

<b>Title:</b>	<b>Guide to Install Java</b>	<b>Document ID: JAV01</b>
<b>Replaces:</b>		<b>Date Modified: 05/06/2016</b>

**Purpose:** The purpose of this document is to assist employees with the removal and reinstallation of Java. Oracle E-Business Suite requires the latest version of Java.

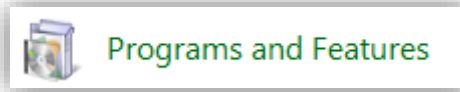

**For Questions Contact:** Service Desk, 740.593.1222, or submit a [Service Request](#) online.

## Table of Contents

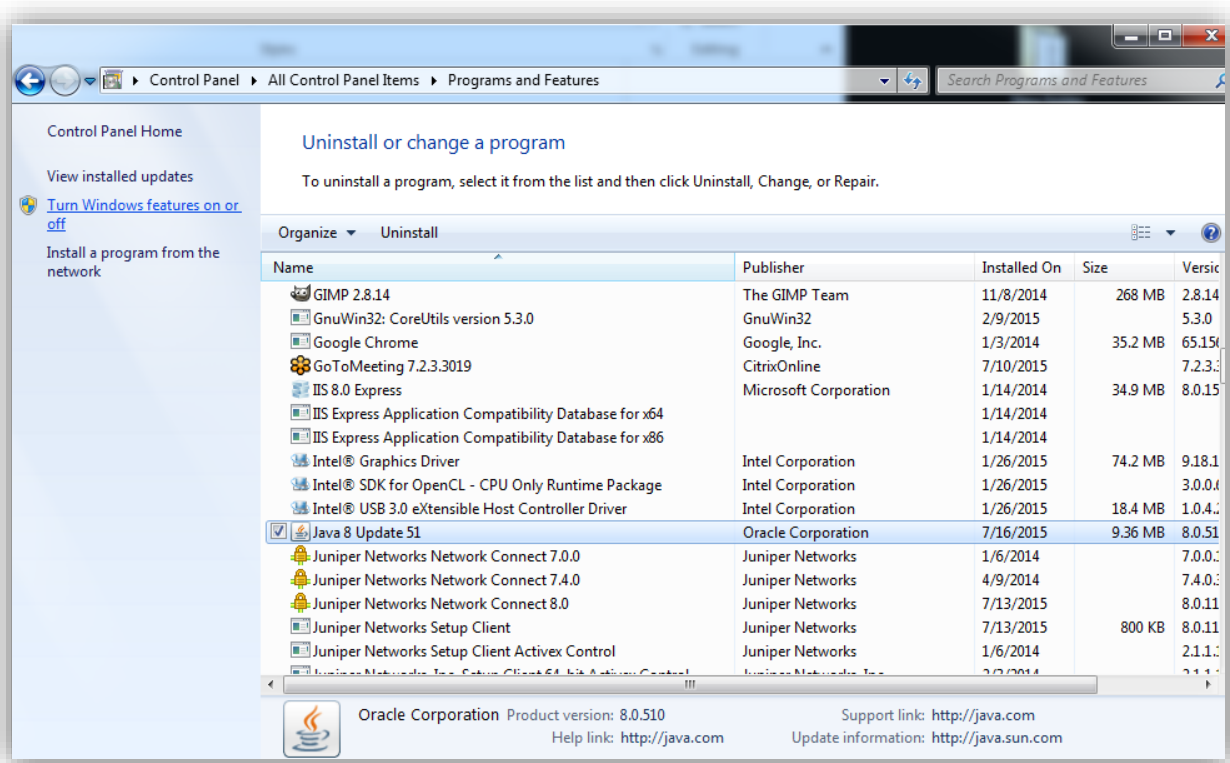

<b>UNINSTALL ALL VERSIONS OF JAVA .....</b>	<b>2</b>
<b>DOWNLOAD AND INSTALL JAVA .....</b>	<b>3</b>
REMOVE OUT-OF-DATE JAVA VERSIONS .....	6
RE-ENABLE JAVA'S SECURITY PROMPTS .....	9

