Using Blackboard’s Course to Course Navigation

Blackboard’s course to course navigation feature allows you to navigate from the course you are in to another course without having to re-visit the My Courses list on the My 9.1 Bb tab. Additionally, the course you choose will open in the same tool or content area that you were using in the original course.

1. Login to Blackboard.
2. Open one of your courses.
3. To navigate to another course, click the down-arrow button next to the Home button at the top left to see a list of your courses.
4. Click the name of the course you wish to navigate to.
5. The course you selected will open to the same tool or content area that you were using in the previous course.
