FAR	ART	AH	3530	Early Modern Architecture: 15th - 18th Centuries GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: This course examines global building practices in Europe, the Americas, and Asia between the 15th and 18th centuries. Our selected themes include: nation building and globalization, landscape architecture and garden design, new technologies, the social history of public and private spaces, and the persistence of classicism as an architectural style and theory. FAR	ART	AH	3540	Modern Architecture and Design GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: This course offers a global perspective of buildings, cities, and landscapes from the nineteenth-century to the present. We approach architecture as an interdisciplinary object of study bridging spatial, material, and technological cultures. Our goal is to identify design theories and methods that exemplify modernity.	SEM	SE	3	0		N	U30		0
FAR	ART	AH	3600	Modernist Theory and Criticism GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: An overview of the major theoretical and critical positions on the visual arts in modernism, especially from the late 19th- century to the later 1970s. Topics include formalism, expressionism, and the relationship of art to nature and society.	LEC	LE	3	0		N	U30		0
FAR	ART	AH	3610	History of Photography GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: Approaches photography as a set of problems and concepts rather than as a unified medium with a linear history. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interest is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn.	LEC	LE	3	0		N	U30		0

FAR	ART	AH	4161	Arts of Medieval China (400-1300) GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: The subject is the arts of the medieval period in China, from the 5th- to the 14th- century. The objects studied include ceramic and bronze vessels, stone and terracotta sculptures, Buddhist cave art, calligraphy and ink painting, and printed books. The concept "appropriation" will be engaged for the interpretative understanding of especially Buddhist art and of the practices of calligraphy and ink painting.	LEC	LE	3	0		N	U30		0
FAR	ART	AH	4171	Arts of Early Modern China (1500-1700) GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: The subject is the arts of the early modern period in China, from the 16th- to the 18th- century. The objects studied include calligraphy and ink paintings, lacquer and porcelain, illustrated books, and landscapes architecture. Will introduce two sets of linked concepts, agency and artistic imagination, economic globalization and cultural hybridity, concepts that will frame interpretive understanding of the objects. FAR	ART	AH	4190	Visual Culture of China GEC1: A-F REQUISITE: Jr or Sr COURSE DESC: Studies painting and prints, commercial advertising and fashion, photographs, and films in China, 1840 to 1940. The visual forms are located in a matrix of changing political and social conditions made more complex by the presence of non-Chinese subjects and cultures. Also introduces the methodological concept, visual culture.	LEC	LE	3	0		N	U30		0

