Intellectual Property Management at Ohio University

This presentation introduces intellectual property from the perspective of a research university environment. The four main forms of intellectual property will be discussed. These include patents, copyrights, trademarks and trade secrets. Special attention will be paid to patents and the policies, laws, and procedures that affect their management and commercialization here at Ohio University.

Mark D. Foley, MBA

Mark Foley is a Technology Commercialization Manager with Ohio University’s Technology Transfer Office. His technology focus is on the physical sciences, including engineering, physics and chemistry. Mark has been with Ohio University for almost two years, and has fifteen years of experience in the technology transfer profession.
