The Data Analyst position supports the activities of the Office of Global Opportunities (OGO) by assisting OGO staff in interpreting study abroad/away data to identify trends and make data-informed decisions. Duties include combining data from multiple sources, creating data models and producing annual and ad hoc reports.

This position will have the opportunity to propose new data models, data collection measures, and other structures to improve the data-quality. They will help fulfill the Office's mission and achieve the University's goal of increasing the number of students who participate in global programs.

This position is appropriate for a student who has an attention to detail and would like to gain valuable skills in data collection and analysis, as well as general office skills.