FAR	ART	AH	4616	Art Spaces ELIGIBLE GRADES: GEC1: A-F COURSE DESC: This course explores the relationship between visual art and spatial modes of display, installation, collection, and exhibition. Using historical case studies, we question the white-wall gallery as the primary home of fine art, finding instead a rich history of alternative spaces and presentation techniques. Selected case studies include: cabinets of curiosities, salons, modern galleries, museums (art, science, natural history), department stores, archives, cities, gardens, fairs, and various mediated spaces (pictorial, electronic, virtual). This class considers how spatial conditions factor into the production and reception of art, visual culture, and media.	SEM	SE	3	0		N	U30		0
FAR	ART	AH	4621	Art and Theory Since 1945 ELIGIBLE GRADES: GEC1: A-F COURSE DESC: Looks at the three decades of artistic production in America and Europe after World War II and the Holocaust. It focuses Develop language to discuss, describe, and generate formal analyses of art works.on four main questions: first, how did artists attempt to come to terms with the violent rupture in European civilization caused by the dehumanizing forces of war and genocide? Second, how did artistic production assist in the reconstruction of culture and community? How did they forge a connection to the prewar avant-garde? Third, how did artists attempt to engage the increasing presence of media and advertisement production, what Theodore Adorno referred to as "The Culture Industry," and George Bataille has discussed under the rubric of "The Marshall Plan," roughly understood as the "Americanization" of Europe. Last, how does our focused examination of postwar European Art in relationship to post-war American art de-center the art historical narrative that focuses primarily on American art centering on New York? How might our queries suggest a different narrative? Presents a historical approach to the development of art in America, Italy, France, Germany and the Netherlands from the first attempts to represent the atrocities of war to the critique of institutions of power in the '60s through to the return of painting as a form of historical reflection in the late '70s and early '80s. Does not claim to provide an exhaustive catalogue of every important artistic activity after the war. Rather, specific figures will be examined as case studies of the interrelationship between aesthetic, historical and ideological issues from 1945 on. Finally, introduces the history of contemporary artistic practices from the 1960s to the present, and the major critical and historical accounts of modernism and postmodernism in the arts. Focusing on the interrelationships between modernist culture and the emerging concepts of postmodernism and contemporary art, addresses a wide range of historical and methodological questions. These include the evolving idea of artistic autonomy, the changing role of cultural institutions, the shifting relationship of high art and mass culture, the impact of new technologies on cultural production, and the emergence of new audiences for art. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interest is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	ART 1200 and 1210 and 1220 and 1230 and 1240							
		COURSE DESC:		An introduction to hand building techniques in clay. Includes diverse surface techniques, slips, glazes, and kiln firing. The semester builds to address more advanced techniques such as basic mold making, conceptual problem solving through material and contemporary and non-traditional approaches to ceramics.									
FAR	ART	ART	2220	Ceramics Wheel Throwing	LEC	LE	4	0		N	U30		0
		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	ART 1200 and 1210 and 1220 and 1230 and 1240							
		COURSE DESC:		Explores the creative possibilities of the potter's wheel. Emphasis will initially be placed on functional objects, building a variety of skills that can lead to individual interpretations, both functional and sculptural. Students will become familiar with clay and glaze materials, surface application with slips and glazes, kiln design, and firing processes.

		COURSE DESC:		REQUISITE:									
				As a result of globalization, studying cross-cultural design provides a framework of visual culture that emphasizes the role of design in diverse communication exchanges and public discourse. Particularly important is that a history of design transcends mere exposure to various traditions of design. Instead, a critical discussion of design in various contexts is encouraged as a way to understand our own cultural patterns of design among a broader history. An inclusive classification of design will be used to track significant developments in design across technological, physical and social contexts.

				GEC1: A-F REQUISITE: (Soph or Jr or Sr) and Interior Architecture Major An introduction to design process and programming as related to the development of interior design and application within the planning and shaping of interior architecture. Students begin with a design problem, and see it through the various phases of research, programming, ideation, implementation and final analysis in design process thinking. For Interior Architecture programming addresses more specifically space planning and analysis of space to meet client needs. Concept statements, project statements, adjacency studies and diagrams are used as tools to help students analyze and develop a program in response to a given problem. Human dimensions, physiological and psychological aspects of the environment are studied as well as issues related to sustainable design, code issues, and ergonomic concerns are addressed.

				A multi- and interdisciplinary studio workshop for the development of individual fine arts practices. Students will pursue individual projects of study, research, and studio production exploring how means, methods, forms, and strategies for exhibition or dissemination are appropriate to project goals and work content. Students will further develop studio work and interests initiated in their concentrated area of study and experience and create new work for a culminating thesis project. Ongoing critique experiences with other advanced students from all areas of fine arts will guide project progress. Discussion and readings will aid students' understanding of how their individual practice and goals reside in discourse with larger movements, positions, and activities of the field of contemporary art. Practice with the presentation of ideas and concepts inherent in the work verbally and in written statements will supplement studio production.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		This summer intensive course is a college-level introduction to the study of dance. Through experiential learning in dance technique, composition, improvisation, and somatic practices, students develop their skills and knowledge in movement, the creative process, and performance. Students also gain an understanding of community engagement and current professional practices in dance.									
FAR	DFT	DANC	5150	Laban Movement Analysis	LEC	LE	3	0		N	G40		0
		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Introduces Laban Movement Analysis (LMA), a research methodology used to identify, describe, and notate movement, based on work of movement theorist Rudolph Laban (1879-1958). Course materials provide a framework for observation and description of movement through identifying its spatial, dynamic and qualitative features. Application of course materials includes use of LMA as a tool in performance coaching, teaching, choreography and as an instrument for recording movement through notation. Includes an introduction to Bartenieff Fundamentals, a movement training approach based on the principles of LMA.

