First M. Last

Dean, <type your college name>
A concise account of the thesis or dissertation should be written that states the problem, describes procedure/method used, and summarizes conclusions reached. An abstract is required for all electronic papers. The word abstract appears at the top of the page if needed for the automatic Table of Contents feature. A maximum of 350 words are recommended for dissertations and a maximum of 150 words for theses.

Your program name (not school or department name) should appear above following the month and year of graduation. Your title and name above should appear in uppercase letters.
To my husband, Steven Lange
ACKNOWLEDGMENTS

The acknowledgments page is optional. This page includes a brief, sincere, and professional acknowledgment of the assistance received from individuals and/or institutions. The word acknowledgment has two common spellings. You may spell it with an “e” or without an “e” after the letter “g” as Acknowledgement or Acknowledgment, but the spelling you select must match the spelling used in the Table of Contents.

The first item that shows up in your Table of Contents is the Abstract, followed by Acknowledgments and then typically the List of Tables, List of Figures, and then Chapter 1, etc.

</table>

- The Table of Contents should include chapter titles (at a minimum) and other major headings if needed. Multiple levels of sub-headings are not required in the Table of Contents, but consistency in the levels included in the Table of Contents is required. For example, if you include level three headings for Chapter 1, then all level three headings in the document need to be included for each chapter.
- Each chapter number, title, heading and page reference should correspond exactly with those in the text, including capitalization and punctuation. Capitalization and punctuation selected should be used consistently throughout the document.
The list of tables may be single spaced.

SAMPLE LIST OF TABLES

LIST OF TABLES

Table

1. Table Numbers and Titles must Correspond Closely with Text .................. 10
2. Page Numbers must Correspond Exactly to Text .................................... 13
3. Place Tables as Close as Possible to Relevant Text .................................. 51

Or

Table 1. Microsoft Word’s Built-in Automatic List of Tables Feature Formats Tables with the Word Table in Front of the Number ................................. 10
Table 2. The List of Tables may be Single Spaced for Long Lists .................... 13

• Include a separate page for the List of Tables and the List of Figures. Each table should have a number and title in the document and each should appear in the List of Tables. The titles should be worded similar to the captions in the document. (For long titles, the first sentence or a shorter title may be used).
• If a table resides on multiple pages, a reference to the table’s first page is given in the List of Tables.
• Use a consistent capitalization (case style) on all table titles in the document. Typically, table titles are above the tables and are in title case (or initial caps).
• Use a consistent capitalization (case style) on all figures in the document. Typically, the figure titles appear below the figures and are in sentence case with a period at the end.
Figures

1. The List of Figures page is formatted similar to the List of Tables page. 10

1. APA style suggests that figure captions be in sentence case with a period at the end of the caption in text. 13

All rules that apply to the List of Tables apply to the List of Figures.

Bibliography (References or Works Cited)
- Page numbers appear on these pages.
- Includes all references cited in the document.
- Use the style guide required by your discipline.
- References can be single spaced with double spacing between each reference. Follow your style guide or advise of your advisor.
- Footnotes/references have exact author’s name, title of book or article, and place and date of publication.

Appendices
- Includes materials that interrupt the flow of the body of the document.
- Appendix text may be in any format, spacing, font, and style. Margins and page numbers must remain the same as the rest of the document.
CHAPTER 1: INTRODUCTION

Each chapter should begin on a new page. The chapter number and title should be placed on the same line of text at the beginning of each chapter. For example:

“CHAPTER 1: INTRODUCTION” should be placed on the same line. A double space should be used after all heading levels (1, 2, 3…) in the document.

Timesaving Microsoft Word Tips for Basic Computer Users

1. Press the Tab key at the beginning of each paragraph to indent text one-half inch.

2. Turn double spacing mode on (In Word 2003: Format/Paragraph/Line Spacing: Double. In Word 2007: Home tab/Line Spacing icon above word “Paragraph”). You will need to turn this feature on and off as needed. If the line spacing appears to be greater than double spacing, remove Before:/After: line spacing (In Word 2003: Format/Paragraph/Set the Before: 0 and After: 0. In Word 2007: Home tab/Line Spacing icon above word “Paragraph”/select Line Spacing Options…/Set the Before: 0 and After: 0.)

3. Do not press the Enter/Return key at the end of each line. Press the Enter key once at the end of each paragraph.

4. Use CTRL-Enter to move to a new chapter. This retains the placement of your Chapter headings at the beginning of a new page and reduces code in the document.
