

Bachelor of Technical and Applied Studies

Upon completion of the technical and applied studies degree, students will:

- Demonstrate understanding of how to conduct a research project through the development of a research proposal that begins in TAS 3010, continues in TAS 3210, and is finalized and presented in TAS 4510.
- Integrate critical skills necessary for the interpretation of research results
- Analyze leadership and workplace effectiveness theories for real world implications
- Identify sources of information available in finding a professional career
- Interact with others regarding professional attitudes and behaviors
- Value the opportunities a bachelor's degree provides
