In 2014, we defined primary care research as, “...directed toward that better understanding and practice improvement of primary care (Mold, Green et al, 2000). As such primary care research covers the entire spectrum of clinical problems in offices as well as the organizational delivery of primary care (adapted by NAPCRG). In addition, primary care research provides an opportunity to embrace the voice of the consumer and the community in the design, implementation, and interpretation of research.” Does this definition still encompass our work?
