| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Introduction to systems engineering concepts. Continuous time and discrete time methods for modeling of systems. Systems structure, open-loop and closed-loop systems, positive and negative feedback. State and transition equations. Applications to modeling in manufacturing, production and inventory systems, service industries, physical and biological systems. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Introduces students to key thoughts and tools needed to move to the next level of engineering design excellence, where designing an operational component that works well by itself is not enough. Here students learn how to ensure that a product meets the customer's actual need, that it works optimally and behaves as expected within a much larger and more complex system, that it lasts for its entire expected life, and that it does all these things at an affordable and stable cost. Individual disciplines of system engineering, such as requirements analysis, functional design, and life cycle cost analysis, are identified, integrated into a new way of thinking--systems thinking--and illustrated by a series of exercises and actual case studies from industry and government. Notable successes and spectacular failures are examined, and the indispensable role of the influential team leader is described. Systems engineering is shown to be a uniquely effective interface between management, customers, suppliers, specialty engineers and other stakeholders in the systems development process. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Introduction to decision theory and its applications are covered. Decision making under different circumstances are discussed. Fuzzy decision making is also briefly introduced. Single objective and multiple objectives cases are illustrated. Single person as well as multiple-person decision making is differentiated. Examples will be given from different applications such as inventory control, scheduling, system design, and economic analysis. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Instruction in product cost estimating, product value engineering, and manufacturing performance evaluation in state-of-the-art manufacturing systems. Examines the application of industrial engineering techniques, work measurement, cost accounting, and computers to manufacturing cost measurement and process design. | | | | | | | | |
| ENT | ISE | ISE | 5335 | Applications of Mathematical Programming | Lecture | 2 | 0 | | N | G40 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Formulation and solution of various mathematical programming models. Topics include linear programming, integer programming, and mixed-integer programming. Various solution algorithms will also be discussed. | | | | | | | | |
| ENT | ISE | ISE | 5340 | Work Design | Lecture | 2 | 0 | | N | G40 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | | | | | | | | |
| | | COURSE DESC: | | Design of work systems and measurement of work. Topics include job methods, operation analysis, charting techniques, stop-watch time study, work sampling, predetermined time systems, standard data, incentive wage systems, and learning curves. Students are also introduced to ergonomics considerations in the design of manual operations. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Historical development of worker's compensation and industrial health and safety; review of federal activities in occupational health and safety with focus on contemporary public policy and risk/benefit issues. Specific occupational health and safety issues dealt with in seminar format. | | | | | | | | |
| ENT | ISE | ISE | 5390 | Work Physiology and Occupational Biomechanics | Lecture | 3 | 0 | | N | G40 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Introduction to the theory and methodologies involved in work physiology and occupational biomechanics. Structural and functional design of the human body to determine its implications for the design of physical work, tools, and the workplace itself. Applications to classification of work, manual materials handling, tool design, workplace design, and worker selection and training. Selected environmental conditions that alter performance will be discussed. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: ET 3200 | | | | | | | | |
| | | COURSE DESC: | | Introduction to theoretical principles and practical design aspects of solar energy systems. Topics covered include principles of radiation; heating load computation; air and liquid, flat-plate collectors; concentrating collectors; energy storage; photovoltaic conversion; economic analysis. | | | | | | | | |
| ENT | ME | ME | 4760 | Automotive Engineering | Lecture | 3 | 0 | | N | U30 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: ME 3700 | | | | | | | | |
| | | COURSE DESC: | | Overview of automotive engineering, including modeling, simulation, design, and testing of land vehicle systems with emphasis on performance, safety, fuel economy, and emissions. Broad exposure to all topics through case studies. | | | | | | | | |
| ENT | ME | ME | 4770 | Vehicle Systems Design | Lecture | 3 | 0 | | N | U30 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: PHYS 2051 or 252 | | | | | | | | |
| | | COURSE DESC: | | Introduction to the systems engineering design process for land and air vehicles through case studies and projects. Examines the process for developing a first layout for a new vehicle platform, including setting requirements, generating concepts, and predicting performance. Technical, economic, environmental and social aspects are considered. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: ME 3012 and 3022 | | | | | | | | |
| | | COURSE DESC: | | This course covers the history, analysis, flight mechanics, and design of modern rockets and missiles. A historical perspective of the significance and design practices used to develop rockets and missiles are explored. Each of the five major rocket and missile components are discussed and analyzed separately and then combined to form a flight system. Mechanics of flight and basic aerodynamics are covered in order to develop a six degree of freedom flight simulator. A final project occurs to allow exploration of a design and simulation of a full rocket delivering a payload or a tracking missile. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Structure and functional properties of connective tissue. Techniques for determining the mechanical response of biological soft and hard tissues. Includes static, viscoelastic, creep, fatigue and fracture. Simplified models of biological structures. Creation of geometric models from medical imaging and computational modeling. Specific topics may include bone, cartilage, ligaments, tendon, teeth, and skin. | | | | | | | | |
| ENT | ME | ME | 5670 | Engineering Biomechanics of Human Motion | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Overview of human skeletal and muscular anatomy and physiology. Application of engineering mechanics to the musculoskeletal system. Kinematics, statics, and dynamics of human motions in engineering contexts. Human motion metrology. | | | | | | | | |
| ENT | ME | ME | 5680 | Mechanics of Polymers | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | An overview of the principles of polymer physics and polymer mechanics for engineering students. Major advancements in modeling and analysis of the mechanical behavior of polymers and polymeric compounds in solid and liquid phases are covered, with emphasis on polymer flow (rheology), rubber elasticity, and viscoelasticity of solid polymers. | | | | | | | | |
| ENT | ME | ME | 5690 | Introduction to Nanomaterials | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | This course provides a basic yet broad understanding of the principles of nanotechnology and nanoscale materials. The course discusses the scale effects, relevance of nanomaterials in several engineering disciplines, synthesis and characterization techniques available at the nanoscale, and the wide range of applications possible with engineered nanomaterials. | | | | | | | | |
| ENT | ME | ME | 5740 | Advanced Machine Design | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Advanced considerations in design and analysis of machine members, strength under combined stress, thermal stress, fatigue in metals, and design using plastics. | | | | | | | | |
| ENT | ME | ME | 5750 | Solar Design | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Introduction to theoretical principles and practical design aspects of solar energy systems. Topics covered include principles of radiation; heating load computation; air and liquid, flat-plate collectors; concentrating collectors; energy storage; photovoltaic conversion; economic analysis. | | | | | | | | |
| ENT | ME | ME | 5760 | Automotive Engineering | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Overview of automotive engineering, including modeling, simulation, design, and testing of land vehicle systems with emphasis on performance, safety, fuel economy, and emissions. Broad exposure to all topics through case studies. | | | | | | | | |
| ENT | ME | ME | 5770 | Vehicle Systems Design | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Introduction to the systems engineering design process for land and air vehicles through case studies and projects. Examines the process for developing a first layout for a new vehicle platform, including setting requirements, generating concepts, and predicting performance. Technical, economic, environmental and social aspects are considered. | | | | | | | | |
| ENT | ME | ME | 5780 | Missiles guidance systems and rocket design | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | This course covers the history, analysis, flight mechanics, and design of modern rockets and missiles. A historical perspective of the significance and design practices used to develop rockets and missiles are explored. Each of the five major rocket and missile components are discussed and analyzed separately and then combined to form a flight system. Mechanics of flight and basic aerodynamics are covered in order to develop a six degree of freedom flight simulator. A final project occurs to allow exploration of a design and simulation of a full rocket delivering a payload or a tracking missile. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: ME 5630 | | | | | | | | |
| | | COURSE DESC: | | Thermal stresses developed in machine and structural components. Procedures for solving stress problems associated with elevated temperatures in such components as tubes, rods, and plates as encountered in nuclear reactors, engines, and aircraft and missile structures. | | | | | | | | |
| ENT | ME | ME | 6500 | Advanced Engineering Mathematics I | Lecture | 3 | 0 | | N | G50 | | 0 |
| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: | | | | | | | | |
| | | COURSE DESC: | | This course will focus on analytical solutions to linear Partial Differential Equations (PDEs), with an emphasis on applications of PDEs in Engineering problems. The goal is to impart to students the excitement and usefulness of mathematics as a tool in solving real-world problems. The approach will be to look at the mathematical modeling & solution of simplified Engineering problems. The course is intended to act as a foundation course for engineering graduate students coming from a range of backgrounds, but with previous exposure to multi-variable calculus and linear constant coefficient ordinary differential equations. | | | | | | | | |

