The course draws on readings from Geography, Sociology, Economics, Literature, Women and Gender Studies and other disciplines. It begins with an investigation of systems of power and inequality with specific attention to race and racism and gender and sexism and their intersectionality with other forms of difference. The structure of social institutions and their influence in everyday life that produces wealth and inequality will also be examined. The relationship between population and environment will be examined through a gendered and economic lens. The economic and social-political dimensions of global inequality will be highlighted through case studies. The course will wrap up with an analysis of a recent biography and novel that will be carefully selected to allow students to synthesize information covered in the course. The course will integrate class meetings with related activities on campus, and wrap up with a wealth and poverty research expo open to OU faculty and students.

				Students in this problem-based discussion and writing course will examine race in America through the lenses of law and religion. Working on teams and using a variety of resources, students will investigate five issues spanning from the founding of the country to present day New Orleans. Analyzing past and present historical events, students will gain insights into both the progressive and repressive roles that law and religion can play in creating and resolving difficult human problems. Students who take this class will become "bridge-builders" in their communities; people who bridge the gulf between groups that sometimes perceive themselves as being divided, when they have far more in common than that which may be the subject of a "difficult dialogue."

		COURSE DESC:		African-American workers have had a profound effect on U.S. labor and its history. This course will examine the transformation of the African-American working class from the post-Civil War period through the late twentieth-century. African American workers and their community organizations played an integral role in shaping the American working class experience from the maturing industrial period through post-industrial period of U.S. history. We will analyze the changing relationship between capital and labor, employers and employees while evaluating the shifting meanings of "owners" and "workers" over time. Through the lenses of race, gender, and sexuality we will also analyze the developments in African American working-class culture and politics.

		COURSE DESC:		Introduction to the idea of a black art by focusing on a number of different kinds of art practice that enact the idea of race (e.g., film, video, fine art, new media, television, photography, literature). Develop skills in the critical study of black art as a historiographical, cultural, and political craft. Topics are chosen to provide a wide breadth and scope of black visual and expressive culture.									
				The course is interdisciplinary by design and necessity. Encourages a shift of hermeneutics from the black life world to black visual and expressive culture in the terms of blackness. This means repurposing the study of black art in ways other than fidelity to the social category of race and an ethics of positive and negative representation that tacitly encourages the idea of film as cultural policy. Details a commitment to how new paradigms for form and aesthetics, historiography, and intertextuality constitute blackness as the unfinalizable encounter between the idea of race and the idea of art rather than blackness as merely sociology.									
				The approach of this course is primarily that of visual culture and post-structuralist work devoted to difference. In this way, the method is twofold. Firstly, this is an introduction to the idea of race as enacted in the arts and an introduction to critical theory.

A&S	AAS	<b>AAS</b>	<b>3460</b>	<b>Black Men and Masculinities</b> GEC1: A-F REQUISITE: Soph or Jr or Sr COURSE DESC: Black Men and Masculinities is an interdisciplinary course that examines the diverse experiences of black men and the public discourses about black masculinities primarily in the U.S. The major thrust of the course is to examine how the gendered social order influences black men's actions and the way black men perceive themselves, other men, women, and social situations. We will use an intersectionality perspective to explore the relationships between multiple dimensions of social relations and inequalities: gender, race/ethnicity, class, and sexual orientation. We will also consider how black masculinities are produced in various physical/social sites. This course evaluates the prospects for social change in how black men think, feel, and act. It addresses issues such as: black male socialization and boyhood/guyland culture, the black male body image, black male friendship, black male sexuality and fertility, black men's experiences as fathers and their involvement in volunteer and paid youth work, male aggression and violence, the social construction of masculinities in different historical and cultural contexts, and men's movements and networks. A&S	AAS	<b>AAS</b>	<b>3500</b>	<b>African American Arts and Artists</b> GEC1: A-F REQUISITE: Soph or Jr or Sr COURSE DESC: The class is an intensive study of a specific topic/theme of Black visual and expressive culture. The course will be structured around this specific topic/theme to illustrate the methods and traditions of black visual and expressive culture. The content of the course will rotate but always address the relationship between art practice and the idea of race. Such topics might include feminist art, the racial grotesque, Chester Himes and the noir tradition, passing and the black embodiment index, historical consciousness and Civil Rights America, hip-hop modernism, or an analysis of one literary text (Ralph Ellison's Invisible Man or Ishmael Reed's Mumbo Jumbo) and its influence of black visual and expressive culture.  The purpose of this class is to promote a rigorous sense of blackness as entailing a negotiation with the necessary, creative tensions between art and distinct modalities of black visual and expressive culture. In other words, this course redraws the lines of influence, appreciation, allusion, causality, reference, and exposition by recognizing the importance of ambiguity over prescription. 		COURSE DESC:		Black Independent Cinema is a course about seeing. Many look but few see. We will build a consciousness of the Africana experience in independent filmmaking with particular emphasis on independent filmmakers from the United States. This aim will be achieved by examining the body of work produced by independent filmmakers from the early 1900s up until present day.									
				In addition to the study of the film diegesis, this course will explore aesthetic and theoretical issues relative to the development of an independent Black cinema. Black cinema describes a specific body of films produced in the African Diaspora which shares a common problematic (Yearwood, 2000, p5). Further this course will examine the social dynamics at work during the various stages of Black independent cinema, which has served as a counter to Hollywood's limited portrayal of the Africana experience.									
				This class is guided by interactive discussion and analysis of films screened.

				COURSE DESC: What does it mean to be a black child in America at the beginning of the 21st century? We will consider how the meaning of childhood changes over time, place, and social context for African Americans. By moving children to the center of focus, we will see that there is no singular definition of African American childhood, but instead many different ways in which African Americans experience childhood and adolescence. Typically African American children are only studied as victims or perpetrators of social problems, but in this course we will consider African American children in many additional contexts. We will begin by examining the meaning(s) of childhood and adolescence and how they have changed over time. Throughout the course we will see how African American children's lives are shaped by broader systems of inequality. We will also examine how African American children are active in the construction of their own peer cultures and popular culture, as well as why the relationship between Black youth and popular culture is routinely viewed as problematic, and how African American children are discussed within the popular press. Finally, we will examine how public policies shaping African Americans children and adolescents' lives are formulated and how they sometimes serve to replicate various inequalities.

		COURSE DESC:		For nonmajors. The brain creates behavior in part via multiple chemical messenger (neurotransmitter) systems that serve specific functions such as mood alteration and arousal. Recreational and psychoactive medical drugs work by mimicking these natural messenger systems, and thus help elucidate the behavioral functions of different neurotransmitter classes. Reviews nervous system structure and chemical signaling pathways and then survey the major classes of psychoactive drugs, including alcohol, opium, cocaine, amphetamines, nicotine, caffeine, marijuana, the hallucinogens, and the antidepressants. Particular attention is paid to the biological bases of their effects.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:								
		COURSE DESC:		Humans have always been interested in animal behavior. During our early history, much of that interest was based on practical need. Today studies of animal behavior help us understand our own behavior as well as our interactions with all other animals. Explore both how and why some animals migrate, live in groups, fight, have mating preferences, provide parental care, and communicate. Lectures will address some controversial issues in animal behavior, such as "Do animals have emotions?" Provides you with a new way of thinking about, observing, and interacting with the animals.

		COURSE DESC:		An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson's disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.

		COURSE DESC:		An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson's disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.

		COURSE DESC:		The purpose is to train Master's and Ph.D. level graduate students in the Department of Biological Sciences in molecular and cellular aspects of human tissue structure and function. This course is also intended to train graduate students to teach in the microanatomy laboratories offered in a standard medical curriculum. Complements graduate courses in clinical gross anatomy and provides credit for students pursuing a Master's or Ph.D. in Biological Sciences. A formal and structured approach to training students in microanatomy of human tissues and will be taught in conjunction with anatomy-based courses in the Department of Biological Sciences, including Clinical Gross Anatomy I (Back and Extremities), Clinical Gross Anatomy 2 (Thorax, Abdomen, Pelvis, and Perineum), and Clinical Gross Anatomy 3 (Head and Neck).									
				Lectures and laboratory exercises will involve examination of prepared slides and discussion of molecular and cellular composition of the basic tissue types and organs of the human body, as well as an introduction to pathology. Each laboratory will address a specific area and associated clinical questions and correlates that will require discussion among students.									
				In addition to weekly quizzes and practical examinations covering the course material on cell and tissue architecture and introductory pathology, students will be required to formally develop and present detailed audio-visual demonstrations of selected histopathological specimens to graduate students and graduate faculty within Biological Sciences.

				Aims to demonstrate fundamental principles and concepts of biochemistry, physiology, microbiology, and plant biology through beer brewing. The practice and study of fermentation first defined the field of biochemistry and combines skills/concepts taken from microbiology (yeast cultivation; inhibition of bacterial growth by hops and ethanol; assay of bacterial contamination), biochemistry (an understanding of aerobic vs non-aerobic respiration and glucose metabolism, lipid oxidation, enzyme kinetics and assay as in starch degradation by amylases and protein degradation by proteases), physiology (the effects of alcohol on the body), and plant biology (barley and hops cultivation, harvesting and malt production; the contribution of plant tannins to beer flavor). This course combines a series of lectures, labs and field trips to the Plant Biology Gardens to demonstrate the concepts invoked in lecture. This course exploits a general public interest in alcohol and its production to demonstrate fundamental scientific concepts using a hands on approach. As many students seem unaware of how alcohol interacts with the body in the long term, this course also informs students about the devastating effects of alcohol abuse on the body and society. As such this course outfits students with a wide range of key scientific concepts coupled with practical skills.

				This course focuses on the chemical principles involved in small molecule drug discovery, design and development. The organic chemistry of drug design and drug action is studied in detail. Starting from strategies for finding a lead compound through optimizing target interactions and drug efficacy, to ultimately bringing the drug to market, the impact of each step on the drug design process is discussed. Drug design tools and approaches such as combinatorial chemistry, molecular modeling, structure-activity-relationships and other strategies are analyzed in detail along with selected topics in the medicinal chemistry of both classic therapeutic agents and newer therapeutic breakthroughs.

A&S	CHEM	<b>CHEM</b>	<b>5810</b>	<b>Medicinal Chemistry and Drug Discovery</b>	LEC	LE	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F									
		COURSE DESC:		REQUISITE:									
				This course focuses on the chemical principles involved in small molecule drug discovery, design and development. The organic chemistry of drug design and drug action is studied in detail. Starting from strategies for finding a lead compound through optimizing target interactions and drug efficacy, to ultimately bringing the drug to market, the impact of each step on the drug design process is discussed. Drug design tools and approaches such as combinatorial chemistry, molecular modeling, structure-activity-relationships and other strategies are analyzed in detail along with selected topics in the medicinal chemistry of both classic therapeutic agents and newer therapeutic breakthroughs.

