30-34	.23
35-39	.20

To calculate your premium, divide your annual salary by 52 weeks to determine your weekly benefit. Multiply this by 60% then divide by 10 and multiply by the rate that corresponds to your age. The formula is:

Annual salary / 52 x 60% / 10 x Rate per \$10 of Coverage

For example, the rate for an individual age 40 earning \$50,000 per year is:

\$50,000 / 52 x 60% / 10 x \$0.20 = \$11.53 per month