| | | | | This course is typically partnered with an exhibition and is geared in part toward students preparing material for the exhibition and learning about the objects in the exhibition. | | | | | | | | |
| | | | | For readings, the class focuses on global museums, exhibitions, and politics of display through contemporary critical museology. The treatment and recontextualization of international art in the museum world both in the U.S. and abroad are analyzed. Also considered are questions around global design, the quotidian, built form, and exhibitionary practice. The objective of the course is to study artworks in exhibitions within the Western museum, political histories of conflict, cultural specificity, and indigenous world views. | | | | | | | | |

| FAR | ART | AH | 3600 | Modernist Theory and Criticism ELIGIBLE GRADES: GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: An overview of the major theoretical and critical positions on the visual arts in modernism, especially from the late 19th- century to the later 1970s. Topics include formalism, expressionism, and the relationship of art to nature and society. | Lecture | 3 | 0 | | N | U30 | | 0 |
| FAR | ART | AH | 3610 | History of Photography ELIGIBLE GRADES: GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: Approaches photography as a set of problems and concepts rather than as a unified medium with a linear history. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interest is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn. | Lecture | 3 | 0 | | N | U30 | | 0 |

| FAR | ART | AH | 4161 | Arts of Medieval China (400-1300) ELIGIBLE GRADES: GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: The subject is the arts of the medieval period in China, from the 5th- to the 14th- century. The objects studied include ceramic and bronze vessels, stone and terracotta sculptures, Buddhist cave art, calligraphy and ink painting, and printed books. The concept "appropriation" will be engaged for the interpretative understanding of especially Buddhist art and of the practices of calligraphy and ink painting. | Lecture | 3 | 0 | | N | U30 | | 0 |
| FAR | ART | AH | 4171 | Arts of Early Modern China (1500-1700) ELIGIBLE GRADES: GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: The subject is the arts of the early modern period in China, from the 16th- to the 18th- century. The objects studied include calligraphy and ink paintings, lacquer and porcelain, illustrated books, and landscapes architecture. Will introduce two sets of linked concepts, agency and artistic imagination, economic globalization and cultural hybridity, concepts that will frame interpretive understanding of the objects. | Lecture | 3 | 0 | | N | U30 | | 0 |

The class will track their relevance for art up to the present. Each practitioner and movement will be placed in historical and geopolitical context. | Lecture | 3 | 0 | | N | U30 | | 0 |
| FAR | ART | AH | 4616 | Art Spaces ELIGIBLE GRADES: GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: This course explores the relationship between visual art and spatial modes of display, installation, collection, and exhibition. Using historical case studies, we question the white-wall gallery as the primary home of fine art, finding instead a rich history of alternative spaces and presentation techniques. Selected case studies include: cabinets of curiosities, salons, modern galleries, museums (art, science, natural history), department stores, archives, cities, gardens, fairs, and various mediated spaces (pictorial, electronic, virtual). This class considers how spatial conditions factor into the production and reception of art, visual culture, and media. | Seminar | 3 | 0 | | N | U30 | | 0 |

| | | COURSE DESC: | | PR | Approaches photography as a set of problems and concepts rather than as a unified medium with a linear history. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interest is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn. | | | | | | | |

| | | COURSE DESC: | | This course explores the relationship between visual art and spatial modes of display, installation, collection, and exhibition. Using historical case studies, we question the white-wall gallery as the primary home of fine art, finding instead a rich history of alternative spaces and presentation techniques. Selected case studies include: cabinets of curiosities, salons, modern galleries, museums (art, science, natural history), department stores, archives, cities, gardens, fairs, and various mediated spaces (pictorial, electronic, virtual). This class considers how spatial conditions factor into the production and reception of art, visual culture, and media. | | | | | | | | |

| | | COURSE DESC: | | As a result of globalization, studying cross-cultural design provides a framework of visual culture that emphasizes the role of design in diverse communication exchanges and public discourse. Particularly important is that a history of design transcends mere exposure to various traditions of design. Instead, a critical discussion of design in various contexts is encouraged as a way to understand our own cultural patterns of design among a broader history. An inclusive classification of design will be used to track significant developments in design across technological, physical and social contexts. | | | | | | | | |

| | | | | An introduction to design process and programming as related to the development of interior design and application within the planning and shaping of interior architecture. Students begin with a design problem, and see it through the various phases of research, programming, ideation, implementation and final analysis in design process thinking. For Interior Architecture programming addresses more specifically space planning and analysis of space to meet client needs. Concept statements, project statements, adjacency studies and diagrams are used as tools to help students analyze and develop a program in response to a given problem. Human dimensions, physiological and psychological aspects of the environment are studied as well as issues related to sustainable design, code issues, and ergonomic concerns are addressed. | | | | | | | | |

| | | | | Covers fundamental technical and conceptual issues of traditional analog photography. Skills covered include camera operation, film processing, printing, and principles of composition. In addition, slide lectures address pertinent issues in the history and current practice of photography. Through a combination of lectures, critiques, and workshops students learn the fundamentals of traditional silver printing as well as basic camera controls and other skills essential to future work in photography. Both black and white and color processes are examined. | | | | | | | | |

Through class, workshops and demonstrations students learn the basics of Photoshop and become familiar with other digital programs. Others skills include scanning and printing as well as digital camera operation. Class lectures address cultural, social and ethical issues involving digital practice and explore the broad cultural shift from analog to digital media. Students are expected to become competent in various areas of digital practice and to test its possibilities. | | | | | | | | |

The alteration of wheel thrown forms and the process of creating forms of greater complexity with multiple parts are emphasized. Utilitarian pottery is explored through the use of the potter's wheel, coupled with hand building and mold making techniques. The class also examines how the alteration of wheel thrown forms can be an effective way of producing sculptural objects. Clay and glaze chemistry are approached through ceramic material testing and kiln firings. Group and individual critiques take place at the end of each kiln firing. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | This course provides a comprehensive analysis of strategies, from the traditional to the experimental, for arts organization working with both artists and diverse publics. Participants review practical and ethical considerations as they examine such areas as curation, residencies, public projects, written projects, interdisciplinary collaborations, community formation, and social engagement. Participants also undertake their own projects organizing and supporting contemporary artists in a variety of contexts. | | | | | | | | |

| | | COURSE DESC: | | This course disrupts monolithic conceptions of the "art world" by asking participants to map the various institutions, organizations, and communities making up this ecosystem. Participants consider both practical and philosophical concerns, from capital flow and systems of power to radical economies and community involvement. Special attention is paid to the overlaps, collaborations, and conflicts experienced by entities within their respective art worlds. | | | | | | | | |

Participants conduct in-depth field investigations of several art organizations using publicly available data to assess their strengths, weaknesses, and trajectories. Participants also imagine their own art organizations and generate a significant amount of official written material for these, including their own grant applications. Additionally, the course features several guests from grant-giving organizations who share their experiences evaluating applications. | | | | | | | | |

| FAR | DANC | DANC | 5210 | Graduate Modern Dance Technique ELIGIBLE GRADES: GEC1: A-F COURSE DESC: This studio-based course provides opportunities for graduate students to deepen and refine their proficiency in modern dance technique. Students participate in studio classes in which they perform advanced-level movement phrases and practice ways of sensing and responding in movement. Particular emphasis is placed on musical phrasing, dynamics, and subtle demands of expressivity in movement. Concepts from improvisational practices and somatic techniques such as Klein/Mahler or Bartenieff Fundamentals bring awareness to physical states. | Studio | 1 | 3 | | N | G40 | | 0 |

| FAR | DANC | DANC | 5250 | African Dance Technique III ELIGIBLE GRADES: GEC1: A-F COURSE DESC: Will focus on complex religious and ceremonial dances as they are performed in their traditional settings. The student will begin to learn how to perform these dances at a professional level. It will include arranging and performing both traditional and contemporary African dances to be performed on a Western stage. Students will learn approximately 6 different dance types from 6 different ethnic groups as well as be invited to perform in the The Ohio University African Ensemble's Annual Concert. | Studio | 1 | 3 | | N | G40 | | 0 |
| FAR | DANC | DANC | 5300 | Dance Kinesiology I ELIGIBLE GRADES: GEC2: A-F, PR COURSE DESC: Introduces basic concepts of the study of the body through an overview of: the anatomy of breathing; the musculo-skeletal system; basic principles of kinesiology and their relationship to fitness training; the nature of stress and benefits of relaxation training. A somatic (body/mind) approach to the course materials draws on experiential activities to enhance conceptual and factually based materials. Explores skeletal alignment, muscular development and function, and mechanical efficiency in the production of dance movement. | Lecture | 3 | 6 | | N | G40 | | 0 |