		COURSE DESC:		This studio-based course provides opportunities for graduate students to synthesize and apply community dance theory and practice with undergraduates and community members. Graduate students in this course are both participants and facilitators as they identify potential community partners, and lead dance sessions with people of varying ages and abilities. Students discuss concerns and challenges with implementation of dance experiences and identify resources that support stewardship of community dance. Students have the opportunity for independent investigation of a question, challenge, or project related to their interests and investigations of how theory is connecting to the studio-based experience. A substantial portion of the final grade comes from this independent investigation and final presentation of the work.

FAR	IART	IART	5401	World Aesthetic Ideas	SEM	SE	4	0		N	G50		0
		ELIGIBLE GRADES:		GEC1: A-F REQUISITE:									
		COURSE DESC:		The seminar explores the musical-aesthetic thought outside the Western world, from ancient sources to contemporary debates. The readings include mythological, religious, literary, and philosophical texts, both traditional and modern. The areas of musical creativity that will be discussed comprise classical traditions and popular genres, including the uses of music in mass entertainment, ideological propaganda, and devotional practices. Literary, visual, and video materials will help illustrate the attitudes towards music in these cultures. In addition, the seminar will pursue a methodological theme of considerable urgency: Do the existing historical and contemporary approaches do justice to the uniqueness and complexity of music-philosophical theorizing in the cultures of, for example, India, China, or Bali? What kind of an approach would allow us to avoid the pitfalls of comparativism, Orientalism, and distorting biases in general? What kind of a philosophical perspective can assure at once a meaningful multilateral dialogue among world musical cultures, and their resistance to the levelling effects of globalization? A variety of texts, both by authors from a relevant cultural tradition and by Euro-American commentators, will serve as a platform for addressing these questions.

				GEC1: A-F REQUISITE: ANTH 1010 and Sr This course is intended to give students an overview of the two contributing cultures and their musics found in this country, from the songs of rural Appalachia and New England to the African music brought by the slaves; to the musics that grew out of those traditions, from the popular musics of the cities to the songs of Latin Americans and European minorities. We will trace the way these musics live in the modern city, in the academic world and in contemporary music society. (Nettl, 1976) The student will be introduced to the study of music as a manifestation of human need and a representation of culture. The course uses music as an index to understand American culture while it introduces the student to various concepts in the field of ethnomusicology. (Nettl, 1976)

		COURSE DESC:		This is an experiential-participatory class that includes a pedagogical and service-learning component. Students will learn fundamental acting techniques, improvisations and theater games appropriate for the elementary school population. We explore methods that cultivate the imagination, creative collaboration, and the expressive use of body and voice toward developing story and character. We align each exercise with specific learning outcomes, and have the opportunity to apply those learned teaching skills in educational and outreach settings. Elements of production are introduced (material, venue, design, fundraising and marketing), and applied to organizing an informal public performance. The class revolves around the transformative power of theater, and how it can enrich lives and support curriculum.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F									
		COURSE DESC:		Professional Seminar 1 is a forum for students studying in the PhD IIP program. The seminar will facilitate conversations on scholarship and what it means to take on the challenge of bringing an interdisciplinary perspective to projects/assignments. The focus for this Professional Seminary is, first, on orienting students to the IIP requirements and the challenges involved in crafting a graduate degree program. Second, we examine a variety of issues related to scholarship, including: (1) finding your voice as a scholar, (2) conference participation, (3) the process of scholarly publication, (4) grant writing, and (5) writing a research paper/dissertation.

		ELIGIBLE GRADES:		GEC1: A-F		REQUISITE:							
		COURSE DESC:		Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land managements, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems.

