<td>COURSE DESC: This course covers the history, analysis, flight mechanics, and design of modern rockets and missiles. A historical perspective of the significance and design practices used to develop rockets and missiles are explored. Each of the five major rocket and missile components are discussed and analyzed separately and then combined to form a flight system. Mechanics of flight and basic aerodynamics are covered in order to develop a six degree of freedom flight simulator. A final project occurs to allow exploration of a design and simulation of a full rocket delivering a payload or a tracking missile.</td>

**ENT ME**

**Eligible Grades:** GEC1: A-F, GEC4: A-F, CR, PR

**Course Description:**

- **Solar Design:** Introduction to theoretical principles and practical design aspects of solar energy systems. Topics covered include principles of radiation, heating load computation, air and liquid, flat-plate collectors; concentrating collectors; energy storage; photovoltaic conversion; economic analysis.

- **Automotive Engineering:** Overview of automotive engineering, including modeling, simulation, design, and testing of land vehicle systems with emphasis on performance, safety, fuel economy, and emissions. Broad exposure to all topics through case studies.

- **Vehicle Systems Design:** Introduction to the systems engineering design process for land and air vehicles through case studies and projects. Examines the process for developing a first layout for a new vehicle platform, including setting requirements, generating concepts, and predicting performance. Technical, economic, environmental and social aspects are considered.

- **Missiles guidance systems and rocket design:** This course covers the history, analysis, flight mechanics, and design of modern rockets and missiles. A historical perspective of the significance and design practices used to develop rockets and missiles are explored. Each of the five major rocket and missile components are discussed and analyzed separately and then combined to form a flight system. Mechanics of flight and basic aerodynamics are covered in order to develop a six degree of freedom flight simulator. A final project occurs to allow exploration of a design and simulation of a full rocket delivering a payload or a tracking missile.

- **Graduate Colloquium:** An open graduate colloquium for discussion of research topics, as well as possible future areas of interest. Guest speakers, faculty, and graduate students present results of their research with discussions moderated by the speakers.

- **Special Topics in Mechanical Engineering:** Specific course content will vary with offering.

- **Special Investigation:** An opportunity for graduate faculty to offer a one-time special topics course, or for students to select a special topic that is not covered in the current offerings of the University and study that topic under the mentor-ship of a qualified faculty member.

- **Introduction to Kinetic Theory and Statistical Thermodynamics:** Kinetic theory, classical and quantum statistical mechanics with applications to engineering devices.

- **Experimental Methods in Design:** Investigation and evaluation of experimental methods that may be used to obtain design and performance data. Probability, statistics, and principles of design of experiments (DOE) with application to thermo-mechanical experiments.

- **Advanced System Analysis and Control:** The application of modern control theories to the synthesis of dynamical systems. Topics include the analysis of the behavior of linear systems, controllability and observability. Synthesis in the eigenvalue domain: modal control. Synthesis of stable systems and optimal linear systems in the time domain.

- **Mechanics and Control of Multi-Degree-of-Freedom-Systems:** Techniques of analysis and design of multi-degree-of-freedom planar and spatial mechanical systems: kinematic structure, coordinate transformations, inverse solutions, workspace, path selection, dynamics, and control. Kinematically-redundant, mobile, parallel, and humanoid robots.

- **Intermediate Dynamics:** Review of Newtonian mechanics, fundamental concepts of analytical mechanics, partial differentiation of vector functions in a reference frame, configuration constraints, inertia scalars, vectors, matrices, and principal moments of inertia, Lagrange's equations, and rigid-body dynamics.

<td></td>
<td></td>
<td>This course will focus on analytical solutions to linear Partial Differential Equations (PDEs), with an emphasis on applications of PDEs in Engineering problems. The goal is to impart to students the excitement and usefulness of mathematics as a tool in solving real-world problems. The approach will be to look at the mathematical modeling &amp; solution of simplified Engineering problems. The course is intended to act as a foundation course for engineering graduate students coming from a range of backgrounds, but with previous exposure to multi-variable calculus and linear constant coefficient ordinary differential equations.</td>

<td></td>
<td></td>
<td>Examines the theory, derivation, and computer implementation of finite element methods for solution of boundary value problems. Study examples from heat conduction, solid mechanics, and vibration in one-, two-, and three-dimensional geometries. This fundamental approach will give users of finite element packages a deep understanding of both the power and limitations of FE techniques as well as providing a background to accurately use FE models. It will also provide a base for more advanced users to modify existing or write their own FE code. Use a programming language such as C or Matlab.</td>

<td>Approaches photography as a set of problems and concepts rather than as a unified medium with a linear history. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interest is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn.</td>

<td>This course explores the relationship between visual art and spatial modes of display, installation, collection, and exhibition. Using historical case studies, we question the white-wall gallery as the primary home of fine art, finding instead a rich history of alternative spaces and presentation techniques. Selected case studies include: cabinets of curiosities, salons, modern galleries, museums (art, science, natural history), department stores, archives, cities, gardens, fairs, and various mediated spaces (pictorial, electronic, virtual). This class considers how spatial conditions factor into the production and reception of art, visual culture, and media.</td>

<td></td>
<td>COURSE DESC: Approaches photography as a set of problems and concepts rather than as a unified medium with a linear history. Photography is marked by multiple, often contradictory practices at the nexus of differing discursive and contextual parameters. As a result, the main interaction is not only with the photograph as an object of study, but as a modality of thinking and a way of producing new models of visibility. We will investigate the criteria used to identify and discuss photographic images and practices over the century and a half since the inception of processes resulting in photographic material. At the same time, we will ask after the ways in which photographic practices elucidate aspects of the historical context from which they are drawn.</td>

<td>Hip Hop culture has profoundly influenced art since the 1970s. Hip hop has given voice to new art forms and new approaches to existing artistic practices. Its underlying concepts have been adapted worldwide into art unique to diverse geographic and cultural locales. Art and Hip Hop will explore this phenomenon within the context of traditional and contemporary art; polyculturalism and multiculturalism; activism and politics; and gender and race.</td>

**COURSE LISTING**

**SORTED BY College, Department/School, Prefix**

**FAR ART**

**ART 1121 Introduction to Drawing**

**COURSE DESC:** Introduction to Drawing develops fundamental skills and techniques in drawing with emphasis on creative expression, perception, and composition. No previous art experience is required. Designed for the non-art student in the general university seeking an appreciation and heightened understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration in a variety of drawing media.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration in a variety of approaches to drawing.

**ART 1161 Introduction to Ceramics**

**COURSE DESC:** Introduction to Ceramics develops fundamental skills and techniques in ceramics. Designed for the non-art student in the general university seeking an appreciation and heightened understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration in a variety of approaches to ceramics.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration in a variety of approaches to ceramics.

**ART 1113 Introduction to Film Photography**

**COURSE DESC:** Introduction to Film Photography develops basic camera and darkroom techniques using light sensitive materials with emphasis on creative expression, composition, lighting, and the art of film-based photography. No previous art experience is required. Designed for the non-art student seeking an appreciation and understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration with a single-lens reflex camera, 35mm film, and a traditional wet darkroom.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration with a single-lens reflex camera, 35mm film, and a traditional wet darkroom.

**ART 1141 Introduction to Digital Photography**

**COURSE DESC:** Introduction to Digital Photography develops basic camera and digital techniques with emphasis on creative expression, composition, lighting, and the art of digital photography. No previous art, photography, or computer experience is required. Designed for the non-art student seeking an appreciation and understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration with a digital camera, scanners, imaging software, and output devices.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration with a digital camera, scanners, imaging software, and output devices.

**ART 1151 Introduction to Painting**

**COURSE DESC:** Introduction to Painting develops fundamental skills and techniques in painting with emphasis on creative expression, perception, and composition. No previous art experience is required. Designed for the non-art student in the general university seeking an appreciation and heightened understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration in a variety of approaches to painting.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration in a variety of approaches to painting.

