These initiatives are being undertaken to achieve the efficiencies and accountability necessary to support the six goals of the FYVOIP:

1. Recruit and retain talented and diverse students, faculty, and staff.
2. Strengthen undergraduate education.
3. Enhance graduate and professional education and research.
4. Enrich the environment for students, faculty, staff, and the region.
5. Fortify and align infrastructure to enhance the academic missions of instruction, research, and service.
6. Enhance prominence within Ohio, the nation, and the world.

*Major strategic initiatives are understood as projects that will involve a significant number of planning units either in development and/or implementation; will require new practices, policies, training, and, in some instances, reorganization.
