Dean's Message

We in the College of Health Sciences and Professions are pleased to share this report of our recent research and scholarly activity. Through sustained creative effort, our faculty produced an impressive array of publications, presentations, and extramural grants. They also mentored many undergraduate and graduate students, as reflected in a special section highlighting students' accomplishments.

We are proud of the community of scholars who reside in the College and know they are making important contributions to the advancement of health and wellbeing through the research they do—whether it is in one of the research labs here on campus, a healthcare setting, or in the community.

Collectively, the scholarly effort of our faculty and students has a broad impact not only within our respective scientific disciplines but also on our professional and pedagogical endeavors. I invite you to read through the following pages in hopes that you will appreciate the volume, scope, and quality of the research accomplished by my colleagues in the College of Health Sciences and Professions.
