electrolyte imbalance, growth disorders, weight homeostasis and diabetes. By the end of this course, students will integrate and understand the underlying mechanisms by which these hormones act and how these signals are interpreted by tissues such as liver, bone, adipose, and muscle to coordinate metabolic changes in the body.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: Offered only to OUCOM 2nd Year students PR, F								
		COURSE DESC:		This three-week Geriatrics course introduces Clinical Presentation Curriculum (CPC) students to key concepts essential to caring for older adults. The Block begins by presenting the aging demographic imperative. There are not enough geriatricians to care for this growing segment of the population. Therefore, it is critical that all medical students are trained to meet the needs of older citizens with complicated, overlapping, factors associated with chronic medical conditions. Older adults often have three or more chronic medical conditions, take multiple medications and respond to treatments and medications differently than do younger patients. This block targets these often complicated overlapping factors. An emphasis is placed on understanding the following: aging versus disease; geriatric syndromes and atypical presentation of disease; providing care across the continuum of locations: ambulatory, hospital, assisted living, nursing home, and home; comprehensive geriatric assessment; psychosocial and environmental considerations; pharmacology/prescribing practices; and advance directives.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F								
		COURSE DESC:		This course is a one-year rotation, during the third year of medical school, situated within a rural or urban underserved family medicine practice and providing exposure to the continuity of primary care across the continuum of the inpatient and outpatient settings. It exposes the student to the breadth of family practice including medical care of all ages, as well as enhances the student's ability to provide continuity in care. This rotation also exposes the student to the collaboration of health care entities in the community, practice, management, practice quality improvement, and possibly research. It also provides exposure to the direct supervisory role of the physician CNP/PA/MA relationships. Overall, the goal of this rotation is to allow the student to develop rural/urban primary health care training by developing a continuity practice of their own under the direction of their supervisory site director. With this knowledge and experience, a better understanding of the scope of rural/urban underserved primary health care is achieved.

		ELIGIBLE GRADES:		GEC6: CR, PR, F	REQUISITE:							
		COURSE DESC:		Both university faculty and actual policymakers participate in instruction. A workshop in the orientation week sets the definitions to be used and introduces the materials in the texts. The sessions are organized around:  1. State policymaking - the powers which reside in the state and processes used to set health policy. Material is presented by faculty, officials, and elected representatives from the state in which the meeting is held. Comparison and contrast to other states is included. 2. Executive branch government policymaking - the agencies, regulatory and research evaluation processes by which policy is generated and implemented for the administration defining their missions and illustrating their ability to impact policy. The sessions are organized by the American Association of Colleges of Osteopathic Medicine (AACOM) at its Chevy Chase, Maryland offices. 3. Federal legislative policymaking - the process and the players. A full-day workshop on the legislative process in Congress is offered by personnel from the training program for freshman legislators. University faculty present sessions on the history of health policy in government. The role of special interest organizations and methods for presenting policy solutions to policymakers are covered by national experts.  Other material is included throughout the year on topics such as the role of values in health policy decisions, budgets as policymaking tools, how to influence your legislator, the growing presence of D.O.s in health policy, and the policymaking processes of the American Osteopathic Association.  Evaluation: Participants build a policy agenda with government relations staff of the AOA and carry it to federal legislators and staff from their own state - then evaluate the sessions with the accompanying staffers.

		ELIGIBLE GRADES:		GEC6: CR, PR, F	REQUISITE:							
		COURSE DESC:		The issues to be included in each year's curriculum are determined by a curricular planning group which meets in July to plan the following academic year. Instruction is organized around set problems furnished to the Fellows at one session and resolved at the next. Key references are furnished and the program content is delivered by experts and policymakers intimately involved in the issue under discussion. Wherever possible, both sides of controversial issues are presented. Issues presented in the programs for a sample year are: Reform in Healthcare Entitlement Programs (state and national perspectives) The Healthcare Market move to Managed Care Determining and Controlling the Healthcare Workforce The Role of Regulation in Healthcare Economics of Healthcare Health Policy Issues in the Osteopathic Profession Preparing for an Increasingly Diverse Patient Population  Fellows are trained in problem-based learning in the orientation sessions. Groups of five meet with a faculty facilitator trained in small group facilitation. In the first session they read the case, identify the learning issues it presents, and make member assignments in preparation for the resolution of the case at the next session. They meet again to share their work at the opening of the following month's program and to decide what questions they will put to the presenters. (Presenters are furnished the case in advance). Finally, they meet to arrive on a solution and plan a presentation of their work.  Evaluation: Faculty and Fellows critique presentation of the case resolution following each issue-based program. Presenters are evaluated by the Fellows and the feedback used to select the strongest faculty for the following year's program.