**ART 1171 Introduction to Printmaking**

**COURSE DESC:** Introduction to Printmaking develops fundamental skills and techniques in printmaking with emphasis on creative expression, perception, and composition. No previous art experience is required. Designed for the non-art student in the general university seeking an appreciation and heightened understanding of art and art practices. Students will gain experience and direct knowledge from hands-on exploration in a variety of approaches to printmaking.

**ELIGIBLE GRADES:** A-F

**REQUISITE:**

- Direct knowledge from hands-on exploration in a variety of approaches to printmaking.

<td>An introduction to design process and programming as related to the development of interior design and application within the planning and shaping of interior architecture. Students begin with a design problem, and see it through the various phases of research, programming, ideation, implementation and final analysis in design process thinking. For Interior Architecture programming addresses more specifically space planning and analysis of space to meet client needs. Concept statements, project statements, adjacency studies and diagrams are used as tools to help students analyze and develop a program in response to a given problem. Human dimensions, physiological and psychological aspects of the environment are studied as well as issues related to sustainable design, code issues, and ergonomic concerns are addressed.</td>

<td>Covers fundamental technical and conceptual issues of traditional analog photography. Skills covered include camera operation, film processing, printing, and principles of composition. In addition, slide lectures address pertinent issues in the history and current practice of photography. Through a combination of lectures, critiques, and workshops students learn the fundamentals of traditional silver printing as well as basic camera controls and other skills essential to future work in photography. Both black and white and color processes are examined.</td>

<td>This course utilizes an interactive lecture and experiential approach to build an understanding of the history, theories, principles, and practices of contemporary art therapy. Students explore how psychology and psychotherapy intersect with the creative process. Using both art produced from classwork as well as from other sources, students learn and practice how to explore artwork non-judgmentally in a manner that promotes an increase of self-awareness, health and well-being, and the concrete experience of change. Additionally, students study the range and uses of art therapy in a variety of community as well as clinical settings.</td>

<td></td>
<td>This course includes the exploration of alternative construction and surface application techniques in ceramics to foster expressive sophistication in the production of art. Mold-making is introduced as a tool for ceramic construction and to discuss contemporary issues in ceramics; such as, the reproduction, the found object, craft and the multiple. Independent artistic production is fostered alongside of technical skill building.</td>

<td></td>
<td></td>
<td></td>
<td>The class is designed to reinforce basic wheel throwing techniques and to introduce new technical and innovative approaches on the potter's wheel. The alteration of wheel thrown forms and the process of creating forms of greater complexity with multiple parts are emphasized. Utilitarian pottery is explored through the use of the potter's wheel, coupled with hand building and mold making techniques. The class also examines how the alteration of wheel thrown forms can be an effective way of producing sculptural objects. Clay and glaze chemistry are approached through ceramic material testing and kiln firings. Group and individual critiques take place at the end of each kiln firing.</td>

<td>Study and production of construction documents as architectural graphic communications. Construction documents present and communicate specific dimensions and materials required to physically construct interior environments. Students will engage industry standards, learn to critically evaluate design proposals in terms of construction potentials, critically use professional processes, methods and techniques and learn to communicate effectively with these standards.</td>

<td>REQUIRE: ART 2810 and 2820 and two 2000-level Studio Art courses</td>
<td></td>
<td></td>
<td>This course provides an introduction to view camera operation and the basics of studio lighting. Students build on the fundamental technical skills and conceptual issues of analog black and white photography covered in ART 2810, with a special focus on refining darkroom skills and large scale printing. Through an introduction to its history and contemporary practitioners, students engage in dialogue about the aesthetic and conceptual potentials of film-based photography. In addition to skill building, there is an emphasis on the fundamental questions of why and how artists use these tools within the larger context of contemporary art. Class time is devoted to demonstrations, lab periods, presentations, discussions and critiques.</td>

<td>Continued intermediate studies in professional interior architecture studio practices. This studio builds upon the prior IA studio courses, and increases in complexity and scale. Design investigations include research, programming, analysis, theory, ideation and conceptualization, schematic design, project evaluation, refinement, materials, finishes, detailing, furnishings, lighting, communication graphics, and formal presentation. Topics vary based on current social and aesthetic issues that may include commercial, institutional, and/or residential design typologies. Students must maintain a computer workstation in the studio. This is the third IA studio in a sequence of six. Students must also maintain a C average or higher to remain an Interior Architecture Major. Special Fee.</td>

<td>Museum Fundamentals II builds on knowledge acquired in Museum Fundamentals I. Working as a cohort, under the guidance of museum staff, students will collaborate and share responsibilities for researching, planning, designing, interpreting, and installing a cohesive exhibition utilizing various collections located on the Ohio University campus. The course concludes with an exhibition, programming, and opening reception for the public.</td>

**Course Descriptions:**
- **Ballet Technique I:** Introduction to ballet and the development of basic technical skills within the classical ballet tradition. Execution of basic ballet vocabulary with an emphasis on classical line.
- **Ballet Technique II:** Continuation of 1220. Introduction to ballet and the development of basic technical skills within the classical ballet tradition. Execution of basic ballet vocabulary with an emphasis on classical line.
- **Beginning Dance Composition I:** Exploration of movement materials through improvisation and short problems dealing with rhythm, space, movement qualities, and dynamics.
- **Beginning Dance Composition II:** Continuation of 1230. Exploration of movement materials through improvisation and short problems dealing with rhythm, space, movement qualities, and dynamics.
- **Jazz Dance Technique I:** Beginning through intermediate level instruction in various styles of jazz dance including the use of proper technique, performance quality, and rhythmic complexity. Development of movement skills from various styles of jazz through using a series of challenging exercises and movement phrases to improve technical skills.
- **African Dance Technique I:** Introduction to traditional dances of Africa. Will focus on developing a balanced practical, and theoretical understanding of the dances and related traditional rhythms and songs. It will explore basic African dance movements coming from secular and social dances, focusing on their quality, timing and spatial organization. Over the course of 14 weeks the students will learn approximately 6 different dance types from 6 different ethnic groups. No prior African dance experience is necessary.
- **Hip Hop Dance Technique I:** This is an intermediate level course that focuses on applying and integrating movement that utilizes a curved spine, bent knees, and complex rhythmic patterns with the whole body. The course emphasizes intermediate level learning of the percussive, improvisational, and communal aspects of Hip Hop and the polyrhythmic and polycentric nature of the form. Students also explore ideas of personal style, musicality, spatial awareness, gesturing and attitude/individuality. Students readily participate in call and respond exercises, playful improvisations, and discussions about the use of Hip Hop in musical theater and contemporary jazz dance.
- **Tap Dance I:** This is an intermediate level tap dance course that focuses on warm-up sequences, across the floor progressions, and center floor combinations that advance students technical proficiencies in tap. Students expand their technical capabilities and aesthetic range with work on complex rhythms, steps, foot articulations, and whole-body alignment. Students expand their expressive potential for tap dance through application of listening skills, personal musicianship, and study of contemporary forms and diverse styles of tap dance. Class work also includes call and respond exercises, improvisation, choreographic study, and discussion.
- **The Dance Experience:** A comprehensive course to introduce the beginning student to contemporary classical and modern dance forms including modern, ballet, and jazz dance styles. Discussions and readings cover historical and aesthetic perspectives. Live performances and studio practice contribute to students' experiential learning.
- **Summer Dance Experience:** This summer intensive course is a college-level introduction to the study of dance. Through experiential learning in dance technique, composition, improvisation, and somatic practices, students develop their skills and knowledge in movement, the creative process, and performance. Students also gain an understanding of community engagement and current professional practices in dance.

**COURSE DESC:**

Dance Production I: Choreographic studies to enhance the student's understanding and appreciation of the creative process by developing the concepts of rhythm, space, and dynamics into longer, more detailed studies.

Dance Production II: Continuation of materials learned in Dance 1020. Students are expected to be familiar with basic ballet terminology including feet and arm positions, specific ballet steps including adagio and allegro combinations, basic turns and leaps in the classical ballet tradition. Expectations include improved technical movement skills, musical awareness, and introduction to performance qualities of classical ballet.

Dance Technique II Modern: A continuation of Dance 2210. Development of basic technical skills for modern dance. More complex coordinations, which add more spatial and dynamic considerations.

