**Behavioral Objectives:** At the completion of this workshop participants will be able to:

- **Objective #1**: To engage students in hands-on learning and concepts
- **Objective #2**: To practice clinical skills in a primary care setting
- **Objective #3**: To think through a patient case with a multi-disciplinary approach

**Abstract**

Dr. Murphy and Michelle Sergi are putting together a robotic simulation case with clinical skills lab associated in order to increase the student interactive learning and interest in a primary care setting.

**Please indicate length of presentation (50 minutes or 2 hours)**

Dr. Murphy will start with an hour of a robotic simulation prevalent to interprofessional teams and primary care. Dr. Bales will be presenting about opioid addiction in the primary care setting for the second hour.

**Describe in outline form how the time will be spent:**

- Dr. Murphy: 10 minutes - presenting the case/intro, 20 minutes of hands-on practice with clinical skills, 20 minutes working with case in small groups
- Dr. Bales: Lecture will span most of 50 minutes with Q & A session at the end.
