Invasive Plant Removal Event at the Moonville Tunnel

Saturday, April 30th 2016 from 1:00-4:00pm

Meet at Hope School House @1:00pm to travel to site

Come spend a spring afternoon in Zaleski State Forest removing invasive non-native plant species while learning how to manage and properly remove them

The event site is located along the Moonville Rail Trail and the Raccoon Creek Water Trail. The 16-mile rail trail holds water on both sides of the trail, creating wetland areas throughout Zaleski State Forest and Lake Hope State Park. Raccoon Creek crosses directly in front of the Moonville Tunnel where upstream watershed restoration activities are restoring native fish populations to this area.

This event will take place rain or shine

Bring work gloves and water, wear long pants, and dress for the weather

If you have questions or need directions contact Cody Hacker at Vinton Soil and Water Conservation District:
740-596-5676 or cody.hacker@oh.nacdnet.net

Event hosted by the Vinton County Soil and Water Conservation District in partnership with Ohio University through the Appalachian Ohio Clean Watershed Initiative (AOCWI) The AOCWI is supported through a grant from the State of Ohio Environmental Protection Agency and the United States Environmental Protection Agency, under the provisions of Section 319(h) of the Clean Water Act"