		COURSE DESC:		REQUISITE:									
				Survey topics, which are not included in CHEM 4870 or law enforcement technology (LET) courses, relevant to the modern crime lab. These topics will be focused on arson and explosives analysis and DNA analysis. The DNA section will survey the techniques and instrumentation used in the identification, extraction, and analysis of DNA obtained from forensic evidence with an emphasis on electrophoretic methods of analysis. Topics include the identification and extraction of blood stains, DNA analysis by restriction fragment length polymorphisms, PCR amplified length and sequence polymorphisms, STR systems, Amelogenin markers, Y-chromosome markers and mitochondrial DNA sequencing. Electrophoretic techniques and statistical interpretation of data will also be covered. Other topics may also be included.

		COURSE DESC:		This advanced seminar focuses on building research development and leadership skills necessary for graduate students to succeed as professionals in the broad disciplinary field of Chemistry and Biochemistry. Specific topics vary based on the most recent advances in the field, but always include significant applied experiences requiring both depth and breadth of knowledge in the discipline. These activities are focused to improve graduate student communication skills in their field including interpretation and analysis of research output; development of research hypotheses; leadership in collaborative work; and awareness of relevant experimental results in comparison to peer-reviewed journals.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Fr or Soph									
		COURSE DESC:		Provides a broad overview of the archaeology of the Mediterranean world from the time of the Old Kingdom in Egypt (3rd millennium BC) to the early Byzantine period (6th century AD). Organized around iconic structures from the main cultures and time periods covered. Each site will be used individually as a vehicle for studying broader aspects of the society that produced it. Explores why it is particularly significant and representative of that society. Questions include: Why were lists of "wonders" made in the first place? What was the political significance of creating a "wonder"? What effect did the original Seven Wonders have on the monuments that came later? What effect did the wonders have on the modern imagination and the archaeologists devoted to rediscovering them?

		COURSE DESC:		Introduces Greek society and culture through investigation of its artifacts and the contexts in which they are found. Explores the different approaches to investigating particular kinds of material evidence, and what aspects of Greek culture they reveal. Starting with the Minoans and Mycenaeans, examines the growth of civilization in Bronze Age Greece and its rebirth after the fall of the Mycenaean palaces, to the appearance of city-states, and the rise of Philip of Macedon in the 4th century. Examines how to identify and date different types of material evidence, and be able to show their relevance to the reconstruction of ancient Greek culture as a whole.

		COURSE DESC:		Explores the material remains from the Roman world and of the information they provide about Roman society. Among other things, examines sculpture, painting, coinage, and architecture to learn how Romans at various levels of society used objects, images and built structures to make statements about themselves. Examines how these messages differed from one part of the empire to another. Teaches how to look at and 'read' objects and images. Special emphasis placed on methodologies used to interpret them.

		COURSE DESC:		Traces the development of states in Mesopotamia and Egypt, from the beginning of agriculture to the end of the Bronze Age in 1000 B.C. Explores how these civilizations of the Near East first developed cities, temples and palaces, writing, taxation, and large scale warfare, all which influenced the development of cultures ancestral to our own. Topics include the role of religion in the early states, the rise of the absolute ruler, trade networks, and the growth of the Mesopotamian and Egyptian empires. Focuses in particular on the roles of the ruler in religion, society and economy, and the sources for reconstructing economy and society at the lower levels of society.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Examines the relationship between the development of technology and political/economic factors that affected changing attitudes and desires of the Roman people in different parts of the Roman Empire. Explores the tools and processes used for making objects, building structures, and supplying water and food to urban masses as well as the organization of labor that makes such accomplishments possible. Various types of modern analysis are discussed to show how advances in technology affect our understanding of the ancient world. Counterpoints made with Classical Greek and Hellenistic cultures since many technologies were borrowed by the Romans. Modern parallels also discussed.

		COURSE DESC:		Examines technological developments in Graeco-Roman world within a chronological framework so that the advances in technology can be related directly to broader changes in the Mediterranean world from the 7th century BC to the 4th century AD. Examines a variety of different types of technology including coinage, building construction, water management, agricultural/food production, terracotta, glass, metallurgy, shipbuilding, and warfare. Students look at ways in which the societal needs framed technological development at different times and places, as well as ways that new technologies affected the societies in which they occurred. A major goal is to examine the role of technology in the Mediterranean basin as the organization of society moved from the Greek city-state to Hellenistic kingdoms to the Roman Empire.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		The course focuses on the archaeological context of selected objects usually described as examples of Greek art. It examines where they were found, what significance they had in the culture that produced them, how they were excavated, how they have been conserved and what ethical issues surround the modern conservation and acquisition of them. Each object has its own story yet also fits into a larger context. Above all, this is a course that emphasizes the importance of establishing clear methodologies and its purpose is to provide students with tools to explore the contexts of objects, ultimately on their own. What questions do they need to ask? To what types of sources can they reliably turn for information? How might they interpret the ethical arguments raised by the excavation and acquisition of some objects? The core material for the course will comprise twenty objects. Chronology will provide the organizational principle for the study of the objects. The focus of each class will be a single object; readings will discuss some aspects of its context and part of the in-class presentation will provide comparative material/objects.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		This course examines the rise and fall of the Athenian Democracy and the Roman Republic, placing particular emphasis on understanding the social, political, and cultural attitudes and developments that contributed to the development and collapse of these types of government. Because both types of government conveyed substantial political power and responsibility to the citizenry as a whole, the course takes a broad interdisciplinary approach to understand the views and experiences of the people who lived under these governments. Focusing on ancient sources, the course seeks to understand how ancient Greeks and Romans described and conceived of their types of government, and how they understood the erosion and collapse of those governments. The course uses a wide range of evidence, including architecture, art, drama, history, literature, and philosophy.

		COURSE DESC:		Through myth, literature, religion, art and archaeology, this course investigates different kinds of evidence for the food cultures of the ancient Near East, the Greek world and the Roman Empire. Specific types of food and drink and occasions at which they were shared formed the social and religious ties at the heart of these civilizations, and helped shape modern Western values concerning food production and consumption. Food security, human fertility, sense of community, relation to the gods and proper social order are all themes that reappear in the myths, literature and art of these major civilizations.

		COURSE DESC:		This course introduces students to ancient thinking about ethnicity and race. It studies the ways ancient Greeks and Romans conceived of ethnic, cultural, or racial difference, and how these ideas of similarity and difference were constructed. The course also considers how, and to what extent, ancient thinking about ethnicity and race influences modern thinking. The course uses primary and secondary texts to explore how ethnicity was defined by ancient peoples, what traits identified a person as being similar or different, and how the recognition of difference influenced an individual's life and opportunities in the Greco-Roman world. The course examines different ways that race, ethnicity, and difference were constructed in the ancient world, and compares and contrasts this with modern constructions of these ideas.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Attempts to approach the city of Jerusalem and the complex interaction of political, social, and above all religious realities that continue to define the city. Focuses on Jerusalem as a mythic as well as a historical entity; attempt to disentangle some of the threads that make Jerusalem the rich tapestry of meaning it has become. It does this by a careful reading of textual material from Jewish, Christian, and Islamic sources, as well as of archaeological and art-historical data. Focuses especially on the Temple Mount as a site of religious practice, transformation, myth, and conflict because of the long shadow it casts over the traditional landscape of Jerusalem.

		COURSE DESC:		Focuses on the people of the Greek city of Athens during an extraordinarily creative period of history--the century and a half from 480 B.C to 323 B.C--when the Athenians undertook the world's first democratic experiment. Examines textual sources (literature, philosophy, history, speeches and public documents) and archaeological sources (architecture, sculpture, painting) for the light which they shed on the ancient Athenians' political, intellectual, and artistic problems, concerns, and achievements. Explores how the Athenians dealt with those fundamental questions about life that face all thinking humans in a democracy.

		COURSE DESC:		Focuses first on Alexander himself, a man who became a myth even before his death. Next examines the Hellenistic world, the world that Alexander created out of his conquests. Alexander's conquests helped spread Greek civilization over the whole of the eastern Mediterranean. Many of the issues that people living in this world confronted are still relevant today: the nature of celebrity, for Alexander was arguably the first celebrity; the challenges of emigration, of living in a society that was culturally and ethnically diverse, of assimilating a foreign culture, and living under an autocracy.

		COURSE DESC:		Looks at life and thought in ancient Rome from Augustus through Marcus Aurelius (27 B.C.- A.D.180) based on archaeological, historical, and literary sources. Examines across cultural boundaries the issue of what it means to be human. Focuses primarily on the inhabitants of Rome, how they lived and what they thought about fundamental issues such as: How should the demands of the common good be balanced with individual needs and desires? What is the role of religion in society? of education? of art? How does one deal with death? What ultimately make life worth living for an individual in Roman society? Issues then compared with our own attitudes in modern America. Studies the use of political propaganda in society, the rituals of daily life in ancient Rome, and the art and architecture that made up the environment in which these people lived.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		What is "religion" and how do we study it? The answer may seem obvious but it's not. In this course, we explore religious practices in multiple religious traditions and examine the relationship between religion and a range of other social factors--social class, gender, ethnicity, politics, among others. Along the way, we will also reflect on broader comparative and methodological questions posed by scholars who have studied religion from diverse perspectives (historical, psychological, phenomenological, and sociological).

