Ohio University

University Curriculum Council (UCC)

Guidelines for Submission of New Course Proposals and Course Changes

Effective Fall Semester 2015-16
University Curriculum Council (UCC)
Guidelines for Submission of New Course Proposals and Course Changes

This document summarizes the current guidelines of the University Curriculum Council (UCC) as pertaining to new courses and course changes. The Individual Course Committee (ICC), comprised of representative faculty across the university, reviews proposals for new courses and course changes (including course deletions) and enforces the current guidelines. ICC is committed to upholding academic rigor and maintaining consistency for individual courses across the university. Courses submitted to fulfill General Education requirements are also considered by the Individual Course Committee. No permanent change is effective without the approval of the University Curriculum Council. All new course proposals, changes in existing courses, and course deletions must be submitted through the Ohio Curriculum Enhancement and Approval Network (OCEAN).

Course Approval Process for New Courses and Course Changes

Once a course change or new course has been created by the Contact person, the order of approval is as follows:
DSCC: Department/School Curriculum Committee (optional)
DCSD: Department Chair/School Director
CCC: College Curriculum Committee
CDEAN: College Dean
ICC: Individual Course Committee
UCC: University Curriculum Council

ICC Meeting Schedule and Procedures

The Individual Course Committee (ICC) meets once per month, one week before each UCC meeting. Courses normally undergo one full review by the committee. For a course to have a full committee review in any given month, the course must be at the ICC level of review at least 18 calendar days before a regular meeting. This lead time is necessary to organize the courses for review and for the committee members to have time to review courses prior to each meeting. The subsequent review(s) of a course at the ICC level (after ICC has requested corrections/revisions) is typically done by the Chair or Vice Chair. In some cases, a course may undergo another full review of the committee—depending on the extent of the revisions or issues involved. If a course is approved at ICC, it is put on the agenda for the next UCC meeting (which is always one week after ICC). Specific dates can be found on the UCC website.

Course Changes vs. New Courses

Proposed course changes should be done only to make minor modifications in existing courses. For example, typical minor changes may include revisions to a requisite or grade eligibility code. Revisions may also include minor wording changes to course name, course description, course learning outcomes and course topics. The Individual Course Committee (ICC) may pose questions and concerns about course changes if the changes appear to be more than minor. In such a case, the ICC may request a new course proposal. Due to limitations in using percentages to determine amount of course change, ICC no longer uses percentages as guidance. Any change in total credit hours (increasing or decreasing) will require the submission of a new course.

If a new course is created to specifically replace another course, the “old” course should be deleted as soon as possible after the new course is approved. Deletion of a course must be initiated by the academic department through a course change proposal.

Some course changes do not require approval through the curriculum process. Examples include changes to texts/readings, key grade factors, and/or using a different summative experience to achieve the same outcomes. Using a different pedagogical approach (e.g., flipped classroom) to achieve the same outcomes would not require curriculum approval.

Course Update/Refresh: It is recognized that courses which fulfill long-standing needs in an academic unit may need more than minor changes to have the content updated based on research and advances in academic fields. The revisions for such an update would focus only on the content of the course, and include possible updates to any of the following: Name of course, course description, course topics, and possibly student learning outcomes. If a course is approved for course update/refresh, the course will retain the same course number. When requesting a course update/refresh, please specifically address the following in the change explanation field:

1. The requested change is to update/refresh course.
2. Note each change requested.
3. Describe the function of the course in the curriculum—and that the course will continue to serve the same function in the curriculum.
It may be necessary to seek consultation(s) with one or more academic departments who were originally consulted on the course. Other academic departments (not consulted when the course was first approved) may need to be consulted depending upon the nature of the content changes.

**Effective Dates for New Courses and Course Changes**

**New Courses:** Course must be approved by UCC before the start of the term in which course is offered.

For example:
- To go into effect fall 2015-16: Course must be approved on or before the last spring semester UCC meeting (typically in April).
- To go into effect spring 2015-16: Course needs to be approved on or before the last fall semester UCC meeting (typically in December).
- To go into effect summer 2015-16: Course needs to be approved on or before the last spring UCC meeting (typically in April).

**Course Changes:**

After a course change has been approved, a determining factor of when the change will be effective relates to the timing of course offerings published by the Registrar’s office and their availability to students. For example, a course requisite cannot change after the offerings have been published and students are in the process of registering for courses. Proposals for all course changes should be submitted to the University Curriculum Council (UCC) in time to meet the following deadlines:

- To go into effect fall semester: Must be approved no later than the January UCC meeting of the prior academic year.
- To go into effect spring semester: Must be approved no later than the last UCC meeting of the prior academic year (typically in April).
- To go into effect summer semester: Must be approved by UCC no later than the last UCC fall semester meeting of the same academic year (typically in December).

</tr>
</tbody>
</table>

All new course and course change or deletion requests will be given one year to complete the curricular process from the department/school curriculum committee to final approval by UCC. If final approval is not given within a year’s time (12
months) from the date of the department/school curriculum chair’s approval, the course may be returned to the department/school curriculum committee for resubmission.

**Temporary Approval of Courses**

New courses and course changes may be granted temporary approval for one semester. Temporary approval is granted in cases where UCC approval has not occurred in time to meet published guidelines. A college dean and the associate provost for faculty and academic planning must approve temporary course offerings. Before this approval, the course must have been approved by the appropriate college curriculum committee. General education courses may not be offered on a temporary basis. Temporary course approvals do not require formal approval from the ICC; however, ICC is regularly notified of all temporary course offerings.

**Course Numbering**

Generally, the course level dictates the course number (e.g., 1000-level courses are intended for first year students). There are specific guidelines for dual-listed courses and the use of letters in course numbers. In addition, there are reserved course numbers for various instruction types. Complete course numbering guidelines may be found in Appendix A.

**Course Name**

The name of a course should give a brief, general description of the subject matter covered. A total of 100 maximum characters may be used for a long course name. The short (abbreviated) name should be as clear as possible within the length limit (maximum 30 characters). The short name will appear on students' records. In determining a course name, give attention to capitalization, standard abbreviations, and acronyms. See Appendix B for guidelines for course names.