Dance Technique II Ballet: Continuation of Dance 2200. Development of basic technical skills for modern dance. More complex coordinations, which add more spatial and dynamic considerations.

Dance Technique II Jazz: Continuation of Dance 2210. Development of basic technical skills for modern dance. More complex coordinations, which add more spatial and dynamic considerations.

Ballet Technique III: Expanded balletic movement vocabulary with continued emphasis on basic technical skills. Musicality emphasized.

Ballet Technique IV: Continuation of 2220. Expanded balletic movement vocabulary with continued emphasis on basic technical skills. Musicality emphasized.

Intermediate Dance Composition I: Choreographic studies to enhance the student's understanding and appreciation of the creative process by developing the concepts of rhythm, space, and dynamics into longer, more detailed studies.

Intermediate Dance Composition II: Choreographic studies to enhance the student's understanding and appreciation of the creative process by developing the concepts of rhythm, space, and dynamics into longer, more detailed studies.

<td>REQUIREST: DANC 1270 or permission This is an advanced Hip Hop course that broadens the application and integration of students' technical proficiencies, expressivity, and musicality. The course emphasizes advanced level learning of complex and lengthy movement combinations to employ the polyrhythmic and polycentric nature of the form. Students further develop and express rhythmic and spatial awareness, dynamic range, and stylistic execution of technique. Students readily lead call and respond exercises, create improvisations, and participate in discussions and choreographic studies about the fusion styles of Hip Hop that span historical and contemporary jazz dance.</td>

<td>REQUIREST: DANC 1280 or permission This is an advanced tap course that broadens the technical range, movement vocabulary, and aesthetic choices of students. Course exploration focuses on challenging, extended warm-up sequences, across the floor progressions, and center floor combinations that require students to apply technical proficiencies in tap. This course aims to expand the technical and expressive capacities of students through continued work on intricate rhythms, steps, and foot articulations that require whole body integration. Additionally, students explore a fusion of historical and contemporary forms of tap dance and participate in the advanced study of improvisation, choreographic study, and musicianship.</td>

**Course Descriptions:**

- **Graduate Modern Dance Technique**: This studio-based course provides opportunities for graduate students to deepen and refine their proficiency in modern dance technique. Students participate in studio classes in which they perform advanced-level movement phrases and practice ways of sensing and responding in movement. Particular emphasis is placed on musical phrasing, dynamics, and subtle demands of expressivity in movement. Concepts from improvisational practices and somatic techniques such as Klein/Mahler or Bartenieff Fundamentals bring awareness to physical states.

- **Advanced Dance Composition I**: The synthesis of choreographic elements, devices, and musical or sound choices into studies having a sense of form and content.

- **Dance Kinesiology I**: Introduces basic concepts of the study of the body through an overview of: the anatomy of breathing; the musculo-skeletal system; basic principles of kinesiology and their relationship to fitness training; the nature of stress and benefits of relaxation training. A somatic (body/mind) approach to the course materials draws on experiential activities to enhance conceptual and factually based materials. Explores skeletal alignment, muscular development and function, and mechanical efficiency in the production of dance movement.

- **African Dance Technique III**: Will focus on complex religious and ceremonial dances as they are performed in their traditional settings. The student will begin to learn how to perform these dances at a professional level. It will include arranging and performing both traditional and contemporary African dances to be performed on a Western stage. Students will learn approximately 6 different dance types from 6 different ethnic groups as well as be invited to perform in the The Ohio University African Ensemble's Annual Concert.

- **Pilates Reformer Training**: Designed to condition students using resistance training on the Universal Reformer and other Pilates apparatus. Students learn exercise principles and techniques on specialized equipment, focusing on correction of body alignment problems, muscle imbalances, strength, and flexibility.

- **Pilates Mat Training**: Instructs students in the proper form and execution of beginning through intermediate level non-equipment based exercises performed on an exercise mat. It is the principle segment of training in the comprehensive Pilates Method of Body Conditioning and is appropriate for all levels of movement experience. The precision, control and focus of the exercises enables students to balance the musculoskeletal system so that they are able to efficiently and safely practice other more rigorous, demanding physical disciplines. Includes laboratory practice of 45 mat exercises that train the muscles to improve body stability and mobility. The Pilates method develops precision coordination and concentration in movement while increasing strength and flexibility. Addresses injury rehabilitation from the perspective of preventive training.

- **Bartenieff Fundamentals**: Provides the student with an experiential approach to movement as a somatic (from soma, meaning body) study experience. Addresses Irmgard Bartenieff's (1890-1981) work, Basic Six Fundamentals exercises, their relationship to the Bonnie Bainbridge Cohen's six Developmental Patterns and enhancing ones movement facility through an approach based on these materials.

- **Yoga: Principles and Practice**: Introduction to yoga, particularly the practices of asanas (poses), vinyasas (sequences), and pranayama (breathing techniques). Emphasizes developing a personal practice, sequencing poses and counterposes to promote safety, and practicing pranayama and meditation to improve concentration and body awareness. Readings and class discussions will provide an understanding of the history and philosophy of yoga. No yoga experience is required, but some movement background is helpful.
DANCE 6405 Issues and Methods in Dance Pedagogy

COURSE DESC: This course explores the teaching and learning of dance. Dance pedagogy is considered through artistic, personal, cultural, and interdisciplinary connections as well as how individuals identify, understand, and express themselves. Students evaluate and apply various teaching methods, assessment and evaluation practices, and culturally relevant pedagogy. Best practices in the skills of creating, responding, and connecting are studied in order to meet learners on a continuum of knowledge. Dance education is further considered within community dance contexts.

<td>This course offers a clear introduction to community dance practices, its purpose, and core values. The course is designed to provide students with the ability to integrate the theoretical studies of artistry, civic engagement, and dance content knowledge with pedagogical considerations in implementing a community dance project, program, and/or performance. Students gain an understanding of how particular topics or problems within a community dance practice are organized and adapted to the interests and abilities of participants. Students also examine the importance of diversity in community dance and consider issues of representation and inclusion.</td>

<td>This course offers students an opportunity to put their prior studies of dance artistry, civic engagement, dance content knowledge, and pedagogical theory into practice by implementing a community dance project, performance, and/or research project. Students gain a deeper, experiential understanding of how particular topics or problems within community dance settings and practices are organized and adapted to the interests and abilities of participants. Students hone their communication and advocacy skills through the implementation and presentation of a final capstone project.</td>

COURSE DESC: The Professional Internship is the required, culminating experience of the Arts Administration MA degree and applies and synthesizes coursework. Advisor must approve all internship placements. During the professional internship, students continue to explore programmatic learning objectives and focus on topics including: organizational culture, structure and governance; marketing and resource allocation; programming and education; mission, vision, law, and ethics; fundraising and grants management; and community engagement. Students enrolled in the Professional Internship meet weekly to focus on various symposium issues of professional practice. The discussion component of this course is designed to be adaptive and responsive to emergent topics and issues that occur during the internship experience. As part of the course, and with instructor guidance and feedback, students develop their final capstone projects or portfolios.

**ELIGIBLE GRADES:** GEC2: A-F; PR
**REQUISITE:** CR, PR
**COURSE DESC:** The purpose of the Arts in Health Professional Internship course is to provide students in the Applied Arts in Health Master's Degree an in depth immersive culminating experience where they can synthesize knowledge and skill learned from their program coursework. Students will be given many opportunities to observe, participate, and lead Arts in Health practices on site at an approved Arts in Health facility or program. Students will gain depth of experience as they plan, facilitate, and document health and wellness outcomes during arts experiences. Students will also learn ethical considerations related to Arts in Health practices. Provided with Arts in Health professional on-site supervision, students will also be required to complete a culminating final project approved by the site supervisor and class professor related to Arts in Health practices at the internship.

**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** Sr only
**COURSE DESC:** This course explores the arts and culture of our region as related to energy and the environment both past and present. Topics will include music of coal miners; murals, festivals and performance commemorating the culture of mining towns; historic preservation of local architecture; material culture and memory in local museums and historical societies; engagements and encounters with the environment; and protest cultures related to energy extraction past and present. Throughout, attention will be paid to questions of citizenship and social justice. Students will engage the material firsthand through readings, screenings, guest lectures and performances, and field trips.

