Fix for Java issues in IE, Firefox and Chrome.

Java Version 1.7.0_45

You will see the following windows when trying to access Ebiz.

And

You will need to change some Java settings to make this work. Go to the Control Panel. Then click on Java (32-bit) icon.
If the icon is there but is white and you cannot click on it, you will need to go to an alternative location. Start menu > All Programs > Java > Configure Java. See screenshot below.
In the window that comes up, select the Security tab. You will see the following screen.

Drag the slider down to medium and click Ok.
Java Version 1.7.0_51

You will see the following windows when trying to access Ebiz.
And

You will need to change some Java settings to make this work. Go to the Control Panel. Then click on Java (32-bit) icon.

In the window that comes up, select the Security tab. You will see the following screen.
Enable Java content in the browser

Security Level

- Very High
- High (minimum recommended)
- Medium

Java applications identified by a certificate from a trusted authority will be allowed to run.

Exception Site List
Applications launched from the sites listed below will be allowed to run after the appropriate security prompts.
https://ebiz.ohio.edu

Edit Site List...

Restore Security Prompts
Manage Certificates...
Click the Edit Site List button. You will see the following. Enter https://ebiz.ohio.edu into the box and click Add. This will add https://ebiz.ohio.edu to the exception list. Repeat this step for any other sites that are blocked this way (internal sites only recommended). Here is a list that you will have to add:

https://ebiz.ohio.edu
https://epdr.oit.ohio.edu
https://ebiz-edevelop.ohio.edu
https://ebiz-erpt.ohio.edu
https://docimage4.cats.ohiou.edu