| FAR | DANC | DANC | 5301 | Pilates Reformer Training ELIGIBLE GRADES: GEC4: A-F, CR, PR COURSE DESC: Designed to condition students using resistance training on the Universal Reformer and other Pilates apparatus. Students learn exercise principles and techniques on specialized equipment, focusing on correction of body alignment problems, muscle imbalances, strength, and flexibility. | Studio | 1 | 2 | | N | G40 | | 0 |
| FAR | DANC | DANC | 5302 | Pilates Mat Training ELIGIBLE GRADES: GEC4: A-F, CR, PR COURSE DESC: Instructs students in the proper form and execution of beginning through intermediate level non-equipment based exercises performed on an exercise mat. It is the principle segment of training in the comprehensive Pilates Method of Body Conditioning and is appropriate for all levels of movement experience. The precision, control and focus of the exercises enables students to balance the musculoskeletal system so that they are able to efficiently and safely practice other more rigorous, demanding physical disciplines. Includes laboratory practice of 45 mat exercises that train the muscles to improve body stability and mobility. The Pilates method develops precision coordination and concentration in movement while increasing strength and flexibility. Addresses injury rehabilitation from the perspective of preventive training. | Studio | 1 | 0 | | N | G40 | | 0 |
| FAR | DANC | DANC | 5303 | Bartenieff Fundamentals ELIGIBLE GRADES: GEC4: A-F, CR, PR COURSE DESC: Provides the student with an experiential approach to movement as a somatic (from soma, meaning body) study experience. Addresses Irmgard Bartenieff's (1890-1981) work, Basic Six Fundamentals exercises, their relationship to the Bonnie Bainbridge Cohen's six Developmental Patterns and enhancing ones movement facility through an approach based on these materials. Fundamentals provides a framework for movement training through 1) open exploration, 2) discovery, 3) observation and 4) practice. Class work is designed to address common dance and non-dance movement issues. | Studio | 1 | 0 | | N | G40 | | 0 |
| FAR | DANC | DANC | 5304 | Yoga: Principles and Practice ELIGIBLE GRADES: GEC1: A-F COURSE DESC: Introduction to yoga, particularly the practices of asanas (poses), vinyasas (sequences), and pranayama (breathing techniques). Emphasizes developing a personal practice, sequencing poses and counterposes to promote safety, and practicing pranayama and mediation to improve concentration and body awareness. Readings and class discussions will provide an understanding of the history and philosophy of yoga. No yoga experience is required, but some movement background is helpful. | Studio | 1 | 4 | | N | G40 | | 0 |

| | | | | This studio-based course provides opportunities for graduate students to synthesize and apply community dance theory and practice with undergraduates and community members. Graduate students in this course are both participants and facilitators as they identify potential community partners, and lead dance sessions with people of varying ages and abilities. Students discuss concerns and challenges with implementation of dance experiences and identify resources that support stewardship of community dance. Students have the opportunity for independent investigation of a question, challenge, or project related to their interests and investigations of how theory is connecting to the studio-based experience. A substantial portion of the final grade comes from this independent investigation and final presentation of the work. | | | | | | | | |

| | | | | This course explores the teaching and learning of dance. Dance pedagogy is considered through artistic, personal, cultural, and interdisciplinary connections as well as how individuals identify, understand, and express themselves. Students evaluate and apply various teaching methods, assessment and evaluation practices, and culturally relevant pedagogy. Best practices in the skills of creating, responding, and connecting are studied in order to meet learners on a continuum of knowledge. Dance education is further considered within community dance contexts. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | | REQUISITE: | | | | | | |
| | | COURSE DESC: | | The seminar explores the musical-aesthetic thought outside the Western world, from ancient sources to contemporary debates. The readings include mythological, religious, literary, and philosophical texts, both traditional and modern. The areas of musical creativity that will be discussed comprise classical traditions and popular genres, including the uses of music in mass entertainment, ideological propaganda, and devotional practices. Literary, visual, and video materials will help illustrate the attitudes towards music in these cultures. In addition, the seminar will pursue a methodological theme of considerable urgency: Do the existing historical and contemporary approaches do justice to the uniqueness and complexity of music-philosophical theorizing in the cultures of, for example, India, China, or Bali? What kind of an approach would allow us to avoid the pitfalls of comparativism, Orientalism, and distorting biases in general? What kind of a philosophical perspective can assure at once a meaningful multilateral dialogue among world musical cultures, and their resistance to the levelling effects of globalization? A variety of texts, both by authors from a relevant cultural tradition and by Euro-American commentators, will serve as a platform for addressing these questions. | | | | | | | | |

| | | COURSE DESC: | | This course is intended to give students an overview of the two contributing cultures and their musics found in this country, from the songs of rural Appalachia and New England to the African music brought by the slaves; to the musics that grew out of those traditions, from the popular musics of the cities to the songs of Latin Americans and European minorities. We will trace the way these musics live in the modern city, in the academic world and in contemporary music society. (Nettl, 1976) The student will be introduced to the study of music as a manifestation of human need and a representation of culture. The course uses music as an index to understand American culture while it introduces the student to various concepts in the field of ethnomusicology. (Nettl, 1976) | | | | | | | | |

| FAR | THAR | THAR | 2120 | Mindfulness and Creativity ELIGIBLE GRADES: GEC1: A-F REQUISITE: COURSE DESC: Mindfulness refines the quality of our attention to the present moment. In this course, students cultivate presence and explore the creative process through meditation, collaborative practice and research. They develop a daily mindful practice through experiential learning and doing. Practices include Yoga, Mindfulness Based Stress Reduction exercises, and various forms of meditation. Students apply mindfulness to their own creative process and work on a creative project of their choice. The course emphasizes the creative process over the final project, developing awareness of how mindfulness informs the creative process. Students cultivate creative collaboration and critical analysis by analyzing a work of art in teams. They research the historical and cultural context of the work and devise a short group project based on their findings. Readings might include texts by Anne Bogart, Chogyam Trungpa, John Cage, Mihaly Csikszentmihalyi, Dr. Kabat-Zinn, Sharon Salzberg, Julia Cameron and Liz Lerman's Critical Response Theory. | Lecture | 3 | 0 | 2FA; BER | N | U30 | | 0 |

| | | COURSE DESC: | | Within the entertainment industry multiple methods of automation technology are being utilized for the purpose of moving onstage design components including scenery, stage properties, lighting, sound and projection surfaces for the purpose of changing the visual landscape of the stage throughout the production. For these multiple systems used in the area of stage automation to be useful, they must be reliable, repeatable, and often programmable to enable changing travel distances/ length of time to travel scenarios. Automation is enabling large scale scene changes to occur within the natural rhythm of performance; eliminating the need to endure long interruptive transitions between scenes that negatively impacts the production. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: | | | | | | | | |
| | | COURSE DESC: | | Within the entertainment industry multiple methods of automation technology are being utilized for the purpose of moving onstage design components including scenery, stage properties, lighting, sound and projection surfaces for the purpose of changing the visual landscape of the stage throughout the production. For these multiple systems used in the area of stage automation to be useful, they must be reliable, repeatable, and often programmable to enable changing travel distances/ length of time to travel scenarios. Automation is enabling large scale scene changes to occur within the natural rhythm of performance; eliminating the need to endure long interruptive transitions between scenes that negatively impacts the production. | | | | | | | | |

The seminar will facilitate conversations on scholarship and what it means to take on the challenge of bringing an interdisciplinary perspective to projects/assignments. The focus for this Professional Seminar is, first, on orienting students to the IIP requirements and the challenges involved in crafting a graduate degree program. Second, we examine a variety of issues related to scholarship, including: (1) finding your voice as a scholar, (2) conference participation, (3) the process of scholarly publication, (4) grant writing, and (5) writing a research paper/dissertation. | | | | | | | | |

| | | | | Resiliency has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications. | | | | | | | | |

| | | | | This course introduces students to the study of climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gas emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors. | | | | | | | | |

| | | | | Climate change and other rapid environmental changes create risk to communities, infrastructure, and human security; managing these climate-related risks requires understanding of the community, its risk perception, and collaborative communication and management planning. Students characterize risk to communities from climate change and explore risk perception theory and methods to manage threats to human security. Students discuss concepts of justice and equity in risks to human security, risk management, and communication. Students explore these particular climate change and environmental challenges through the multidimensional and interdisciplinary lens of human security. | | | | | | | | |

| | | | | Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land managements, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems. | | | | | | | | |

Students apply interdisciplinary perspectives to identify, analyze, and evaluate environmental issues, measure impacts, and establish criteria for effective remedies. The course reviews key environmental challenges within selected areas (with topical themes chosen from contemporary issues in environment, health & well being, education, economic development, and other timely topics.) as well as fundamentals of social entrepreneurship to enable students to design and present enterprise development models for market-based social ventures seeking to deliver such remedies. Students learn how to pitch venture proposals to address criteria evaluating efficacy, feasibility, sustainability, and potential "return on investment" for both financial and social/environmental impacts. | | | | | | | | |

| | | | | This course involves students in a critical analysis of the Ohio University Sustainability Plan and community-based projects that support the Office of Sustainability's mission. Students are engaged in the exploration of contemporary environmental initiatives, leadership, professionalism and local issues. Implementation of effective projects and feasibility studies to advance institutional sustainability efforts provides students the opportunity to make meaningful changes within their campus and community. This course's focus allows students the opportunity to better define sustainability and the role it plays in their lives, enhance skills that encourage sustainable behaviors and make positive contributions to their health, the natural environment and the local community. | | | | | | | | |

| | | COURSE DESC: | | Resiliency has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications. | | | | | | | | |

| | | COURSE DESC: | | This course introduces students to the study of climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gas emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors. | | | | | | | | |

| | | | | ELIGIBLE GRADES: GEC1: A-F | | | | | | | | |
| | | | | COURSE DESC: Resilience theory has emerged as an approach for understanding how systems are able to thrive through rapid, often unexpected change. Managing for resilience is key in preparing for some of the greatest challenges that society faces including climate change, globalization, and rapid urbanization. In this capstone, students analyze the risk and vulnerability of a community, organization, or infrastructural system to unexpected change and develop strategies to improve the community or organization's resilience. Students critically evaluate the resilience preparation at a local, state, regional, and national level to highlight both best practices and lessons learned. They then select a system in which they are most interested; infrastructure, urban centers, community plans, ecological systems, organizational, and others. Students engage with organizations and communities to develop a resilience plan for that system with a focus on improving sustainability, human security, and resilience. | | | | | | | | |

| | | COURSE DESC: | | Entrepreneurship education, in the sense of focusing on the creation of new economic entities centered on a novel product/service, has been, until recently, relatively rare. At Ohio University, a pedagogy has been developed focused on inter-disciplinary team-based projects that result in new venture formation and long-term success for the newly-founded companies and the University that developed the research and technologies which are the basis for many of the companies. The curriculum is structured such that students from the disciplines of science, medicine, engineering, communication, and business can be engaged and participate. | | | | | | | | |

| | | COURSE DESC: | | Examines the role that values play in the design and implementation of public policy. The course begins with a brief introduction to some of the most influential traditions in ethics: deontology, utilitarianism, virtue theory and care ethics. This introduction aids us in establishing a common vocabulary for the analysis of policy questions and engagement with the broader debates in which such questions are embedded. We move from this introduction into a closer consideration of ethics in the context of several concrete institutional settings. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F REQUISITE: | | | | | | | | |
| | | COURSE DESC: | | A communications plan is an important part of an organization's daily operation. Additionally, for public and nonprofit organizations in particular, the activities in the plan should support overall communications goals in ways that help raise money, create change, recruit talent, and promote mission-related goals and objectives. As a living document, it frames the way both internal and external audiences perceive the organization; and since many nonprofits have limited staff and financial resources available for communications activities, it is even more important that these resources be deployed as strategically as possible. This course offers an overview of communications concepts and media activities in ways that will help students develop a strategic communication plan focused on emphasizing a commitment to organizational mission; building trust among internal and external audiences; clarifying organizational priorities; and generating public value. | | | | | | | | |

| | | COURSE DESC: | | An introduction to the principles, methodologies, and methods of qualitative research. The course will examine the role of qualitative research in the field of public administration (and allied fields) as well as the relationship between qualitative and quantitative methodologies. The course will provide students the opportunity to examine and practice approaches and methodologies utilized by qualitative researchers such as: interviewing, ethnography, participant observation, case studies, discourse analysis, and content analysis. Through readings, discussions, and practice, students will be able analyze the comparative strengths and liabilities of each method. The course will provide students with the knowledge and skills needed to select qualitative methodologies and methods that are appropriate given the research question at hand. | | | | | | | | |

| | | COURSE DESC: | | Best practices in healthcare emphasize a strong connection between practice and research. This course provides a cross-disciplinary overview of research-informed practice and practice-informed research for the allied health professions. Includes the role of the health professional as a consumer of research with concern for the ethical considerations in the research process. Basic elements of research design, concepts and statistical tests are covered. | | | | | | | | |

| | | COURSE DESC: | | This course introduces different approaches to health systems strengthening in low and middle income countries (LMIC), including monitoring and evaluation, continuous quality improvement, community health workers, health workforce development and research capacity building. A case based approach is used to evaluate the extent to which health systems address health equity in a sustainable manner. Students explore how transdisciplinary research can convert health research to action and policy. The class examines contextual and cultural explorations of different LMIC settings that act as facilitators and/or barriers for high performance in LMIC settings. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | IHS 5210 | | | | | | |
| | | COURSE DESC: | | This course provides a conceptual framework to understand the process of global migration and human health. Students critically examine the social and political construction of displaced people (migrant and refugee), and the resultant state and humanitarian responses surrounding health and social services. This course frames global health in broad terms to include underlying social and economic conditions, including climate change, economic underdevelopment, and political instability, which displace people around the world and present barriers to achieving health and well-being in displaced communities. In order to sharpen skills in critical analysis of health problems and to better understand their underlying causes, students draw upon various fields including: global health, development studies, public health, anthropology, and other social sciences. | | | | | | | | |

Students work with an adviser to develop the topic and negotiate the products to be completed. | Ind Study | 1 to 5 | 5 | | I | G40 | | 0 |
| HSP | NRSE | NRSE | 6931 | Capstone Seminar ELIGIBLE GRADES: GEC5: CR, PR, F COURSE DESC: This course emphasizes synthesis of the American Association of Colleges of Nursing (AACN) Essentials of Master's Education. The Commission on Collegiate Nursing Education (CCNE), the Master of Science in Nursing (MSN) program accrediting body, mandates that these Essentials are incorporated into all MSN programs. These Essentials represent the core competencies for preparation for movement of students into advanced nursing practice regardless of specific practice setting. Students will engage in focused self-reflection on achievement of these competencies and a comprehensive final program exam. | Seminar | 1 | 2 | | N | G40 | | 0 |
| HSP | NRSE | NRSE | 6932 | Capstone Project ELIGIBLE GRADES: GEC5: CR, PR, F COURSE DESC: Provides the opportunity to synthesize the information gained throughout the MSN program to develop a product that enhances the quality of the discipline and/or the quality of health care associated with a specific health issue. The student works with an advisor to complete the capstone project. | Tutorial | 1 to 8 | 8 | | I | G40 | | 0 |
| HSP | NRSE | NRSE | 6933 | Capstone Experience for Nurse Practitioners ELIGIBLE GRADES: GEC2: A-F, PR COURSE DESC: This course emphasizes student self-evaluation of meeting specific program outcomes and professional competencies through portfolio development. Nurse Practitioner students also complete a comprehensive final program exam that includes concepts from all program courses pertaining to the population foci of the student NP Track Option and is based on national certification body domains of practice. Students complete an integrated care simulation exam with a standardized patient. | Seminar | 1 | 0 | | N | G40 | | 0 |

It is an introduction to topics such as cultural identity, core values, group norms, communication, language as well as significant contributions made by Deaf people to the world community. Designed for students who may or may not have had any previous experience or exposure, this course will answer some of the most commonly asked questions about the Deaf community and its rich culture. Views and perspectives of and from the Deaf community will be explored along with the implications of cultural differences when the Deaf and hearing worlds overlap. The oppression experienced by the Deaf community and the impact hegemony has had on the attitudes, values, and beliefs of both the hearing and D/deaf community will be examined. | | | | | | | | |

| | | COURSE DESC: | | This is the first in a sequence of six American Sign Language (ASL) courses. Course focuses on the foundational aspects of ASL such as the manual alphabet, various number systems, basic grammatical structure, non-manual grammatical markers, listing, ranking, contrastive structure, and the use of space. The course applies a conversational, deaf studies approach. The history and culture of the deaf community in the United States is introduced. | | | | | | | | |

| | | COURSE DESC: | | This is the second in a sequence of six American Sign Language (ASL) courses. Course continues to develop grammatical competency in regard to sentence structures in ASL. Course expands on concepts previously introduced and introduces classifiers and ASL literature. The course applies a conversational, deaf studies approach. Registered students attend a section of the corresponding undergraduate course. | | | | | | | | |
| HSP | RCS | CSD | 5210 | Intermediate American Sign Language I | Lecture | 3 | 0 | | N | G50 | | 0 |

| | | COURSE DESC: | | This is the third in a sequence of six American Sign Language (ASL) courses. Intermediate level ASL classes provide students opportunity to develop more complex expressive and receptive conversational skills. Emphasis is placed on expressive ASL using classifiers in ASL storytelling. Topics revolve around sharing information about the environment and everyday communication. Grammar is targeted in context with an emphasis on further development of discourse skills. Students learn conversational strategies to maintain more complex ASL conversations. This is a continued study of Deaf community and more complex ASL literature. Registered students attend a section of the second-year undergraduate course. | | | | | | | | |

| | | COURSE DESC: | | The fourth in a sequence of six American Sign Language (ASL) courses. Focus is placed on the expressive use of ASL through storytelling. Expressive use of ASL grammar is expanded with an emphasis on developing questioning and answering skills. Conversational strategies are learned to help students maintain an ASL conversation appropriately. Includes English/ASL translation of concepts and stories. | | | | | | | | |

| | | COURSE DESC: | | The fifth in the sequence of six American Sign Language (ASL) courses. The advanced level ASL classes provide students the opportunity to further develop more complex comprehension and production skills. This course is designed for students to develop greater knowledge and proficiency of American Sign Language and its subcomponents (e.g., vocabulary, morphology, grammar) and greater American Sign Language conversational proficiency. Emphasis is on ASL expression through language immersion within a controlled classroom of all signers. | | | | | | | | |

| | | COURSE DESC: | | The final class in the sequence of six American Sign Language (ASL) courses. The advanced level classes provide students the opportunity to further develop more complex comprehension and production skills in ASL. This course is designed for students to develop mastery knowledge and proficiency of ASL and its subcomponents (e.g., vocabulary, morphology, grammar) and conversational proficiency with deaf signers within the context of the deaf culture. Course represents the capstone of the ASL course sequence and thus requires students to demonstrate ASL proficiency in real life situations. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC2: A-F, REQUISITE: PT 7011 | | | | | | | | |
| | | COURSE DESC: | | Deals with application of physiological principles to the study of disease and injury, with particular attention to cellular injury, inflammation and repair, and immunity. Emphasis on implications of pathophysiology for physical therapy evaluation and treatment. General principles of pathophysiology will be applied to specific examples in class. Subsequent courses in this curriculum will assume a working understanding of the concepts presented in this class. Will also prepare the student to treat patients with select systemic conditions, whether or not those conditions are the primary reason for physical therapy referral. Emphasis will be placed on identification of the patient with systemic pathologies requiring further consultation or referral to other healthcare providers. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC2: A-F, REQUISITE: PT 7111 | | | | | | | | |
| | | COURSE DESC: | | Provides students with an overview of topics from a cellular to a systems level. Gastrointestinal, genitourinary, hepatobiliary, renal, endocrine, and metabolic systems will be covered. Additionally, the role of physical therapy in acute care and the Intensive Care Unit (ICU) will be covered. For each topic area or system, the student will be presented with the pathophysiology focused at the cellular and tissue level. The role of physical therapists in differential diagnosis, by recognizing the signs and symptoms associated with impairments of the systems, will be presented. Prepares the student to identify the patient with systemic pathologies requiring further consultation or referral to other health care providers. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC2: A-F, REQUISITE: Admission to the PT program | | | | | | | | |
| | | COURSE DESC: | | This course is designed to introduce students to some of the professional role responsibilities and the processes and requirements for clinical education experiences. Beginning with profession expectations and history of the profession, the course provides foundational information on physical therapy practice. The students will begin their Professional Development portfolio. The latter portion of the course is focused on preparing the student for clinical experiences in the curriculum. | | | | | | | | |

| | | | ELIGIBLE GRADES: | GEC2: A-F, REQUISITE: PT 7500 and PT 7510 | | | | | | | | |
| | | | COURSE DESC: | This course applies the knowledge of neuroanatomy and motor control systems to the physical therapy management of movement dysfunction which results from a focal or diffuse lesion, such as stroke or brain injury, in the central nervous system. Course content introduces the foundational characteristics and clinical presentation of focal and diffuse brain lesions, evidence-based systems approach to examination and assessment, and critical evaluation of treatment theory. | | | | | | | | |

| | | | ELIGIBLE GRADES: | GEC2: A-F, REQUISITE: PT 7500 and PT 7510 | | | | | | | | |
| | | | COURSE DESC: | Course content addresses the synthesis and application of didactic knowledge regarding clinical presentation of focal and diffuse brain lesions and movement dysfunctions after neurological insult. Course emphasizes the effective performance of a physical therapy examination and assessment. Design and implementation of task-specific and activity based prevention and interventions with the goal of promoting optimal functional recovery and neural reorganization is also covered. | | | | | | | | |

| | | | | ELIGIBLE GRADES: GEC2: A-F, PR | | | | | | | | |
| | | | | COURSE DESC: This course introduces students to the role of physical therapists in the evaluation and treatment of disorders of the integumentary system, with a focus on chronic wounds. Principles and techniques of patient management are presented along with a discussion of appropriate therapeutic equipment (e.g., physical agents, dressings). In addition, the students will understand the pathophysiology associated with lymphedema and the commonly associated physical therapy treatment techniques. | | | | | | | | |

| | | | | ELIGIBLE GRADES: GEC2: A-F, PR | | | | | | | | |
| | | | | COURSE DESC: Discusses biological, histological and biomechanical principles of connective tissues, bone, and muscle as applied to physical examination and therapeutic exercise. There is presentation of medical imaging of the listed tissues as they appear on plane x-ray, MRI, fMRI, CT scan, PET/SPECT scan, and ultrasound as related to physical therapy practice. Basic principles of exercise prescription will be discussed to achieve optimal outcomes for the patient based on the pathology, biomechanical principles of tissues, impairment, and the desired level of performance. | | | | | | | | |

| | | | | ELIGIBLE GRADES: GEC2: A-F, PR | | | | | | | | |
| | | | | COURSE DESC: Focuses on orthopedic examination and treatment of the upper quarter of the musculoskeletal system, as well as a brief introduction to the cervical spine. Designed around the understanding of and subsequent application of the anatomy, mechanics, pathomechanics, pathology, surgical intervention, and rehabilitation to physical therapy case studies involving the upper quarter. Content includes orthopedic evaluation skills, advanced skill development in special tests, introduction to manual therapy of the extremities, and development of appropriate exercise programs. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC1: A-F | REQUISITE: | Jr or Sr | | | | | | |
| | | COURSE DESC: | | An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and recreative. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities. | | | | | | | | |

| | | COURSE DESC: | | This is the child and family studies capstone course in the assessment of children, individuals, couples and families, and the acquisition of helping skills needed to facilitate these processes; all necessary in preparing students for their final internship experience. It is designed to help students acquire practical helping skills, techniques, and theoretical foundations that define and support assessment and effective helping relationships for human services professionals working in a wide range of settings. Highly experiential in nature and includes multiple opportunities for practice, demonstration, and discussion of methods and techniques drawn from the text, lectures, and supplemental materials. It also includes an introduction to group process. Specific emphasis is placed on integrating previous and concurrent course content and experiences, and bringing an enhanced level of skill to the helping relationship. Additional considerations include an emphasis on a student's personal beliefs, values, and spirituality and their impact on the helping process and developing an awareness of multicultural issues and other significant topics that impact the helping relationship, such as ethics, gender, race, religion, disability, ageism, and sexual orientation. | | | | | | | | |

| | | COURSE DESC: | | An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and recreative. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities. | | | | | | | | |

| | | | | This is the child and family studies capstone course in the assessment of children, individuals, couples and families, and the acquisition of helping skills needed to facilitate these processes; all necessary in preparing students for their final internship experience. It is designed to help students acquire practical helping skills, techniques, and theoretical foundations that define and support assessment and effective helping relationships for human services professionals working in a wide range of settings. Highly experiential in nature and includes multiple opportunities for practice, demonstration, and discussion of methods and techniques drawn from the text, lectures, and supplemental materials. It also includes an introduction to group process. Specific emphasis is placed on integrating previous and concurrent course content and experiences, and bringing an enhanced level of skill to the helping relationship. Additional considerations include an emphasis on a student's personal beliefs, values, and spirituality and their impact on the helping process and developing an awareness of multicultural issues and other significant topics that impact the helping relationship, such as ethics, gender, race, religion, disability, ageism, and sexual orientation. | | | | | | | | |