Course Descriptions:

**Narrative Screenwriting I**
Introduction to the principles and craft of screenwriting with emphasis on the short narrative film. Class format will include lectures, discussions, readings, screenings, critiques, writing exercises and the 'screenwriter's workshop' approach.

**Narrative Screenwriting I**
Introduction to the principles and craft of screenwriting with emphasis on the short narrative film. Class format will include lectures, discussions, readings, screenings, critiques, writing exercises and the 'screenwriter's workshop' approach.

**Special Topics in Film**
Specific course content will vary with offering.

**Film Tutorial**
Tutorial for HTC students addressing specific filmmaking or film studies topics. Subject matter arranged by tutorial student(s) in consultation with School of Film tutorial advisor. A tutorial consists either of one-on-one or a small seminar. Such a setting provides the type of individualized attention and academic challenge capable of stimulating the intellectual growth of talented and creative HTC students. A tutorial is meant to be an ongoing conversation in which the tutor and tutee(s) move through the academic landscape of a particular topic.

**Film Tutorial**
Tutorial for HTC students addressing specific filmmaking or film studies topics. Subject matter arranged by tutorial student(s) in consultation with School of Film tutorial advisor. A tutorial consists either of one-on-one or a small seminar. Such a setting provides the type of individualized attention and academic challenge capable of stimulating the intellectual growth of talented and creative HTC students. A tutorial is meant to be an ongoing conversation in which the tutor and tutee(s) move through the academic landscape of a particular topic.

**Filmmaking I**
This is the first course in a two-course production sequence for the BFA in Film student. Through class exercises and the production of individual 16mm and/or video projects, students engage in the practical, technical, and aesthetic aspects of the filmmaking process.

**Filmmaking I**
This is the first course in a two-course production sequence for the BFA in Film student. Through class exercises and the production of individual 16mm and/or video projects, students engage in the practical, technical, and aesthetic aspects of the filmmaking process.

**Filmmaking II**
This is the second course in a two-course production sequence for the BFA in Film student. The course is designed to continue student development in the technical, aesthetic aspects of the filmmaking process through the production of individual 16mm and/or video projects.

**Filmmaking II**
This is the second course in a two-course production sequence for the BFA in Film student. The course is designed to continue student development in the technical, aesthetic aspects of the filmmaking process through the production of individual 16mm and/or video projects.

**Filmmaking II**
This is the second course in a two-course production sequence for the BFA in Film student. The course is designed to continue student development in the technical, aesthetic aspects of the filmmaking process through the production of individual 16mm and/or video projects.

**Film Studies 1**
This course offers an introduction to film studies, focusing on the formal and critical dimensions of film. The course introduces selected key events and movements in film history and selected texts in film theory. Weekly screenings are provided.

**COURSE DESC:**
- A workshop in cinematographic techniques. Specific attention will be paid to use of the camera and interior lighting.
- Survey of classical film theory, including semiotics, psychoanalytic, feminist, post-colonial and contemporary film theory. Weekly screenings.
- Survey of post-classical film theory, including semiotics, psychoanalytic, feminist, post-colonial and contemporary film theory. Weekly screenings.
- A sustained study of key debates in film theory selected by instructor. Weekly screenings.
- A sustained study of key debates in film theory selected by instructor. Weekly screenings.
- Students screen and program entries for the Athens International Film and Video Festival.
- An examination of contemporary video, music video, and new media within the context of art.
- An examination of contemporary video, music video, and new media within the context of art.
- Examination of function of producer in financing, organizing, scheduling, budgeting, managing, and securing distribution for a film.
- Examination of function of producer in financing, organizing, scheduling, budgeting, managing, and securing distribution for a film.
- Investigation of selected motion picture topic announced in advance of registration. Focus may be scholarly/critical, industry-related, film festival-related, or some other aspect of motion picture production, post-production, or screenwriting. Topics and credit hours vary.

**Course Descriptions:**
- **Thesis Seminar:** Presentation and discussion of thesis projects in progress.
- **Master Class I:** This is the first course in a two-course sequence for the MFA student making a second-year or thesis film. Students will confront the basic and the advanced filmmaker's storytelling craft, and be asked to write and workshop a script for a short narrative or documentary thesis film. The class also focuses on the director's craft as the student prepares a project for production.
- **Master Class II:** This is the second course in a two-course sequence for the MFA student making a second-year or thesis film. The focus is on the production and post-production of the film.
- **Individual Production Problems:** Investigations into specific areas of the filmmaking production process. Assignments arranged with professor.
- **Individual Readings:** Readings and reports on works related to motion pictures. Reading list selected in consultation with faculty member.

<td>Includes foundational texts that define and inform contemporary critical and theoretical discourse. Organized into three major threads that run through the 20th-century: Marxism, psychoanalysis, and post structuralism. The aim is to provide analytical tools for analysis of primary themes of critical theory, including, but not limited to, the social, the subject, the object, and power. Students will become versant in contemporary discourse for the study of the art.</td>

**Description for Far MUS MUS 2240 History of Rock Music II**
This course is a continuation of MUS 1240, History of Rock Music I. MUS 2240 is a historical survey of Rock music from the 1970's through the 1990's and beyond.

**Description for Far MUS MUS 2410 Class Piano III**
Group instruction in piano for music majors.

**Description for Far MUS MUS 2420 Class Piano IV**
Group instruction in piano for music majors; continuation of MUS 2410.

**Description for Far MUS MUS 2440 Communiversity Band**
Wide variety of music literature, including marches, overtures, and musicals is studied and performed both on and off campus under both a permanent and guest conductor.

**Description for Far MUS MUS 2480 African Ensemble I**
Introduction to the practices of drumming ensembles in traditional sub-Saharan African societies presented in a studio and lecture format. Introduction to variety of procedures, concepts, and structures that may be used in the understanding of specific musical ensembles in West Africa. Films and videotapes provide visual examples.

**Description for Far MUS MUS 2481 African Ensemble II**
Advanced study and performance of African music and dance in an ensemble setting from sub-Saharan Africa. Students employ various African performance techniques and to demonstrate their skills using the master drum, supporting instruments, singing and dance. Films and videotapes provide visual examples. Opportunities to perform on campus and also tour with the ensemble.

**Description for Far MUS MUS 2490 Brass Choir**
Performance of literature for large brass ensemble.

**Description for Far MUS MUS 2510 Marching Band**
Marching band for football and other university activities.

**Description for Far MUS MUS 2511 Wind Symphony**
Performance of literature for the wind symphony.

**Description for Far MUS MUS 2512 University Concert Band**
Performance of literature for concert band.

**Description for Far MUS MUS 2513 Varsity Band**
Provide music for various university indoor athletic events.

**Description for Far MUS MUS 2514 Symphonic Band**
Performance of literature for large concert band.

**Description for Far MUS MUS 2520 Symphony Orchestra**
Performance of literature for the symphony orchestra.

**Description for Far MUS MUS 2521 Campus Orchestra**
All-campus orchestra open to all members of the community. Performance of literature for symphony orchestra.

**Description for Far MUS MUS 2530 University Singers**
Performance of music for SATB choir.

**Description for Far MUS MUS 2531 Choral Union**
Performance of music for large chorus, including literature for chorus and instruments.

<td>This course is intended to give students an overview of the two contributing cultures and their musics found in this country, from the songs of rural Appalachia and New England to the African music brought by the slaves; to the music that grew out of those traditions, from the popular musics of the cities to the songs of Latin Americans and European minorities. We will trace the way these musics live in the modern city, in the academic world and in contemporary music society. (Nettl, 1976)</td>

  - Subsidy Level: 0
FAR  THAR  THAR 3161  ELIGIBLE GRADES:  
COURSE DESC: Advanced technique and integrated movement vocabulary into advanced study including creation of scenes, heightened language/verse, and character. The research may include study of specialized and advanced practices in stage combat, advanced scenic work with special movement challenges or heightened language as well as advanced composition devising original ensemble, physically-based work.