**Course Description**

The course description is a brief summary (800 maximum characters including spaces) of the content of the course. Course Description guidelines are as follows:

1. Provide a concise yet comprehensive summary of the course content.
2. Do not include syllabus-level information likely to change over time (e.g., assignments, activities, presentation modes, etc.)
3. Write in the present tense (e.g., “Students investigate…” not “Students will investigate…”).
4. Use the word “course” sparingly.
5. Avoid rhetorical questions.
6. Avoid language that may be construed as promoting or advertising the course.
7. Avoid discipline-specific jargon or specialized terms unlikely to be understood by potential students.

**Course Components (instruction type)**

Possible course components include the following: Lecture, Tutorial, Seminar, Laboratory, Studio, Clinical, Practicum, Field Experience/Internship, Independent Study, Research, Thesis/Dissertation, Discussion, Recitation. See Appendix C for descriptions.

Many courses will have “lecture” or “seminar” as the primary and only component. However, for example, a course can have “lecture” as the primary component, and “lab” as the secondary component—and they will be scheduled as separate sections. Discussion and Recitation may not serve as primary components. Tutorial and Thesis/Dissertation may not serve as secondary components.
If more than one component is selected for a course, all of the selected components must be scheduled (as separate sections) every time the course is scheduled. Multiple components should not be used if there is not a defined separate section for the secondary or tertiary component, and they should not be used if a course occasionally offers part of the instruction in a separate delivery.

**Course Learning Outcomes**

Course learning outcomes are what the instructor expects students to know or do upon the completion of the course. All new courses submitted to ICC are expected to have observable and measurable learning outcomes. There should be more than one learning outcome, but there is no exact number of outcomes that are required or expected. Typically, courses have between 5 to 10 learning outcomes. The inclusion of action words is expected (e.g., define, explain, describe, solve, apply, analyze, compare, evaluate, create, etc.). See Appendix D for examples of verbs and course learning outcomes. The outcomes should be worded as follows: “Students will...” The outcomes as provided in OCEAN are expected to be the same as the learning outcomes on course syllabi. The outcomes specified for General Education at the university utilize some of the language such as understanding, appreciation, awareness, and the like. These should be interpreted as broadly-based outcomes for the General Education tiers rather than learning outcomes for specific courses.

* Course proposals that include learning outcomes specified for TAG (Transfer Assurance Guide) courses by the Ohio Board of Regents should list these specified learning outcomes in the discussion tab (see https://www.ohiohighered.org/transfer/tag/definitions).

**Grade Eligibility Codes**

Grade eligibility codes are as follows: (note: WP, WF, I, FN, and FS apply to all grade eligibility codes)

- 01: A-F
- 02: A-F, PR
- 03: A-F, CR
- 04: A-F, CR, PR
- 05: F, CR, PR
- 06: F, CR
- 07: F, CR, NC (OPIE courses only)

GEC 01 is appropriate for almost all undergraduate and graduate courses. Please explain the rationale for proposing a GEC other than 01.

GEC 02, 04, and 05 (which allow in progress grade) may be used in certain other courses specifically designated by the department with the approval of the dean. Such courses are those where a project or course of study extends over more than one semester.

GEC 03, 04, 05, and 06 (which allow for CR grade) are to be used only for certain specified courses and only by prior approval of the college curriculum committee and the University Curriculum Council. When a CR grade will be used in a course, it must be used for every student in that section of the course and this will be so announced by the instructor at the start of the course. The blanket CR will not apply to independent studies or independent reading. In unusual circumstances, the dean may allow CR to be assigned to individual students.

Generally, all thesis and dissertation courses should have a code that includes PR and/or CR.

**Course Credit**
Course credit for formal courses (e.g., lecture, seminar) is based on the number of contact hours. For example, one hour lecture OR one hour seminar equals one hour semester credit.

Course credit for laboratory:
Undergraduate: One semester credit hour equals a minimum of 2 contact hours but not more than 3 contact hours for lab.

For graduate courses, the number of credits should be equal to or within one hour of the lecture hours or the combination of lecture and lab credit hours as determined by the formula. In other words, a graduate course can earn one credit more than the number of hours that it meets given the expected workload of the course.

Variable credit courses are typically independent studies, thesis, research, practicum, or special topics. Variable credit courses should be listed as repeatable, and the maximum repeat hours should be a multiple of the end range of variability. For example, if a course is variable for 1-6 hours, then the maximum repeat hours should be 6, 12, 18, 24, etc.

Course Retakes and Repeats

Retakable: This means that a student may retake a course for a different grade to replace the original grade (even if the retake grade is lower). The credit hours do not accumulate.

Undergraduate. All undergraduate courses with fixed content are retakable. All grades appear on a student's transcript, but only the last (most recent) grade counts in the GPA calculation. A student may retake a course only two times—after the initial take (three total, excluding withdrawals). There is no accumulation of credit hours.

Graduate. Graduate courses are not retakable (as defined above). In the event that a graduate student must take a class second time to achieve a sufficient grade for a graduate program, the original grade stays on the transcript and in the GPA calculation.

Honors tutorial courses are not retakable; they are repeatable. They are not retakable because they are one-on-one tutorial courses.

Repeatable: This means that a student may register for a course again for additional credit hours, such as practicum courses, special topics courses, research, thesis, or independent study. The hours will accumulate.

Undergraduate and graduate courses may be repeatable. If a course is repeatable, the maximum repeatable hours must be identified and must be a multiple of the maximum credit hours of the course. Maximum repeatable hours include the total hours earned from all repeat attempts plus the hours earned when the course was first taken. For example, a 3-credit hour class may have maximum repeatable hours of 6, which means the student can repeat the course one time. In very limited cases, enter a number such as “999” if there is no limit (number still must be a multiple of the credit hours of the course). A course with fixed content is not repeatable. A course with fixed credit hours may be repeatable if the content changes from one offering to the next. In all cases where a course is repeated, all grades will appear on DARS and will contribute to GPA calculation.

Note regarding Special Topics courses (e.g., 2900, 4900): Special Topics are courses that vary from offering to offering with respect to the content (topic). For example, a Special Topics course in Communication Sciences and Disorders may include the following topics as offerings: Traumatic Brain Injury, Autism, Cleft Palate, and Cochlear Implants. A student who has taken the course for Autism may repeat the course for the topic Traumatic Brain Injury and receive additional credit. Thus, a special topics course is repeatable because the content changes. Within a special topics course, a particular topic (content) is retakable. For example, a student who took Autism may retake Autism to replace the original grade. Please note that the OCEAN system does not allow for specific subfields for each topic; however the proposal should include some examples of topics to be taught in the special topics course.
Course Consultations

The development of a new course may require a consultation with another department/school for potential overlap/duplication, complement, or collaboration with respect to the content of the course. The department of the new course must make a good effort to get a consultation. ICC strongly recommends contacting the department/school directly by email to request the consultation. Also, use the REL tab on OCEAN. The result of a consultation should be documented on the Discussion tab. Typically, two weeks is given for a department/school to respond to consultation request. In this case, please note on the Discussion tab that no response was received.

