Finding Answers When Parents Ask...

Why isn’t she talking yet?

Why can’t he get along with others at day care/preschool? Could it be autism?

Is my child hearing what I say?

Does my child have ADHD?

Do young children need mental health services?

Will I have to give my child medication?

Southeastern Ohio Interdisciplinary Assessment Team

Please meet the team of professionals who will be providing your child an interdisciplinary evaluation for behavioral and developmental concerns. Together the Interdisciplinary Assessment Team promotes collaboration and cooperation among local agencies to provide coordinated and comprehensive care for children in our community.

The SEO-IAT was developed by Integrating Professionals for Appalachian Children in collaboration with Nationwide Children’s Hospital through funding from the U.S. Dept. of Health and Human Services-HRSA. Ongoing support is provided by the Ohio Dept. of Health and IPAC.
