Your health is important to all of us at Ohio University.

The best way to stay healthy is to emphasize good hygiene, social distancing and wearing facemasks. But if you start to feel sick, it’s important to know when to stay home and what to do next.

To help prevent the spread of disease to others, we ask anyone with a fever or other symptoms to self-isolate and call the Ohio University COVID-19 Response Hotline.

Call the Ohio University COVID-19 Response Hotline
877-OU-COV19 (877-682-6819)

Ohio University students and employees should call the hotline if they are experiencing COVID-19 symptoms.

• If a COVID test is needed, the Ohio University COVID-19 Response Hotline will connect with a provider who will order the test for you and provide information regarding a testing location.
• An OhioHealth case manager will contact you with the test results and follow up with information including returning back to work/school.

NOTE: This hotline is for Ohio University students and employees only.

Call 911 if you are experiencing life-threatening symptoms (e.g. persistent pain or pressure in the chest, new confusion, severe shortness of breath, inability to wake or stay awake, bluish lips or face).

Other COVID Questions?

Ohio Department of Health (ODH): Call Center open to answer questions regarding COVID-19:
