WEBINAR: WED, DECEMBER 6, 2017

SEVERANCE TAXES & WEALTH RETENTION IN SHALE COUNTRY

Severance taxes are important sources of revenue to many state governments in the U.S., including Alaska and Texas. This revenue can be used for a variety of purposes such as funding current expenditures or creating permanent trust funds. The shale revolution across Ohio, West Virginia, and Pennsylvania has prompted these states to revisit their severance tax policies. This webinar will document the current status of state-based severance taxes across the U.S., summarize the current policy debate, and explore the costs and benefits of imposing new, or increasing existing, severance taxes.

Join the webinar on December 6 to hear our expert panelists discuss energy taxes as they relate to regional wealth management and economic development strategies to bolster local economies.

When: 12:00-1:30 pm, Wednesday, December 6, 2017
Register today!

Please forward any advance questions for our panelists to welche@ohio.edu.

The Shale Innovation Project is an interdisciplinary collaboration between the Russ College of Engineering and Technology, the Voinovich School of Leadership and Public Affairs, and the College of Arts and Sciences at Ohio University examining the impact of shale development on businesses and communities in Ohio’s shale region. This project is generously supported by a three-year Innovation Strategy Award from the Ohio University Research Division.
