Annotated Bibliography/UC116

Identify and articulate a research topic that pertains to your major or some aspect of college life. If you have a research assignment in another class, I will permit you to use that topic for this assignment.

Using a combination of library databases and open-web resources, create an annotated bibliography that contains 7 citations about this topic. In your 7 citations include 2 books, 3 scholarly journal articles, and 2 websites. Each citation should include a 2-3 sentence description which should elaborate on the concepts of credibility, validity, relevance, and purpose addressed in lecture on 15 September. Be sure to collect the following information for each resource you locate:

AUTHOR information—for all authors or groups responsible for the work.

Publication date

Title of the work

Publication data— for books this includes city and state and publishing company.

for journal and newspaper articles this is title of journal or newspaper, volume and issue numbers, and page numbers.

for websites this is the date you accessed the webpage and the URL.

Here is an example of how a citation will look (depending on the resource type) and an example of the annotation:

This is a relevant source because it is an excellent collection of lectures aimed at the freshman student in the field of physics. Feynman was a professor of Physics at Cal Tech, has written extensively in the field, and has written several books on the teaching of concepts in the field of physics which gives him a great deal of credibility. Bias doesn’t appear to be an issue because the subjects he discusses aren’t disputed in the scientific community and he isn’t trying to get students to go to Cal Tech.

ALICE/Library Catalog

- Searches all OU system libraries holdings of books, journal titles, videos, etc.
Search by TITLE, AUTHOR, KEYWORD or PERIODICAL TITLE

Verify resource LOCATION and STATUS in search results.

- Items marked “Zanesville” and “Available” will be located in our library; use the “Call Number” to locate materials in the stacks.
- Items marked Alden, Athens, Lancaster, Chillicothe, Eastern, and Southern will have to be requested through intercampus loan. Click on the title of the item you wish to request and then select at the top of the record. Use your OAK ID and password to request.
- Occasionally you might find a resource you would like that is checked out or missing or non-circulating. These items may be available through OhioLink. Click on the title of the item you would like to request and then on the right side of the screen, click on

  ![Search OhioLINK](image)

  Use your OAK ID and password to request the item.

**Academic Search Complete**

- Academic Search Complete is a multidisciplinary database providing full-text access to newspaper articles, popular magazine articles, scholarly journal articles, book reviews, and editorials.

  Start searching by using keywords and select “TX All Text” in the drop-down menu next to each keyword you enter.

  - Refine your results by selecting a date range, or possibly “Academic Journals/Peer Reviewed”.
  - Use Subject: Thesaurus Terms to help you refine.