Dual-Listed Courses

Courses intended for upper level undergraduate students and masters level graduate students may be dual-listed at the 3000/5000 or 4000/5000 level. In such dual-listed courses there must be qualitative and quantitative differences in work expected of the graduate students compared with the undergraduate students. Courses at the 6000, 7000, and 8000 levels cannot be dual listed with undergraduate courses. Master’s level courses (6000 level) may be dual-listed with 7000-level courses.

Requisites

If permission is part of the requisite, students will be required to obtain formal permission via the class permission slip in order to enroll in the course.

3000- and 4000-level courses should require junior or senior standing, respectively, and/or appropriate requisite course(s).

See Appendix E for standard requisite text.

Majors set aside

Majors set aside allows (but does not require) a department to have a percentage of the total class capacity to be reserved for their majors only (or related majors, minors, and/or certificates). Thus, if the maximum capacity for a class is 60, and 75% majors set aside is used, then 45 seats may be set aside for majors in a particular program. Majors set aside seats are not defaulted automatically to a section of a course, and majors set aside restrictions are only available for Athens campus class sections. The REL tab is used for majors set aside. If requesting majors set aside, please include a justification.

Introductory and Tier II courses: Generally speaking, majors set aside for introductory courses and general education Tier II courses is discouraged because introductory and general education courses should be available for all students across all majors. If majors set aside is used for such a course, a reason should be provided and ICC strongly recommends a maximum of 50%. Although majors set aside can be used with Tier I Junior Composition and Tier II courses, these courses typically have requisites that serve to control enrollment for majors and non-majors. If majors set aside is used, a major/minor/certificate code must be identified.

Experimental Courses

Departments or schools may wish to offer a new course experimentally before seeking permanent approval for the course. The experimental course guidelines provide a direct procedure for provisional course approval without review by UCC. Approval from ICC is not required for experimental courses; however, ICC is notified when an experimental course has been approved. Experimental courses requires the approval from the appropriate college curriculum committee and dean. The following are the guidelines for experimental courses:
- The instructor should be a full-time faculty member in the department/school offering the course.
- The course should reflect the discipline of the instructor and the department/school.
- The course may only count as an elective and cannot be a mandatory course requirement.
- The course may be offered for a maximum of two years.

**Developmental Courses**

These courses are remedial, and any credits given are not applicable toward a degree. No more than 6 semester hours earned in developmental courses may be applied toward the total hours required for graduation. Developmental courses shall be so publicized by curricular committees in the appropriate academic units. Course numbers will be prefixed with a “D” (e.g., ENG D150, MATH D005).

**Honors Tutorial Courses**

HTC courses always have a grade code of 01. They are repeatable; not retakable. The standard method for numbering courses is show below.

- 1st semester – 2970T
- 2nd semester – 2980T
- 3rd semester – 2971T
- 4th semester – 2981T
- 5th semester – 3970T
- 6th semester – 3980T
- 7th semester – 4970T
- 8th semester – 4980T

Internally, HTC refers to 2970T through 3980T as “non-thesis tutorials” and to 4970T and 4980T as “thesis tutorials.” For the catalog, DARs, and schedule of courses, all T courses may be named, “[name of sponsoring department’s discipline] Tutorial,” such as Journalism Tutorial, Geology Tutorial, etc.

The preferred language for an HTC course description should include first-year, second-year, etc. rather than class rank (e.g., freshman). HTC students often have advanced status in terms of credit hours, but their tutorials are dependent on their year in the program—not credit hours earned. Example of course description: Tutorial study for first-year Honors Tutorial students (or second-year, etc.) in the Geological Sciences. The following are examples of appropriate learning outcomes for HTC courses. Note that the outcomes in HTC courses across the curriculum should show a logical progression.

1. Students will demonstrate a sophisticated understanding of their discipline.
2. Students will produce original, independent research or creative activity.
3. Students will demonstrate behaviors that are consistent with expectations of professional work ethics and responsibility.

For HTC courses, there is no standard wording or language for the course topics, key grade factors, and summative experience.

**Special Topics Courses**

Special Topics are courses that vary from offering to offering with respect to the content (topic). These courses have reserved course numbers—those numbers must be used for special topics courses. Special topics courses are repeatable. (Also see section in this document on Retakes and Repeats for more specific information about special topics courses).

**Service Learning Courses**

A service learning course at Ohio University:
1) has service learning embedded in the course curriculum;
2) is based on collaboration between faculty and community organizations;
3) requires at least 20 hours of structured, intentional work on the service project [for a 3 credit course];
4) serves the greater good; and
5) requires reflections that link experience to academic material. Courses that meet these criteria are granted a C designation. For more information on developing a service learning course, see Appendix H.

**General Education**

See Appendix F for guidelines for Tier I, II, and III general education courses.

**Submission Guidelines: Curriculum Management System**

All course changes and new course proposals are submitted through the OCEAN curriculum management system.

Login to OCEAN: [https://webapps.ohio.edu/ocean/](https://webapps.ohio.edu/ocean/)

To submit a new course:
--"Courses" tab
--"Create Course form"
--Click on the course type you want to submit
--On the GEN INFO tab, put in the desired effective term (see: Effective Dates for New Courses and Course Changes in this guide)
--Click on the NEW COURSE tab to begin inputting information about the new course (Tabs: COURSE INFO, PREREQS, CONTENT).
--Use this guide to provide assistance in the various form fields.
--Only use the REL tab if you want majors set aside OR need to consult with another academic department for possible overlap (duplication), complement, or collaboration.
--Save all changes and submit when the course is ready to be approved to the next level.

To submit a change to a course:
--"Courses" tab
--"Create Course Change form"
--Enter the prefix and course number you want to change, and continue
--On the GEN INFO tab, put in the desired effective term (see: Effective Dates for New Courses and Course Changes in this guide)
--The ORIGINAL tab will allow you see the course in its present state
--The CHANGE tab will allow you to enter changes. Make sure each change is clearly explained in the top field, and a reason is provided for each change. *(Please list all of the course changes requested on this form, and provide a justification for each change)*
--Make the change on the form
--Save and submit when ready to be approved to the next level.