		ELIGIBLE GRADES:		GEC4: A-F, REQUISITE: CR, PR									
		COURSE DESC:		Entrepreneurship education, in the sense of focusing on the creation of new economic entities centered on a novel product/service, has been, until recently, relatively rare. At Ohio University, a pedagogy has been developed focused on inter-disciplinary team-based projects that result in new venture formation and long-term success for the newly-founded companies and the University that developed the research and technologies which are the basis for many of the companies. The curriculum is structured such that students from the disciplines of science, medicine, engineering, communication, and business can be engaged and participate.

		COURSE DESC:		This course presents fundamentals of the physical therapy patient care management process, clinical decision making model, and tests and measures across the disablement model. Normal/pathological gait and posture biomechanics will be discussed.									
HSP	RCS	PT	7042	Clinical Skills and Examination II: Applications	LEC	LE	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7031 and PT 7032									
		COURSE DESC:		This course will focus on the development of the fundamental skills involved with physical therapy patient care management. Emphasis will be placed on patient examination and treatment techniques related to patient mobility, transfers, posture, gait training, and activities of daily living. Kinematic and kinetic motion analysis will be integrated into the evaluation process.									
HSP	RCS	PT	7110	Clinical Science: Pathophysiology	LEC	EL	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011									
		COURSE DESC:		Deals with application of physiological principles to the study of disease and injury, with particular attention to cellular injury, inflammation and repair, and immunity. Emphasis on implications of pathophysiology for physical therapy evaluation and treatment. General principles of pathophysiology will be applied to specific examples in class. Subsequent courses in this curriculum will assume a working understanding of the concepts presented in this class. Will also prepare the student to treat patients with select systemic conditions, whether or not those conditions are the primary reason for physical therapy referral. Emphasis will be placed on identification of the patient with systemic pathologies requiring further consultation or referral to other healthcare providers.

		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7011 and PT 7012									
		COURSE DESC:		This survey course of medical physiology provides students with an overview of basic cellular processes and their impact in disease models in several key organ systems: integumentary, renal, genitourinary (GU), hepato-biliary, and gastro-intestinal (GI). In-depth examination of the physiology of diabetes is included as an example of a multi-system disorder. Emphasis is placed on the role of the physical therapist in applying signs and symptoms in the differential diagnosis of musculoskeletal conditions within the scope of PT practice from those arising from impairments of other systems.									
HSP	RCS	PT	7120	Cardiopulmonary Conditions in Physical Therapy	LEC	LE	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7111									
		COURSE DESC:		This course provides the theoretical foundation for physical therapy evaluation and treatment of patients with cardiopulmonary conditions. Course content includes examination, evaluation of systems and clinical laboratory values, assessment and physiologic monitoring, discharge planning, determining patient equipment, and combating the effects of bed rest and deconditioning. Specific emphasis will be placed on evaluation, treatment, and management of the cardiovascular and pulmonary patient across all spectrums of care.									
HSP	RCS	PT	7130	Differential Diagnosis and Acute Care in Physical Therapy	LEC	LE	3	0		N	G50		0
		ELIGIBLE GRADES:		GEC2: A-F, REQUISITE: PT 7111									
		COURSE DESC:		Provides students with an overview of topics from a cellular to a systems level. Gastrointestinal, genitourinary, hepatobiliary, renal, endocrine, and metabolic systems will be covered. Additionally, the role of physical therapy in acute care and the Intensive Care Unit (ICU) will be covered. For each topic area or system, the student will be presented with the pathophysiology focused at the cellular and tissue level. The role of physical therapists in differential diagnosis, by recognizing the signs and symptoms associated with impairments of the systems, will be presented. Prepares the student to identify the patient with systemic pathologies requiring further consultation or referral to other health care providers.

		COURSE DESC:		This course uses interdisciplinary, team-based problem solving to introduce OHIO Honors students to the foundations of the three honors engagement pathways: leadership, community engagement, and research and creative activity. The activities and product align with a relevant university-related health and wellness initiative, as will be defined. Students work in an interdisciplinary team to research the campus context and needs related to the initiative topic, propose a relevant project, test and refine the proposal, and execute it. Lectures provide academic background on the topic and introduce students to a variety of problem-solving methods, such as evidence-based practice, systems thinking and design thinking, a creative, empathy-driven process for developing user-friendly solutions to everyday challenges people encounter. The lab sections guide students through the practical application of these problem-solving tools, help to explore ideas from lecture, and provide time and space for the team to work on the project.