FAR  THAR  THAR 3162  ELIGIBLE GRADES:  
COURSE DESC: Students will learn skill sets specific to stage combat. Of primary importance will be the skills necessary to execute a fight without the risk of injury to the performers involved. Through the preparation and performance of dramatic and comedic scenes involving stage combat, the student will experience the process of stage combat as it applies to the actor.

FAR  THAR  THAR 3170  ELIGIBLE GRADES:  
COURSE DESC: Designed as an introduction to the process of directing for the stage. The focus will be on basic concepts of script analysis, table work, staging, and the rehearsal process, with a special emphasis on clarity in storytelling.

FAR  THAR  THAR 3210  ELIGIBLE GRADES:  
COURSE DESC: Supervised lab practice in design and execution of scenery, lighting, costumes, properties, and sound.

FAR  THAR  THAR 3300  ELIGIBLE GRADES:  
COURSE DESC: Focuses on figure drawing, collage, and illustration techniques that can be used to express character and costume using dry and wet media, and digital techniques.

FAR  THAR  THAR 3361  ELIGIBLE GRADES:  
COURSE DESC: Introduction to pattern draping and drafting using modern and historical methods. Advanced sewing ability is required.

FAR  THAR  THAR 3380  ELIGIBLE GRADES:  
COURSE DESC: Introduction to costume craft and prop techniques. Areas of study may include millinery, metalworking, maskmaking, fabric dyeing and printing, soft and hard sculptural techniques, and painting and decorative techniques.

FAR  THAR  THAR 3380  ELIGIBLE GRADES:  
COURSE DESC: Introduction to figure drawing, collage, and illustration techniques that can be used to express character and costume using dry and wet media, and digital techniques.

FAR  THAR  THAR 3390  ELIGIBLE GRADES:  
COURSE DESC: Application of principles of design for the theatrical space, with emphasis on drawing, model-making, conceptualization and script analysis.

**FAR THAR THAR 3392 Drafting for the Theater**
- Component: Tutorial
- Cred Hours: 3
- Repeat Hours: 6
- General Education: I
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: Permission required

Fundamental and advanced problems of drafting for the stage. Digital and hand drafting methods will be utilized to create ground plans, sections, front elevations, rear elevations, and details.

**FAR THAR THAR 3393 Vectorworks for the Theater**
- Component: Tutorial
- Cred Hours: 3
- Repeat Hours: 6
- General Education: I
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: Permission required

A specialized study of skills utilized in theatrical lighting design software including Vectorworks and Lightwright. Application and development of solutions to lighting design problems.

**FAR THAR THAR 3395 Digital Portfolio and Performance Photography**
- Component: Laboratory
- Cred Hours: 3
- Repeat Hours: 6
- General Education: I
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: Permission required

Introduction to the development of digital portfolio presentations from performance photography. Students will take production process and theater performance photos and manipulate them using digital and website development programs to create different digital portfolios.

**FAR THAR THAR 3396 Design History I: Period Styles**
- Component: Lecture
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: 

Survey of research techniques in history, the arts, and period "style" from Antiquity to the present in Western Civilizations for the purpose of theatrical production.

**FAR THAR THAR 3397 Design History II: Costume Survey**
- Component: Lecture
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: 

Development of dress and influence of technical and cultural factors from Antiquity to 1900.

**FAR THAR THAR 3398 Design History III: 20th- Century Clothing and Culture**
- Component: Lecture
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: Soph or Jr or Sr

The study of the development of Western European and American dress and culture from 1900 to the present. Classwork revolves around using primary and secondary research to explore how fashion changes as a result of shifts in cultural and political developments.

**FAR THAR THAR 3399 Scenography: Exploring the Creative Vision**
- Component: Tutorial
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: THAR 2390

Application of principles of design to stage costuming and scenery, with emphasis on figure drawing, characterization, conceptualization, and scenic sketching and models.

**FAR THAR THAR 3510 Playwriting Revision Technique**
- Component: Seminar
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: THAR 2510 or 250

Theory and practice of dramatic writing with an emphasis on craft and control through revision.

**FAR THAR THAR 3511 Playwriting Style and Voice**
- Component: Seminar
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: THAR 3510

Theory and practice of dramatic writing with an emphasis on varying style and defining voice.

**FAR THAR THAR 3600 Practicum in Production Stage Management**
- Component: Laboratory
- Cred Hours: 1 to 6
- Repeat Hours: 18
- General Education: BLD
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: THAR 1392 and (3610 concurrent)

Supervised lab practice as a member of the stage management team for a School of Theater production.

**FAR THAR THAR 3605 Stage Management 1: Fundamentals of Stage Management**
- Component: Lecture
- Cred Hours: 3
- Repeat Hours: 0
- General Education: N
- Perm: U30
- Subsidy Level: 0
- eLearn Options: 
- Majors Set Aside: 0

ELIGIBLE GRADES: A-F

REQUISITE: Admitted to Stage Management BF5168

This course is an introduction to the theory and practice of stage management in American theater. The purpose of this course is to introduce and discuss techniques of efficiently managing the preparation, rehearsal, and performance of theatrical productions. Information in this class will be presented through readings, class discussions, assignments and in-class exercises.

COURSE LISTING
SORTED BY College, Department/School, Prefix

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 4350
Focuses on safe and acceptable standards for stage rigging practices within the entertainment industry.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 2350
An introduction to the materials and techniques of welding and metal fabrication for the scenic technician.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Permission required
Within the entertainment industry multiple methods of automation technology are being utilized for the purpose of moving onstage design components including scenery, stage properties, lighting, sound and projection surfaces for the purpose of changing the visual landscape of the stage throughout the production. For these multiple systems used in the area of stage automation to be useful, they must be reliable, repeatable, and often programmable to enable changing travel distances/length of time to travel scenarios. Automation is enabling large scale scene changes to occur within the natural rhythm of performance; eliminating the need to endure long interruptive transitions between scenes that negatively impacts the production.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3361 or 436D
Advanced pattern development and construction utilizing drafting, bias draping and flat pattern techniques.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3361 or 436D
A specialized study of skills, formulas, and techniques used in theatrical tailoring.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3361 or 436D
A specialized study of skills, formulas, and techniques used in researching and solving costume technology problems.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3361 or 436D
Consists of a study of the skills and techniques needed for rendering interpretation. Students will focus on researching the images for details of seam placement, fabric hang, cut, and mechanics and apply their findings to creating 3-D models.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 1390 or 2390
Principles and functions of sound design for the theater.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 1392
Principles, characteristics, and techniques in the use of sound equipment for the theater.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 1392
Principles, characteristics, and techniques in the use of sound equipment for the theater.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3380
A specialized study of skills, formulas, and techniques used in solving costume crafts and technology problems.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: THAR 3380
Introduction and application of organizational skills and specialized properties techniques to theatrical design problems.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Permission required
Advanced studies in furniture construction for the props artisan covering woodworking, upholstery, carving, finishing, and furniture repair.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Permission required
Advanced studies in metalworking for the props artisan covering armor research and construction techniques and stage weapon research and construction techniques.