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Introduction to serious, informed discussion of basic intellectual issues in religious belief. One of two Difficult Dialogues courses offered by the Department of Classics and World Religions to encourage thoughtful and productive discussion of historically contentious topics. Discussions concerning religious beliefs are notoriously difficult. They have often devolved into disputes, which have divided families, sundered friendships, and even fueled wars. Experience in navigating difficult dialogues concerning, we believe, transfer into the more generalized skill of productive discussion concerning virtually any difficult topic. So, this class is concerned specifically with learning to think through difficult religious topics and more generally with learning to think through any difficult and contentious topic.									
A&S	CLWR	<b>CLWR</b>	<b>2220</b>	<b>Difficult Dialogues: Religion, Gender and Sexuality</b>	LEC	LE	3	0	2HL	N	U10		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		One of two Difficult Dialogues courses offered to encourage thoughtful and productive discussion of historically contentious topics. Promotes dialogue on conflicts made divisive because of significant differences involving religious beliefs and assumptions about gender and sexuality such as how religious experience is gendered, what scriptures in different traditions say about women, and how religious traditions have changed in the way women and their role in society are viewed. Emphasizes the search for understanding of others whose beliefs are rooted in different religious or secular humanist traditions. Students are asked to engage in disciplined, self-critical thinking. Draws on methods and content from intellectual and religious history, the philosophy of religions, and contemporary religious dialogue.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Students will explore the question "What is evil?" from the perspectives of the major World Religions: Judaism, Christianity, Islam, Hinduism and Buddhism. In addition they will explore how evil was conceptualized in core texts of Classical Greece and Ancient Rome. The course begins with a brief introduction to psychological and sociological research which attempts to answer the question "Why do good people do evil things?" It concludes with a short consideration of representations of evil in popular culture and influential texts written in response to the Holocaust.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		What does it mean to believe in ghosts? How do people who cast hexes, perform a Black Mass, or hold séances understand their actions and experiences? Designed to address these kinds of questions, this course is a survey, from the perspective of religious studies, of beliefs about ghosts, demons, and supernatural phenomena throughout history and around the world. In their readings, films, and lectures, students will look at ghost traditions from North India, Hawaii, and Europe; exorcism in the U.S., Sri Lanka, and Tibet; demonology in Buddhism, Hinduism, and Zoroastrianism; and witchcraft in England, Italy, and Niger. They will also examine the scientific claims of parapsychology, the practice of necromancy, and accounts of people who report being attacked by evil spirits in their sleep.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Introduces Islam as a religious and cultural system. Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shari'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also place 'insider' perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that 'humanity consider from what it is created'.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:	Jr or Sr						
		COURSE DESC:		Surveys the main theoretical orientations that have guided the study of religions within the Humanities and Social Sciences as these fields have developed since the 18th century within the academic institutions of Europe and the United States. Begins with early Enlightenment thinkers who were responding to the wars of religion and the rise of rationalism and empiricism. Continues with 19th and early 20th century scholars who confronted the impact of industrialization, nation-state formation, bureaucratization, technologization, and most of all, the colonization of entire societies and cultures beyond Europe. To listen in on discussions about religion among U.S. and European thinkers during these three centuries is to become privy to the struggles of North Atlantic societies with 'the disenchantment of the world,' that is, the loss of faith in a transcendent purpose connected to a larger divine will. After surveying the classical theories, examines the impact of decolonization on the inherited Enlightenment assumptions concerning religion. Discussion today has raised substantial doubts that the category of 'religion' is of any real empirical or analytical use. Instead, many theorists argue that the inherited conceptions of 'religion' are nothing more than a mask that obscures and justifies Western domination. Other theorists, however, have argued the 'religion' concept is still useful if corrected for its biases. Explores this debate and tries to arrive at one's own conclusions about whether the religion concept is still helpful

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		How can a book that seeks to justify extreme violence inspire a man whose name is synonymous with peaceful protest? To answer this question, we will examine the life and thought of M. K. Gandhi through the lens of religion, focusing on the text that served as one of his chief inspirations, the Bhagavad Gita. The Gita is an ancient philosophical poem in which the god Krishna convinces the reluctant warrior Arjuna to initiate a war that will annihilate most of the human race. But to Gandhi, this text was the blueprint for the most successful nonviolent resistance movement in history, the campaign to free India from British control. By reading the Gita and works by and about Gandhi, students will examine the confluence of religion and politics that gave rise to Gandhi and to modern India.

A&S	CLWR	<b>CLWR</b>	<b>4330</b>	<b>Political Islam</b> GEC1: A-F REQUISITE: Jr or Sr Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors--the 'ulama', lay activists, social movements--responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context--Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by 'political Islam'--but also the politics of Islam, and what the implications are for a wider globalized modernity.	LEC	LE	3	0		N	U30		0

		COURSE DESC:		Introduces Islam as a religious and cultural system. Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shari'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also place 'insider' perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that 'humanity consider from what it is created'.

		COURSE DESC:		Introduces Buddhist doctrines, practices and institutions. Focuses on the spread and development of Buddhism across Asia and beyond, with an eye toward examining how foundational Buddhist ideas and practices have taken shape in specific places and in particular historical contexts. Selectively surveys the foundational teachings, history and diversity of Buddhism, from the lifetime of the Buddha in fifth century BCE India to contemporary Buddhist communities in Southeast Asia, East Asia, and North America. Along the way, considers some important questions raised and addressed in the critical study of religion.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:		PR							
		COURSE DESC:		Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors--the 'ulama', lay activists, social movements--responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context--Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by 'political Islam'--but also the politics of Islam, and what the implications are for a wider globalized modernity.

Through a variety of sources, illuminates Buddhist concepts of gender and sexuality, views of women's spiritual capacities, the diversity of women's images, roles, experiences, concerns, and contributions in Buddhist societies, and scholarly approaches to women in Buddhism. Special attention given to how gender is constructed in each cultural and religious context encountered, with particular emphasis on Buddhist women in Southeast Asia. Explores reasons why texts on religion have not always included the voices of women, and investigates ways to uncover them through research techniques and alternative hermeneutical strategies.

				ELIGIBLE GRADES: GEC1: A-F REQUISITE: 8 Hours in (AAS or ANTH or CLAS or HIST) and Sr only									
				COURSE DESC: What was it like to be a slave in the Roman world? No first hand account describing slavery which was written by a slave has survived. To understand what a slave's life was like we are forced to reconstruct slavery from the materials that do survive. These include: descriptions of slavery and slaves by the slave owners; literature which features characters who are slaves; archaeological remains which illustrate the conditions of slavery. An important concern will be the special demands made in the reading and interpretation of texts that are over two-thousand years old. Finally, the experience of African-American slaves in the 18th and 19th centuries, a period more richly documented than the Roman, helps us to imagine much more about the Roman institution than what we could infer from the ancient sources alone.

		COURSE DESC:		This course is an introduction into behavioral economic theory and methods as they pertain to concepts of altruism, generosity, and giving. The course will contrast economic theories that predict selfish behavior to those that attempt to explain kindness and generosity. Recent research in behavioral economics shows a plethora of surprising and often, conflicting evidence on the existence of altruism. Students will become familiar with the altruism literature and related economic experiments and games. The role of humanitarianism in society will be explored as students perform service learning projects with local non-profit organizations. Students will learn project evaluation techniques to give insight into effective philanthropy.

		COURSE DESC:		Our readings, film screenings, discussions (oral and online), research and composing will be focused on relations between people and the environment, primarily but not exclusively, in our regional environment. We will explore mountaintop removal coal mining in Appalachia, the natural history of the region's forests, industrial food systems and "locavore" (agri)culture. Our approach will be "ecological" in the sense of attempting to understand our complex interrelationships with the natural and artificial systems we rely on and of which we are a part. We will take a similar approach to environmental rhetoric and use rhetorical analysis as the main means of mapping connections among informative, persuasive, and creative discourse on these topics.

		COURSE DESC:		Rhetoric and law were interdependent in Ancient Greece. This course introduces students to rhetorical concepts and appeals that remain critical to the practice of American law as they arise out of western rhetorical history. Legal concepts from other cultures will provide further context. The course will also introduce rhetorical analytical methods for understanding the textual features of law and policy through concepts such as stasis theory, audience, appeals, and common ground. Assignments might include rhetorical analyses of legal documents, presentation of legal cases, analyzing an important legal decision, analyzing the impact of particular laws on issues of race, class, gender, orientation or disability. Students will study written rhetorical and textual features of legal genres.

		COURSE DESC:		Explores the discourses, theories and practices of ecologically-oriented movements, genres, and intellectual areas that are influencing English Studies. Examines a range of ecological positions, including mainstream environmentalism, deep ecology, ecofeminism, and social ecology. Our method will be to discuss and practice criticism of literary and cultural texts, including rhetorical studies of ecological texts, rhetoric, and popular culture expression. Course study will employ rhetorical theories as a productive tool for identifying recurring motifs, conflicts, concepts, and material realities at stake in artistic and rhetorical expressions about the ecology and human relations within it, and how writers and film makers make strategic appeals to specific audiences. Topics may include issues of representing nature, the separation of nature and culture, relationships between place and identity, issues of development, technology, indigenous cultures, and environmental justice. Our readings will include book excerpts, environmental writing, and rhetoric, fiction, poetry, visual, and online texts.

				The course focuses on the rich literary tradition of Ireland. For such a small country, Ireland boasts some of the biggest names in literary history, including four Nobel Prize winners: George Bernard Shaw, W.B. Yeats, Samuel Beckett and Seamus Heaney. This class focuses on introducing students to the rich literary tradition of Ireland beginning with an examination of Irish myths and legends as well as examining texts from the Irish Literary Renaissance through the twenty-first century. Irish literature is haunted by its political, linguistic and cultural history as well as the geography of Ireland itself, and therefore, this course explores the shaping influences of politics, language, culture and geography alongside the exploration of examples of Irish literature. Readings include early Irish legends and myths as well as texts from the nineteenth through the twenty-first century. Some of the authors explored in this course include W.B. Yeats, Lady Gregory, Edna O'Brien and Seamus Heaney.

		COURSE DESC:		Introduces students and teachers to writing-to-learn theories, concepts, and strategies central to the teaching of writing. To familiarize teachers with how writing-to-learn strategies can work, we will begin each class by engaging in informal writing exercises. Writing-to-learn concepts allow teachers to imagine curricula where writing creates knowledge, where ties to reading, writing, and thinking lead to inquiry, and where teachers integrate critical engagement through writing with various kinds of sources, from library sources to popular culture. Teachers will apply both theory and practice in the classroom and will design assignments that promote critical inquiry. Usually for students attending the Appalachian Writing Project.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Sr only									
		COURSE DESC:		What is the literacy crisis? Our environment bombards us with increasing amounts of information: images, words, text. Those who speak of a literacy crisis assert that a large portion of the United States' population is overwhelmed by rising demands made on them and handicapped by inadequate literacy skills.									
				This problem can be demonstrated by the poor performance of students on international tests of reading and writing, and employers' charges their workers cause accidents and decrease production because of limitations in their reading and writing skills.									
				To assess the validity of these claims, this course reviews the historical development of literacy; the personal and professional applications of literacy; the power of literacy to effect change within the developing world; the educational strategies employed by U.S. schools to foster literacy skills; and the performance of students and workers on reading and writing tasks. The course also addresses the tensions that complicate efforts to establish a definitive standard for writing and reading skills. Some of these tensions arise from the evolving nature of reading and writing skills and from the demands made by various activities and professions on these same skills. Beyond the tensions produced by changes within literacy itself, other changes might arise from employers' efforts to acquire the most highly skilled workers at the lowest possible wage.									
				Students critique the arguments for and against the existence of this crisis and suggest responses based on their views. Students also study literacy practices within their areas of study and propose solutions to literacy problems that arise within their disciplines.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 4 hours in GEOG and (Jr or Sr)									
		COURSE DESC:		This course offers a unique combination of collaborative mapping, spatial understanding of community issues, and interaction with and participation in the community from the bottom up, as engaged members of the Athens community. Students will be introduced to real-world problems and best practices, and encouraged to explore creative solutions. Community geography helps students better understand the spatial nature of these issues, how to evaluate both local and global forces which transform communities, and assists them with evaluating actionable solutions which promote sustainability at the local level. This course is designed to engage students with the Athens area, to build collaboration between students, residents and community groups, and to develop marketable skills and expand student awareness of community issues.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in GEOG and (Jr or Sr)									
		COURSE DESC:		An introduction to how urban planning tools can be used to support the natural environment and promote local and regional sustainability. Outlines strategies for meeting important biodiversity, water resources, hazard mitigation, working landscape, waste management, and air quality goals. Connects environmental planning with supportive topics such as environmental policy and governance, sustainability and climate action planning, environmental justice, and environmental assessment.

