

## Configuring Java Exception Site List for EBIZ

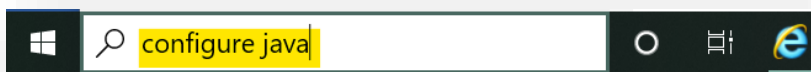

This document explains how to configure your Java settings to access Oracle E-Business Suite (EBIZ) forms.

If you have not yet added the EBIZ link to your exceptions site list, you will receive the error below.

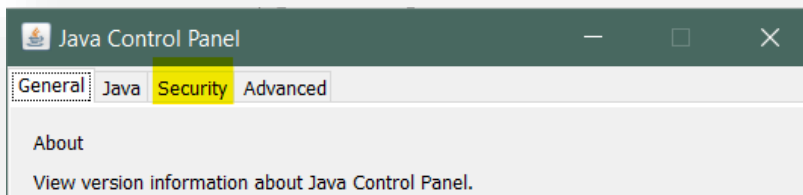

To add EBIZ as an allowable site in Java, follow the steps below:

1. In the windows search box on your task bar, type **Configure Java**, then press **Enter**

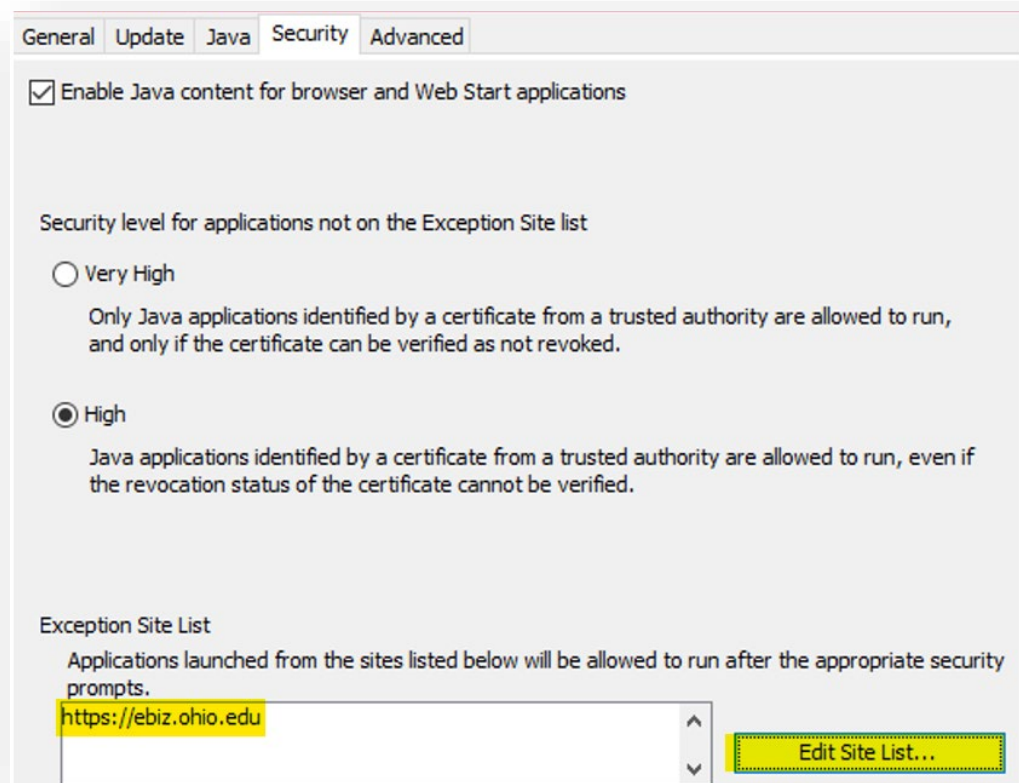

2. Click on the **Security** Tab

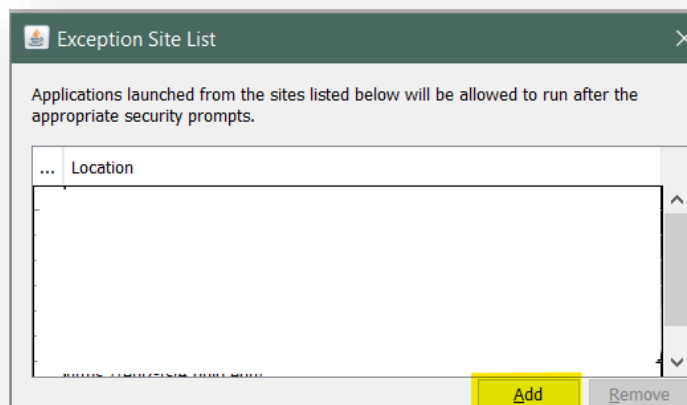

# EBIZ: Configuring Java Exception Site List

3. In the Exceptions Site List box, please make sure you have <https://ebiz.ohio.edu> listed. If you do not, click on the **Edit Site List** button and continue with the remaining steps listed below.