		ELIGIBLE GRADES:		GEC6: CR, PR, F	REQUISITE:		OHIO Honors Program						
		COURSE DESC:		This course introduces students to fundamental principles of ethical community engagement that begin with an understanding of how first to engage with a community through the identification and elevation of its assets. Students are asked to reflect on their perceptions of communities with which they have no previous relationships, encouraged to interrogate the factors that have influenced those perceptions, and challenged to expand their understanding of those communities through research and engagement with community members. Through that process of self-reflection, students also are challenged to consider ways of engagement that are mutually beneficial to themselves and their community partners. In addition, this class explores the tension associated with navigating structural and cultural differences to find common goals and create partnerships that facilitate the achievement of community partners' missions as well as academic expectations for the students.

		COURSE DESC:		This course introduces students to fundamental principles of ethical research and creative activity. Students are asked to reflect on their perceptions of how research and creative activity contribute to new knowledge and insights, encouraged to interrogate the factors that influence those perceptions, and challenged to expand their understanding of how individuals can ethically contribute to these endeavors through a multidisciplinary perspective. Through this process of self-reflection and peer discussions, students also are challenged to consider ways that their engagement in research/creative activity can be mutually beneficial to themselves, their field, and the greater public. In addition, this class explores the tensions associated with navigating the research/creative process, including interrogating personal, social, and cultural values, applying rigorous, systematic processes, and properly citing/acknowledging others' works to ensure that the knowledge and insights gained are rigorous, ethical, and contribute to the existing body of knowledge.

Students learn about different models and philosophies of service-learning and work collaboratively on a community-identified service project in an under-resourced community in Ecuador. Students explore what it means to be a global citizen and gain an understanding of service-learning in local and international contexts. Students engage in critical thinking about community development, civic engagement, power, privilege, and poverty and how these themes relate to global service-learning.

		COURSE DESC:		The Clinical Anatomy Immersion allows all entering Heritage College students, regardless of their curricular track, to begin their training together, immersed for roughly 5 weeks in clinically-oriented study of human gross anatomy. At the core of the course are the laboratory activities. Students will participate in 4, 3-hour gross anatomy labs each week. These activities involve dissection of human cadavers, imaging studies, and discussion of clinical anatomy in an interactive laboratory setting. The structure of the human body is presented in a clinically relevant manner, providing correlations of normal anatomy to common disease states. The ultimate goal is to enhance clinical reasoning in the context of human gross anatomy. A few key lectures will provide background for the lab studies

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: First year Heritage College Medical Students PR, F									
		COURSE DESC:		This one-week course will introduce students to Patient Centered Primary Care medical practice, and will incorporate active learning principles. On the first day of the block, students will be introduced the "5 Cs of patient-centered primary care". These concepts will be emphasized over the next 5 days and be the basis for all of the learning activities. Additionally, there will be a doctor-patient communication thread of activities that build students' skills throughout the week, culminating in a patient interview, and a reflective paper on that experience. This course provides protected time outside of class for students to learn and prepare for in-class hands-on activities that incorporate that knowledge into tangible skills.

