Change the Course Entry Page

The default course entry page remains the “Homepage” in Bb 9.1. The Homepage is an excellent place to start a course because its modules allow users to get a brief overview of everything that is occurring in the course. However, you can change the course entry to another page, such as an Announcements page (if you have one—see “Adding to the Course Menu” for creating navigation buttons and tool links), if you like.

Changing your Course Entry Page:

1. Login to Blackboard.
2. Select the course within which you wish to work.
3. In the “Control Panel,” select Customization.
4. From the “Customization” sub-menu, click Teaching Style.
5. On the “Teaching Style” page, scroll down to section 2, and from the drop-down menu, select the item you wish to make your course entry page.
6. Scroll down and click Submit.

Note: As mentioned in the introductory description, you may not see the page you wish to make your course entry point in the list provided in step 6. If this is the case, please see "Adding to the Course Menu" for creating navigation buttons and tool links, then return to this document to make a new page the course entry point.
