

MSN to DNP

Doctor of Nursing Practice

School of Nursing

- Acquire knowledge of advanced clinical or executive practice.
- Develop expertise in such areas as informatics, health policy and epidemiology.
- Prepare to lead and collaborate with a team to implement practice change projects.
- Develop and utilize interprofessional competencies through individualized electives and practice experiences.

The DNP program offers a concentration in advanced clinical or executive practice to further expand the knowledge and skills of the advanced nurse clinician or administrator. Classes are offered in a blended format, including both web-based and on-campus intensives (OCIs) throughout each course. Students will need to plan for one campus visit a semester at the Athens or Dublin Campus to engage in interactive, interprofessional activities, while learning from faculty, expert leaders in the field and peers.

Doctor of Nursing Practice: MSN to DNP

DNP Admission Requirements

- Valid, unrestricted RN license in approved states is required. See website for details.
- Undergraduate research methods course and statistics course.
- Two years professional experience working as an RN.
- An admission interview with faculty is required.
- Minimum cumulative GPA of a 3.2 on a 4.0 scale in BSN coursework.
- Written professional goals statement in APA sixth edition style.
- Three letters of reference, at least one must be an RN/APRN and at least one must be a Master's or Doctoral level of preparation.

Students may also build on previous knowledge in order to complete a Post-graduate Certificate as a Psychiatric-Mental Health NP; an Adult-Gerontology Acute Care NP, a Family Nurse NP, or take additional coursework that may lead to a certificate in such areas as Nurse Leader, Nurse Educator and more. Visit our website for more information on all available certificates at Ohio University. (www.ohio.edu/chsp/certificates)

Students in the MSN to DNP will build on previous knowledge and skills to develop expertise in such areas as specialty clinical practice, advanced leadership, health policy, informatics and more.

The curriculum is offered part-time and includes:

- 36 credit hours
- Clinical practicum hours required, with number needed dependent upon previous graduate work and clinical hour approval
- On-campus intensives (OCI)
