Associate of Applied Science
Law Enforcement Technology

Upon completion of the law enforcement technology major, students will:

- Demonstrate foundational skills in the administration of justice by differentiating the role of police, corrections, courts and community in contemporary America.
- Assess the evolution of policing in America through a core recognition of law enforcement history, organization, subculture and criminological theory.
- Recognize the legal elements of a Constitutional case study in order to assess criminal law, rules of evidence and the role of the courts in the adjudication of the law in America.
- Integrate knowledge from discipline specific courses in criminalistics, rules of evidence, narcotics, homeland security, and patrol operations to effectively conduct a criminal investigation.
- Demonstrate an analytical ability to make proactive decisions through knowledge of contemporary criminal justice information systems, computer technology and effective deployment of technology in collaboration with the community to reduce criminal opportunities.
- Analyze criminal justice research in order to develop evidence-based practices.
- Develop a criminal justice ethical perspective consistent with 21st century America in order to effectively and ethically perform a criminal justice role in law enforcement, corrections or the courts.
- Use the LET degree as a platform to complete an advanced degree in criminal justice.