				A critical examination of the role of nature and political economy in the sustainable development of urban environments in the context of social and environmental justice. Topics studied include the relationship between urbanism and nature, environmental justice, compact versus sprawling development, slums in developing world cities, urban agriculture as a solution to urban hunger, toxic lawn ecologies, uneven urban forests and parks, vulnerability to urban climate changes, brownfield redevelopment and the specter of gentrification, and the role of animals in the city, among other topics. These topics are studied in both developed and developing world contexts. Students taking this course will also be asked to evaluate urban sustainability initiatives related to these topics with concepts of social and environmental justice in mind.

		COURSE DESC:		Knowing the geography of one's community, from the distribution of parks and schools to the location of healthcare and social services providers to the assessment of walkable downtowns and neighborhoods, is a hallmark of an engaged citizenry. Community Geography examines a variety of place-based challenges and opportunities that are found within and between communities through the lens of geo-spatial analysis. It engages students in real ways through documenting, evaluating and mapping the community they live in and care about. University-community partnerships are built from the bottom up around social issues such as income inequalities, food insecurity, educational disparities, limited access to transportation and healthcare, and more.									
		COURSE DESC:		This course offers a unique combination of collaborative mapping, spatial understanding of community issues, and interaction with and participation in the community from the bottom up, as engaged members of the Athens community. Students will be introduced to real-world problems and best practices, and encouraged to explore creative solutions. Community geography helps students better understand the spatial nature of these issues, how to evaluate both local and global forces which transform communities, and assists them with evaluating actionable solutions which promote sustainability at the local level. This course is designed to engage students with the Athens area, to build collaboration between students, residents and community groups, and to develop marketable skills and expand student awareness of community issues.

		COURSE DESC:		A critical examination of the role of nature and political economy in the sustainable development of urban environments in the context of social and environmental justice. Topics studied include the relationship between urbanism and nature, environmental justice, compact versus sprawling development, slums in developing world cities, urban agriculture as a solution to urban hunger, toxic lawn ecologies, uneven urban forests and parks, vulnerability to urban climate changes, brownfield redevelopment and the specter of gentrification, and the role of animals in the city, among other topics. These topics are studied in both developed and developing world contexts. Students taking this course will also be asked to evaluate urban sustainability initiatives related to these topics with concepts of social and environmental justice in mind.

The course will begin with an introduction to the sciences of paleontology and geology including an overview of the theories of plate tectonics and evolution, geologic time, relative and absolute age dating, and the fossil record. The history of the science of paleontology will also be explored as well as the different methods and techniques employed by modern paleontologists to ask and answer scientific questions about ancient life including dinosaurs. Topics will then focus on the physical, biological, and chemical conditions of the Mesozoic world and a general introduction to dinosaurs including their classification, anatomy, physiology, and behavior. Three major groups of dinosaurs will be discussed in detail, the Ornithischia, Sauropoda, and Therapoda in addition to other major components of Mesozoic ecosystems including marine reptiles, pterosaurs, mammals, insects, and plants. The course will conclude with an overview of the evolution of terrestrial and marine ecosystems during the Mesozoic and the causes and effects of the end Cretaceous mass extinction.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: GEOL 3150									
		COURSE DESC:		In second year geology, you are starting to build a breadth of knowledge in the geological sciences. More importantly, you are starting to learn the material which will make you a practicing geoscientist. All subjects are related and interconnected; you must now build on the knowledge learn in previous courses. An introduction to the basic concepts of rock-forming processes in igneous and metamorphic environments. This includes concepts related to identification, classification and origin of volcanic rocks, igneous intrusions, and metamorphic rocks associated with plate collisions, burial and intrusions. More importantly, you will gain an overview and understanding of the fundamental geologic processes that form these rocks. While what we (mostly) see at the Earth's surface is sedimentary units; the mantle and major portions of the Earth's crust have been formed and modified by igneous and metamorphic activity. Therefore, an understanding of these activities is essential as a starting point for understanding the Earth. Also, the processes that formed these rocks are exciting and fun to study!

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	GEOL 3201							
		COURSE DESC:		Radiogenic and stable nuclides are a critical tool for dating materials, understanding planetary differentiation, and tracing provenance and process in all spheres of the earth. This course examines the theory and application of isotope geochemistry to a broad range of geologic topics. Radiometric isotope techniques (dating and geochemical tracing) are introduced through a discussion of atoms, isotopes, and radioactive decay systematics, followed by systematic discussion of a number of specific systems (e.g., uranium-lead). Applications of stable isotopes to investigating volcanism, and meteoric-hydrothermal systems are discussed. Concepts of mass-balance, mixing theory, and open and closed systems are introduced.

More importantly, you are starting to learn the material which will make you a practicing geoscientist. All subjects are related and interconnected; you must now build on the knowledge learn in previous courses. An introduction to the basic concepts of rock-forming processes in igneous and metamorphic environments. This includes concepts related to identification, classification and origin of volcanic rocks, igneous intrusions, and metamorphic rocks associated with plate collisions, burial and intrusions. More importantly, you will gain an overview and understanding of the fundamental geologic processes that form these rocks. While what we (mostly) see at the Earth's surface is sedimentary units; the mantle and major portions of the Earth's crust have been formed and modified by igneous and metamorphic activity. Therefore, an understanding of these activities is essential as a starting point for understanding the Earth. Also, the processes that formed these rocks are exciting and fun to study!

A&S	GEOL	<b>GEOL</b>	<b>5280</b>	<b>Physical Geochemistry</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Basic principles of physical chemistry for hydrogeologic, environmental, and geologic applications. Topics include adsorption and desorption reactions, chemistry of sulfur and iron, introduction to stable isotopes, transport mechanisms of chemical species, and origin, formation, and migration of oil.									
A&S	GEOL	<b>GEOL</b>	<b>5290</b>	<b>Contaminant Geochemistry</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Provides students with knowledge of the chemical principles and processes involved in the generation and movement of contaminants. It will give students an understanding of the sources, fate, and chemical behavior of some of the most important classes of chemical pollutants.									
A&S	GEOL	<b>GEOL</b>	<b>5300</b>	<b>Principles of Geomorphology</b>	LAB	LB	4	0		N	G40		0

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Global tectonics and structure of continental cratons and margins, mid-ocean ridges, island arcs, and major orogenic belts.									
A&S	GEOL	<b>GEOL</b>	<b>5660</b>	<b>Geodynamics: The Earth's Interior</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Solid earth geophysics (gravity, magnetism, seismicity, heat flow) and internal structure, dynamics, and evolution of Earth's core, mantle, and crust.									
A&S	GEOL	<b>GEOL</b>	<b>5670</b>	<b>Tectonophysics</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Quantitative modeling of solid earth physical processes. Physical properties of minerals, rocks, and unconsolidated materials. Modeling of tectonic plate flexure, geothermal heat flow, seismic wave propagation, and fault mechanics.									
A&S	GEOL	<b>GEOL</b>	<b>5700</b>	<b>Groundwater Fundamentals and Practices</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Students learn fundamental concepts and theories related to occurrence, movement, storage, reaction, contamination, and remediation of surface and groundwater and their applications to real-world problems through case studies. Topics include water issues, hydrologic cycle, surface water-groundwater interaction, groundwater sustainability, streams and watersheds, types and properties of aquifers, groundwater flow and quality, basic well hydraulics, and contamination and remediation.									
A&S	GEOL	<b>GEOL</b>	<b>5710</b>	<b>Advanced Environmental Geology</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Covers the conceptual basis for understanding transport and reaction processes that govern change in many environmental systems. Emphasizes processes occurring at the three major environmental interfaces: air and water, water and the adjoining earth material, and air and soil. Includes chemical and thermal equilibrium, chemical transport, and transport and transfer of energy across the interfaces.									
A&S	GEOL	<b>GEOL</b>	<b>5730</b>	<b>Forensic Geoscience</b>	LAB	LB	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Introduction to geologic, geophysical, and geochemical techniques employed by forensic investigators. For majors in chemistry, biology, anthropology, and geology.

		COURSE DESC:		An introductory multimedia survey of medieval society and culture, especially but not exclusively European. The Middle Ages are commonly seen as primitive and barbaric, as pure and romantic, or as an infantile version of the modern world. This course invites students to test those generalizations against more critical views. Focus is on violence and religious life, two topics with a surprising amount of overlap between them. Along with reading primary sources, including warrior epics and saints' lives, students analyze a variety of films ranging from famous to obscure, artistic to graphic. Whatever the medium, we are concerned with improving our critical and interpretative skills, and with better understanding the challenges and possibilities for engaging with cultures other than our own.

A&S	HIST	<b>HIST</b>	<b>2200</b>	<b>A Global Military History from Antiquity to the Present</b> ELIGIBLE GRADES: COURSE DESC:	LEC	LE	3	0	2SS	N	U30		0
				GEC1: A-F REQUISITE: This is a survey on war in world history from ancient kingdoms and empires to present-day conflicts. These themes are central: war and the state; war and society; war and culture; war and trade; and conflict resolution. In the twenty-first century, the definition of "war" has broadened from our modern understanding as an armed conflict between states. Today, war is better defined as an armed conflict between organized groups, which includes states, terrorist groups, militias and warlords, and crime syndicates. "World," too, has taken on broader meaning: it is not simply a geographic term, but connotes connections between states and people. Studying war in history allows students to consider how societies have responded to change under duress, how technology has spread across the globe, how empires were built and how they collapsed, how ancient empires became modern states, and how modern culture emerged from the rubble of wars.

				GEC1: A-F REQUISITE: This course offers students an opportunity to critically explore the historical connections between Middle East history and other parts of the world. Structured as a chronological survey spanning the period of 600-1990 AD, the course covers events and processes related to developments in politics, economics, social organization, religion, science and technology, and culture. It highlights key moments in which dynamics in the Middle East shaped other parts of the world. Equally important will be those moments in which developments in other parts of the world helped shape the region. The survey will draw on connections between the Middle East and multiple other regions: Africa, South Asia, Southeast Asia, Europe, and the Americas. No prior historical or regional knowledge necessary.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:								
		COURSE DESC:		Beginning in the third century, the mighty Roman Empire began its slow but inevitable decline and fall, brought to a decisive end by the barbarian invasions of the late fourth and fifth century, epitomized by the sack of Rome by Goths in 410 and Vandals in 455, and terminated with the deposition of the last western emperor in 476. That is one vision of the period sometimes called Late Antiquity. The other vision sees the transformation of classical culture, closely related to the emergence of Christianity, and diverse political and social changes that would live on long after the imperial political order disappeared in the west. This course will take account of both these visions, with a strong preference for continuity over decline. Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Soph or Jr or Sr									
		COURSE DESC:		Beginning with the end of the western Roman Empire in 476, this course surveys major legal systems emerging around the Mediterranean and western Europe over the next 500 years. The legacy of imperial Roman law affected all these systems, whose own legacies would endure for centuries. Featured in the survey are the reforms of Justinian and the Corpus Iuris Civilis, early Frankish law, the Visigothic Code, the formation of Islamic jurisprudence, Carolingian legal reforms, and Anglo-Saxon law before the Norman Conquest. Focal topics allow comparison between different legal systems and the societies they affected, e.g. sources of legal authority (human and divine, oral and written); status and rights of women; slavery and minority groups; vengeance and restitution. Students analyze these topics through case studies, based on primary sources in translation.