		COURSE DESC:		Fundamentals in Clinical Osteopathic Medicine 1 and 2 are a series of courses devoted to assisting students in developing clinical skills necessary to work towards mastery of the AOA Core competencies. Fundamentals in Clinical Osteopathic Medicine 1 is a sixteen week course. The focus is on History and Physical (H&P), Osteopathic Manipulative Medicine (OMM) skills and Clinical and Community Experiences (CCE). Integral to all of these areas are psychosocial skills. Other components will guide the student in learning specific psychosocial and psychomotor skills, as well as reinforce the importance of an evidence-based approach to the clinical application in the practice of medicine. The format of the course incorporates clinical lab sessions, utilizing peers or simulated patients for practice in obtaining history and performing physical examinations. On occasion, learning activities will utilize real patients. Clinical cases in the concurrent Biomedical Sciences course are structured to foster learning objectives that enhance History and Physical exam skills. An ongoing thread in this course is the Problem Oriented Medical Record (POMR) and medical progress notes (SOAP notes) tools students need to develop and maintain excellent documentation of clinical encounters. The OMM lab component for this course is taught to PCC students in conjunction with the students in the CPC curriculum. Students will be assigned to one or more clinical faculty for 8 four-hour experiences per quarter to be given an opportunity to practice their developing clinical skills. They will also be assigned to community agency preceptors for 2 four-hour experiences per quarter in order to develop an understanding of the roles of non-physician personnel and health care services provided outside the hospital/physician's office. Objectives and activities for each community agency experience are available on the CCE website.

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: Offered only to OUCOM 2nd Year students									
		COURSE DESC:		This three-week Geriatrics course introduces Clinical Presentation Curriculum (CPC) students to key concepts essential to caring for older adults. The Block begins by presenting the aging demographic imperative. There are not enough geriatricians to care for this growing segment of the population. Therefore, it is critical that all medical students are trained to meet the needs of older citizens with complicated, overlapping, factors associated with chronic medical conditions. Older adults often have three or more chronic medical conditions, take multiple medications and respond to treatments and medications differently than do younger patients. This block targets these often complicated overlapping factors. An emphasis is placed on understanding the following: aging versus disease; geriatric syndromes and atypical presentation of disease; providing care across the continuum of locations: ambulatory, hospital, assisted living, nursing home, and home; comprehensive geriatric assessment; psychosocial and environmental considerations; pharmacology/prescribing practices; and advance directives.

				COURSE DESC:	This sixteen-week course will provide second year Osteopathic medical students with an opportunity to advance their skills in, understanding of and capacity to teach Osteopathic manipulative medicine (OMM) beyond the level possible through the standard year 1 & 2 curricula. The topics presented by our OUCOM director of faculty development will be: "giving constructive feedback". A weekly instructional hour designed to prepare these students to teach year 1 students as table trainers in the Osteopathic manipulative medicine lab will constitute the lecture portion of the course. One faculty development session will be provided fall quarter to focus honors students teaching skills. Each weekly lab period is 2 hours in length. During that lab each second year honors student will be supervising the progress and facilitating the understanding of six to eight year 1 students in a setting where faculty lead the lab and provide the resources to answer questions that the honors students have and/or questions year 1 students have with which the honors students need help. This allows the honors students to deepen their understanding and refine their palpatory skills following the adage, "see one, do one, teach one." A journal club will be scheduled once each quarter with review of articles relevant to Osteopathic philosophy, principles and practice. The honors students will have the opportunity to evaluate articles and exchange ideas with OMM faculty and post-graduate residents. There will also be one 2 hour lab session per quarter that will bring new diagnostic and therapeutic skills into focus (beyond those taught in the courses in the first two years).

		ELIGIBLE GRADES:		GEC5: CR, REQUISITE: PR, F									
		COURSE DESC:		This course is a one-year rotation, during the third year of medical school, situated within a rural or urban underserved family medicine practice and providing exposure to the continuity of primary care across the continuum of the inpatient and outpatient settings. It exposes the student to the breadth of family practice including medical care of all ages, as well as enhances the student's ability to provide continuity in care. This rotation also exposes the student to the collaboration of health care entities in the community, practice, management, practice quality improvement, and possibly research. It also provides exposure to the direct supervisory role of the physician CNP/PA/MA relationships. Overall, the goal of this rotation is to allow the student to develop rural/urban primary health care training by developing a continuity practice of their own under the direction of their supervisory site director. With this knowledge and experience, a better understanding of the scope of rural/urban underserved primary health care is achieved.