<td>COURSE DESC:</td>
<td>Provides an opportunity for directors and designers to cast a critical and practical eye towards the various aspects of conceiving, designing, casting, rehearsing, and teching a major classic (i.e. Love's Labour's Lost, The Taming of the Shrew, The Adding Machine, Tartuffe, etc.). The goal is to look at the directing process from every angle and, working in collaboration with selected actors and designers, come up with a variety of solutions for each challenge. Each student will play various roles such as, director, designer, actor, casting director, etc.</td>

<td>Students will develop research methods and skills through the pursuit of an original research project. This research will then serve as the basis for developing a piece of scholarship, such as a critical review, conference presentation, journal article, or graduate thesis. In addition to serving as a workshop for students’ scholarly works-in-progress, will also include an examination of scholarly organizations, journals, and conferences.</td>

**Course Descriptions:**
- **THAR 6200 Practicum in Directing**
  - Directing practicum credits reflect work done on School of Theater productions, lab shows, realism projects, style projects, and playwrights festival productions. The directing mentor makes weekly visits to rehearsals for these projects, assessing rehearsal strategies and overall progress of the production.
- **THAR 6210 Period Style and the Director I**
  - Addresses the questions "What is period style", and "How does a director change his or her approach to preproduction and rehearsal when dealing with a period play or a contemporary play with period style elements?” Through a careful examination of the distinguishing characteristics of period style, and in-class application of strategies and tools honed through scene work, the student will develop the tools to direct productions that have a variety of stylistic challenges. The primary focus will be Greek drama and other non-Shakespearean theater.
- **THAR 6211 Period Style and the Director II: Shakespeare**
  - The second semester of Period Style and the Director shifts focus to the poetry and plays of William Shakespeare and how directors adapt their preproduction and rehearsal work to his world. To that end, class work will revolve around careful examination of the Sonnets (both as poetry and as a method of storytelling) and in-class analysis and rehearsal of scenes from Shakespeare's dramatic works.
- **THAR 6300 Practicum in Design and/or Technical Production**
  - Practical application of design or technical theory in planning and execution of university production.
- **THAR 6320 Advanced Costume Design Techniques**
  - Advanced problems and projects that explore style and process challenges for film, opera, dance, and high theatricality productions. Assignments emphasize advanced conceptualization.
- **THAR 6340 Advanced Scenic Design Techniques**
  - Advanced problems and projects in scenic design emphasizing style, conceptualization, and collaboration.
- **THAR 6350 Advanced Technical Direction**
  - Advanced problems and projects in technical direction emphasizing problem solving, research and development, management, and collaboration.
- **THAR 6390 Creating the Realized Design/Main Stage Process**
  - A detailed experiential examination of the process of participating in the creation of designs for the main stage and major commercial theater venues including Broadway, off-Broadway, and regional theaters.

**Course Descriptions:**

- **ES 2900 Special Topics in Environmental Studies**: Lecture 1 to 15 999 N U30 0
  - ELIGIBLE GRADES: CR
  - Specific course content will vary with offering.

- **ES 2970T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Special environmental studies course offered for students in the Honors Tutorial College.

- **ES 2971T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Tutorial for second year HTC students in Environmental Studies.

- **ES 2980T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Honors tutorial for students in environmental studies.

- **ES 2981T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Tutorial for 3rd year HTC students in Environmental Studies.

- **ES 3620 Environmental Science and Public Policy**: Lecture 3 0 N U30 0
  - ELIGIBLE GRADES: CR
  - Course description: Public administrators face a wide range of environmental science and policy challenges. This course develops skills in science literacy and environmental policy management. Students are empowered with tools for addressing environmental issues integral to economic development, infrastructure, and broader regulatory frameworks. This class explores the interaction between scientific analysis and policymaking through case studies at multiple levels of government.

- **ES 3970T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Tutorial for 3rd year HTC students in Environmental Studies.

- **ES 3980T Environmental Studies Tutorial**: Tutorial 1 to 12 12 N U30 0
  - ELIGIBLE GRADES: CR, PR
  - Course description: Tutorial course for 3rd year HTC students in Environmental Studies.

- **ES 4250 Watershed Management**: Lecture 3 0 N U30 0
  - ELIGIBLE GRADES: CR
  - Course description: Examine the major chemical and biological factors that affect watershed health and how to incorporate them into a watershed management plan in consultation with stakeholders. Discuss the importance of stakeholder engagement and identify key stakeholders and the key social, legal and economic issues that will affect management decisions.

- **ES 4250A Honors Experience in Watershed Management**: Ind Study 0 0 N U30 0
  - ELIGIBLE GRADES: CR
  - Course description: OHIO Honors curricular experience in Watershed Management.

- **ES 4300 Field Methods in Environmental Studies**: Field 3 0 N U30 0
  - ELIGIBLE GRADES: CR
  - Course description: Primarily field based class covering field methods in surface water, groundwater, aquatic biology (including headwaters), terrestrial ecology, soil and air quality sampling, evaluation and analysis. Focus is on how these methods apply to interdisciplinary environmental studies.

- **ES 4300A Field Methods in Environmental Studies**: Seminar 3 0 N U30 0
  - ELIGIBLE GRADES: CR
  - Course description: Primarily field based class covering field methods in surface water, groundwater, aquatic biology (including headwaters), terrestrial ecology, soil and air quality sampling, evaluation and analysis. Focus is on how these methods apply to interdisciplinary environmental studies.

<td></td>
<td>COURSE DESC:</td>
<td>Resilience has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications.</td>

<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>COURSE DESC:</td>
<td>This course introduces students to the study of climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gas emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors.</td>

<td></td>
<td></td>
<td>COURSE DESC:</td>
<td>Climate change and other rapid environmental changes create risk to communities, infrastructure, and human security; managing these climate-related risks requires understanding of the community, its risk perception, and collaborative communication and management planning. Students characterize risk to communities from climate change and explore risk perception theory and methods to manage threats to human security. Students discuss concepts of justice and equity in risks to human security, risk management, and communication. Students explore these particular climate change and environmental challenges through the multidimensional and interdisciplinary lens of human security.</td>

<td></td>
<td></td>
<td>COURSE DESC:</td>
<td>Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land management, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems.</td>

<td>GEC1: A-F, REQUISITE: Students gain an understanding of key problems, root causes, and potential entrepreneurial solutions relevant to selected contemporary environmental challenges. Students apply interdisciplinary perspectives to identify, analyze, and evaluate environmental issues, measure impacts, and establish criteria for effective remedies. The course reviews key environmental challenges within selected areas (with topical themes chosen from contemporary issues in environment, health &amp; well being, education, economic development, and other timely topics,) as well as fundamentals of social entrepreneurship to enable students to design and present enterprise development models for market-based social ventures seeking to deliver such remedies. Students learn how to pitch venture proposals to address criteria evaluating efficacy, feasibility, sustainability, and potential &quot;return on investment&quot; for both financial and social/environmental impacts.</td>

### Watershed Management

- **Title:** Watershed Management
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Examine the major chemical and biological factors that affect watershed health and how to incorporate them into a watershed management plan in consultation with stakeholders. Discuss the importance of stakeholder engagement and identify key stakeholders and the key social, legal, and economic issues that will affect management decisions.

### Field Methods in Environmental Studies

- **Title:** Field Methods in Environmental Studies
- **Component:** Field Seminar
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Primarily field based class covering field methods in surface water, groundwater, aquatic biology (including headwaters), terrestrial ecology, soil and air quality sampling, evaluation and analysis. Focus is on how these methods apply to interdisciplinary environmental studies.

### Environmental Science and Public Policy

- **Title:** Environmental Science and Public Policy
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Primarily field based class covering field methods in surface water, groundwater, aquatic biology (including headwaters), terrestrial ecology, soil and air quality sampling, evaluation and analysis. Focus is on how these methods apply to interdisciplinary environmental studies.

### Global Water Resources

- **Title:** Global Water Resources
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC4: A-F
- **REQUISITE:**
- **COURSE DESC:** Explores global water use, scarcity, quality, and supply in the context of international development, climate change and land use.

### Resilience Theory and Practice

- **Title:** Resilience Theory and Practice
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Resilience has emerged as a central concept across a wide variety of fields including: city planning, policy analysis, human security, economics, natural resource and environmental management, public services, infrastructure planning, engineering, technology innovation, and indeed any field dealing with rapidly changing systems. Students unpack and apply ideas in resiliency theory to a broad range of fields of practice, link new theory with application, and gain real world experience in applying these concepts. Students examine resiliency as a general concept, critique the concept as a management approach, and focus on concrete applications.

### Climate Change Mitigation, Adaptation and Resilience Policy

- **Title:** Climate Change Mitigation, Adaptation and Resilience Policy
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** This course introduces students to study climate policy and planning. Students examine the range of mitigation, adaptation and resilience approaches for managing greenhouse gases emissions and the impacts of climate change to improve human and environmental security. Students gain an understanding of the implications of climate change science for public policy making and hands-on experience in using climate information for preparing a climate change plan. Students explore a basic overview of public policy theory, discuss various policy options for mitigation and adaptation policy, and gain the skills necessary for incorporating climate into a diverse area of public policy issues. Students are presented with the general theory, analytic frameworks, and specific techniques necessary to analyze climate change policy alternatives within a larger human security framework. The skills learned in this class are applicable to a variety of levels of government planning (local, state and national) as well as across the private, nonprofit and public sectors.