A&S	HIST	<b>HIST</b>	<b>3550</b>	<b>The Age of Darwin, 1800-Present</b> ELIGIBLE GRADES: GEC1: A-F COURSE DESC: REQUISITE: Soph or Jr or Sr What is life, and where did it come from? This course presents a historical survey of how people have attempted to answer that question since 1800, by situating the revolutionary impact of Victorian British naturalist Charles Darwin and the theory of evolution in its age. Beginning with key moments in the development of evolutionary theory, the course then explores its reception in Britain, Europe, and Asia. Emphasis is on the social and historical context of ideas as well as controversies and religious disputes, the relationship between ideas and the public especially through popular media, and the various uses of evolutionary ideas in wider arguments about humanity and society. It concludes with a consideration of how historical debates on evolution resonate with debates in the present.	LEC	LE	3	0	2HL	N	U30		0

		COURSE DESC:		The ideas of ancient East Asian philosophers, thinkers, and mystics offer us surprising insights into life in the 21st century. In this interdisciplinary capstone course, we read and discuss the foundational texts of the East Asian tradition (including, but not limited to, the classic works of Confucianism, Daoism, and Buddhism). We look at these writings as historical documents which need to be placed in the context of their times, as creative works to be analyzed as literature, and as living philosophical texts which contain ideas that resonate with our own lives.

		COURSE DESC:		History is the past. It also is how we remember and tell about the past. In this seminar-style course, we explore different approaches to history. Narrative, or story-telling, remains the oldest and still most common way of describing the past. But alternatives are to be found, not only among professional historians, but artists and filmmakers. Understanding the relationship of humans to their past has occupied some of the greatest of historians and philosophers. This course surveys some of these approaches to history and considers the possible future of history.

		COURSE DESC:		This course examines the political economy of the New Deal, the broad program of relief, recovery, and reform that President Franklin Roosevelt's Administration implemented in response to the Great Depression. It surveys the reaction to these unprecedented government efforts across the political spectrum, with an emphasis on the New Deal's most articulate critics. And it considers how Roosevelt's major domestic and foreign policies influenced the direction of both liberalism and conservatism in the United States from the decade of the thirties through the end of World War II.

A&S	HIST	<b>HIST</b>	<b>5293</b>	<b>World of Late Antiquity: Culture and Society in the Late Roman Empire</b>	LEC	LE	4	8		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		Beginning in the third century, the mighty Roman Empire began its slow but inevitable decline and fall, brought to a decisive end by the barbarian invasions of the late fourth and fifth century, epitomized by the sack of Rome by Goths in 410 and Vandals in 455, and terminated with the deposition of the last western emperor in 476. That is one vision of the period sometimes called Late Antiquity. The other vision sees the transformation of classical culture, closely related to the emergence of Christianity, and diverse political and social changes that would live on long after the imperial political order disappeared in the west. This course will take account of both these visions, with a strong preference for continuity over decline. Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		Historical introduction to Roman law, interpretation of legal sources, and especially the role of law in Roman society and culture. Chronological focus is on the Empire through the age of Justinian. After a survey of the origins of Roman law, lectures and readings use legal sources to look in two directions: downwards to the way law affected social life; upwards to how politics and governance affected law. Attention will be given throughout to how the nature of different types of legal evidence affect our interpretation of the purpose and effectiveness of law. Specific topics of focus will include the bearing of law on marriage and family life, slavery and freedom, surveillance, and religion.									
A&S	HIST	<b>HIST</b>	<b>5521</b>	<b>Medieval Law &amp; Society: Byzantine, Sharia, and Germanic Law, 500-1000</b>	LEC	LE	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		Beginning with the end of the western Roman Empire in 476, this course surveys major legal systems emerging around the Mediterranean and western Europe over the next 500 years. The legacy of imperial Roman law affected all these systems, whose own legacies would endure for centuries. Featured in the survey are the reforms of Justinian and the Corpus Iuris Civilis, early Frankish law, the Visigothic Code, the formation of Islamic jurisprudence, Carolingian legal reforms, and Anglo-Saxon law before the Norman Conquest. Focal topics allow comparison between different legal systems and the societies they affected, e.g. sources of legal authority (human and divine, oral and written); status and rights of women; slavery and minority groups; vengeance and restitution. Students analyze these topics through case studies, based on primary sources in translation.

				ELIGIBLE GRADES: GEC1: A-F REQUISITE:									
				COURSE DESC: Studies ethnic cleansing as a central issue in European history - including Europe's colonies. Ethnic cleansing (for much of the 20th century termed "population transfer" or "expulsion") was a policy initiated by numerous great and minor powers from the beginning to the end of the 20th century and provides important perspective on the development of human rights law and state and nation building (and empire breaking) throughout this time. Also considers how the legacy of ethnic cleansing lives on in international relations, politics, the arts, and the popular attitudes and culture of the victims and perpetrators of ethnic cleansing, and their relations toward one another and in the broader international community.

		COURSE DESC:		World History is a comparatively new, or at least newly redefined and newly important, field of teaching, research, and writing in our discipline. Many history graduate students have never studied it, or have been introduced to it only in cursory or piecemeal fashion, yet are increasingly called upon to refer to it, utilize its findings and insights in their own work, and . . . teach it. One obvious goal is to provide a quick and broad-brushed overview of the basic content of World History. Covers major periods in world history from the beginning to the present, highlighting major global changes and their interconnectness. A second goal is to develop a sensitivity to and critical sense about such fundamental matters as structure, generalization, and perspective in World History. Considerable time is spent discussing these, and emphasizing areas in which comparative study is and is not appropriate. A third goal is to introduce some of the major themes and issues that attract debate among world historians these days, and to appreciate the strengths and weaknesses which they pose. This attention to current historiography, especially in a new field, is critical for showing the differences and similarities between today's World History and other perspectives on the study of the past. Along the way, we will consider some strategies for coming to terms with the welter of information and opinion in this often unwieldy field, and for approaching it in ways that are useful to learning and understanding what it has to offer to the study of other varieties of history. A final aim is to introduce graduate students to the many challenges and approaches to teaching this subject. The intent is not only to prepare graduate students for teaching their own World History surveys, but to suggest ways in which they can incorporate global perspectives into their own scholarship and into a variety of possible teaching assignments. Students follow common readings and individual readings, and produce weekly papers on these readings, which are discussed intensively in a seminar setting. The final portion is devoted to students producing an original syllabus for an undergraduate course in World History (either Before 1750 or Since 1750), of sufficient quality to be used in the classroom. This intended to better prepare our graduates to enter the real teaching world of today, in which most will be asked at one time another to talk about and teach World History, and in which having taken a course like this can be a critical factor in an academic job interview.

A&S	HIST	T3	4104	<b>God and Science in the Western World</b> GEC1: A-F REQUISITE: Sr only This interdisciplinary course examines the relationship between religion and science in the Western world, with a particular focus on the era from sixteenth until the late nineteenth century. It is a subject which has vexed historians for nearly a century and a half. Historians originally conceived of religion and science as inherently antagonistic forces which were necessarily at war with one another. The so-called "warfare school" argued that the history of modern science was the history of the science's gradual, indeed, inevitable victory over religion. Others, however, have countered that religion and science were often allies. Still others have contended that the relationship between religion and science cannot adequately be described in terms either of conflict or harmony. Their relations were, instead, complex and can only be appreciated properly when considered in their particular, contingent historical contexts. Students will be forced to grapple with these conceptual models as we cover the broad sweep of religio-scientific development in the Western world, with particular emphasis on the period from 1500 until 1900. We shall also zero in on particular topics Galileo's trial, Newton's alchemical experimentation, Hume's attack on the miraculous, Darwin's theory of evolution, and the Wilberforce-Huxley debates, for instance, which illuminate the distinctive relationship between religion and science in the Western world. 		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		A broad look at the nature of language. The focus is on human language in general: characteristics, acquisition, meaning, social use, and tendencies for change in language. Language is an everyday experience for all of us. We use language to convey our most basic needs and to express our most profound hopes. We rarely give a second thought to this tool whose use generally comes to us so effortlessly. This course will help you understand and appreciate the complexity and sophistication that underlies this system we depend on so much.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Soph or Jr or Sr									
		COURSE DESC:		This course examines cultural similarities and differences through the prism of language. Etymology and the mapping of world language families reveal how cultural practices are transmitted through language and how loan words reveal patterns of world trade, migration, and colonialism. Differing semantic classification systems of kinship, food, emotions, etc., and varying conceptual metaphors of space and time show how cultures map the same real world experiences differently. Cultures also vary in terms of speech acts - greetings, apologies, compliments, etc., and how they mark social relationships through address terms - honorifics, pronouns, and nicknames, etc. Ultimately, this course seeks to illuminate the complex inter-relationship of individual, linguistic and cultural identity.

		COURSE DESC:		English for Specific Purposes (ESP) refers to the branch of language teaching and research in which course content and teaching approaches are derived from an analysis of language use in a specific context. In contrast to general purposes language courses, in which purpose is broadly defined, ESP courses are designed to prepare learners with the specific language requirements they need in order to participate appropriately in particular academic, occupational, and professional communities. This course surveys the literature that has contributed to the growth of the field of ESP and examines the key theories, principles, and ideas that form the basis of current approaches to ESP. Included in the course are more practical questions of needs analysis, curriculum design, materials development, and assessment.

		COURSE DESC:		The course examines historical varieties of English as well as contributing forms of Scots and Scots Gaelic. More specifically, the course traces the development of contemporary varieties of English, especially those varieties recognized in the Appalachian and southern Ohio regions. Coursework emphasizes synchronic variation and diachronic change as primary elements of language analysis while also highlighting contributions of the languages of Scotland to varieties of American English. Students examine data, interpret texts and apply knowledge of multiple language forms to documentation tasks both inside and outside the classroom.

