Bachelor of Science in Integrated Healthcare Studies Pathway

The Integrated Healthcare Studies degree is designed for individuals who may be working in an allied health-related discipline to further their education or those who wish to enter into healthcare from a different perspective. The Integrated Healthcare Studies program responds to the need of an increasingly complex state of the American healthcare system by providing opportunities for students to acquire vital knowledge and skills that will be critical in practicing and navigating the healthcare system. Not only is the healthcare system becoming more complex, healthcare professions and healthcare support will be among the fastest growing occupations, requiring high levels of post-secondary education.
