2015-16 CE3 BROWNBAG LUNCH SERIES

CHENOPODIUM BERLANDIERI
How a Prehistoric Appalachian Food May Hold Answers to Regional Food Insecurity

Join us for the first CE3 Brownbag Lunch of Spring Semester!
Friday, February 12th at 12:00 PM • Bldg 22, The Ridges, Room 221
~ Free Pizza Provided ~

Join OU Dept. of Sociology and Anthropology Assistant Professor of Anthropology, Paul Patton, Ph.D., as he discusses the prehistoric domestication of the local “goosefoot” plant by Native Americans in the Ohio Valley ca. 5000 years ago and how this plant offers solutions to contemporary food insecurity. Dr. Patton is an archaeobotanist (Ph.D. OSU 2013), a graduate of the Ohio University Master’s of Science of Environmental Studies program, and Director of the OU Archaeological Field School. If you are interested in the environment, sustainability, food security, the local landscape, history and more, this session connects these themes and then some for a fascinating discussion!

Save the Date for these Upcoming CE3 Brownbags!

Friday, Feb. 26: Ohio EPA (invited)  Friday, Mar. 11: Environmental Studies Student Panel
Friday, Mar. 25: Lisa Hamler-Fugitt, Executive Director, Ohio’s Second Harvest Food Banks
