Earth Day Hike – Special Session:
The Built and Natural History of The Ridges
Friday, April 22nd at 12:00 PM • Meet at Bldg 22, The Ridges, Room 221
~ Sandwiches Provided ~

Join CE3 and Environmental Studies as we take a hike around The Ridges in celebration of Earth Day and Spring in Athens! Our expert guides will show us the ecological uniqueness and the rich human history of the site—and point out how changes over the past 200 years have shaped this beautiful corner of campus.

- George Eberts, an OHIO instructor of astronomy, worked at the Athens Mental Health Center on The Ridges for 14 years before it closed in 1993. He is an experienced tour guide on The Ridges and with the Athens County Historical Society & Museum.
- Rob Wiley is a senior research ecologist with the Voinovich School with 40+ years of experience as an ecological consultant working with public, commercial and private entities in the U.S. and abroad. Rob is an OHIO grad with a B.S. in botany and geology.

Take a break from studying – this is worth it! We’ll eat a quick sandwich lunch (or bring your own) while we listen to a short presentation, then get hiking. Don’t forget your reusable water bottle and appropriate footwear! RSVP requested, but not required, to ce3@ohio.edu to help with the lunch counts. Rain or shine, meet in Room 221!

Thank you to everyone who participated in this year’s CE3 Brownbag Sessions!
Watch for the fall lineup at www.ohio.edu/ce3!
