ICC Review of General Education Courses

In an effort to strengthen the review of curriculum changes involving general education components, the ICC review process is augmented as follows:

1. This policy does not apply to course changes eligible for expedited approval.
2. For all other ICC work items (new courses and non-expedited course changes) that include a general education component, a list of these work items will be provided to the General Education Committee at the same time as the ICC review process begins (roughly one week before the ICC meeting).
3. The General Education Committee will provide the result of its review to the ICC by the time of the ICC meeting; in unusual cases the General Education Committee may ask the ICC to hold a course over for one meeting cycle. The General Education Committee reviews are advisory to the ICC, but are expected to carry significant weight in the ICC decision-making process.
4. The ICC agenda for the UCC meeting will identify all new courses and course changes with general education impact.
