How to find your MAC Address

Windows 8
1. Go to your Start screen
2. Type cmd and press Enter
3. In the resulting window, type getmac -v and press Enter
4. The MAC address for each of your computer’s adapters will be listed on its own line.

Windows Vista, Windows 7
1. Start > Control Panel
2. Select Network and Sharing Center
3. Click Change adapter settings...
4. Click Local Area Connection (for wired) or Wireless Adapter (for WiFi)
5. Select Details and look for “physical address” or MAC address

Windows XP
1. Start > Control panel
2. Select Network Connections
3. Double click Local Area Connection (for wired) or Wireless Adapter (for WiFi)
4. Select the Support tab
5. Select Details, and it will list the MAC Address

TECH NOTE: If you are comfortable using the Windows command prompt, you can use the command getmac -v for a listing of all MAC addresses associated with your computer. This works on any version of Windows.

Mac OS 10.7 and 10.8
1. Open System Preferences and choose Network
2. Choose WiFi
3. Click Advanced...
4. Your MAC will be listed on the Wi-Fi tab as “Wi-Fi Address” and the Hardware tab as “MAC Address”

Mac OS 10.4, 10.5, 10.6
1. From the Finder’s Apple menu choose About This Mac > More Info
2. Select Network (on left hand side)
3. Under Active Services, choose for Airport wireless or Ethernet for wired
4. Scroll down to find your MAC Address

Android
1. Go to the Home screen
2. Click Menu
3. Click Settings
4. Click About Phone
5. Click Status
6. Scroll down to see Wi-Fi MAC address

iPhone, iPad, iPod Touch
1. Tap Settings
2. Tap General
3. Tap About
4. Scroll down to Wi-Fi Address

Windows-based mobile devices
1. Open Settings
2. Click Next
3. Click About
4. Press more info - MAC address is on the next screen

Xbox 360: (Xboxes only work on the OHIO wired network.)
1. From your home screen choose Settings
2. Choose Network
3. Choose Wired
4. Choose Configure network
5. Choose Additional
6. Choose Advanced
7. MAC address will be in the bottom left

*Note – we do not officially support gaming systems on the university’s networks, but most are able to be registered. Search the web for help locating the MAC address for your particular console.