## UNINSTALL ALL VERSIONS OF JAVA

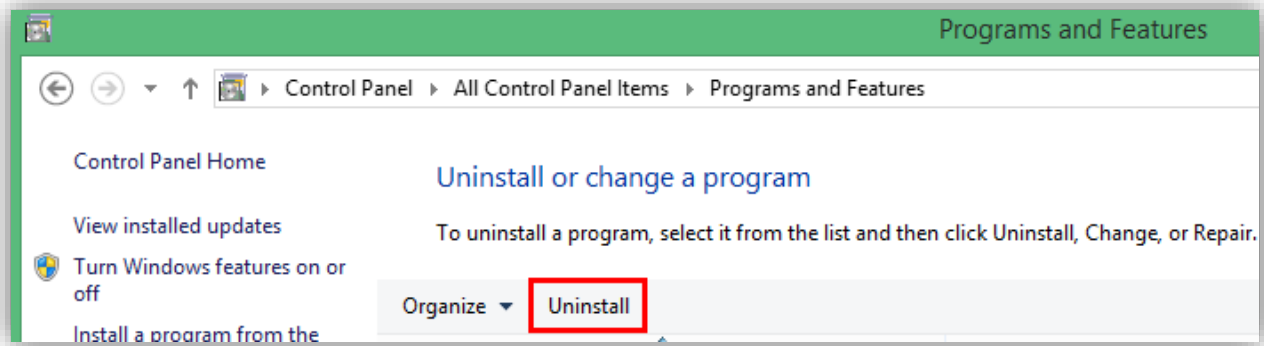

1. From the **Start** menu, trace to **Settings**, and click **Control Panel**.
2. In the list of *All Control Panel Items*, locate and click **Programs and Features**.

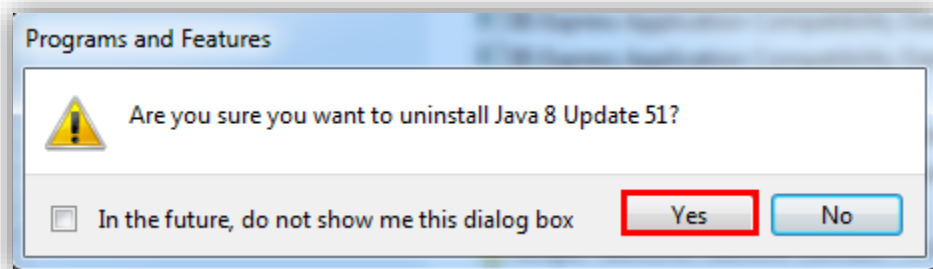

3. In the list, locate and click **Java**. **NOTE:** The list displays in alphabetical order. Your list is unique to your computer.

4. Click the **Uninstall** link (at the top).

5. To confirm, click **Yes**.

6. Proceed through the prompts. Click **Yes**.
7. If you have any browsers open, click **Close and Continue**.
8. Repeat steps 1-7 until you have uninstalled all versions of Java.

