Recommendation for a Reduced Course Load for Medical Reasons

Background information: Immigration regulations require F-1 and J-1 international students to be enrolled fulltime each semester. Fulltime enrollment for undergraduate students is at least 12 credit hours and fulltime enrollment for graduate students is at least 9 credit hours.

A student may be authorized to enroll less than fulltime or no coursework at all for a given semester if the student has a medical condition that prohibits a full time course load. This request requires medical documentation from a licensed medical doctor, doctor of osteopathy, or licensed clinical psychologist.

Please note that we do not need to know the details of the health issue. We only need to know that the doctor recommends the student be enrolled less than fulltime or no coursework at all.
