

**Connect to your future.**

**Ohio University**

**McClure School of Information  
and Telecommunication Systems**

**OHIO**  
UNIVERSITY

“Most of the jobs we have right now we didn’t even know about 20 years ago. So one of the major things you need as you go forward is the ability to learn and be versatile. And our curriculum expects that.”

—**Phyllis Bernt**, professor of information and telecommunication systems

Author of *Shaping American Telecommunications*

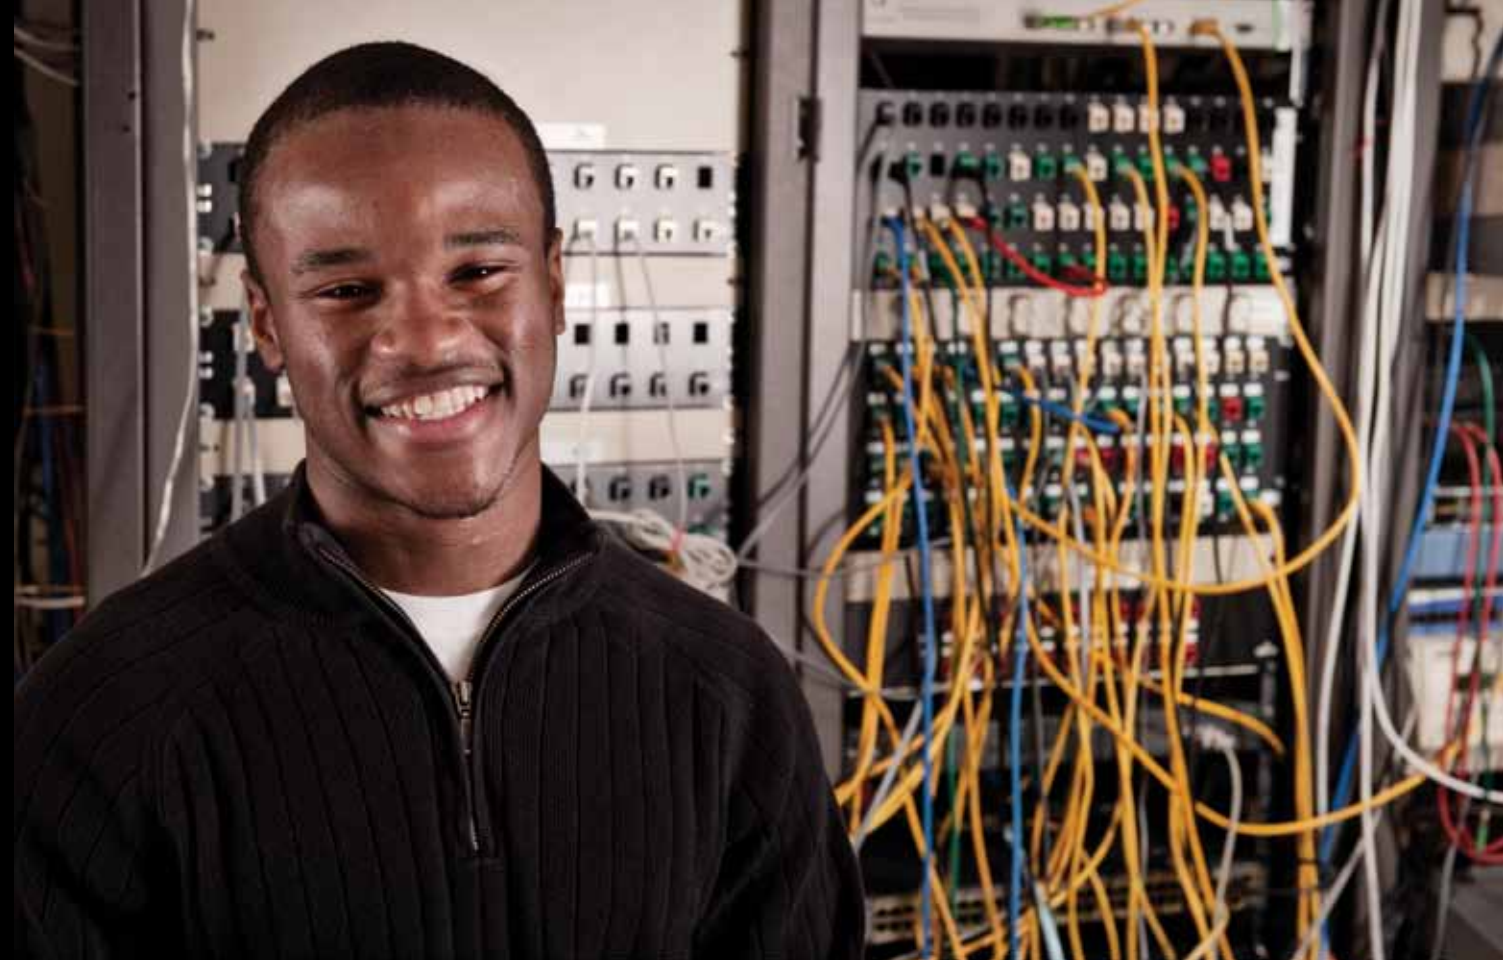

The J. Warren McClure School of Information and Telecommunication Systems prepares students for careers in the rapidly growing information network technology field. Extensive laboratory facilities, expert faculty members, core business courses, and relationships with industry professionals make it the only program of its kind in Ohio.