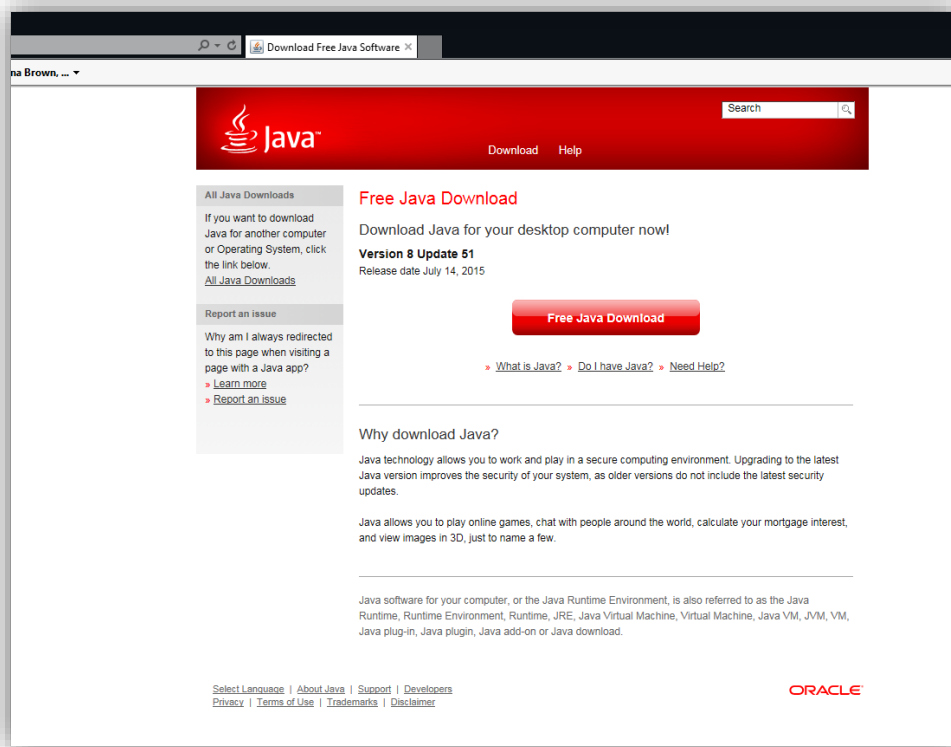

## DOWNLOAD AND INSTALL JAVA

1. Open Internet Explorer (IE) and navigate to <http://www.java.com/download>

---

**WARNING: YOU MUST USE INTERNET EXPLORER TO INSTALL JAVA.**

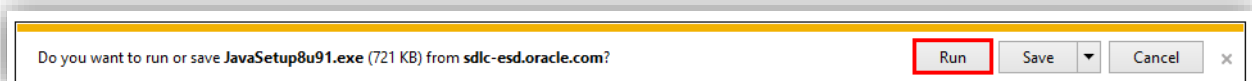

---

2. Click the **Free Java Download** button.
3. Click the **Agree and Start Free Download** button.

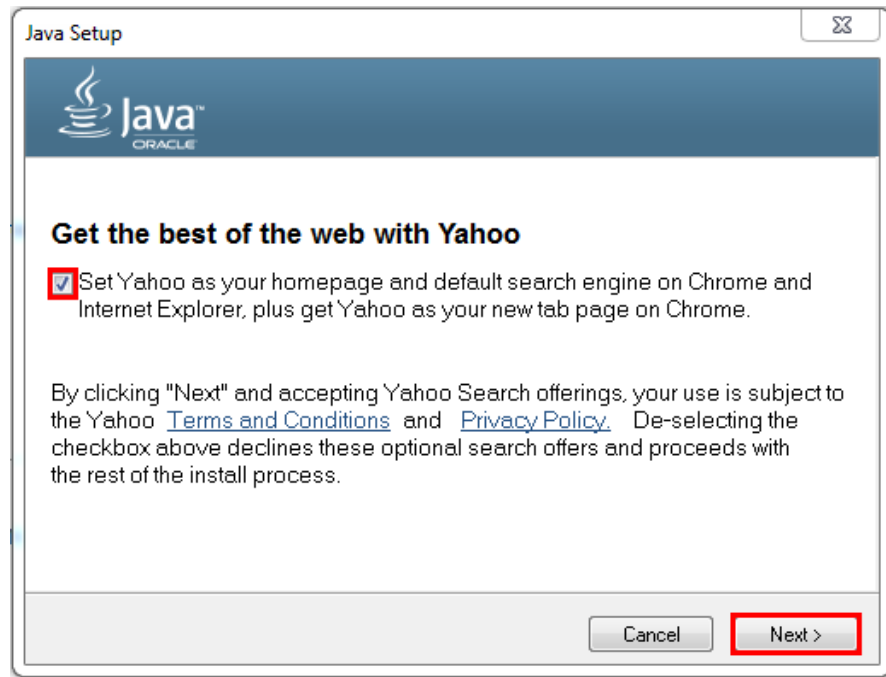

4. The following will display at the bottom of your browser's window.