		COURSE DESC:		REQUISITE: Introduces learners to Swahili vocabulary and grammar. These are used as the foundation for promoting the four skills of reading, writing, listening and speaking. Emphasis will be on promoting the learners' ability to express themselves, describe their daily experiences and engage in basic conversations. Although East African texts (reading passages, music and poems) will be used to promote learners' understanding and appreciation of Swahili language and culture, non East African texts in Swahili might be sparingly used to achieve certain objectives. While the main focus of the course will be on enriching the students understanding of African culture through the learning of Swahili, students are expected to relate the Swahili culture with their everyday experiences. Learners will be involved in a semester long portfolio project comprised of biographical information about their everyday activities, or activities of other people, whether actual or fictional with an intention of applying all aspects of the materials covered in class. Specific information on this will be provided in the syllabus.

				COURSE DESC: This is the second course of two-semester first-year sequence. A continuation of 1110 covering the different types of nouns in Swahili. By now, students will have covered all the noun classes and will begin to see their relevance to various aspects of Swahili grammar. It will become clear that once you know the class of noun in question, the grammar can easily be derived from a consistent pattern. Learners will also broaden their vocabulary and they will be able to engage in more complex dialogues. Although some dialogues will be tailored to accomplish grammatical ends, Also do dialogues for the sake of it in order to promote confidence in oral communication. Learners are encouraged to pay attention to the way the sample dialogues are structured and try to model their dialogues along similar lines. Learners are encouraged to test your skills to the limit without focusing too much on grammatical mistakes. The best language learners are the adventurous people who are willing to test anything they have learned, even when they do not do it correctly. In addition, listening tasks and lab work will be assigned to ensure that students are increasing their knowledge of Swahili. Some time will be set aside to do pronunciation drills to ensure that learners get their pronunciation right. To promote reading skills, the instructor will introduce some basic Swahili booklets to be used as class readers. Attempts will also be made to invite classroom guests who will speak in Swahili in order to give learners a chance to listen to accents other than their instructor's. A lot of the classroom exercises will involve conversation with a colleague. Attempts will be made to ensure that students speak with different people in each speaking task. Finally, updating of portfolio will continue. Material from new topics must be integrated into the students' portfolio in a creative way.

				COURSE DESC: First course of two-semester intermediate-level sequence. Although this course will rely on the basic knowledge learned in the previous year, it is designed to take the learner deeper into Swahili structure and grammar as well as deepen their understanding and appreciation of Swahili culture. The reading passages will be longer, the written compositions longer, and the concepts more abstract. Promoting communicative competence is the main goal of this course. Students will be expected to develop their abilities in debating and expressing abstract ideas and concepts. Students will also begin working on group or individual projects that demonstrate their understanding of East African cultural issues. Students will also be encouraged to make the connections or draw comparisons between East African and American culture. In addition, students will be expected to try to integrate their majors with what they are learning in class.

Focuses at discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. In addition, learners are exposed to various elements of Swahili culture through authentic texts. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructors. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes practical application of Swahili in the learner's field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

		COURSE DESC:		In this course, we will explore the interface of language and culture. Language is a symbolic system through which we communicate our experience of the world to others. Culture is a set of beliefs and actions through which we, in concert with others in a community of practice, enact a common understanding of our experiences of the world as they are now, as we understand them to have been in the past, and how we imagine them to be in the future. The context of culture that this course uses to illustrate the connection between language and culture is that of sport. Sport is a community of practice in which language is used to report on sporting events, express opinions, and express support for a team through chants, etc. We are interested in how language is used in the specific culture of sport and how it expresses both individual, group and national identity. By the end of this course, students will be better able to understand how culture is expressed through language.

		COURSE DESC:		Elementary Topics in Mathematics I and II develops mathematical topics usually taught in grades preK-5 to a depth required for future elementary educators (and related fields) to establish professional expertise. The courses are taught through an inquiry approach that focuses on problem solving and discussion. Key themes include 1) explaining and justifying standard and alternative algorithms for basic arithmetic operations learned in grades preK-5; 2) students' construction and critique of their own ideas and others' ideas; and 3) using manipulatives to represent and justify algorithms. Topics include counting and cardinality, the development of the base-10 number system and properties of and operations on natural, whole, rational, and irrational numbers. Satisfies Tier I requirement for elementary education majors only. Does not apply to Arts & Sciences Natural Science requirements.

		COURSE DESC:		REQUISITE: (CS 3000 or MATH 3050) and (3200 or 3210) An axiomatic approach to Euclidean geometry. A core batch of theorems of Euclidean geometry are proven, and interesting geometric problems are solved using the axioms and theorems. Additional concepts and techniques -- such as similarity, transformations, coordinate systems, vectors, matrix representations of transformations, complex numbers, and symmetry -- are introduced as ways of simplifying the proofs of theorems or the solutions of geometric problems. Hyperbolic geometry is introduced from an axiomatic standpoint, primarily to illustrate the independence of the Parallel Postulate. Computers are used to produce dynamic drawings to illustrate theorems and problems.

		COURSE DESC:		An axiomatic approach to Euclidean geometry. A core batch of theorems of Euclidean geometry are proven, and interesting geometric problems are solved using the axioms and theorems. Additional concepts and techniques -- such as similarity, transformations, coordinate systems, vectors, matrix representations of transformations, complex numbers, and symmetry -- are introduced as ways of simplifying the proofs of theorems or the solutions of geometric problems. Hyperbolic geometry is introduced from an axiomatic standpoint, primarily to illustrate the independence of the Parallel Postulate. Computers are used to produce dynamic drawings to illustrate theorems and problems.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Part of the Food Studies curricular theme, this course introduces French gastronomy and analyzes its importance in French culture. It investigates the practice, expressions, and skills that constitute the 'Gastronomic Meal of the French', added to the Intangible Cultural Heritage of Humanity by UNESCO in 2010. Starting with the creation of the restaurant in Paris in the 19th century, we will examine the development of French gastronomy as described in the literature of the time, as well as its encoding in food texts. This course analyzes the specificity of French food and French concepts such as 'terroir'. It examines the evolution of French gastronomy, its increasing importance in French culture, and its influence worldwide. Students will also explore the underlying reasons for the changes in French gastronomy, as well as the French reactions to these changes.

A&S	PBIO	<b>PBIO</b>	<b>2470</b>	<b>Biomes of the World</b>	LEC	LE	3	0	2NS	N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	Detailed survey of biomes around the world. Broad characterization of each ecosystem globally is coupled with details on representative protected areas for each biome in North America. Emphasis is placed on geologic and ecological processes determining vegetation zones and the plant and animal species characteristic of each biome. Conservation issues, human impacts, and products for human use, are discussed throughout the course.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	PBIO 1150 or BIOS 1710 or GEOG 1100							
		COURSE DESC:	This is a field course to teach students how to identify local woody species throughout the forests of Ohio, any time of the year. Students will gain hands-on experience to successfully recognize the key features of woody plants to be proficient in identifying plants during any season. This course will go beyond description because students will also learn about reproductive and establishment requirements to help aid identification and understand how these species can be used as a bioindicator of site quality, disturbance regimes, and land-use history. Due to the field based nature of this course, student need to be willing to walk several miles in rough terrain and poor weather. Students will compile their knowledge by making a field guide of the species covered in class for outreach.

				This course covers the fundamental principles and concepts of soil and ecosystem ecology. The course will provide a foundation on the physical and chemical environment (i.e. soils) that mediates plant function. We then cover basic concepts in ecosystem ecology followed by the mechanisms (via biogeochemistry and ecological stoichiometry) that drive or limit ecosystem function, including temporal and spatial patterns. We will then integrate this information at several scales and discuss consequences of ecosystem function on human wellbeing. The lab portion will integrate concepts discussed in lecture, but emphasize analyzing soil and vegetation for metrics of ecosystem function. Data from the lab will be analyzed to investigate the influence of soil and plants on ecosystem-level processes.

		COURSE DESC:		Aims to demonstrate fundamental principles and concepts of biochemistry, physiology, microbiology, and plant biology through beer brewing. The practice and study of fermentation first defined the field of biochemistry and combines skills/concepts taken from microbiology (yeast cultivation; inhibition of bacterial growth by hops and ethanol; assay of bacterial contamination), biochemistry (an understanding of aerobic vs non-aerobic respiration and glucose metabolism, lipid oxidation, enzyme kinetics and assay as in starch degradation by amylases and protein degradation by proteases), physiology (the effects of alcohol on the body), and plant biology (barley and hops cultivation, harvesting and malt production; the contribution of plant tannins to beer flavor). This course combines a series of lectures, labs and field trips to the Plant Biology Gardens to demonstrate the concepts invoked in lecture. This course exploits a general public interest in alcohol and its production to demonstrate fundamental scientific concepts using a hands on approach. As many students seem unaware of how alcohol interacts with the body in the long term, this course also informs students about the devastating effects of alcohol abuse on the body and society. As such this course outfits students with a wide range of key scientific concepts coupled with practical skills.

A&S	PBIO	T3	4950	<b>Biology and Geography of Regional Food Plants</b> GEC1: A-F REQUISITE: Tier II completed and Sr only The proposed integrative course examines plants utilized commonly as food in a selected region of the world from a variety of perspectives including their biology and evolution, geographic origins and historical development, chemical properties related to their use, agriculture and harvesting, food products utilizing these plants, and how cultures have been modified by food plants. Students will learn how regional environmental conditions and topography, land use, political and ethnic groups, economics, and infusion of other cultures have dictated the food plants now utilized in particular areas within the region under study. Each week, food plants will be introduced and discussed both within a geographic context (e.g., Rhineland of W Germany and adjacent Belgium; and E Germany and Moravia) and a functional or product-based context (e.g., fermentation, grapes and wines; and cereal grains, salt and preservation methods). Students will learn how regional environmental conditions and topography, land use, political and ethnic groups, economics, and infusion of other cultures have dictated the food plants now utilized in particular areas within the region under study. Each week, food plants will be introduced and discussed both within a geographic context (e.g., Rhineland of W Germany and adjacent Belgium; and E Germany and Moravia) and a functional or product-based context (e.g., fermentation, grapes and wines; and cereal grains, salt and preservation methods). 		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: Sr only									
		COURSE DESC:		Examines the application of the concept of entropy to human society as a whole, through the critical reading and discussion of works by advocates of multiple energy sources, using the viewpoints and patterns of inquiry of several disciplines. Energy is conserved, but most physical processes transform available energy into forms less readily available (thereby "increasing entropy"). Several topics in the physical sciences are presented in some detail to provide adequate technical background. World population and per capita consumption are increasing exponentially. Burning fossil fuels creates toxic byproducts and accelerates global warming. Extractive industries (e.g., agriculture and mining) reduce the natural resources available to future generations. Can we expect solar or nuclear power to "save the day?" Should humanity change priorities to minimize increases of entropy? To what extent can physical principles sensibly be generalized so far? These and other questions provide a focus to our inquiry.

