

COOPERATIVE EDUCATION REPORT

Each year, Russ College students participate in co-ops—salaried positions at various companies where they gain real-world experience and perspectives on career paths. For the 2004-2005 academic year, more than 100 students worked more than 150 different assignments. Mechanical engineering students once again led the pack, with more than 50 different assignments worked among them.

The Russ College thanks its co-op employers for their commitment to engineering and technology education. To get your company involved as an employer, contact the Russ College Cooperative Education Office at coop@ohio.edu, or call 740.593.1618.