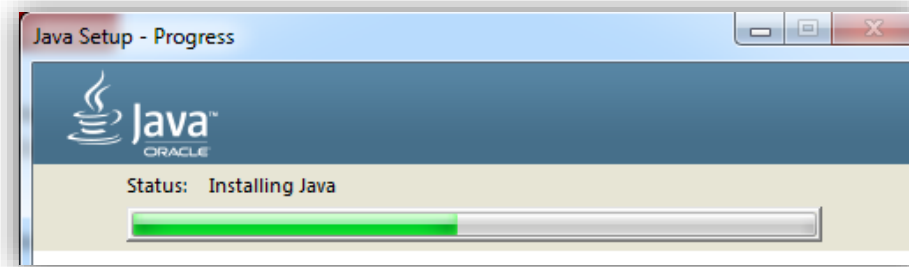

5. Click **Run**.
6. Click **Yes**.
7. Click **Install**.

8. **Deselect** the checkbox to set Yahoo as your homepage and click **Next**.

The progress window will display.

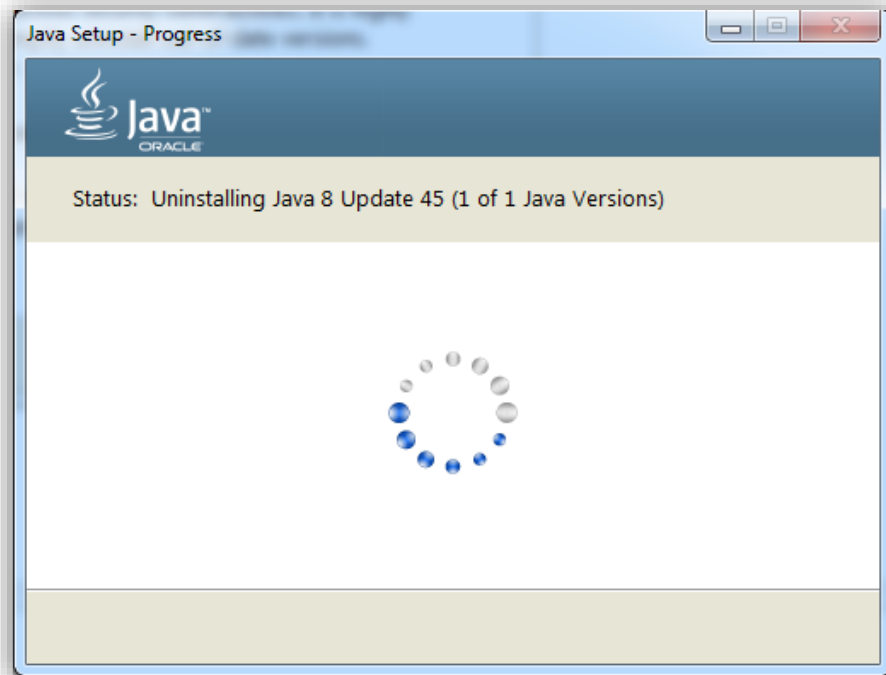

## Remove Out-of-Date Java Versions

After installing Java, the following window may or may not display. **NOTE:** Java remnants may be left behind during uninstallation. The following process will remove out-of-date Java versions.

