

BSN to DNP

Doctor of Nursing Practice

School of Nursing

Program Benefits

- Acquire knowledge of advanced clinical or executive practice.*
- Develop expertise in such areas as informatics, health policy, and epidemiology.
- Prepare to lead and collaborate with a team to implement practice change projects.
- Develop and utilize interprofessional competencies through individualized electives and practice experiences.

The DNP program offers a concentration in advanced clinical or executive practice to further expand the knowledge and skills of the advanced nurse clinician or administrator. Classes are offered in a blended format, including both web-based and on-campus intensives (OCIs) throughout each course. Students will need to plan for one campus visit a semester at the Athens or Dublin Campus to engage in interactive, interprofessional activities, while learning from faculty, expert leaders in the field and peers.

The doctoral degree program in nursing at Ohio University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Doctor of Nursing Practice: BSN to DNP

DNP Admission Requirements

- Valid, unrestricted RN license in approved states is required. See website for details.
- Undergraduate research methods course and statistics course.
- Two years professional experience working as an RN.
- An admission interview with faculty is required.
- Minimum cumulative GPA of a 3.2 on a 4.0 scale in BSN coursework.
- Written professional goals statement in APA sixth edition style.
- Three letters of reference, at least one must be an RN/APRN and at least one must be a Master's or Doctoral level of preparation.

When considering an online program that leads to a professional license in a state other than Ohio, it is highly recommended that prospective students contact the appropriate licensing agency in that state to seek information and additional guidance before beginning the program.

Students in the BSN to DNP track will focus on the advanced nursing practice role in direct patient care such as nurse practitioner, or through indirect care such as nursing administration or through indirect care such as nursing leader/nurse educator.

The curriculum is offered part-time and includes:

- 74 credit hours
- 1,000 clinical practicum hours
- On-campus intensives (OCI)

Sample Schedule

Program of study will vary depending on chosen track. Sample is NP program of study.

Semester 1

NRSE 7801 Leadership in Systems & Organizations
NRSE 7808 Informatics

Semester 2

NRSE 7805 Analyzing Evidence Based Practice
NRSE 7803 Health Policy & Advocacy

Semester 3

NRSE 7802 Interprofessional Theories
NRSE 7806 Promoting Quality Healthcare

Semester 4

NRSE 7807 Application of Evidence Based Practice
NRSE 7809 Epidemiology & Population Health

Semester 5

NRSE 7804 Principles of Business & Resource Management
NRSE 8940 DNP Project I

Semester 6

NRSE 8941 DNP Project II
NRSE 6210 Advanced Pathophysiology

Semester 7

NRSE 6230 Advanced Pharmacology
NRSE 6220 Advanced Health Appraisal

Semester 8

NRSE Elective Clinical Course (dependent on program track)

Semester 9

NRSE Elective Clinical Course (dependent on program track)

Semester 10

NRSE Elective Clinical Course (dependent on program track)