4. Click the **Add** button

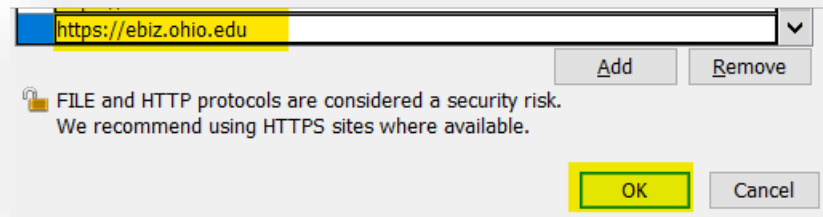

5. A new row will appear at the bottom of the white box above the Add button, click on that new row.

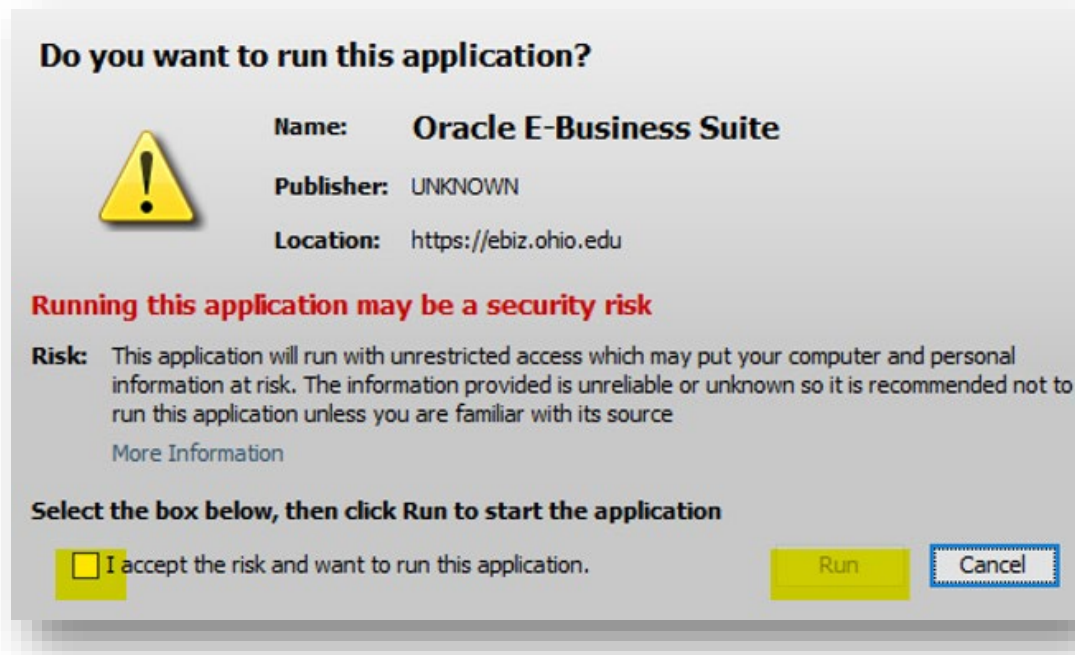

# EBIZ: Configuring Java Exception Site List

6. In the new row, enter the following link: **https://ebiz.ohio.edu**, then press **OK** (press OK on all remaining windows until closed)

7. Close any browser windows that you may have open. Make sure you are connected to the VPN or VDI if not connected to an OHIO network, and then relaunch Oracle EBIZ.
8. After logging in, you may see the window shown in the screenshot below. Check the box next to **"I accept the risk and want to run this application"**, and then press the **Run** button. The Oracle EBIZ form should then open.

Questions? Contact the OIT Help Desk at (740) 593-1222 or [servicedesk@ohio.edu](mailto:servicedesk@ohio.edu).