### Risk, Climate Security, and Community Engagement

- **Title:** Risk, Climate Security, and Community Engagement
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Climate change and other rapid environmental changes create risk to communities, infrastructure, and human security; managing these climate-related risks requires understanding of the community, its risk perception, and collaborative communication and management planning. Students characterize risk to communities from climate change and explore risk perception theory and methods to manage threats to human security. Students discuss concepts of justice and equity in risks to human security, risk management, and communication. Students explore these particular climate change and environmental challenges through the multidimensional and interdisciplinary lens of human security.

### Bioenergy: Science, Policy, and Business

- **Title:** Bioenergy: Science, Policy, and Business
- **Component:** Lecture
- **Cred Hours:** 3
- **Perm:** G40
- **ELIGIBLE GRADES:** GEC1: A-F
- **REQUISITE:**
- **COURSE DESC:** Students gain an understanding of the historical uses, current trends, and potential future production of bioenergy. Students learn how to describe and interpret life-cycle impacts of bioenergy production systems. The course reviews national (U.S.) and international policies that regulate bioenergy production; and analyzes the crop species, agro-ecosystems, land management, conversion technologies, co-products, transportation infrastructure, and end uses of bioenergy production pathways for both solid and liquid fuels. Students also evaluate the ecological impacts, land and water requirements, economic efficiencies, and energetic efficiencies of bioenergy systems relative to other energy systems.
Energy Systems and Policy
GEC1: A-F
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Energy systems are undergoing rapid change due to resource constraints, market forces, local, state, national, and international policy, and environmental impacts. Public administrators have a need to understand the implications of energy systems and the policies that govern them. This course presents traditional and emerging energy systems and how policy affects these systems.

Environmental Entrepreneurship
GEC1: A-F
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Students gain an understanding of key problems, root causes, and potential entrepreneurial solutions relevant to selected contemporary environmental challenges. Students apply interdisciplinary perspectives to identify, analyze, and evaluate environmental issues, measure impacts, and establish criteria for effective remedies. The course reviews key environmental challenges within selected areas (with topical themes chosen from contemporary issues in environment, health & well being, education, economic development, and other timely topics,) as well as fundamentals of social entrepreneurship to enable students to design and present enterprise development models for market-based social ventures seeking to deliver such remedies. Students learn how to pitch venture proposals to address criteria evaluating efficacy, feasibility, sustainability, and potential "return on investment" for both financial and social/environmental impacts.

Strategies for Resilient Agriculture
GEC1: A-F
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Agricultural production systems comprise a fundamental sector of the economy, of which many policy makers have only specialized knowledge based on single commodities. Students gain an overview of the diverse portfolio of agricultural products that drive essential systems in the United States, and the major challenges that exist for achieving resiliency in the agricultural sector. Students explore food, livestock, fiber, and fuel crop management and associate supply chains that are complex systems influencing social, environmental, and economic resilience.

Environmental Sustainability Assessment
GEC1: A-F
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: An introduction to sustainability assessment theory with special reference to application. Students analyze sustainability planning efforts, contextualize and write up results, measure impacts, and learn the process to complete an assessment.

Sustainability Implementation Practicum
GEC1: A-F
Component: Seminar
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: This course involves students in a critical analysis of the Ohio University Sustainability Plan and community-based projects that support the Office of Sustainability’s mission. Students are engaged in the exploration of contemporary environmental initiatives, leadership, professionalism and local issues. Implementation of effective projects and feasibility studies to advance institutional sustainability efforts provides students the opportunity to make meaningful changes within their campus and community. This course’s focus allows students the opportunity to better define sustainability and the role it plays in their lives, enhance skills that encourage sustainable behaviors and make positive contributions to their health, the natural environment and the local community.

Science, Technology and Innovation Policy
GEC1: A-F
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Innovation and entrepreneurship have evolved from unstructured societal process to what is today a core principle of many private sector companies, a public policy goal of governments at all levels, and the primary mission of research organizations. Students examine both the theory and practice of how societies discover and create something new. Students examine the variety of processes through which ideas are generated, implemented and result in change to products, technologies, techniques, organizations, and policies. Students explore the concepts of environmental innovation and entrepreneurship.

Special Topics in Environmental Studies
GEC4: A-F, CR, PR
Component: Lecture
Cred Hours: 1 to 15
Repeat Hours: 999
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC4: A-F, CR, PR
COURSE DESC: Designed as an undergraduate seminar on contemporary environmental issues.

Environmental Studies Colloquium
GEC6: CR, PR, F
Component: Seminar
Cred Hours: 1
Repeat Hours: 2
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC6: CR, PR, F
COURSE DESC: Forum for presentation of original research, literature reviews, and discussions of contemporary environmental issues. Presentation by students, faculty, and guests.

Seminar in Community-Based Environmental Studies
GEC4: A-F
Component: Seminar
Cred Hours: 2
Repeat Hours: 0
General Education: N
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC4: A-F
COURSE DESC: Provides forum for discussion and analysis of contemporary environmental problems. Class includes orientation to the Appalachian region in the context of environmental issues.

Preparing for Environmental Leadership Practicum
GEC1: A-F
Component: Seminar
Cred Hours: 2
Repeat Hours: 4
General Education: I
Permanence: G40
Prerequisite: 
ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: For Environmental Studies students who will be completing a practicum. Students are oriented to a range of organizations and materials for a successful practicum experience.

GVS GVS LPA 4860 Public Budgeting Lecture 3 0 N U30 0
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: POLS 2000
COURSE DESC:
This class examines principles of sound tax policy and politics surrounding revenue decisions. It also examines processes and techniques of governmental spending decisions. The practices and fundamental concepts of government accounting, budgeting, financial management and public finance will also be introduced. Contemporary cases of budget decision-making processes at the national, state and local budget systems will be considered.

GVS GVS LPA 4870 Financial Management in Government Lecture 3 0 N U30 0
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: POLS 2000
COURSE DESC:
Students will survey the principles, issues and skills of financial management in the public sector. The focus is upon applications in the public sector and not-for-profit environment. The objectives of the course are to provide students with both theoretical understanding of the topic and to develop some of the fundamental skills necessary to work competently in the field. The focus will be on preparing students to be skilled consumers of financial information who possess the ability to analyze it and make sound decisions based on their analysis.

GVS GVS LPA 4890 Nonprofit Management Lecture 3 0 N U30 0
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Jr or Sr
COURSE DESC:
An introduction to the nonprofit sector and its role in society, the economy, and the delivery of human services. Includes an overview of principle management functions as each applies to nonprofit organizations.

GVS GVS LPA 4900 Special Topics in Leadership and Public Affairs Lecture 1 to 15 999 N U30 0
ELIGIBLE GRADES: GEC3: A-F,
REQUISITE:
COURSE DESC:
Specific course content will vary with offering.

GVS GVS LPA 4910 Strategy and Organization Consulting Internship 3 0 I U30 0
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Permission required
COURSE DESC:
Will provide students with real-world learning experiences in working as a consultant with public sector organizations and non-profit ventures. Students will work in teams using analysis-based decision-making to solve these clients’ key organizational/programmatic problems. Students will also acquire the soft skills necessary for effective oral/written communication, persuasion, and conflict resolution.

GVS GVS LPA 4920 Applied Learning in Leadership and Public Affairs Practicum 1 to 9 999 I U30 0
ELIGIBLE GRADES: GEC6: CR,
REQUISITE: PR, F
COURSE DESC:
Provides students with credit for applied practical experiences in various projects in the public sector. Students participate in a combination of seminars, lectures and project-based learning under the guidance and mentoring of Voinovich School Faculty and staff.

GVS GVS LPA 4930 Independent Study in Leadership and Public Affairs Ind Study 1 to 3 6 I U30 0
ELIGIBLE GRADES: GEC4: A-F,
REQUISITE: CR, PR
COURSE DESC:
Independent study is a one-on-one course with a topic and scope of work approved by the supervising faculty.

