KIDS IN COLLEGE '22 AT OHIO UNIVERSITY LANCASTER

KIDS IN COLLEGE '22 provides an opportunity for highly motivated students to reinforce the knowledge and instruction they received in school. Faculty members at OHIO Lancaster and other qualified instructors will teach the courses. Class enrollment is limited so that students receive individual attention. The courses are designed to be a 'hands-on' experience. Parents of children should accompany their child to registration on the first day of the program.

The campus reserves the right to change the schedule of programs and to cancel programs where enrollment is insufficient. No refunds will be made after the first meeting of the class.

ARTS, MUSIC, AND DANCE

Contemporary Jazz Dance
Learn how Jazz, Modern, and Ballet have been fused together to help create the style now known as Contemporary. Contemporary is a dance style that is very physical, being grounded into the floor one moment and then up in the air the next while 'feeling' the music. We will put together an exhibition show on Friday that you can invite family and friends to see. You will need clothing that allows movement, socks, water, and bring thin knee pads if you have them. Class Instructor: Tonya Krane

Hip Hop Dance
Learn a sample of several styles of Hip Hop including street, commercial, flow, breakin', and stomp to name a few. We will put together an exhibition show on Friday that you can invite family and friends to see. You will need clothing that allows movement, tennis shoes (no sandals or flip flops!), water, and bring thin knee pads if you have them. Class Instructor: Tonya Krane

Let Me Get My Hands on a Dulcimer!
You can play the mountain dulcimer — no prior instrumental experience is required!Loaner instruments will be provided for in-class use. In this class, you will learn to read tablature to play traditional American folk tunes, write your own lyrics to a song, and learn to play chords to back up singing. The week will end with a brief "Performance" to share what you have learned. There are a limited number of instruments available so register early. Class Instructor: Kathy Smith

Musical Theatre Dance
Do you love all that is Broadway, perform in shows, and/or sing along to musicals? Then this class is for you! Learn dance styles used in Golden Age and Contemporary musicals and Broadway shows. We will put together an exhibition show on Friday that you can invite family and friends to see. You will need clothing that allows movement, tennis shoes (no sandals or flip flops!), water, and bring thin knee pads if you have them. Class Instructor: Tonya Krane

Pinterest
Students will make a wreath, dye tie an item, decoupage an item, make a tile coaster, antique a picture frame, and many more items during the week. Lab Fee: $30, Class Instructor: Suzanne Mulrooney

COMPUTERS

Computer Aided Drawing
Students who have an interest in engineering or architecture or simply in exploring computer art will experiment with hands-on drawing using CAD programs. No prior knowledge of computers is required. Class Instructor: Ray Mulrooney

GAMES

Games, Games, Games!
In this class we will be playing games! Board games, card games, dice games, and more. Sorry no video games! Not only will we be playing games but we will be learning about the history of the game as well. Please come with a fun, friendly, competitive spirit to play games!! Class Instructor: Amy Stone

HISTORY

Grow Your Family Tree
Have you ever wondered where your ancestors are from? What were their lives like? Where did they live, and what kinds of jobs did they have? Did they look like you? In this class, you will begin to answer questions like these as you begin to build your very own family tree. Class Instructor: Natalie Herdman

History of Baseball
If you have an interest in Baseball and its history, you will enjoy this class. We will talk about its beginnings before the Civil War, its rule changes, the Greats of the Game, the ladies who played during the war, the Negro leagues, its moving West and its expansion. Baseball if the American past time spread throughout the world during the war and in peace. Students will see many pieces of memorabilia. Class Instructor: John Mulrooney

History of World War I
From the assassination of Archduke to the Treaty of Versailles. The invention of the machine gun to the development of the airplane. Learn why World War I transformed war from the Napoleon style to modern day war. The History of World War I will explain why this was the start of World War II and the Communists taking over in Russia. You will have authentic World War I items to wear and see. Class Instructor: John Mulrooney
History of World War II
Why was Pearl Harbor attacked? We will discuss the reasons and results of World War II, and provide hands-on materials, autographs, and pictures. Class Instructor: John Mulrooney