Please see Appendix G for helpful tips for submitting a course in OCEAN.
APPENDIX A: Course Numbering Guidelines

Number Format
Course numbers shall consist of four numbers or a D followed by three digits.

Course Level
0-999 Level Courses
These courses are remedial, developmental or special requirement courses. Any credits given are not applicable toward a degree. Developmental courses shall be so publicized by curricular committees in the appropriate academic units. Course numbers will be prefixed with a “D” (e.g., ENG D101, MATH D101, etc.).

1000 Level Courses
These courses are intended primarily for freshmen. Generally, such courses should have no college prerequisite (except sequential courses) and should be the first course of any particular discipline.

2000 Level Courses
These courses are intended primarily for sophomores. They may or may not have a prerequisite. The second course in a major sequence might properly be given a 2000 number.

3000 Level Courses
These are courses primarily for juniors and seniors. In disciplines where one course builds on knowledge acquired in a previous course, 3000 level courses have prerequisites. In other disciplines where specific course prerequisites are not necessary or appropriate, the courses should be taught with the assumption that the students have an educational background at least equivalent to a college junior.

4000 Level Courses
These courses should be primarily for juniors and seniors. They should be more advanced or more specialized than 3000 level courses and may have a 3000 level course as a prerequisite.

5000 Level Courses
These courses are primarily for master’s level students. They may be dual listed with 3000 or 4000 level courses.

6000 Level Courses
These courses are primarily for master’s level students and they may not be dual listed with undergraduate courses. OCOM courses start at the 6000 level.

7000 Level Courses
These courses are for advanced graduate students, most of whom are doctoral students. They may not be dual listed with undergraduate courses.
8000 Level Courses
These courses are specialized courses such as seminars, research and dissertation for doctoral students. They may not be dual listed.

Multiple Listed Courses

1. Courses intended for advanced undergraduate students and masters level graduate students may be dual listed at the 3000 – 5000 or 4000 - 5000 level.

2. Dual listed 1000 - 5000 and 2000 - 5000 courses are permitted only under very special circumstances such as language courses and courses that provide basic research or laboratory skills.

3. PhD courses may be dual listed with Master’s level courses.
4. In dual listed undergraduate/graduate courses, there must be a qualitative and quantitative difference in work expected of the graduate students as compared with the undergraduate students (e.g., extra meetings, readings, writings, etc.). New course proposals must include this information.

Use of Letters

The following alphabetical suffixes are to be used for specific courses:

a) "H" - Departmental Honors Courses
b) "J" - Junior Level Composition Courses
c) "T" - Honors Tutorial Courses for the Honors Tutorial College (HTC) Programs
d) "L" – A laboratory course that is closely associated with a lecture course with the same four digit number.
e) "X" - Experimental courses. They are approved at the college level to be offered for a maximum of two (2) years.
f) "D" – Graduate course for which the course credit is not applicable to programs.
g) "U" – University Professor courses designated to meet Arts & Sciences humanities requirement
h) "N" - University Professor courses designated to meet Arts & Sciences natural sciences requirement
i) "S" - University Professor courses designated to meet Arts & Sciences social sciences requirement
k) "C" – Service Learning Courses, see appendix H.

Reserved Course Numbers

1. 2900, 4900, 5900, 6900, and 8900 for special topics.
2. *910 for internship (e.g., 2910).*
3. *920 for practicum.*
4. *930 for independent study.*
5. *940 for research.*
6. 6950 is for thesis.
7. 6960 is for studio, project or performance based thesis.
8. 8950 is for dissertation.
9. 2970T and 2980T, 2971T and 2981T, 3970T and 3980T, and 4970T and 4980T for first, second, third and fourth year honors tutorial courses respectively.

*Multiple courses of this instruction mode at the same level with the same MCF prefix should utilize the same middle two digits and be differentiated in the fourth digit (e.g. 2911, 2912,) The numbers without a zero in the fourth digit are not reserved.

Course Numbering Suggestions
1) Course numbers in the 900s should be used for independent study, internships, special problems, readings, special studies, seminars, theses, etc. Course types with a reserved number should use that number if an individual course or the tens range if multiple courses.

2) Courses of similar major subject area will have the same hundreds digit. Courses in the same sub area will have the same tens digit.

3) Sequential courses at the same level (thousands) will go in order in the ones digit.

4) Sequential courses at the higher level (thousands) have the same number as the sequence at the lower level

APPENDIX B: Course Name Guidelines

- Please make sure the first letter in each key content word in the course name is capitalized.
- Delete small words (such as of, and, the, etc.) before trying to abbreviate more essential words in the course name.
- Do not use punctuation marks unless it is crucial to the meaning of the course name. An ampersand (&) is acceptable to join words.
- Acronyms specific to a discipline or that someone outside the academic department would not know or understand should not be used.
- Abbreviate words so they may be easily deciphered. Please use standard abbreviations whenever possible (see below).

APPENDIX C: Course Components

Standard definitions that units can use to determine the proper components to use for their courses.

Lecture - A lecture is formalized instruction, conducted on or off campus, in which an educational experience prepared by the teacher is presented to students through any combination of instructional methods such as lecture, directed discussion, demonstration, or the presentation of audiovisual materials or techniques.

Tutorial - A tutorial is an educational experience in which individual students or small groups of students are tutored by a faculty member or qualified individual.

Seminar - A seminar is an educational experience that is less formal than a lecture class, in which a relatively small number of students engage in discussions that are directed by a faculty member in the development and/or review of concepts which have been or are to be applied to practical situations.

Discussion - Discussion is an instructional format in which the observations made in the lab are further discussed. This may also be a formal class in which discussion, rather than lecture, is the pedagogical structure.

Recitation - Recitation is an educational activity in which small breakout groups meet in conjunction with a lecture to review exams, discuss issues, address questions, and extend the instruction that occurs in the larger lecture.

Laboratory - A laboratory is an educational activity in which students conduct experiments, perfect skills, or practice procedures or practice, perform, or produce under the direction of a faculty member.

Studio - A studio is an educational activity in which students practice, perform, or produce under the direction of a faculty member. It is typically used to describe music, performance art, and theater courses.

Clinical - A clinical is a laboratory section which meets at a health-related agency facility in lieu of on-campus laboratory facilities. Clinical laboratory sessions provide a realistic environment for student clinical laboratory session, a regular faculty member directly supervises the class. A clinical laboratory applies only to health technology programs.