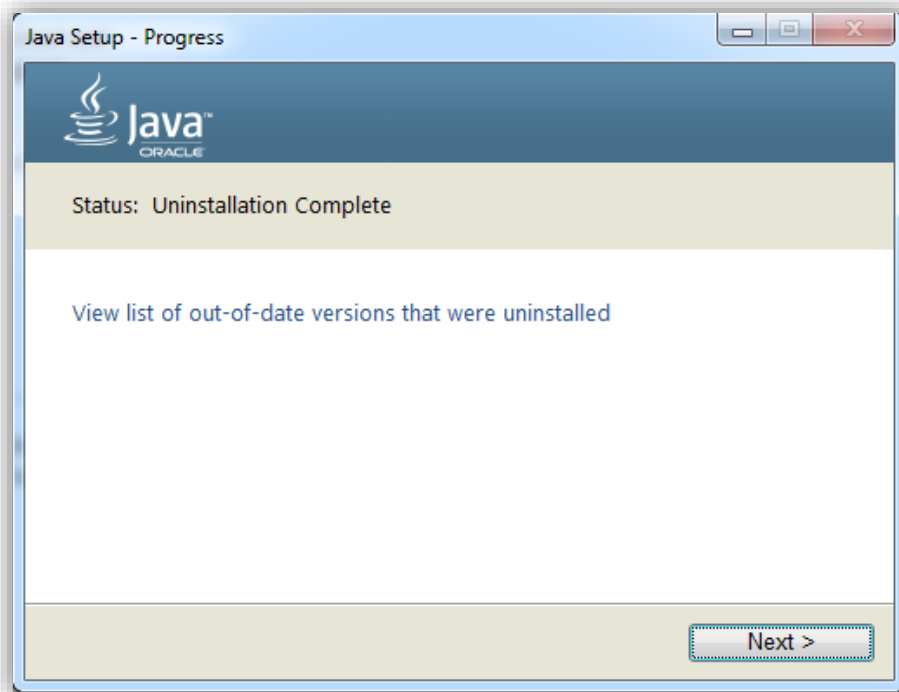

1. If the *Java Setup – Uninstall Out-of-Date Versions* window displays, click **Uninstall**.

The following window will display.

2. Click **Next**.

3. Click **Close**. Java will redirect to Java's verification page. **NOTE:** This step is optional. If desired, follow the prompts to verify Java.
4. To ensure Java forms open successfully, use *Internet Explorer* (IE) to access a Java form (not an HTML form) in Oracle E-Business Suite. If the form does not open, follow the steps to *Re-enable Java's Security Prompts*.