| | | COURSE DESC: | | This project-based course provides students with an opportunity to explore the three OHIO Honors Program pathways - community engagement, research/creative activity, and leadership - in an applied context. Students are assigned to small, interdisciplinary groups, and each group works with a campus or community partner on a defined project over the course of the semester. In-class lectures focus on ethical approaches to each of the three pathways in addition to the theoretical foundations of experiential learning and interdisciplinarity. | | | | | | | | |

| | | COURSE DESC: | | This course uses interdisciplinary, team-based problem solving to introduce OHIO Honors students to the foundations of the three honors engagement pathways: leadership, community engagement, and research and creative activity. The activities and product align with a relevant university-related health and wellness initiative, as will be defined. Students work in an interdisciplinary team to research the campus context and needs related to the initiative topic, propose a relevant project, test and refine the proposal, and execute it. Lectures provide academic background on the topic and introduce students to a variety of problem-solving methods, such as evidence-based practice, systems thinking and design thinking, a creative, empathy-driven process for developing user-friendly solutions to everyday challenges people encounter. The lab sections guide students through the practical application of these problem-solving tools, help to explore ideas from lecture, and provide time and space for the team to work on the project. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC7: CR, F, NC | REQUISITE: | OHIO Honors Program | | | | | | |
| | | COURSE DESC: | | This course introduces students to fundamental principles of ethical community engagement that begin with an understanding of how first to engage with a community through the identification and elevation of its assets. Students are asked to reflect on their perceptions of communities with which they have no previous relationships, encouraged to interrogate the factors that have influenced those perceptions, and challenged to expand their understanding of those communities through research and engagement with community members. Through that process of self-reflection, students also are challenged to consider ways of engagement that are mutually beneficial to themselves and their community partners. In addition, this class explores the tension associated with navigating structural and cultural differences to find common goals and create partnerships that facilitate the achievement of community partners' missions as well as academic expectations for the students. | | | | | | | | |

| | | COURSE DESC: | | This course deals with the theory and practice of living and studying in other cultures and is designed specifically for students preparing to participate in one of OHIO's education abroad programs. Students gain the culture-general skills and critical thinking to explore and understand both their own culture and the culture of their host country. Through class discussions and homework assignments, students apply the general ideas and concepts discussed in the course to their particular host country. The development of an informed cross cultural perspective is essential if students are to have a transformative learning experience and gain the maximum academic, cultural and social benefit from their academic experience abroad. The cross cultural course component is complemented by a course segment focused on teaching students the skill set required to successfully navigate the logistics of study abroad. | | | | | | | | |

INST3600/5600: Global Citizen Journalism will examine this social movement and place it in its real-world context. It will also help train and educate potential citizen journalists on how the journalism process works. On one hand, this course will serve as a media literacy primer, explaining how journalists choose their stories, sources, and reach their audience. On the other, it will help students understand how to take advantage of the information explosion the Internet has created to share their own stories and help combat the spread of 'fake news.' | | | | | | | | |

| | | COURSE DESC: | | This course introduces students to the norms, practices, and structures underlying global collective order. It examines shifts from governments to governance in the management of international affairs, as well as the policy debates and coordination challenges these entail and the core theoretical concepts we use to understand them. How has increasing interdependence shaped the ways in which modern states and non-state actors identify and respond to collective goods and harms? The course begins with a consideration of new risks and rewards created by contemporary globalization in areas of security, aid and development, trade and finance, and human rights. We consider who 'wins' and 'loses' in the international system by addressing issues of power, authority, and legitimacy as well as the changing roles of states, formal and informal institutions (e.g. The UN, WTO), NGOs, and transnational corporations. We conclude by examining the formation an 'international community' and assessing its capacity in responding to collective challenges such as poverty and inequality, trans- and sub-national political violence, economic regulation, cyber, energy, and environmental security, and humanitarian intervention. | | | | | | | | |

These include human trafficking, challenges faced by refugees, climate change, loss of biodiversity, food insecurity and others. We use a global perspective to understand the extent of these problems, and focus our attention on how local communities around the planet come together to address them. As part of this consideration of human agency, we spend time learning about key local activists, their work, and the strategies they employ. We also evaluate ways in which the activities of such local communities can receive broader support. This course provides students with training on how to make effective oral presentations. | | | | | | | | |

| | | COURSE DESC: | | This class takes place in Ecuador and introduces students to the concept of global service-learning. Students learn about different models and philosophies of service-learning and work collaboratively on a community-identified service project in an under-resourced community in Ecuador. Students explore what it means to be a global citizen and gain an understanding of service-learning in local and international contexts. Students engage in critical thinking about community development, civic engagement, power, privilege, and poverty and how these themes relate to global service-learning. | | | | | | | | |

| | | COURSE DESC: | | The Clinical Anatomy Immersion allows all entering Heritage College students, regardless of their curricular track, to begin their training together, immersed for roughly 5 weeks in clinically-oriented study of human gross anatomy. At the core of the course are the laboratory activities. Students will participate in 4, 3-hour gross anatomy labs each week. These activities involve dissection of human cadavers, imaging studies, and discussion of clinical anatomy in an interactive laboratory setting. The structure of the human body is presented in a clinically relevant manner, providing correlations of normal anatomy to common disease states. The ultimate goal is to enhance clinical reasoning in the context of human gross anatomy. A few key lectures will provide background for the lab studies | | | | | | | | |

| | | COURSE DESC: | | This one-week course will introduce students to Patient Centered Primary Care medical practice, and will incorporate active learning principles. On the first day of the block, students will be introduced the "5 Cs of patient-centered primary care". These concepts will be emphasized over the next 5 days and be the basis for all of the learning activities. Additionally, there will be a doctor-patient communication thread of activities that build students' skills throughout the week, culminating in a patient interview, and a reflective paper on that experience. This course provides protected time outside of class for students to learn and prepare for in-class hands-on activities that incorporate that knowledge into tangible skills. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC5: CR, REQUISITE: PR, F | | | | | | | | |
| | | COURSE DESC: | | The first course of the Open Book Project elective series explores issues of social justice and inclusion in medicine. Grounded in Rita Charon's (2007, 2017) narrative medicine methodology, the Open Book Project elective (OBP1) introduces preclinical medical students to a unique framework for understanding, interpreting and interacting with the lived experiences of others; skills and techniques for empathy building, self-reflection, and connecting to others at a deeper, humanistic level; and an approach to clinical practice in which narrative sensibilities inform how physicians listen to and provide care to their patients. Through practice in the process of close reading, radical listening and expressing our own stories, narrative medicine facilitates relationship building and a deeper understanding of physicians and patients alike. Students will participate in two sessions of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum. | | | | | | | | |

| | | COURSE DESC: | | The Open Book Project (OBP2) elective course builds upon the skills introduced in OBP1 while focusing on issues of social justice and inclusion in medicine. The Open Book Project elective (OBP2) deepens and expands preclinical medical students narrative medicine skills of close reading, radical listening and expressing their own stories. Students will engage with new selections of art, poetry, prose, and other works. | | | COURSE DESC: | | Fundamentals in Clinical Osteopathic Medicine 1 and 2 are a series of courses devoted to assisting students in developing clinical skills necessary to work towards mastery of the AOA Core competencies. Fundamentals in Clinical Osteopathic Medicine 1 is a sixteen week course. The focus is on History and Physical (H&P), Osteopathic Manipulative Medicine (OMM) skills and Clinical and Community Experiences (CCE). Integral to all of these areas are psychosocial skills. Other components will guide the student in learning specific psychosocial and psychomotor skills, as well as reinforce the importance of an evidence-based approach to the clinical application in the practice of medicine. The format of the course incorporates clinical lab sessions, utilizing peers or simulated patients for practice in obtaining history and performing physical examinations. On occasion, learning activities will utilize real patients. Clinical cases in the concurrent Biomedical Sciences course are structured to foster learning objectives that enhance History and Physical exam skills. An ongoing thread in this course is the Problem Oriented Medical Record (POMR) and medical progress notes (SOAP notes) tools students need to develop and maintain excellent documentation of clinical encounters. The OMM lab component for this course is taught to PCC students in conjunction with the students in the CPC curriculum. Students will be assigned to one or more clinical faculty for 8 four-hour experiences per quarter to be given an opportunity to practice their developing clinical skills. They will also be assigned to community agency preceptors for 2 four-hour experiences per quarter in order to develop an understanding of the roles of non-physician personnel and health care services provided outside the hospital/physician's office. Objectives and activities for each community agency experience are available on the CCE website. | | | | | | | | |