Practicum - A practicum is an on- or off-campus work experience which is integrated with academic instruction in which the student applies concurrently learned concepts to practical situations within an occupational field. The practicum is coordinated by a faculty member who visits the student on a regular basis, provides the final grade, and teaches at least one course on the campus.

Field Experience/Internship - Field experience is a planned work activity which relates to an individual student's occupational objectives, and which is taken in lieu of elective or required courses in his or her program with the permission of a faculty advisor. The experience is coordinated by a faculty member of the college who assists the student in planning the experience, visits the site of the experience for a conference with the student and his or her supervisor, and assigns the course grade to the student after the appropriate consultation with the employer or supervisor.
Independent Study – An educational activity in which a faculty member works with a student or small group of students.

Research- During research, a student performs a systematic inquiry, investigation and analysis of data in order to increase knowledge, test hypothesis, and arrive at conclusions under the direction of a faculty member.

Thesis/Dissertation- Thesis and Dissertation are substantial scholarly papers written as a requirement for a graduate degree in an academic discipline.

APPENDIX D: Language for Student Learning Outcomes

Bloom’s Revised Taxonomy

Remembering (knowledge): Can the student recall or remember the information? Example verbs: choose, describe, define, identify, label, list, locate, match, memorize, name, omit, recite, recognize, select, state

Sample instructional strategies: highlighting, rehearsal, memorizing, mnemonics

Understanding (comprehension): Can the student explain ideas or concepts? Example verbs: explain, describe, translate, discuss, summarize, classify, illustrate, interpret, compare, classify, indicate, distinguish, infer, express

Sample instructional strategies: key examples, emphasize connections, elaborate concepts, summarize, paraphrase

Applying: Can the student use the information in a new way? This involves knowing when to apply, why to apply, and recognize patterns of transfer to situations that are new, unfamiliar or have a new slant for students. Example verbs: apply, use, practice, sketch, solve, generalize, employ, execute, perform, construct, role-play

Sample instructional strategies: case studies, modeling, mindful practice, authentic situations, “coached” practice, simulations, part and whole sequencing

Analyzing: can the student break down into parts and forms? Example verbs: analyze, categorize, classify, compare, differentiate, appraise, critique, survey, distinguish, experiment, measure, test

Sample instructional strategies: models of thinking, challenging assumptions, retrospective analysis, reflection through journaling, debates, discussions, collaborative learning, decision-making situations

Evaluating: can the student evaluate according to some set of criteria and state why? Example verbs: appraise, judge, criticize, defend, compare
Sample instructional strategies: challenging assumptions, journaling, debates, discussions, collaborative learning activities, decision-making situations

Creating (synthesis): Can the student combine elements in a pattern not clearly there before? Example verbs: combine, compose, construct, create, design, develop, formulate, invent, originate, produce, hypothesize

Sample instructional strategies: Modeling, challenging assumptions, reflection through journaling, discussions, collaborative learning activities, design, decision-making situations

Simply stated, expected learning outcome statements describe:

1. What faculty members want students to know at the end of the course
AND
2. What faculty members want students to be able to do at the end of the course.

Learning outcomes have three major characteristics
1. They specify an action by the students/learners that is observable
2. They specify an action by the students/learners that is measurable
3. They specify an action that is done by the students/learners (rather than the faculty members)

Course Samples:

United States History: Upon completion of this course, the students will be able to…

…describe the relationship between the past and the present.
…define a pluralistic society and its relationship to our democratic principles.
…outline the structure of the Constitution of the U.S.
…identify and define the social, political, and economic institutions that impact the modern society.
…describe the major events and individuals associated with the history of the United States.

Introduction to Business: Upon completion of this course, the students will be able to…

…identify and describe current domestic and international business trends.
…explain how proper business management benefits consumers and employees.
…define the basic rules related to human resources management.
…compare and contrast the different types of business ownership.
…evaluate and classify various marketing strategies.
…summarize how technology can help a business manage information.

Music Appreciation/History Course (focus on Western music): Upon completion of this course, the students will be able to…

…identify the basic elements of Western music.
…list the instruments associated with Western music.
…describe the distinct style periods of Western music.
…recognize selected examples of Western music aurally.
…discriminate among different Western music styles.
...explain music's place in relation to other art forms.

**General Psychology:**  *Upon completion of this course, the students will be able to...*

...identify and define basic terms and concepts which are needed for advanced courses in psychology.
...outline the scientific method as it is used by psychologists.
...apply the principles of psychology to practical problems.
...compare and contrast the multiple determinants of behavior (environmental, biological, and genetic).
...analyze current research findings in the areas of physiological psychology, perception, learning, abnormal, and social psychology.
...distinguish between healthy and unhealthy physical, mental, and emotional patterns.

**Plant and Soil Sciences:**  *Upon completion of this course, the students will be able to...*

...label the parts of a plant.
...define the terms used in plant growth and reproduction.
...explain transpiration, respiration and photosynthesis.
...calculate the germination rates of various seeds.
...identify soil texture and structure from soil samples.
...list the primary, secondary and micro nutrients present in soil.
...identify and describe land capability classes and their uses.

**General Nutrition:**  *Upon completion of this course, the students will be able to...*

...describe the digestive system.
...explain the steps involved in metabolism and the ways energy is derived from carbohydrate, fat, and protein.
...design individualized eating plans utilizing diet planning principles and the Food Guide Pyramid.
...state the benefits associated with physical activity and the components of a sound fitness or health program.
...describe how nutrition and lifestyle choices impact the life cycle.

**Language Disorders in School-age Children:**  *Upon completion of this course, students will be able to...*

...describe curriculum–based assessment.
...compare and contrast service delivery models.
...explain the importance of the common core state standards in relation to speech/language skills.
...apply curriculum-based assessment to a case scenario.
...evaluate the evidence for the effectiveness of models of language intervention.
...create an informal assessment tool for language-literacy.