State policymaking - the powers which reside in the state and processes used to set health policy. Material is presented by faculty, officials, and elected representatives from the state in which the meeting is held. Comparison and contrast to other states is included. 2. Executive branch government policymaking - the agencies, regulatory and research evaluation processes by which policy is generated and implemented for the administration defining their missions and illustrating their ability to impact policy. The sessions are organized by the American Association of Colleges of Osteopathic Medicine (AACOM) at its Chevy Chase, Maryland offices. 3. Federal legislative policymaking - the process and the players. A full-day workshop on the legislative process in Congress is offered by personnel from the training program for freshman legislators. University faculty present sessions on the history of health policy in government. The role of special interest organizations and methods for presenting policy solutions to policymakers are covered by national experts. <p>Other material is included throughout the year on topics such as the role of values in health policy decisions, budgets as policymaking tools, how to influence your legislator, the growing presence of D.O.s in health policy, and the policymaking processes of the American Osteopathic Association.</p> <p>Evaluation: Participants build a policy agenda with government relations staff of the AOA and carry it to federal legislators and staff from their own state - then evaluate the sessions with the accompanying staffers.</p>

A workshop in the orientation week sets the definitions to be used and introduces the materials in the texts. The sessions are organized around: <ul style="list-style-type: none"> 1. State policymaking - the powers which reside in the state and processes used to set health policy. Material is presented by faculty, officials, and elected representatives from the state in which the meeting is held. Comparison and contrast to other states is included. 2. Executive branch government policymaking - the agencies, regulatory and research evaluation processes by which policy is generated and implemented for the administration defining their missions and illustrating their ability to impact policy. The sessions are organized by the American Association of Colleges of Osteopathic Medicine (AACOM) at its Chevy Chase, Maryland offices. 3. Federal legislative policymaking - the process and the players. A full-day workshop on the legislative process in Congress is offered by personnel from the training program for freshman legislators. University faculty present sessions on the history of health policy in government. The role of special interest organizations and methods for presenting policy solutions to policymakers are covered by national experts. <p>Other material is included throughout the year on topics such as the role of values in health policy decisions, budgets as policymaking tools, how to influence your legislator, the growing presence of D.O.s in health policy, and the policymaking processes of the American Osteopathic Association.</p> <p>Evaluation: Participants build a policy agenda with government relations staff of the AOA and carry it to federal legislators and staff from their own state - then evaluate the sessions with the accompanying staffers.</p>

		COURSE DESC:		The purpose of this rotation is to provide an opportunity for the student to explore issues in the delivery of health services in other countries. This rotation is not intended to transform the student into a specialist, but rather it is to provide a survey of the specialty. Students will need to use a logical and appropriate clinical approach to the care of patients in a developing country setting, utilizing locally available resources, and applying principles of evidence-based decision-making and problem-solving. These experiences are designed not only for students considering careers in international health, but for increasing the understanding of any future physician practicing in the United States who may care for patients from other countries. The experience is also designed to deepen the awareness of all participants regarding the determinants of health and illness and diverse methods of approaching health problems in settings with varied cultural, socio-economic and political characteristics. These experiences help students develop sensitivity to health disparities and their causes, including health, social, economic and environmental factors.

		COURSE DESC:		Students are required to work with the primary preceptor on an assigned service between December of year 3 and December of year 4 to select and approve an appropriate patient actually seen while on rotation as the basis for this paper. The selected patient case must lend itself to producing a paper that includes the usual components of a case report; the case must have some noteworthy appeal that would be valuable to a particular audience. Once the audience has been identified, the student must select a target journal as a potential venue for publication of the case report; it may be helpful to identify a few target publications and discuss these with the preceptor. The case report must then be written to conform to the submission guidelines and specifications of the specified target journal. An osteopathic component must be included in the manuscript submitted for grading.

Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. This rotation provides a broad overview of critical review of literature via hands-on experience. In hospital and ambulatory settings (as appropriate), the student is expected to encounter a variety of experiences that may lead to a clinical question answerable through the conduct of an extensive and critical review of the literature. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, understanding basic statistical results and interpretation, human subject protection, manuscript writing, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of a critical literature review and to practice problem-solving skills.