The cases encourage the student to develop neurological diagnostic skills based on principles of neuroanatomy, neurophysiology, neuropharmacology, neuropathology, infectious disease, and epidemiology. The skills of history taking and physical examination are reinforced in laboratory sessions on the neurology examination. Mastery of clinically relevant neuroanatomy is facilitated in lab sessions devoted to brain dissection. The cases also lead students into considerations of the psychosocial management, pharmacological treatment, OMM, surgery intervention, and rehabilitation of patients with neurological disorders. | | | | | | | | |

As in year 1, small group discussion sessions using clinical case studies serve as the focus of the courses. In addition, graded and non-graded mandatory activities, such as the Brain Anatomy Labs and Biomedical Science Problem Sets, are designed to supplement material covered during the small group discussion process, providing students with hands-on opportunities to understand the relationships between form and function, and encouraging exchange of ideas with content experts throughout the biomedical science disciplines. | | | | | | | | |

| | | | | COURSE DESC: | This three-week Psychiatric course is designed as a comprehensive introduction to psychiatry across the lifespan. Emphasis is placed on the major psychiatric disorders, including: their neuro-chemical basis, assessment, diagnosis, evidenced-based treatments including the pharmacology and clinical utilization of all classes of psychotropic medications as well as psychological interventions. | | | | | | | |
| | | | | | The course is divided into three weekly modules: Anxiety Disorders, Mood and Childhood Disorders, and Psychotic/Personality Disorders. Students are expected to do significant outside reading based upon assignment for each learning topic and activity. Real patient interviews and case studies are utilized to assist the student in experiencing the reality and learning the distinguishing features of these disorders. Case vignettes will be utilized in problem sets and an extensive review prior to the NBME Psychiatry Subject Exam final. | | | | | | | |

We focus on population health management across multiple contexts, medical and otherwise. Activities include employing Electronic Health Records to manage population-level data, understand the connections between that data and payment, as well as perspectives from payers about information exchange. Students also hear from experts about U.S. health systems history, community development impact on health and equity, public health approaches to populations, and patient advocacy. They address the public and population through the creation of a community-oriented project addressing a high-risk health population. | | | | | | | |

We focus on population health management across multiple contexts, medical and otherwise. Activities include employing Electronic Health Records to manage population-level data, understanding the connections between that data and payment, and describing the concurrent financial management practices used in complex delivery systems. Students also hear from experts about the history of community development, the intersection of behavioral health and criminal justice, as well as the role and function of ethics in clinical settings. They will address public and population health through the construction of a community orientated project addressing a high-risk health population leveraging the skills and knowledge developed over the course of the program in quality improvement, systems thinking and community based organizations and population medicine. | | | | | | | |

| | | | | COURSE DESC: | This five-week Endocrinology and Metabolism course presents an opportunity for students to delve into the major endocrine systems in the body, including the pituitary, thyroid, parathyroid adrenal and pancreatic glands. Students explore the regulatory mechanisms of the hormones secreted by these glands and the metabolic effects elicited by these hormones. A major focus of the course is the clinical relevance of hormonal signaling on bone metabolism, growth, and carbohydrate, lipid and amino acid metabolism. Hormonal control under normal physiological conditions is contrasted with disease states such as electrolyte imbalance, growth disorders, weight homeostasis and diabetes. By the end of this course, students will integrate and understand the underlying mechanisms by which these hormones act and how these signals are interpreted by tissues such as liver, bone, adipose, and muscle to coordinate metabolic changes in the body. | | | | | | | |

| | | | | COURSE DESC: | This two-week course will introduce students to topics related to addiction, pain, and palliative care. Addiction topics include abuse of and dependence on alcohol, prescription drugs, illicit drugs and other addictions. Pain and palliative care topics will address chronic pain, palliative care and hospice. Students will be presented with a holistic approach to comprehensive pain and symptom management and be given tools to help care for patients from a primary care approach. A solid foundation in the management of addiction, pain and end of life care will be a crucial component of medicine that students will find very helpful in their personal and professional lives. | | | | | | | |

| | | COURSE DESC: | | This three-week Geriatrics course introduces Clinical Presentation Curriculum (CPC) students to key concepts essential to caring for older adults. The Block begins by presenting the aging demographic imperative. There are not enough geriatricians to care for this growing segment of the population. Therefore, it is critical that all medical students are trained to meet the needs of older citizens with complicated, overlapping, factors associated with chronic medical conditions. Older adults often have three or more chronic medical conditions, take multiple medications and respond to treatments and medications differently than do younger patients. This block targets these often complicated overlapping factors. An emphasis is placed on understanding the following: aging versus disease; geriatric syndromes and atypical presentation of disease; providing care across the continuum of locations: ambulatory, hospital, assisted living, nursing home, and home; comprehensive geriatric assessment; psychosocial and environmental considerations; pharmacology/prescribing practices; and advance directives. | | | | | | | | |

This course will complement the current Patient-Centered Continuum (PCC) and Clinical Presentation Continuum (CPC) curricula currently offered by the College of Osteopathic Medicine. It will also better prepare the students to fulfill future research requirements, such as those in the CORE (Centers for Osteopathic Research & Education) and/or residencies and fellowships. Published research has shown that early research exposure for medical students improves their future attitudes and interest in research (Ley & Rosenberg, 2007), increases their productivity as physicians (Zier, Friedman, & Smith, 2006), better trains medical students to critically assess medical literature (Guillory & Sharp, 2003), and can help to interest medical students in research and academic careers (Solomon, et.al., 2003). | | | | | | | | |

| | | COURSE DESC: | | The purpose of this required four-week required course in surgery is to provide the student with an overview of the clinical specialty of General Surgery. This rotation is not intended to transform the student into a surgeon, but rather it is to provide the clinical clerk a survey of the specialty. The student will encounter a variety of experiences in those areas traditionally identified as Surgery. This course can be taken out of sequence. General Surgery subspecialties can be taken during the same semester as OCOM 8140. | | | | | | | | |

| | | COURSE DESC: | | This course is a one-year rotation, during the third year of medical school, situated within a rural or urban underserved family medicine practice and providing exposure to the continuity of primary care across the continuum of the inpatient and outpatient settings. It exposes the student to the breadth of family practice including medical care of all ages, as well as enhances the student's ability to provide continuity in care. This rotation also exposes the student to the collaboration of health care entities in the community, practice, management, practice quality improvement, and possibly research. It also provides exposure to the direct supervisory role of the physician CNP/PA/MA relationships. Overall, the goal of this rotation is to allow the student to develop rural/urban primary health care training by developing a continuity practice of their own under the direction of their supervisory site director. With this knowledge and experience, a better understanding of the scope of rural/urban underserved primary health care is achieved. | | | | | | | | |

| | | COURSE DESC: | | Elective courses offer opportunities for the 3rd and 4th year student to attain knowledge and skill in one of more areas of special interest related to his/her development as a future osteopathic family physician. This course offers an opportunity for students to attain skill in caring for college students on a clinical rotation, for example at Campus Care on the Ohio University campus. The student's knowledge will be enhanced by direct patient care experiences and didactic lectures. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC6: CR, PR, F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | Both university faculty and actual policymakers participate in instruction. A workshop in the orientation week sets the definitions to be used and introduces the materials in the texts. The sessions are organized around: 1. State policymaking - the powers which reside in the state and processes used to set health policy. Material is presented by faculty, officials, and elected representatives from the state in which the meeting is held. Comparison and contrast to other states is included. 2. Executive branch government policymaking - the agencies, regulatory and research evaluation processes by which policy is generated and implemented for the administration defining their missions and illustrating their ability to impact policy. The sessions are organized by the American Association of Colleges of Osteopathic Medicine (AACOM) at its Chevy Chase, Maryland offices. 3. Federal legislative policymaking - the process and the players. A full-day workshop on the legislative process in Congress is offered by personnel from the training program for freshman legislators. University faculty present sessions on the history of health policy in government. The role of special interest organizations and methods for presenting policy solutions to policymakers are covered by national experts. Other material is included throughout the year on topics such as the role of values in health policy decisions, budgets as policymaking tools, how to influence your legislator, the growing presence of D.O.s in health policy, and the policymaking processes of the American Osteopathic Association. Evaluation: Participants build a policy agenda with government relations staff of the AOA and carry it to federal legislators and staff from their own state - then evaluate the sessions with the accompanying staffers. | | | | | | | | |