**Examples of possible outcomes for internships:**

Apply academic knowledge in a professional setting
Solve practical real-world problems in a professional setting
Demonstrate professionally relevant competencies and relationships in a professional setting
Demonstrate proper business etiquette while fulfilling internship responsibilities
Critically evaluate the internship experience as an exemplar for the field
Demonstrate improved performance accordingly to professional constructive criticism
Evaluate own performance in light of one’s expressed goals and learning outcomes
Compare and contrast one’s self-perception to the professional perception of the site supervisor
Demonstrate understanding of a professional organizational culture

<tbody>
<tr>
<td>NOT PSY 1200</td>
<td>Indicates (for example) the student who has completed PSY 1200 may not register for this course.</td>
</tr>
<tr>
<td>MAJOR OR MJR</td>
<td>Indicates student must be a major of that department/school.</td>
</tr>
</tbody>
</table>

APPENDIX F: General Education

Tier I Courses

Junior-Level “J” Composition Courses

I. General Criteria

- The aims of the course are broad enough to justify its existence as a writing course fulfilling a University-wide requirement.
- The department considers the course an important component of its program.
- Instruction in writing is the focus of the course. Therefore, writing is frequent, and at least 5,000 original words are assigned. The writing will be evaluated and revised.
- A variety of purposes and types of writing appropriate to the discipline should be assigned. Because the course fulfills a University requirement, the audience for the writing usually is imagined to be an intelligent and critical lay audience, rather than the teacher or some highly specialized members of the discipline.
- Any prerequisites should be appropriate for junior-level students within the field of study.
- Enrollment should be limited to 20 students to encourage evaluation and revision, critical thinking, and interaction. The maximum enrollment is 25.
- The instructor is interested in the craft of writing and in helping students achieve higher levels of competence as writers.

II. Criteria for Evaluation of Course

- As is the case with all University courses, students evaluate “J” courses.
- Syllabi will be collected by the Director of the Center for Writing Excellence and reviewed by the J-course subcommittee of CWAC every three years.

III. Suggestions for Good Writing Instruction

- The goal is writing that is readable, lucid, and logical and seeks applicability across the disciplines. Matters of mechanics, grammar, and spelling receive appropriate attention.
- Some subjects or purposes of the writing assignments are initiated by the students.
- Teacher/student responses to writing and rewriting are integral components of the course.
- The student’s writing is discussed with the teacher both in class and in individual conferences.
- The teacher distributes a syllabus with clear explanations of assignments and criteria the instructor uses to evaluate their writing.

Junior Composition Equivalency Courses (JE courses)

In the fall of 2011, the Faculty Senate passed and EVPP Benoit signed a resolution establishing a category of Tier I composition courses at the undergraduate level called Junior Composition Equivalency courses—JE courses. JE courses are
writing-intensive courses that are typically within a student’s major program. Successful completion of two JE courses fulfills the Tier I Junior Composition (J-course) requirement. Students may now use JE courses in their major to meet the J-course requirement.

Completing the Junior-Level Composition Requirement

Students can complete the university’s junior-level composition requirement by passing an approved “J” course, by passing two “JE” courses within their program of study, or by passing one “JE” course within their program of study and one “JE” course outside their program of study approved by their department or school.

Requirements for JE courses

1) The JE course should be a requirement or an elective within a major and should be taught regularly.
2) The JE course must have a minimum of 2 semester credit hours.
3) The course enrollment is limited to 25. A department/school may request an exemption from this requirement; if so, the course proposal should explain how the structure of the course would allow for rigorous evaluation of student writing (e.g., break-out sections).
4) The course content submitted must detail how the course fulfills the following:
   (a) students regularly during the term;
   (b) a specific percentage of class time is devoted to discussions of writing; write
   (c) each student will produce several minor or one major piece of work, comprising at least 10-15 total pages of original writing;
   (d) each student will have the opportunity to revise and resubmit written work; and
   (e) peer critique, where appropriate, is used as a pedagogical strategy.

Submitting JE courses for approval

JE courses can be created by converting a current course to a JE course, or by creating a new JE course. All course changes and new courses are now submitted through OCEAN at https://webapps.ohio.edu/ocean/ and follow the regular approval process through departmental/school, college, and university curriculum committees.

To convert an existing course to a JE course in OCEAN:
1) Log in to OCEAN at https://webapps.ohio.edu/ocean/.
2) Under "Courses" on the top menu bar, choose "Create course change form."
3) In the search text box, enter the course code and number of the course you want to convert to a JE course. This will create a course change form with one tab that shows the original course, and another tab that allows changes to the course.
4) Click on the "change" tab.
5) On the "course info" tab, change the main course type to "Tier I course."
6) On the "Gen Ed" tab, select "Tier 1 Junior Composition Equivalency." The general education outcome goals for JE courses will then be displayed. JE courses should meet all of the objectives unless there are specific disciplinary reasons provided explaining why this is not appropriate.
7) The rest of the information is filled out the same way as the previous paper form. The course content submitted should address the JE course requirements above.

To create a completely new JE course:
1) Log in to OCEAN at https://webapps.ohio.edu/ocean/.
2) Under "Courses" on the menu bar, choose "Create course form."
3) Click on "Semester Undergraduate Tier I course (new). This will take you to the new course form that has the same information to fill out as the previous paper new course forms.
4) On the Gen. Ed. tab, select "Tier 1 Junior Composition Equivalency." The general education outcome goals for JE courses will then be displayed. JE courses should meet all of the objectives unless there are specific disciplinary reasons provided explaining why this is not appropriate.

5) The rest of the information is filled out the same way as the previous paper form. The course content submitted should address the JE course requirements above.

General education outcome goals for JE courses

• Writing competency in the specific discipline’s genre(s) and writing conventions.
• Understanding of how a discipline’s genre(s) and writing conventions shape reading, writing, knowledge, and power as appropriate to the discipline.
• The ability to discover, analyze, evaluate, and synthesize core sources appropriate to the discipline (e.g. primary and secondary sources, data, images, and scores), and to properly cite those sources.
• The ability to improve writing through multiple drafts by developing flexible strategies for generating, revising, editing, and proofreading text.
• Competency in critically assessing one’s own writing and the writing of others.
• The ability to construct compelling and effective arguments using logic, rhetoric, and supporting evidence appropriate to the discipline.

Course numbers for JE courses: Credits for JE courses will only be awarded to students who have completed their Tier I Freshman Composition requirements and have earned at least 30 semester credit hours, so typically JE courses are at the 2000 level or above.

Tier II Courses:

a. Courses should be at the 1000 or 2000 level.
b. Courses should have no or very few prerequisites
c. Courses should have a grade code of 1 (A-F, No PR, No CR)
d. For any new Tier II course (or an existing course to change into a Tier II course) it is critical that the course clearly fits the general education category selected. Please provide a detailed explanation on how the course reflects the general education category (GenEd Category Reason). In addition, the course student learning outcomes must reflect the general education learning outcomes. While some of the general education learning outcomes may not contain measurable language, the course student learning outcomes are expected to be measurable.

