

# Community and Corporate Learning Center

At Ohio University Lancaster, the Community and Corporate Learning Center offers a wide variety of programs, courses and services to help you, your business, and your employees keep up. University credit programs, business / industrial training, distance education, and noncredit classes are offered in several formats. We offer professional development opportunities for those in the public and private workforce sectors.

## **Mission Statement**

*To provide high quality educational programs, services, and career development for non-traditional students through a variety of learning environments.*

## **Business & Industry Training**

Meeting your training needs on campus or at your worksite is part of our mission. We are the education training professionals, and we are here to assist you in enhancing employee skills, morale, and productivity.

## **Computer Training**

Constant changes in technology mean the skills needed in the workplace are also constantly changing. Computer courses are offered at the Lancaster Campus and off-campus locations, including places of work. We will train individuals or groups from area businesses on the latest computer technology.

## **Internet Training**

Through our partnership with Education To Go, we offer a wide range of highly interactive non-credit courses that you can take entirely over the internet. All of our courses are led by expert instructors, many of whom are nationally known authors. Our online courses are affordable, fun, fast, convenient, and geared just for you.

## **Kids In College**

Kids In College provides an opportunity for highly motivated students in fourth to ninth grades to reinforce the knowledge and instruction they receive in school. Faculty members at Ohio University

Lancaster Campus and other qualified instructors teach the courses. Class enrollment is limited so that students receive individual attention. The courses are designed to be a "hands-on" experience.

## **Workshops**

These short duration courses are offered for professional development, as well as for undergraduate or graduate credit.

## **Emergency Medical Services Training**

The Ohio University Lancaster Emergency Medical Services (EMS) program prepares students for an important career and for National Registry examinations. Successful completion of the program and national examination gives the student an Emergency Medical Technician (EMT) or an EMT-Paramedic designation. Choose the program that fits your experience level to move toward a fulfilling career in Emergency Medical Services.

## **60+ Program**

Credit classes (on a non-credit basis) are available free of charge to Ohio residents aged 60 or over. Space available in the classroom and permission of the instructor are both required.

## **Facility Rental**

Classrooms and certain other facilities are available for rent to organizations on a space-available basis. Reservations are required.