| | | ELIGIBLE GRADES: | | GEC6: CR, PR, F | REQUISITE: | | | | | | | |
| | | COURSE DESC: | | The issues to be included in each year's curriculum are determined by a curricular planning group which meets in July to plan the following academic year. Instruction is organized around set problems furnished to the Fellows at one session and resolved at the next. Key references are furnished and the program content is delivered by experts and policymakers intimately involved in the issue under discussion. Wherever possible, both sides of controversial issues are presented. Issues presented in the programs for a sample year are: Reform in Healthcare Entitlement Programs (state and national perspectives) The Healthcare Market move to Managed Care Determining and Controlling the Healthcare Workforce The Role of Regulation in Healthcare Economics of Healthcare Health Policy Issues in the Osteopathic Profession Preparing for an Increasingly Diverse Patient Population Fellows are trained in problem-based learning in the orientation sessions. Groups of five meet with a faculty facilitator trained in small group facilitation. In the first session they read the case, identify the learning issues it presents, and make member assignments in preparation for the resolution of the case at the next session. They meet again to share their work at the opening of the following month's program and to decide what questions they will put to the presenters. (Presenters are furnished the case in advance). Finally, they meet to arrive on a solution and plan a presentation of their work. Evaluation: Faculty and Fellows critique presentation of the case resolution following each issue-based program. Presenters are evaluated by the Fellows and the feedback used to select the strongest faculty for the following year's program. | | | | | | | | |

| | | COURSE DESC: | | A one week orientation offers instruction in computing to enhance e-mail skills, database searching and internet information searches. Reference librarians offer a workshop in the use of the contemporary library with a focus on current health policy documents and resources. Computer skills are reinforced in session gathering references for an assigned research paper, in communication among participants and program faculty, and in instruction in PowerPoint, a statistics program, etc. Guidelines for developing the research paper and workshops in writing skills are offered by medical communicators. Two sessions in quantitative and qualitative analysis address reading and understanding statistical testing methods, survey and focus group methods, and statistical exercises on the computer. One-on-one research design and editorial support are available during project development, and instruction in presenting the findings effectively is offered in the last week of the session. Time is reserved each week to review progress and share feedback on the projects. Evaluation: Policy papers are due mid-summer after the year of study. They are read by reviewers from the AOA council of Federal Health Programs who select three of four for presentation at the fall meeting where certifications are awarded. Others are presented and all printed as proceedings for distribution to the Fellows and alumni of the program. | | | | | | | | |

| | | COURSE DESC: | | The purpose of this rotation is to provide an opportunity for the student to explore issues in the delivery of health services in other countries. This rotation is not intended to transform the student into a specialist, but rather it is to provide a survey of the specialty. Students will need to use a logical and appropriate clinical approach to the care of patients in a developing country setting, utilizing locally available resources, and applying principles of evidence-based decision-making and problem-solving. These experiences are designed not only for students considering careers in international health, but for increasing the understanding of any future physician practicing in the United States who may care for patients from other countries. The experience is also designed to deepen the awareness of all participants regarding the determinants of health and illness and diverse methods of approaching health problems in settings with varied cultural, socio-economic and political characteristics. These experiences help students develop sensitivity to health disparities and their causes, including health, social, economic and environmental factors. | | | | | | | | |

| | | | | GEC5: CR, PR, F REQUISITE: Students are required to work with the primary preceptor on an assigned service between December of year 3 and December of year 4 to select and approve an appropriate patient actually seen while on rotation as the basis for this paper. The selected patient case must lend itself to producing a paper that includes the usual components of a case report; the case must have some noteworthy appeal that would be valuable to a particular audience. Once the audience has been identified, the student must select a target journal as a potential venue for publication of the case report; it may be helpful to identify a few target publications and discuss these with the preceptor. The case report must then be written to conform to the submission guidelines and specifications of the specified target journal. An osteopathic component must be included in the manuscript submitted for grading. | | | | | | | | |

| | | | | GEC5: CR, PR, F REQUISITE: The purpose of this elective rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. This rotation provides a broad overview of critical review of literature via hands-on experience. In hospital and ambulatory settings (as appropriate), the student is expected to encounter a variety of experiences that may lead to a clinical question answerable through the conduct of an extensive and critical review of the literature. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, understanding basic statistical results and interpretation, human subject protection, manuscript writing, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of a critical literature review and to practice problem-solving skills. | | | | | | | | |
| OST | OST | OCOM | 8943 | Research Elective - Case Based Study ELIGIBLE GRADES: COURSE DESC: | Research | 2 to 6 | 6 | | N | M60 | | 0 |
| | | | | GEC5: CR, PR, F REQUISITE: The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. To accomplish this, the rotation provides an opportunity to write a case report and submit it for publication. A case report is defined as an account of the signs, symptoms, diagnosis, treatment and follow-up of a patient that follows an unusual or noteworthy case presentation. A case report can consist of a single-case study or a multiple-case study (N<11). In hospital and ambulatory settings (as appropriate), the student potentially may encounter unique or rare illnesses/diseases or treatment and therapy. To achieve the rotation objectives, the student is expected to apply the concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, be familiar with human subjects protection and its implication on collection of patient information, write the paper following a target journal's submission guidelines, and submit the manuscript for publication as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of scholarly work and to practice problem-solving skills. The student should enroll for the research rotation only after they have found an acceptable case to report; the rotation should not be used to locate a case to report upon. | | | | | | | | |

Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. Student research can consist of any of the following types of studies: a retrospective study, a prospective study, a survey study or a meta-analysis. To accomplish this, the rotation provides a broad overview of research via hands-on experience. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, statistics and hypothesis testing, human subject protection, protocol development, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of research and to practice problem-solving skills. | | | | | | | | |

| | | | | GEC5: CR, PR, F REQUISITE: This capstone course provides the opportunity for Heritage College Dual Degree Program (DDP) students to demonstrate their ability to effectively integrate and successfully apply the knowledge and skills acquired during their DDP, in real-life situations. Students are asked to propose a culminating educational project on a defined scholarly question, or a problem of particular professional and/or personal interest, whose solution requires a multidisciplinary approach. The completion of this educational project takes into consideration each student's distinct academic background and educational experience, and is performed under the guidance of a faculty mentor/advisor. | Year 4 Osteopathic Medical Student | | | | | | | |

| | | COURSE DESC: | | Leader's Training Course (LTC) is four weeks of intense classroom and field training held in the summer at Fort Knox, Kentucky. By transforming yourself through this rigorous training, you will qualify for enrollment in the Army ROTC Advanced Course. At LTC you experience the Army firsthand by developing your potential in the most important of ways-mentally, physically and emotionally. You will be grouped into squads where you will gain experience in all leadership roles-culminating in verbal and written feedback on your improvement. You will also receive a stipend, transportation to and from Fort Knox, housing and meals. The first phase begins with Physical Training (PT) and Drill and Ceremony (D&C) which instill self-discipline and prepare you for the rigors and challenges of the upcoming weeks. The second phase builds on the basics Cadets have learned by extending into adventure training in the field. Combat Water Survival Training, rappelling, land navigation and marksmanship training provide physical challenges that test Cadets individually while developing teamwork skills. In the third phase, Cadets learn squad-level operations by taking part in demanding field exercises. | | | | | | | | |

| | | COURSE DESC: | | CR The mission of the Leader Development and Assessment Course (LDAC) is to train U.S. Army ROTC Cadets to Army standards and to develop leadership and evaluate officer potential. This is accomplished through a tiered training structure using light infantry tactics as the instructional medium over a 28 day period. The Warrior Forge training program is sequential and progressive. It starts with individual training and leads to collective training, building from simple to complex tasks. This building-block approach permits integration of previously-learned skills into follow-on training. This logical, common-sense training sequence is maintained for each training cycle. Every day at LDAC is a day of training. Some of the major training events include the Army Physical Fitness Test, land navigation, weapons training, confidence building, and small unit leadership evaluations. | | | | | | | | |

The students will develop and execute training from beginning to completion to include reviewing for future improvement. Students will work on problem solving, career management, leadership development, ethics through scenarios, and the military decision making process. Communication will be a major focus in the areas of counseling, instructing, briefing, writing and evaluations. Students will learn about the military justice systems and administrative tools that can be used for discipline. Outside the classroom all of the areas will be developed through assigned duties in the Cadet chain of command as well as planning and leading the activities of the Corps of Cadets to include physical training, military science lab, and special events. A leadership lab, MSC 4010L, plus participation in three one-hour sessions for personal and organizational physical fitness are required. | | | | | | | | |