Tier III Courses:

a. Tier III courses must be interdisciplinary.
b. They must be senior-level courses; thus, they will always carry the prerequisite of senior standing (Sr).
c. Tier III courses are expected to require prior course work in at least one of the relevant disciplines. An instructor who proposes a Tier III course without a curricular prerequisite must include in the course proposal a rationale for waiving this guideline.
d. Tier III courses normally carry three hours of credit.
e. They carry a Grade Eligibility Code of 1.
f. The person creating the T3 course in OCEAN may select the course number as long as it’s a 4000 level number that hasn’t already been used for a T3 course.
g. They should have an enrollment upper limit of 40 students.
h. Each Tier III proposal is to include a statement (approximately one paragraph) describing how a synthesis of disciplines will be achieved, as well as some examples of proposed outside assignments, evaluation techniques, and class strategies that will aid students in developing a capacity for interdisciplinary synthesis.
i. The course student learning outcomes must reflect the general education learning objectives. While some of the general education learning outcomes may not contain measurable language, the course student learning outcomes are expected to be measurable.

j. Tier III courses may not be specifically required in a program.

**Tier III Equivalent Courses**

In April 2005 Faculty Senate passed a resolution and the Provost approved it to allow capstone courses (Tier III Equivalents) to be substituted for the current Tier III course requirement.

- a. The course should be at the junior or, preferably, the senior level.
- b. The course should have substantial prerequisites that directly or indirectly force nearly all of the required program curriculum to be completed ahead of the course.
- c. The course will carry a Grade Eligibility Code of 1.
- d. The course will normally contain “SR” as part of its prerequisites.
- e. The course will have an MCF prefix of the department offering the course.
- f. Each Tier III equivalent course proposal is to include a statement which explains how the course includes a substantial amount of research, creative activity, design, or other types of open-ended tasks that are appropriate to the discipline or profession. The statement should also explain how the information is to be presented for purposes of grading the project. Each proposal is to also include a statement (approximately one paragraph) describing how a synthesis within a discipline will be achieved, as well as some examples of proposed outside assignments, evaluation techniques, and class strategies that will aid students in developing a capacity for synthesis.
- g. The course student learning outcomes must reflect the general education learning objectives. While some of the general education learning outcomes may not contain measurable language, the course student learning outcomes are expected to have measurable language.
APPENDIX G: Helpful Tips for Submitting a Course in OCEAN

Course Changes: The course change(s) that are being requested AND the reason for the change(s) must appear clearly under the Course Change Explanation section.

Course Learning Outcomes: There should be more than one learning outcome, but there is no exact number of outcomes that are required or expected. A typical 3-hr semester course should have between 5 to 10 learning outcomes. The inclusion of measurable action verbs is expected. Course learning outcomes that have language such as “Student will appreciate...,” “Student will become familiar with...,” “Student will know...,” “Students will understand,” “Students will participate in...” are difficult to measure. See Appendix C for other examples of verbs and course learning outcomes. The outcomes should be in the following language: “Students will...” The outcomes as provided in OCEAN are expected to be the same as the learning outcomes on course syllabi.

Requisites: If a course is in the requisite text, it must also appear in the requisite list. If a requisite is not necessarily required (e.g., a choice of two courses such as CSD 1080 or 2080), then they should both appear in the requisite list as not required (select “no”). If courses are joined by “and” (e.g., CSD 1080 and 2080) in the text, they should both appear in the requisite list as required (select “yes”). Courses will be returned if the text and the list do not match. Courses listed as concurrent courses in requisite text do not need to be added to the requisite list.

Course description: Provide a concise summary of the content of the course. The description should be free of spelling, punctuation, and grammar errors. This paragraph should focus on the content of the course (not the learning outcomes or assignments, for example). The content in the course description should be connected with the content in the learning outcomes and course topics. For consistency, a course description should be written in a similar manner to other courses in the same program, department, or school.

Need for the Course: For a new course, please briefly indicate the rationale for adding the new course. Please focus on the need/rationale for the course rather than a repetition of the course content from the course description. Several issues may be discussed here including accreditation standards, nature of course (elective vs. required), part of a new program, replacing another course, etc.

Course topics: Course topics are generally the topics that would appear on a syllabus for the course. They should be related to the course description (i.e., the content of the course). A listing of course topics that are not consistent with the content of the course description is problematic. A listing of course topics that do not seem consistent with the learning outcomes would also be problematic.

Texts/Readings: This section requires full citation(s) including publication year. Texts/reading should be as current as possible. If there is an indication of varied readings, then a few examples must be given. Single statements such as “readings will vary” are not acceptable.
**Key grade factors:** This section should indicate % of grade (for example: midterm = 30%, final = 40%, paper = 30%). Make sure the total adds to 100%. A high percentage for a factor such as “participation” may be questioned, given the course type.

**Summative experience:** Every course must have a summative experience. Typically, this is a final exam taken during the scheduled final exam period. It could be a presentation during the final exam time or final paper/project that is turned in during the final exam period. **Please clearly note the summative experience in this section, even if the summative experience (e.g., final exam) is listed under key grade factors.**

**Relation Tab:** This tab may be used as a means to request a consultation with another department or school if needed. As this process results in an OCEAN notification to the department (which may easily be missed), **ICC strongly recommends also sending an email to the appropriate curriculum representative alerting the department or school about the consultation.** All comments should be documented on the Discussion tab. If there is a problem, then the two departments need to resolve it. Typically, two weeks is given for a department to respond to a request for consultation.

**Discussion Tab:** This tab serves as a permanent record of any discussion of the course by departments. If the result of a consultation with another program was not added directly to the Discussion tab, cut-and-paste the response into the Discussion tab.

**General education:** For any course requesting general education status, thoughtfully integrate (not copy and paste) the general education learning outcomes into the course learning outcomes. That is, the student learning outcomes must clearly reflect the purpose of the general education course/category. It is recognized that some general education outcomes do not have measurable language (e.g., participate); however, all new courses are expected to have measurable outcomes. All Tier I Junior English Equivalent courses need to include the completion of Tier I Freshman English (ENG 1510 or 1610) as one of the requisites. Tier 3 courses should indicate SR for requisite and have a grade eligibility code 01. (See Appendix F for more information).

