Creating a Guest Account in the Guest Network Registration System

Guests of Ohio University’s faculty, staff, or students must create an account in the Guest Network Registration System in order to request sponsorship or to redeem a voucher. If you redeem an active voucher code, access to the wireless network will begin as soon as the creator of the voucher code approves your request. If you redeem an active voucher code that is set to auto-approve, access to the wireless network will begin as soon as you finish creating your account. If you request sponsorship from a faculty/staff member or a student, access to the wireless network will not begin until your sponsor accepts your sponsorship request.

Access the Guest Management System at [https://webapps.ohio.edu/gnr](https://webapps.ohio.edu/gnr)

Under the blue login button, select **New user? Click here to get started**.

The next page will contain a form to fill out. First name, last name, email address, and password are required. A phone number is optional but helpful if your sponsor needs to contact you. If you have a voucher code provided by an Ohio University faculty/staff member, enter it. Otherwise, enter the OHIO ID of the employee or student who is sponsoring you. Your sponsor will receive a message to review the sponsorship request.

When the form is completed and submitted, you will see a confirmation screen containing your username. Account details will also be sent to the email address you provided.