		COURSE DESC:		Review of the basic physical principles of sound production, musical sounds and hearing. The more common musical wind instruments are examined using the physical principles developed in the first part of the course. Modern instrument size, shape and construction materials are explored. In the second half of the course, students will build simple musical instruments based on calculations made in class. They learn to play their instruments and evaluate their musical qualities.

		COURSE DESC:		Introduction to American politics, policy, and administration. Investigates how public policies are formulated and implemented. Under conventional view of the politics/administration dichotomy, political factors such as political party and public opinion significantly dominate the entire phase of policy formulation. Governmental bureaucracies are supposed to faithfully implement public policies that political decision makers enact. During recent decades, governmental bureaucracies have been more heavily involved in policy formulation as well as policy implementation. Surveys the historical development from a perspective of democracy and bureaucracy. Asked to think about the ideal relationship among politics, policy, and administration.

				The course examines the experiences of African Americans in the American political system. It focuses on the historical and contemporary status of African Americans in American politics. African American politics in the post-civil rights era constitutes a major part of the course. African American political mobilization and participation, racial representation and leadership, partisan politics, and public policymaking are key topics. The course centrally details the influence and presence of African Americans within American political institutions. A defining theme of the course is an evaluation of the nature and evolution of African American politics within the context of a theoretical and practical paradigm which principally focuses on governmental institutions and political behavior.

A&S	POLS	<b>POLS</b>	<b>4015</b>	<b>Constitutional Politics</b> ELIGIBLE GRADES: GEC1: A-F REQUISITE: 9 Hours in POLS COURSE DESC: The United States Constitution confers authority on the various branches of government in order to empower the federal government. At the same time, the Constitution is designed to restrain public officials in their exercise of institutional power to prevent abuse of government power. In Madisonian theory, the separation of powers system works when one branch challenges another in its exercise of power. Those who challenge another may be motivated by politics or partisanship, but they couch their challenge in constitutional language. Hence 'constitutional politics' serves as conflict that is healthy for the American constitutional order. The system is in trouble when public officials fail to engage in conflict; if one branch asserts excessive power and another branch does not challenge it, then the system runs into the danger of tyranny, which James Madison defined as the accumulation of powers in one branch. Course examines historic and recent constitutional issues to assess whether each branch has lived up to its responsibility of checking the others. If any branch has been remiss, we will explore why. A&S	POLS	<b>POLS</b>	<b>4650</b>	<b>Global Media Politics</b> ELIGIBLE GRADES: GEC1: A-F COURSE DESC: REQUISITE: 6 hours in POLS or (Jr or Sr) This course studies mediated communication in global politics, including both the impact of mass media on the foreign policies of states and the more recent use of social media by state and non-state actors. Readings and discussions address the role of mediated communication in public opinion, political mobilization, citizenship, identity, global justice, and democratic deliberation. The course uses historical and contemporary case studies germane to the study of international politics, including major wars, revolutionary movements, breaches of state secrecy and cybersecurity, Internet freedom, and efforts to promote global political dialogue. Students consider both tendencies of mediated communication to sow enmity and conflict and opposing trends toward universal connectivity and transnational citizenship.	LEC	LE	3	0		N	U30		0
A&S	POLS	<b>POLS</b>	<b>4700</b>	<b>Democratic Theories and Practices</b> ELIGIBLE GRADES: GEC1: A-F COURSE DESC: REQUISITE: 6 Hours in POLS Placing contemporary democracies in both historical and comparative context, examines the relationship between legitimacy, authority, participation and voice. Central focus is the 'edges' or boundaries of democracies: is there a private realm at the edge of democracy? How is it established? What is democracy's jurisdiction? There are margins within and outside of a democratic community, where lines between insiders and outsiders are drawn and redrawn. How do location and membership shape our practices of democratic responsibility? What is the relationship between injustice and democracy?	LEC	LE	3	0		N	U30		0

It could be argued that the emergence of democratic political systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and struggles. The varied origins of rights narratives will be explored, as well as the controversies over the extension and effectiveness of rights to diverse populations. Students think critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others.	LEC	LE	3	0		N	U30		0

Begins with theories that assume a relationship between knowledge and power, and also between theory and practice. Includes expansive concepts of politics that go beyond government. Theories such as Marxism, psychoanalysis, structuralism and post-structuralism, deconstruction, feminism, anarchism, animal rights, critical race theory and postcolonial theory may be examined. A&S	POLS	<b>POLS</b>	<b>4720</b>	<b>Resistance, Reform, and Revolution</b> ELIGIBLE GRADES: GEC1: A-F COURSE DESC: REQUISITE: 6 Hours in POLS Explores the intertwined character of power and resistance. In the process, gain both an understanding of forms of power and resistance in everyday life, and to use such an understanding to negotiate the power in our own lives. Also explores how power is not only prohibitive, but productive; and attempts to figure out what that means for our quests to live good lives and to experience freedom.	LEC	LE	3	0		N	U30		0
A&S	POLS	<b>POLS</b>	<b>4730</b>	<b>Animal/Human/Machine</b> ELIGIBLE GRADES: GEC1: A-F COURSE DESC: REQUISITE: POLS 2700 or permission required Political theorists are concerned with concepts of political agency. How does political action occur? Who can be political? What are the terms of political discourse? During the past 10-15 years, a "post-humanist" discourse has emerged. This has come from two main sources. First, a whole host of studies in psychology and biology have challenged the idea of human exceptionalism (i.e. the idea that humans are a unique animal). In study after study, things once thought to be unique to humans are found in animals (use of tools, communication of relatively complex ideas that some call language acquisition, emotions, laughter, lying, making war, etc.). This is not coming from animal rights, but from science itself. Second, technology and experiments with artificial intelligence, computers, social networking, sex-change surgery, artificial insemination, etc. have challenged us to find new ways to conceptualize thought and the body. These also challenge what it means to be human. Given that an assumption about the stability of the category "human" has been the principle anchor for all theories of politics up till now, these scientific discussions pose important problems for politics, and consequently, for political science. 		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in POLS									
		COURSE DESC:		Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in POLS including 2700									
		COURSE DESC:		Examines various, intricate relationships between race and politics in the United States. Starts with a basic introduction to the concept of race, its origins and evolution. Attention paid early on to the contradictory projects of democracy and racial hierarchy, specifically, the enterprise of white supremacy. Looks at past and present racial topographies, including, but not limited to, trends in partisanship, political ideology and voter turnout per racial group. Examines how the three branches of government have supported America's war on drugs, and subsequently how this war has differentially impacted the American people on lines of race, gender, and class. Investigates how racial identity is shaped by varying economic, social and political contexts, and further how these identities can be mobilized for collective purposes. We think critically about what is at stake in adhering to or diverging from particular racial identities in the political and social arena, how racial identities are policed by group members, and lastly, what is at stake in defining racial authenticity. Last set of readings treat the ways racial anxieties are manipulated during electoral campaigns as a strategy for specific political gains.

		COURSE DESC:		Examines, analyzes, and theorizes race and racism from a critical and politicized perspective. This rich theoretical perspective points out that racism is still a pervasive part of contemporary societies, and seeks out effective ways to challenge racism's existence and impact on various groups and societies. Examines Critical Race Theory as a theoretical and political alternative for understanding and criticizing racism in contemporary settings. Critical Race Theory critiques perspectives that claim far-reaching progress has been made combating racism. Challenges students to think in new ways about contemporary manifestations of racism. Explores innovative ways to challenge the widespread prevalence of racism.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in AAS or 6 hours in POLS or 6 hours in WGS									
		COURSE DESC:		Examines the emergence and prevalence of 'intersectionality' as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, but whose sex and class status are privileged according to societal norms and expectations.

		COURSE DESC:		Engages Critical Race Theory and Critical White Studies in order to better understand how 'whiteness' perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants' motivations to assimilate into whiteness, and by learning how politicians and governmental bodies have protected the interests of white Americans by inscribing white privilege into public policies. Investigates white American public opinion on political issues, their attitudes about people of color, as well as what they think about their own racial group and racial identity. Discusses the normative quality of white racial identity, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in AAS or 6 hours in POLS or 6 hours in WGS									
		COURSE DESC:		Surveys various ideological traditions that have inspired the political visions and agendas of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contests. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: 6 Hours in AAS or 6 hours in POLS or 6 hours in WGS									
		COURSE DESC:		Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Assesses whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.

				Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of vision, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.

				This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present: Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

				Science fiction holds a mirror to the norms, rules and institutions that exist in the contemporary political world, engaging in fundamental comparisons about the way the world is, how it came to be, and what alternatives may exist for the political future. Examining and analyzing the prominent themes and issues in these fictional worlds sheds light on past, present, and future political phenomena of our real one. The course examines works of science fiction (both literature and film) side-by-side with political analyses of a variety of topics: state- and nation-building, war and peace-building, citizenship, race, gender, bio-ethics, revolution and rebellion, the military industrial complex, capitalism and democracy. For example, fiction works that may be used in the course include Foundations, Game of Thrones, the Hunger Games, World War Z, the Handmaid's Tale, Battlestar Galactica, Star Trek, etc. Science fiction literature and film are points of departure for a more substantive focus on these and other important issues in contemporary politics.

		ELIGIBLE GRADES:		GEC2: A-F,	REQUISITE:								
		COURSE DESC:		PR The United States Constitution confers authority on the various branches of government in order to empower the federal government. At the same time, the Constitution is designed to restrain public officials in their exercise of institutional power to prevent abuse of government power. In Madisonian theory, the separation of powers system works when one branch challenges another in its exercise of power. Those who challenge another may be motivated by politics or partisanship, but they couch their challenge in constitutional language. Hence 'constitutional politics' serves as conflict that is healthy for the American constitutional order. The system is in trouble when public officials fail to engage in conflict; if one branch asserts excessive power and another branch does not challenge it, then the system runs into the danger of tyranny, which James Madison defined as the accumulation of powers in one branch. Course examines historic and recent constitutional issues to assess whether each branch has lived up to its responsibility of checking the others. If any branch has been remiss, we will explore why.

Introduces the White House as a "mini-bureaucracy" at the hub of the national government, to include the Executive Office of the President, the White House Office, and the far reaching extensions of presidential bureaucratic power as embodied in such operations as presidential travel. Explores the role of staff within the White House. Focuses on the questions: a) how does the White House work; b) what makes it different from other bureaucracies in the American system of government?

		COURSE DESC:		Examines the interaction between the economy and politics in a comparative context focusing on domestic issues and linkages, which in political science is called comparative political economy. Today most economies have a significant share organized along market capitalist lines, and these market capitalist economies are heavily shaped by the regime type whether democratic or non-democratic and variations within each sub-type, so comparative political economy is about capitalism and democracy or the lack thereof. Analysis takes a theoretical approach that emphasizes competing frameworks including liberalism, Marxism, and neo-mercantilism. Issues examined include welfare state politics, varieties of capitalism, market failure and the state, embedded capitalism, the role of business among others. Also examines the unique challenges facing less developed countries.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR Placing contemporary democracies in both historical and comparative context, examines the relationship between legitimacy, authority, participation and voice. Central focus is the 'edges' or boundaries of democracies: is there a private realm at the edge of democracy? How is it established? What is democracy's jurisdiction? There are margins within and outside of a democratic community, where lines between insiders and outsiders are drawn and redrawn. How do location and membership shape our practices of democratic responsibility? What is the relationship between injustice and democracy?

