

Q2S Binder for Management Information Systems

General Info

Document Description: Q2S Binder for Management Information Systems

Document ID: 107939

Document Type: BINDER

Contact Name: Thom Luce

Designee Name: Ken Cutright

Creation Info: 03/17/2010 by Don Pendergast (pendergd)

Document Version: 1.0

Document Status: REVIEW - UCC

Contact Oak ID: luce

Designee Oak ID: cutright

Last Modification: 05/26/2010 by Ken Cutright (cutright)

Department/School Info

College: CBA(null)

Department: MIS(Management Information Systems)

Mission: The MIS department prepares students for exciting business careers by building relevant information systems analysis and design skills through courses that are both innovatively designed and delivered with high quality internship and job placement as our goal.

The management information systems (MIS) curriculum is designed to develop skills in the analysis, design and implementation of business information systems. Our program teaches students to look at businesses holistically as an integrated system of people, business processes and information technology. We move beyond "techie" skills such as programming to emphasize a functional understanding of technologies and how they can promote business strategies. In other words, improving business processes through the use of technology.

Because of the strategic importance of MIS to all business areas, it is the ideal double major with any of the other business disciplines. In partnership with companies that hire our students, we have built a consistent, highly integrated course sequence that develops skills our employers are seeking. Our innovative curriculum has been nationally recognized for its quality and relevance to the modern business world.

Our mission extends far beyond classroom learning to providing the highest level of service for our students and to creating quality internship and permanent placement opportunities. In a business environment where MIS professionals are in high demand across organizations, our program prepares students to effectively compete for positions in all areas of business. Our graduates have an array of job opportunities in all business disciplines and industries. Starting salaries are high relative to other College of Business majors. Specific areas where we have successfully placed graduates include business consulting, business analysis, web and systems design and project management.

Exceptions - Non Three Hour Lecture

The Ohio University Faculty Senate Resolution on the Number of Semester Hours per Course and Course Meeting Times for Quarters to Semesters (<http://www.ohio.edu/facultysenate/upload/CourseHourTimeResolutionfinal4-2009.doc>) resolved that, as a norm, undergraduate lecture courses on the Athens Campus shall be 3 semester hours and that exceptions to these norms will be allowed on the basis of pedagogical justification specific to a course or course sequence.

Three-hour courses are important for balancing student schedules, and three lecture hour per week blocks are important for classroom utilization. It is understood that there are special cases where the 3-lecture hour course norm does not apply, sometimes for categories of courses (recitals or band), sometimes for disciplinary standards, and sometimes for other reasons.

For the semester courses taught by your department that do not meet the 3 lecture hour norm, give a brief explanation of why the norm was not followed and/or what circumstances make these deviations from the norm not create a problem with classroom scheduling or student schedules. (Notes: Categories of courses can be addressed as a group rather than individually. If you are using a 'disciplinary standard' argument, please make comparisons to Ohio Schools on semesters or to Ohio University peer schools on semesters. If you are using a block scheduling approach, please list the courses that will be block scheduled and identify the semester(s) where the block scheduling applies.)

Reason: MIS3201 is a transition course designed to solve a temporary problem that will exist for students who enter the major under quarters and complete it under semesters. Under quarters we have two programming courses (MIS220 and MIS400) but our redesigned semester curriculum has only one (MIS3200). MIS3200 will cover the material currently taught in MIS220 and some of the topics currently taught in MIS400. Students who have completed MIS220 and MIS400 won't have to take MIS3200. Students who have MIS220 but not MIS400 will take the one hour MIS3201 to get the missing content. We expect that we will need to offer MIS3201 for, at most, two years.