INFORMATION *and* TELECOMMUNICATION SYSTEMS

"It starts with networking technology,  
but the accurate image is people working  
in teams. Working in teams, we put our  
heads together to solve a problem.  
It's definitely encouraged."

—Trevor Tomlinson, ITS major,  
Cisco Academy graduate

Rockwell Automation intern,  
Scripps College of Communication  
learning community member

Students take core IT courses, business administration courses,  
and a personalized area of concentration. Small classes and  
personal attention from faculty are hallmarks of the program.

ACADEMIC  
PROGRAMS

"The ITS classes are the basis of my career,  
and the marketing classes teach me  
how to network, to be more professional."

—Lori Huber, ITS major

Inside sales director with OHIO's  
student-run Sales Centre, Paychex intern

#### CORE COURSES INCLUDE

- Understanding Internet Technology
- Data Networking
- Telecommunication Network Security
- International Communication Networks

#### BUSINESS COURSES INCLUDE

- Accounting
- Management
- Marketing Principles
- Business Law

#### AREAS OF CONCENTRATION INCLUDE

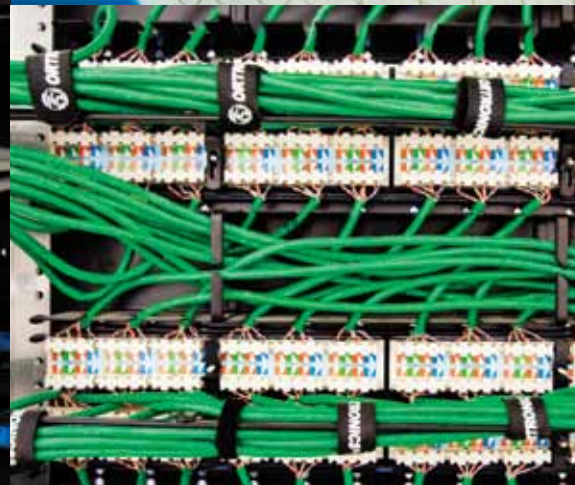

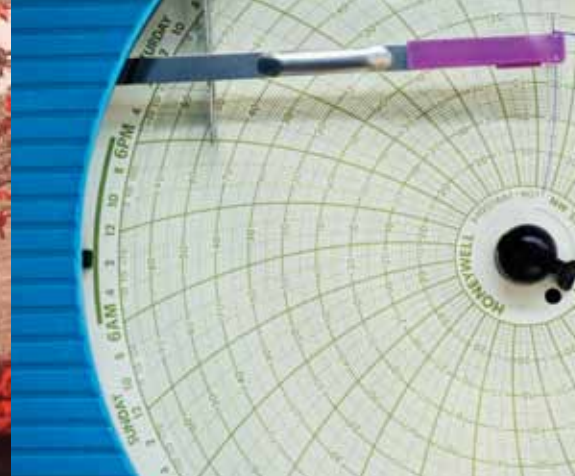

- Management Information Systems
- Marketing
- Sales Certificate
- Japanese

CORE  
COURSES

“The experience I had at OHIO between the ITS major and the Global Leadership Center was all I needed to get my first job. Now I run my own strategic technology consulting business and put that education to work on a daily basis.”

—Matt Raider, B.S.C. '03

President, The Raider Group, and member of the McClure Advisory Board

The **McClure Advisory Board** is made up of successful IT professionals from all corners of the field, and includes OHIO alumni. The advisory board offers professional guidance and sponsors an undergraduate scholarship.

The **Global Leadership Center** offers a two-year undergraduate certificate; OHIO students work with international students on projects for business, government, and education clients in the United States and abroad.

The student-run **Telecommunication Systems Management Association** sponsors résumé help, job placement assistance, field trips, guest speakers, and service projects.

The **Ralph and Lucy Schey Sales Centre**, in OHIO's nationally recognized College of Business, offers one of the few academic sales programs in the country and includes an undergraduate sales certificate.

EXPERIENCE  
the PROMISE

"Our current work is in deep space communications. We're looking at how to do Internet-style communications to the moon, to Mars, to deep space probes. We offer maintenance, development, and support. We're really in the middle of something very exciting."

—**Hans Kruse**, professor of information and telecommunication systems, former faculty fellow at NASA Glenn Research Center

Students can enroll in a practicum course under the guidance of a faculty member to help conduct research, often for real-world clients.

*The* LOOK  
of PROMISE

"Ohio University ITS alums begin at Progressive with a discernable advantage over other collegiate hires due to the highly specialized and cutting-edge curriculum of the J. Warren McClure School. The unique mix of technical, business, and interpersonal communication courses included in the program produce exceptionally well-rounded and extremely valuable employees."

—Thomas Cunningham, IT Business Leader,  
Progressive Insurance