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR There are few legal, normative, and political issues more important than the efforts and struggles surrounding rights. It could be argued that the emergence of democratic political systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and struggles. The varied origins of rights narratives will be explored, as well as the controversies over the extension and effectiveness of rights to diverse populations. Students think critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others.

		COURSE DESC:		PR Examines contemporary political and social theories that have been critical of historically hegemonic ideas and regimes. Begins with theories that assume a relationship between knowledge and power, and also between theory and practice. Includes expansive concepts of politics that go beyond government. Theories such as Marxism, psychoanalysis, structuralism and post-structuralism, deconstruction, feminism, anarchism, animal rights, critical race theory and postcolonial theory may be examined.

		COURSE DESC:		PR Explores the intertwined character of power and resistance. In the process, gain both an understanding of forms of power and resistance in everyday life, and to use such an understanding to negotiate the power in our own lives. Also explores how power is not only prohibitive, but productive; and attempts to figure out what that means for our quests to live good lives and to experience freedom.									
A&S	POLS	<b>POLS</b>	<b>5730</b>	<b>Animal/Human/Machine</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR Political theorists are concerned with concepts of political agency. How does political action occur? Who can be political? What are the terms of political discourse? During the past 10-15 years, a "post-humanist" discourse has emerged. This has come from two main sources. First, a whole host of studies in psychology and biology have challenged the idea of human exceptionalism (i.e. the idea that humans are a unique animal). In study after study, things once thought to be unique to humans are found in animals (use of tools, communication of relatively complex ideas that some call language acquisition, emotions, laughter, lying, making war, etc.). This is not coming from animal rights, but from science itself. Second, technology and experiments with artificial intelligence, computers, social networking, sex-change surgery, artificial insemination, etc. have challenged us to find new ways to conceptualize thought and the body. These also challenge what it means to be human. Given that an assumption about the stability of the category "human" has been the principle anchor for all theories of politics up till now, these scientific discussions pose important problems for politics, and consequently, for political science.									
A&S	POLS	<b>POLS</b>	<b>5738</b>	<b>The Politics of Race in Global Context</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.									
A&S	POLS	<b>POLS</b>	<b>5739</b>	<b>Politics of Race</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR Examines various, intricate relationships between race and politics in the United States. Starts with a basic introduction to the concept of race, its origins and evolution. Attention paid early on to the contradictory projects of democracy and racial hierarchy, specifically, the enterprise of white supremacy. Looks at past and present racial topographies, including, but not limited to, trends in partisanship, political ideology and voter turnout per racial group. Examines how the three branches of government have supported America's war on drugs, and subsequently how this war has differentially impacted the American people on lines of race, gender, and class. Investigates how racial identity is shaped by varying economic, social and political contexts, and further how these identities can be mobilized for collective purposes. We think critically about what is at stake in adhering to or diverging from particular racial identities in the political and social arena, how racial identities are policed by group members, and lastly, what is at stake in defining racial authenticity. Last set of readings treat the ways racial anxieties are manipulated during electoral campaigns as a strategy for specific political gains.

		COURSE DESC:		For many political scientists and theorists, politics involves an ongoing conversation over the meaning and distribution of power in our lives. A major part of the discussions and debates are the various forms of entertainment that many times attempt to represent the world around us through film, music, and other media. Examines the diverse ways that politics, power, and film intersect and co-constitute one another. Investigates how race, sex, class, gender and other identity formations are represented in film, attempting to discern how images either perpetuate or resist dominant societal norms.

				PR									
		COURSE DESC:		Examines, analyzes, and theorizes race and racism from a critical and politicized perspective. This rich theoretical perspective points out that racism is still a pervasive part of contemporary societies, and seeks out effective ways to challenge racism's existence and impact on various groups and societies. Examines Critical Race Theory as a theoretical and political alternative for understanding and criticizing racism in contemporary settings. Critical Race Theory critiques perspectives that claim far-reaching progress has been made combating racism. Challenges students to think in new ways about contemporary manifestations of racism. Explores innovative ways to challenge the widespread prevalence of racism.									
A&S	POLS	<b>POLS</b>	<b>5752</b>	<b>The Politics of Intersectionality</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
				PR									
		COURSE DESC:		Examines the emergence and prevalence of 'intersectionality' as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, but whose sex and class status are privileged according to societal norms and expectations.									
A&S	POLS	<b>POLS</b>	<b>5753</b>	<b>American Whiteness</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
				PR									
		COURSE DESC:		Engages Critical Race Theory and Critical White Studies in order to better understand how 'whiteness' perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants' motivations to assimilate into whiteness, and by learning how politicians and governmental bodies have protected the interests of white Americans by inscribing white privilege into public policies. Investigates white American public opinion on political issues, their attitudes about people of color, as well as what they think about their own racial group and racial identity. Discusses the normative quality of white racial identity, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.									
A&S	POLS	<b>POLS</b>	<b>5754</b>	<b>Black Political Thought</b>	LEC	LE	4	0		N	G40		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
				PR									
		COURSE DESC:		Surveys various ideological traditions that have inspired the political visions and agendas of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contests. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.

		COURSE DESC:		Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Assesses whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.

		COURSE DESC:		Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of vision, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR Seeks to conceptualize, explore and explain the complex relationships between race and the creation, implementation and evaluation of public policy. First half offers overview of some dominant theories of public policy, including rational actor models, institutionalism, policy framing and agenda-setting, causal stories, and policy networks. Second, applies these theories in order to complete a more in-depth examination of policy areas that have either implicitly or explicitly institutionalized racial difference and/or disadvantage. Focus will be comparative; though substantial examples drawn from the United States and the industrialized world, also draws insights from developing contexts as necessary.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE:									
		COURSE DESC:		PR This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present: Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		PR Science fiction holds a mirror to the norms, rules and institutions that exist in the contemporary political world, engaging in fundamental comparisons about the way the world is, how it came to be, and what alternatives may exist for the political future. Examining and analyzing the prominent themes and issues in these fictional worlds sheds light on past, present, and future political phenomena of our real one. The course examines works of science fiction (both literature and film) side-by-side with political analyses of a variety of topics: state- and nation-building, war and peace-building, citizenship, race, gender, bio-ethics, revolution and rebellion, the military industrial complex, capitalism and democracy. For example, fiction works that may be used in the course include Foundations, Game of Thrones, the Hunger Games, World War Z, the Handmaidss Tale, Battlestar Galactica, Star Trek, etc. Science fiction literature and film are points of departure for a more substantive focus on these and other important issues in contemporary politics.

These challenges call for the reinvention of citizenship. Conventional models of citizenship are inadequate for tackling the social, economic, and environmental dimensions of sustainability problems; do not match the realities of social-ecological systems; and provide little guidance for addressing equity within and between generations. In this multidisciplinary course students will investigate changing citizenship norms; the core principles of sustainability citizenship; and the practice of sustainability citizenship in the private and public spheres from the local to the global levels.

		COURSE DESC:		Choices and Happiness synthesizes research from different areas of psychology and related fields (e.g., marketing, economics, nutrition) addressing our quest for happiness within an imperfect cognitive decision making system. The course elucidates judgment biases and errors that prevent us from making better life decisions, from poor food choices to the perils of overusing social media. Choices and Happiness is a deep exploration into the science of self-control, goal attainment, and maintenance.									
				Students explore facets of problematic decision making such as planning fallacies, procrastination, and multi-tasking. Research in the psychology of judgment touches upon judgment fallacies that contribute to unhealthy life patterns in many areas, such as erroneous beliefs about the costs of eating nutritious foods. The class uses a decision architecture approach to address the development of systems that enhance well-being in different life domains.

		COURSE DESC:		Formal modeling is an essential research tool in cognitive psychology and cognitive science. In this seminar we shall discuss and critically evaluate a wide variety of key formal models and modeling approaches to cognition (e.g., algebraic, geometric, analytic, qualitative, statistical, probabilistic, computational, connectionist, dynamical, structural, and process). We shall do this with three goals in mind: 1) to become aware of the wide range of modeling techniques at our disposal, 2) to achieve a basic understanding of these techniques and the modeling process in general, and 3) to get us to start thinking strategically and analytically about how to construct an effective formal model (i.e., one that predicts and explains our empirical results). Discussions will assume no previous modeling background.

		COURSE DESC:		The main goal of this course is for graduate students to gain expert knowledge about the psychology of social psychology, including social cognition, social relationships, and social behavior. This will be accomplished via lecture, and through reading classic and contemporary works in this area. One manifestation of students' mastering the material is their ability to take over the class for an hour and lead a class discussion on a selected topic. A final paper is required to demonstrate their mastery of the material; this involves either a critical review of one of the topics covered in the course or a research proposal on the topic. Upon completion of the course, students should be in a position to design research related to the psychology of social psychology and should also be able to teach this material to undergraduates.

This course will provide an interdisciplinary framework for understanding the relationship between health and social identity group memberships. The disparities that exist in health status for many groups will be explored as well as how factors such as microaggressions, prejudice, stigmatization, poor access to and barriers to care as well as policies contribute to these disparities. Concurrently resiliency factors and intervention strategies to reduce such disparities will be reviewed.

		ELIGIBLE GRADES:		GEC1: A-F REQUISITE: SOC 1000 or (Soph or Jr or Sr)									
		COURSE DESC:		This course is a comprehensive survey of the sources, meaning, and consequences of social inequality in its multiple forms including age, class, gender, poverty/wealth, race/ethnicity, sexuality, and spatial dimensions. The course connects these forms to social change processes that can be both a source of or solution to inequality. Whether it is collective action, culture, development, the environment, globalization, population, social institutions, or social structure, social change has many sources, providing an arena for social inequality to play out and intersect in its various forms. In its breadth the course promotes critical analysis of the dynamics and presence of social inequality and social change in the larger society and everyday lives of students. Using a social injustice framework and an informed sociological imagination, the course is intended to prepare students for additional study in more focused and advanced topics in inequality.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:	6 Hours in SOC including 1000						
		COURSE DESC:		The purpose of this course is to educate students about immigration in the United States and around the world. The students learn about the history of sociological research on immigration to the United States, as well as the sociological theories that help us understand why people migrate to other countries. We cover diverse topics such as settlement patterns, education, identity, language, the second generation, religion, and integration. We also apply these topics to issues of public policy, addressing the shortcomings of past and present policies and potential solutions for future policies based on social science research. Finally, students are able to identify the challenges of global migration especially as it relates to social stratification.
