DISCOVERY AWAITS YOU

Medical student opportunities at Eli Lilly and Company
Lilly is a global pharmaceutical company that unites caring with discovery to make life better for people around the world. Across the globe, Lilly employees work to discover and bring life-changing medicines to those who need them and improve the understanding and management of disease.

Our Medical Student Intern and Medical Student Elective Rotation programs offer an inside look at not only the way we work, but also how the pharmaceutical industry works within the broader healthcare community, as well as possible career paths you can pursue.

Discover where your future can go. Start here.
The Medical Student Elective Rotation Program is our experiential learning program designed to supplement and support your formal training. Student rotations are located at our corporate headquarters in Indianapolis and last 4 weeks.

**In the Medical Student Elective Rotation Program, you will:**

- Receive hands-on experience and learn the intricacies of the drug discovery and development process
- Gain deeper insight into the pharmaceutical industry and its place in the practice of medicine
- Operate under the guidance of a preceptor and team who help tailor your rotation curriculum to your skills and interests
- Network with healthcare professionals and executives at Lilly through planned events and activities

**Benefits to all students**

Students participating in our rotation and intern programs are matched with projects based on our business needs and your skills and interests. You will be expected to meet core requirements and present results of your project experience to a designated team. You’ll receive free parking and, if you need to relocate, possible aid with housing and transportation costs.
ARE YOU A GOOD FIT?
At Lilly, we seek top performers who can uphold the Lilly values and exemplify our global standards of leadership.

The ideal students for the program will be:

- Engaged in a doctoral degree program in a health sciences-related field, such as M.D. or D.O.
- Familiar with the healthcare industry or related field (pharmaceutical, clinical practice, research or academic)
- Self-motivated, team players with the ability to work in a non-traditional setting
- Skilled in project management and both oral and written communication
- Versed in technical and scientific languages to communicate with key internal and external stakeholders (medical affairs, research and development)
- Proficient in Microsoft Office applications (Word, Excel, PowerPoint, Outlook)

Academic partnerships and collaborations
We value excellence, and we bring together the best minds to find solutions. To complement the scientific knowledge and clinical expertise of our employees, we work with a network of clinical investigators, medical societies, academic and medical institutions, and patient advocacy organizations. Plus, our medical employees provide their expertise in many ways to our healthcare partners, as subject-matter experts, study reviewers, guest lecturers, adjunct faculty, and consultants, to name a few.

Partnerships and collaborations that allow for the scientific exchange of information, technology and discovery help drive solutions essential to making lives better.