**Dual-listing:** Any change to a dual-listed course must have the change submitted for the undergraduate and the graduate versions of the course at the same time. There is no way to dual-list a new graduate course with an existing undergraduate course on OCEAN. In this case, put a note on the new graduate course Discussion tab addressing the following:
- The nature of the dual-listing (the other course number)
- Explain what the specific expectations are for graduate students with respect to evaluation (qualitatively and quantitatively).
(ICC does not accept general statements relating to the expectations for graduate students).
APPENDIX H: Service Learning Courses

In Spring Semester 2015, the University Curriculum Council passed a resolution to implement a “C” suffix to designate service learning and community engagement courses at Ohio University. There are two procedures for developing c-courses: new course creation and course change. This appendix spells out the process for faculty wishing to create these courses. The Center for Campus and Community Engagement (CCCE) is available to support the development and delivery of service learning courses, and an important facilitator throughout the course creation process. Faculty members who are interested in delivering c-courses are encouraged to consult with the CCCE staff (https://www.ohio.edu/communityengagement/staff.cfm) before beginning the course design process.

New C-course Process
Step 1: Individuals seeking approval for course with c-designation should complete the Service Learning Course Planning Form, which is available on the CCCE website (https://www.ohio.edu/communityengagement/). The document includes information about the five criteria for Ohio University service learning or c-designated courses. Completing this document will help faculty plan a successful service learning experience.
Step 2: Once the planning document has been completed, the course creator should contact CCCE (3-4801) to request a Box folder for the new course within the ICC C-course folder. The completed C-designation course planning form should be saved in the folder. The form will be reviewed by the CCCE staff. The CCCE will then contact the faculty member to discuss the outcome of the review.
Step 3: Once the course planning form is approved by the CCCE, please complete a new course proposal in OCEAN. Go to the “Course Description” field in the “Course Info” tab. Following your basic description of the course, you will include the following:
• If you are only offering this course with a service learning option, you should write “This is only offered as a service learning course.”
• If the course will sometimes be offered without the service learning component, you should write, “This course will sometimes be offered with a service learning component.” Beneath the “Course Description” field, you will see a field labeled “Additional Resources.” Within that field, provide a URL link to the course Box folder created in Step 2. The CCCE will then add a note on the Discussion tab in OCEAN that the course proposal form has been approved.

Course Change Process
This process should only be used for courses that already exist, but will be offered in the future with a service learning option. Begin by following Steps 1 and 2 listed above. Replace Step 3 above with the following:
• For courses only offered with a service learning component: Under the “Change” tab in OCEAN, type in the following language followed by the URL link to the Box folder created in Step 2: “This is only offered as a service learning course.” The CCCE will then add a note on the Discussion tab in OCEAN that the course proposal form has been approved. No other changes need to be made in the OCEAN system.
• For courses sometimes offered without the service learning component: Under the “Change” tab in OCEAN, type in the following language followed by the URL link to the Box folder created in Step 2: “This course will sometimes be offered with a service learning component.” The CCCE will then add a note on the Discussion tab in OCEAN that the course proposal form has been approved.

Notes:
• Do not include the “C” suffix in the course number. This will be added by the Office of the Registrar following the approval of the course.
• Departments currently offering service learning courses are encouraged to convert the current course to a “C” course and retire the previous course (unless it will continue to be offered without SL). If parallel SL and non-SL courses are offered, and they are retakable, a student may receive credit only for one of them, and standard retake rules apply (last one taken counts).
• Courses approved for service learning carry the sentence “This is a designated service learning course” in their course description.

Appendix H was added in October, 2015.
## Supplement 1: Top Reasons Why ICC Returns Courses

*Note: These are common reasons for course returns, but not an exhaustive listing.*

<table>
<thead>
<tr>
<th>REASON FOR RETURN</th>
<th>HOW TO REMEDY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Course Change: The “course change explanation” is not properly filled out</td>
<td>For each change you are making to a course, note 1) what you are changing, and 2) why you are making that change. Please be as specific as possible so the committee has a good understanding of the changes you are requesting and the reasons why you are making them.</td>
</tr>
<tr>
<td>Prerequisite text and prerequisite list do not match</td>
<td>If a prerequisite course is listed as an option (e.g., CSD 1080 or 2050) then the prerequisite list must include each course and indicate “no – not required.” If a prerequisite course must be taken (not an option among other courses), then the prerequisite list must include the course as “yes – required”</td>
</tr>
<tr>
<td>Student learning outcomes are not measurable</td>
<td>If you are making changes to the outcomes or creating a new course, please see Appendix D of this guide for assistance.</td>
</tr>
<tr>
<td>Typos</td>
<td>While accuracy is expected on all fields on the course proposal forms, carefully proofread the course short name, long name, course description, and prerequisite text for typos (as these are all published aspects of the course).</td>
</tr>
<tr>
<td>Summative experience</td>
<td>Please indicate the summative experience in the “summative experience” field, <em>even if it is already listed in the key grade factors for the course.</em> A summative experience is the final culminating product for the course. A formal final exam (written in class) is required in all courses with letter grades unless the instructor substitutes another method of evaluation (e.g., project).</td>
</tr>
<tr>
<td>Course components</td>
<td>If more than one component is selected for a course, each component will be scheduled separately (this is common for courses that have lecture and lab sections). Multiple components should not be used if there is not a defined separate section for the secondary component.</td>
</tr>
</tbody>
</table>
| Course short and long name                                                        | - Abbreviate words in short name so they may be easily deciphered. Please use standard abbreviations whenever possible (many are listed see Appendix B in this guide). Avoid odd abbreviations of words.  
  - Delete small words (such as of, and, the, etc.) before trying to abbreviate more essential words in the course short name  
  - Make sure the first letter in each key content word in the course name (short and long) is capitalized.  
  - Do not use punctuation marks unless it is crucial to the meaning of the course name.  
  - An ampersand (&) is acceptable to join words in short or long name.  
  - Acronyms specific to a discipline or that someone outside the academic department would not know or understand should not be used. |

March, 2015: Added to *Guidelines for Submission of New Course Proposals and Course Changes*
**Change Log**

March 2015 – reasons for course returns added as appendix H

October 2015 – Appendix H renamed to Supplement 1; new appendix H covers the process for service learning courses. The “C” course suffix definition was added in appendix A. A section titled “Service Learning Courses” was added to the body of the document.
