Undergraduate Students: Select an article that discusses a topic of interest with respect to the design of a machine or part. You must send me the details of your article (the title, author, source and a brief description of what the article is about and why you’re selecting it) by 5 PM on September 26 for approval. You must read the article, write a memo summarizing the article and its salient points, and prepare a 5 minute presentation about it to give to the class during Week 7.

Graduate Students: Select an article that discusses a topic of interest with respect to the design of a machine or part. Your article must be from a peer-reviewed journal such as the ASME Journal of Mechanical Design. You must send me the details of your article (the title, author, source and a brief description of what the article is about and why you’re selecting it) by 5 PM on September 24 for approval. You must read the article, write a memo summarizing the article and its salient points, and prepare a 5 minute presentation about it to give to the class during Week 7. Moreover, you must integrate the knowledge from this journal article in your team design project, so choose carefully! Details about this point are discussed in the team project description.