“O” is for OHIO!
How much do you really know about Ohio's history and its famous or interesting people, places, and things? This class is all about learning the fun facts, trivia, and other knowledge about our State of Ohio that you may not have learned in school. In this class, you can learn more about our wonderful State of Ohio through games, videos, historical documents, fun activities, and much more. Class Instructor: Amy Stone

The Oregon Trail
Do you want to go on an adventure? Let's take a ride on the Oregon Trail and see if you can survive! During this journey students will learn all about the challenges and triumphs of pioneers faced while traveling the 2,000-mile trail. In this class you can learn about the Oregon Trail through games, videos, historical documents, fun activities, and much more. Class Instructor: Amy Stone

U.S. Presidents Facts and Fun
Come learn more about the 46 men who have been the Commander in Chief of our Country! This class is all about learning fun facts, trivia, and other knowledge about our U.S. Presidents that you may have not learned in school. Through games, videos, historical documents, fun activities and more you will learn about the Presidents. Class Instructor: Amy Stone

SCIENCE

Exploring Healthcare
This course includes CPR and First Aid Certification course from Health and Safety Institute content and video demonstrations. Students will learn and master skills by the use of manikins and hands on application. Lab Fee: $10, Class Instructor: Resa Tobin

Field Biology
In this course you will learn techniques in capturing, measuring, and/or identifying local flora and fauna. Students will go outdoors and record, in a field notebook, information about organisms discovered. In particular, local plants (wildflowers and trees), fish, and birds will be explored in this class. Lab Fee: $10, Class Instructor: John Ruenzi

S.T.E.A.M – Science, Technology, Engineering, Art, Mathematics
Do you like to do hands-on activities? Do you enjoy working with others? Are you creative? Have you ever wondered, when am I really going to use what my teacher is teaching me in the real world? S.T.E.A.M could just be the thing you are looking for. Learn how to create a food truck or restaurant, engineer a building or bridge, design a zoo, or even learn about heart rate and morse code. Any of these things are possible with S.T.E.A.M. Lab Fee: $15, Class Instructor: Melissa Stransky

SPORTS

Basketball
Learn the basic skills of basketball and how to work as a team. Wear tennis shoes and appropriate clothing. Class Instructor: Coach Phil McKnight

Taekwondo
Taekwondo is both a traditional martial art and a modern sport. Taekwondo is best known for its extensive use of fast, powerful and often spectacular kicking techniques, but also contains a wide range of hand techniques and uses of the entire body as a tool for self-defense. Class Instructor: Master Cho

LANGUAGE ARTS

American Sign Language (ASL)
Upon completion of this course, students will learn some basic American Sign Language (ASL). We will cover topics which may include the alphabet, numbers, colors, and more! Students will gain knowledge about the Deaf Community and be able to fingerspell their name by the end of the course. Class Instructor: Grace Gamsinski

Introduction to Ancient Greek
In this class, students will learn the basics of ancient Greek language, including the alphabet, common vocabulary words, and basic sentence structure. They will also learn how to recognize Greek roots in English words which can be very helpful on the ACT/SAT. During each class, students will have the opportunity to taste a different traditional Greek food item. Class Instructor: Natalie Herdman

Japanese
Students in this class will learn how to read and write Japanese. Examples include writing the different alphabets (some kanji included), numbers, food, clothing, days of the week, etc. Students will also watch daily cultural videos on Japan, from its mythology to archeology. Grades: 6th Grade to 9th Grade, Class Instructor: Victoria Ginty

Journaling for the Health of It!
Classes include an overview of why spending time to simply write your thoughts promotes health. Participants will learn to share gratefulness with others through card crafting, explore transparency and time management skills with journaling, and create a celebration banner embracing hopefulness. Together we’ll discover the fun and effort involved in paper crafting skills. Natural artistic skills are not necessary. Lab Fee: $35, Class Instructor: Resa Tobin