---

**WARNING: USE INTERNET EXPLORER TO ACCESS THE JAVA FORM FOR THE FIRST TIME.**

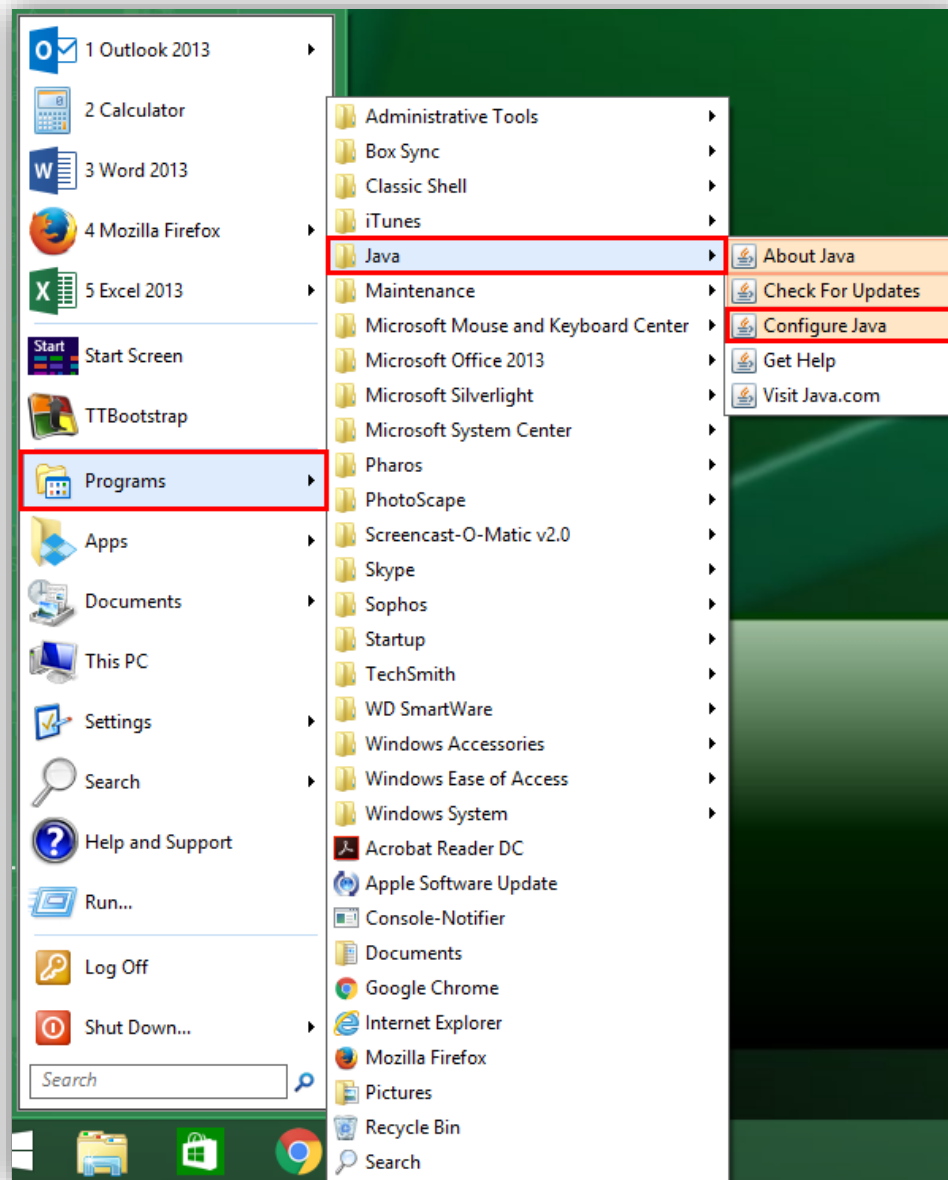

---

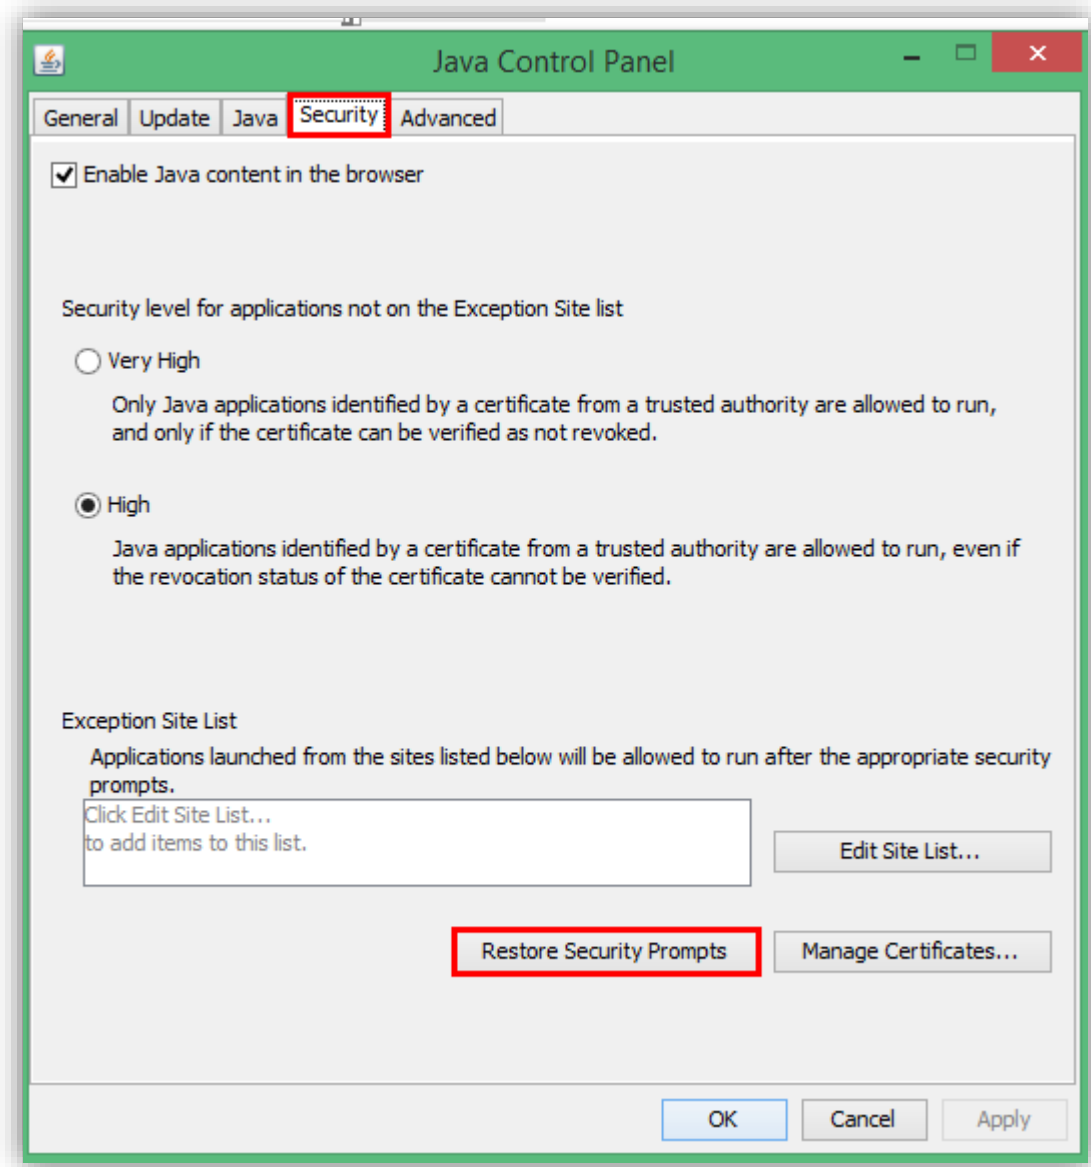

## Re-enable Java's Security Prompts

Occasionally Java's security prompts must be re-enabled.

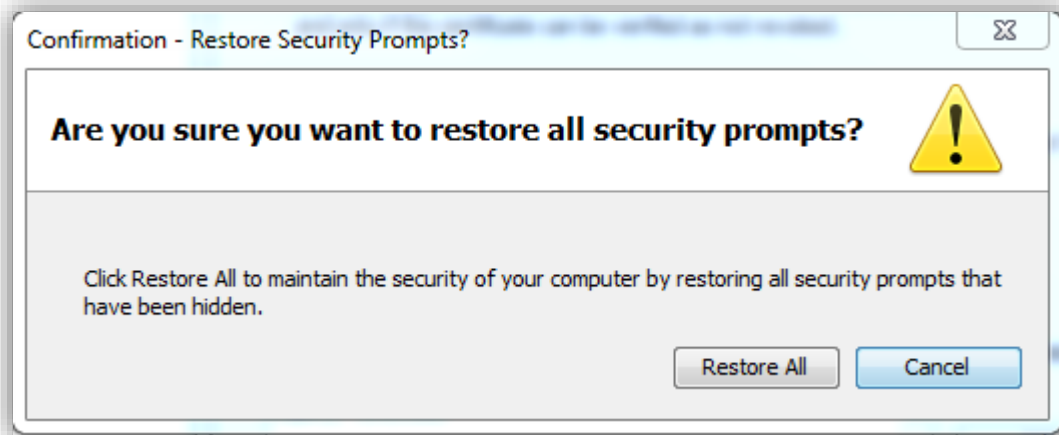

1. To re-enable Java security prompts, from the **Start** menu, trace to **Programs**, then **Java** and click **Configure Java**.

2. Click the **Security** tab. The following window will display.

3. Click the **Restore Security Prompts** button.

4. Click **Restore All** and click **OK**. To ensure Java forms open successfully, use *Internet Explorer* (IE) to access a Java form (not an HTML form) in Oracle E-Business Suite. **NOTE:** When asked if you want to use Java, click **Run**. You must do this for each Oracle E-Business Suite environment. Additionally, you may need to click (multiple times) **Run With Latest Version** in multiple popup windows while accessing the instance. This should only happen once per instance.