		ELIGIBLE GRADES:		GEC6: CR, PR, F	REQUISITE:							
		COURSE DESC:		A one week orientation offers instruction in computing to enhance e-mail skills, database searching and internet information searches. Reference librarians offer a workshop in the use of the contemporary library with a focus on current health policy documents and resources. Computer skills are reinforced in session gathering references for an assigned research paper, in communication among participants and program faculty, and in instruction in PowerPoint, a statistics program, etc. Guidelines for developing the research paper and workshops in writing skills are offered by medical communicators. Two sessions in quantitative and qualitative analysis address reading and understanding statistical testing methods, survey and focus group methods, and statistical exercises on the computer. One-on-one research design and editorial support are available during project development, and instruction in presenting the findings effectively is offered in the last week of the session. Time is reserved each week to review progress and share feedback on the projects. Evaluation: Policy papers are due mid-summer after the year of study. They are read by reviewers from the AOA council of Federal Health Programs who select three of four for presentation at the fall meeting where certifications are awarded. Others are presented and all printed as proceedings for distribution to the Fellows and alumni of the program.

		COURSE DESC:		The purpose of this rotation is to provide an opportunity for the student to explore issues in the delivery of health services in other countries. This rotation is not intended to transform the student into a specialist, but rather it is to provide a survey of the specialty. Students will need to use a logical and appropriate clinical approach to the care of patients in a developing country setting, utilizing locally available resources, and applying principles of evidence-based decision-making and problem-solving. These experiences are designed not only for students considering careers in international health, but for increasing the understanding of any future physician practicing in the United States who may care for patients from other countries. The experience is also designed to deepen the awareness of all participants regarding the determinants of health and illness and diverse methods of approaching health problems in settings with varied cultural, socio-economic and political characteristics. These experiences help students develop sensitivity to health disparities and their causes, including health, social, economic and environmental factors.

OST	OST	<b>OCOM</b>	<b>8941</b>	<b>Scholarly Work - Required Paper</b> ELIGIBLE GRADES: COURSE DESC:	Research	2	0		N	M60		0
				GEC5: CR, PR, F REQUISITE: Students are required to work with the primary preceptor on an assigned service between December of year 3 and December of year 4 to select and approve an appropriate patient actually seen while on rotation as the basis for this paper. The selected patient case must lend itself to producing a paper that includes the usual components of a case report; the case must have some noteworthy appeal that would be valuable to a particular audience. Once the audience has been identified, the student must select a target journal as a potential venue for publication of the case report; it may be helpful to identify a few target publications and discuss these with the preceptor. The case report must then be written to conform to the submission guidelines and specifications of the specified target journal. An osteopathic component must be included in the manuscript submitted for grading.								
OST	OST	<b>OCOM</b>	<b>8942</b>	<b>Research Elective - Critical Literature Review</b> ELIGIBLE GRADES: COURSE DESC:	Research	4 to 6	6		N	M60		0
				GEC5: CR, PR, F REQUISITE: The purpose of this elective rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. This rotation provides a broad overview of critical review of literature via hands-on experience. In hospital and ambulatory settings (as appropriate), the student is expected to encounter a variety of experiences that may lead to a clinical question answerable through the conduct of an extensive and critical review of the literature. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, understanding basic statistical results and interpretation, human subject protection, manuscript writing, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of a critical literature review and to practice problem-solving skills.								
OST	OST	<b>OCOM</b>	<b>8943</b>	<b>Research Elective - Case Based Study</b> ELIGIBLE GRADES: COURSE DESC:	Research	2 to 6	6		N	M60		0
				GEC5: CR, PR, F REQUISITE: The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. To accomplish this, the rotation provides an opportunity to write a case report and submit it for publication. A case report is defined as an account of the signs, symptoms, diagnosis, treatment and follow-up of a patient that follows an unusual or noteworthy case presentation. A case report can consist of a single-case study or a multiple-case study (N<11). In hospital and ambulatory settings (as appropriate), the student potentially may encounter unique or rare illnesses/diseases or treatment and therapy. To achieve the rotation objectives, the student is expected to apply the concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, be familiar with human subjects protection and its implication on collection of patient information, write the paper following a target journal's submission guidelines, and submit the manuscript for publication as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of scholarly work and to practice problem-solving skills. The student should enroll for the research rotation only after they have found an acceptable case to report; the rotation should not be used to locate a case to report upon.

Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. Student research can consist of any of the following types of studies: a retrospective study, a prospective study, a survey study or a meta-analysis. To accomplish this, the rotation provides a broad overview of research via hands-on experience. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, statistics and hypothesis testing, human subject protection, protocol development, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of research and to practice problem-solving skills.

		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: Permission required and Soph only								
		COURSE DESC:		Leader's Training Course (LTC) is four weeks of intense classroom and field training held in the summer at Fort Knox, Kentucky. By transforming yourself through this rigorous training, you will qualify for enrollment in the Army ROTC Advanced Course. At LTC you experience the Army firsthand by developing your potential in the most important of ways-mentally, physically and emotionally. You will be grouped into squads where you will gain experience in all leadership roles-culminating in verbal and written feedback on your improvement. You will also receive a stipend, transportation to and from Fort Knox, housing and meals. The first phase begins with Physical Training (PT) and Drill and Ceremony (D&C) which instill self-discipline and prepare you for the rigors and challenges of the upcoming weeks. The second phase builds on the basics Cadets have learned by extending into adventure training in the field. Combat Water Survival Training, rappelling, land navigation and marksmanship training provide physical challenges that test Cadets individually while developing teamwork skills. In the third phase, Cadets learn squad-level operations by taking part in demanding field exercises.

		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: MSC 3020								
		COURSE DESC:		CR The mission of the Leader Development and Assessment Course (LDAC) is to train U.S. Army ROTC Cadets to Army standards and to develop leadership and evaluate officer potential. This is accomplished through a tiered training structure using light infantry tactics as the instructional medium over a 28 day period. The Warrior Forge training program is sequential and progressive. It starts with individual training and leads to collective training, building from simple to complex tasks. This building-block approach permits integration of previously-learned skills into follow-on training. This logical, common-sense training sequence is maintained for each training cycle. Every day at LDAC is a day of training. Some of the major training events include the Army Physical Fitness Test, land navigation, weapons training, confidence building, and small unit leadership evaluations.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: MSC 3020								
		COURSE DESC:		Course develops future officers in many areas including leadership, personal development, values and ethics, officership, and tactics and techniques. The students will develop and execute training from beginning to completion to include reviewing for future improvement. Students will work on problem solving, career management, leadership development, ethics through scenarios, and the military decision making process. Communication will be a major focus in the areas of counseling, instructing, briefing, writing and evaluations. Students will learn about the military justice systems and administrative tools that can be used for discipline. Outside the classroom all of the areas will be developed through assigned duties in the Cadet chain of command as well as planning and leading the activities of the Corps of Cadets to include physical training, military science lab, and special events. A leadership lab, MSC 4010L, plus participation in three one-hour sessions for personal and organizational physical fitness are required.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:							
		COURSE DESC:		This course examines the relationship between drug use and crime in American society. It serves as a synthesis of the abuse of drugs and the societal consequences in relation to crime and the criminal justice system. In this course students examine the attributes of the people who use drugs, the social dynamics that influence legality, and the norms and characteristics of the society in which the substance use occurs. We conduct an examination of drug use and crime at the micro, meso, and macro levels of analysis. In particular, students gain an understanding of the nexus between individual use, crime, and systematic violence tied to criminal organizations that sell and traffic drugs. Students move beyond U.S. borders and explore drug trafficking and global politics. Prevention, intervention, and treatment tactics used in the U.S. criminal justice system are explored and critiqued. Finally, public policy concerning drug related issues are examined.