		COURSE DESC:		The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. To accomplish this, the rotation provides an opportunity to write a case report and submit it for publication. A case report is defined as an account of the signs, symptoms, diagnosis, treatment and follow-up of a patient that follows an unusual or noteworthy case presentation. A case report can consist of a single-case study or a multiple-case study (N<11). In hospital and ambulatory settings (as appropriate), the student potentially may encounter unique or rare illnesses/diseases or treatment and therapy. To achieve the rotation objectives, the student is expected to apply the concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, be familiar with human subjects protection and its implication on collection of patient information, write the paper following a target journal's submission guidelines, and submit the manuscript for publication as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of scholarly work and to practice problem-solving skills. The student should enroll for the research rotation only after they have found an acceptable case to report; the rotation should not be used to locate a case to report upon.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:	SAM 3010 and 3100 and Sr							
		COURSE DESC:		The course is intended to be a capstone course. The course centers around the theme that a company achieves sustained success if its managers (1) formulate an astute game plan (2) implement and execute the game plan with proficiency. The course will prove how and why doing an effective job of strategy formulation and strategy implementation produces good business performance. In studying the tasks of strategic management, the course will integrate the knowledge students have gained from previous courses. Strategic management requires dealing with many variables and situational factors at one time. The students will be able to weigh the pros and cons of what strategy entails: a total enterprise perspective and a talent of judging how all of the relevant factors add up to shape the actions needed to take place in a business.

		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: Permission required and Soph only									
		COURSE DESC:		Leader's Training Course (LTC) is four weeks of intense classroom and field training held in the summer at Fort Knox, Kentucky. By transforming yourself through this rigorous training, you will qualify for enrollment in the Army ROTC Advanced Course. At LTC you experience the Army firsthand by developing your potential in the most important of ways-mentally, physically and emotionally. You will be grouped into squads where you will gain experience in all leadership roles-culminating in verbal and written feedback on your improvement. You will also receive a stipend, transportation to and from Fort Knox, housing and meals. The first phase begins with Physical Training (PT) and Drill and Ceremony (D&C) which instill self-discipline and prepare you for the rigors and challenges of the upcoming weeks. The second phase builds on the basics Cadets have learned by extending into adventure training in the field. Combat Water Survival Training, rappelling, land navigation and marksmanship training provide physical challenges that test Cadets individually while developing teamwork skills. In the third phase, Cadets learn squad-level operations by taking part in demanding field exercises.

		ELIGIBLE GRADES:		GEC3: A-F, REQUISITE: MSC 3020									
		COURSE DESC:		CR The mission of the Leader Development and Assessment Course (LDAC) is to train U.S. Army ROTC Cadets to Army standards and to develop leadership and evaluate officer potential. This is accomplished through a tiered training structure using light infantry tactics as the instructional medium over a 28 day period. The Warrior Forge training program is sequential and progressive. It starts with individual training and leads to collective training, building from simple to complex tasks. This building-block approach permits integration of previously-learned skills into follow-on training. This logical, common-sense training sequence is maintained for each training cycle. Every day at LDAC is a day of training. Some of the major training events include the Army Physical Fitness Test, land navigation, weapons training, confidence building, and small unit leadership evaluations.

		ELIGIBLE GRADES:		GEC1: A-F	REQUISITE:								
		COURSE DESC:		This course examines the relationship between drug use and crime in American society. It serves as a synthesis of the abuse of drugs and the societal consequences in relation to crime and the criminal justice system. In this course students examine the attributes of the people who use drugs, the social dynamics that influence legality, and the norms and characteristics of the society in which the substance use occurs. We conduct an examination of drug use and crime at the micro, meso, and macro levels of analysis. In particular, students gain an understanding of the nexus between individual use, crime, and systematic violence tied to criminal organizations that sell and traffic drugs. Students move beyond U.S. borders and explore drug trafficking and global politics. Prevention, intervention, and treatment tactics used in the U.S. criminal justice system are explored and critiqued. Finally, public policy concerning drug related issues are examined.