GVS GVS LPA 5640 Conflict Management and Dispute Resolution in Public and Nonprofit Organizations Lecture 3 6 N G40 0
ELIGIBLE GRADES: GEC4: A-F,
REQUISITE: CR, PR
COURSE DESC:
Will introduce you to the concepts of conflict management and the field of Dispute Resolution in general and interpersonal dispute mediation in particular. We will examine how non-adversarial, collaborative dispute resolution approaches can be used to address complex issues. You will learn new perspectives on conflict, evaluate conflict resolution approaches, and practice mediation skills.

GVS GVS LPA 5660 Theories and Practices in Collaboration Seminar 3 0 N G40 0
ELIGIBLE GRADES: GEC4: A-F,
REQUISITE: CR, PR
COURSE DESC:
This seminar focuses on theories and practices in collaboration.

GVS GVS LPA 5840 Entrepreneurial Consulting for Public and Non-Profit Organizations Seminar 3 0 N G40 0
ELIGIBLE GRADES: GEC4: A-F,
REQUISITE: CR, PR
COURSE DESC:
Designed to initially overview the consulting profession with a subsequent emphasis on entrepreneurial consulting issues as well as to introduce students to the entrepreneurial business enterprise in the public and non-profit sectors, its functional areas, challenges and success factors. Effort will be placed on developing proficiencies in a range of skills required to practice consulting as well as start, scale and run a successful organization. The course is relevant to those 1) who are specifically interested in consulting careers and / or 2) whose area of interest involves entrepreneurship, starting, scaling, managing and leading organizations in the public/non-profit sectors.

<td>COURSE DESC: Entrepreneurship education, in the sense of focusing on the creation of new economic entities centered on a novel product/service, has been, until recently, relatively rare. At Ohio University, a pedagogy has been developed focused on inter-disciplinary team-based projects that result in new venture formation and long-term success for the newly-founded companies and the University that developed the research and technologies which are the basis for many of the companies. The curriculum is structured such that students from the disciplines of science, medicine, engineering, communication, and business can be engaged and participate.</td>

<td>COURSE DESC: Examines the role that values play in the design and implementation of public policy. The course begins with a brief introduction to some of the most influential traditions in ethics: deontology, utilitarianism, virtue theory and care ethics. This introduction aids us in establishing a common vocabulary for the analysis of policy questions and engagement with the broader debates in which such questions are embedded. We move from this introduction into a closer consideration of ethics in the context of several concrete institutional settings.</td>

<td>COURSE DESC: A communications plan is an important part of an organization’s daily operation. Additionally, for public and nonprofit organizations in particular, the activities in the plan should support overall communications goals in ways that help raise money, create change, recruit talent, and promote mission-related goals and objectives. As a living document, it frames the way both internal and external audiences perceive the organization; and since many nonprofits have limited staff and financial resources available for communications activities, it is even more important that these resources be deployed as strategically as possible. This course offers an overview of communications concepts and media activities in ways that will help students develop a strategic communication plan focused on emphasizing a commitment to organizational mission; building trust among internal and external audiences; clarifying organizational priorities; and generating public value.</td>

<td>Public and private actions, business and physical infrastructure, provide needed services and contribute to other physical and intellectual attributes that constitute communities. This course examines the intermingling of public and private roles and responsibilities and the potential consequences for the business, economic and physical development of communities that reflect the inevitable negotiation of public interest oversight and entrepreneurial risk in cross-sectoral partnerships. This course will function as a public private partnership with faculty and students engaging business and public leaders to build and analyze partnerships for the future.</td>

<td></td>
<td>An introduction to the principles, methodologies, and methods of qualitative research. The course will examine the role of qualitative research in the field of public administration (and allied fields) as well as the relationship between qualitative and quantitative methodologies. The course will provide students the opportunity to examine and practice approaches and methodologies utilized by qualitative researchers such as: interviewing, ethnography, participant observation, case studies, discourse analysis, and content analysis. Through readings, discussions, and practice, students will be able analyze the comparative strengths and liabilities of each method. The course will provide students with the knowledge and skills needed to select qualitative methodologies and methods that are appropriate given the research question at hand.</td>

**Course Descriptions:**
- **EXPH 2280 Community First Aid, and CPR/AED for the Professional Rescuer:** This course gives the students the skills and knowledge of First Aid and CPR/AED. Certification is given for successfully passing all components of the course.
- **EXPH 2200 Applied Kinesiology:** Practicum in which students gain hands-on experience in the field of applied kinesiology.
- **EXPH 1600 Foundations in Muscular Fitness:** Introduce students to professions in exercise sciences with special emphasis on exercise physiology. Basic concepts of human movement and the foundations of well-being are introduced.
- **EXPH 1001 Lifetime Fitness:** This course presents the risks of sedentary behavior and the benefits of regular physical activity (fitness) to long-term health and wellness. This course includes basic anatomy and physiology to provide an "owner's manual" understanding of how the human body responds and adapts to sedentary and physical activity stressors. This course also includes a basic introduction of the roles of stress and diet in the promotion of fitness and wellness.
- **EXPH 1490 Introduction to Exercise Science:** Introduces foundational knowledge for improving muscular fitness through evidence-based methods. Hands-on experiences to develop a better command of exercise physiology.
- **EXPH 1600 Foundations in Muscular Fitness:** Introduce foundational knowledge for improving muscular fitness through evidence-based methods. Hands-on experiences to develop a better command of physical and field specific skills in strength, conditioning, and exercise physiology.
- **EXPH 2200 Applied Kinesiology:** Introduce foundational knowledge for improving muscular fitness through evidence-based methods. Hands-on experiences to develop a better command of physical and field specific skills in strength, conditioning, and exercise physiology.
- **EXPH 2280 Community First Aid, and CPR/AED for the Professional Rescuer:** This course gives the students the skills and knowledge of First Aid and CPR/AED. Certification is given for successfully passing all components of the course.

**Eligible Grades:**
- **GEC1:** A-F
- **GEC3:** A-F or CR, PR
- **GEC4:** A-F, CR, PR
- **GEC5:** CR, PR

**Prerequisites:**
- **EXPH 1600 Foundations in Muscular Fitness:** Exercise Physiology Major or EXPH 1490 (concurrent or completed with a "C" or better)

**Course Descriptions:**

- **EXPH 4620A**: Honors Experience: Pediatric Exercise Physiology. An honors experience providing students with an opportunity to gain an in-depth understanding of pediatric exercise physiology and its application, with hands-on experience including oral presentations with verbal and non-verbal delivery techniques and both self- and peer-assessments.

- **EXPH 4850**: Motor Development. Consideration of psychological, sociological, and physiological bases of development and application of these theories to motor development and performance.

- **EXPH 4900**: Special Topics in Exercise Physiology. This course will address a variety of special topics related to the field of exercise physiology. The intent of this class is to provide the student with the opportunity to explore, more deeply, topics that he or she may have been exposed to only briefly (youth and aging, environmental effects, ergogenic aids, weight loss).

- **EXPH 4910**: Internship in Exercise Physiology. An elective internship with approved firm, agency, hospital, unit, school, or organization.

- **EXPH 4940**: Research Dynamics: Planning, Participation and Actualization of the Research Process. A hands-on approach to research: developing the idea, establishing the methodology, collecting data, conducting statistical evaluation, and writing the results in publication format.

- **EXPH 5140**: Physiology of Exercise. Explores the physiological characteristics of muscle, its adaptations to exercise, and training methods that can be used to produce these adaptations. Emphasizes both theory and application, with hands-on experience including oral presentations with verbal and non-verbal delivery techniques and both self- and peer-assessments.

- **EXPH 5145**: Physiology of Exercise Lab. The purpose of this laboratory course is to provide the student with an opportunity to obtain hands on experiences in the methodology and techniques used in studying exercise physiology and to learn skills and to practice many of the techniques used by exercise physiologists.

- **EXPH 5160**: Resistance Training: Theory and Application. Explores the physiological characteristics of muscle, its adaptations to exercise, and training methods that can be used to produce these adaptations. Emphasizes both theory and application, with hands-on experience including oral presentations with verbal and non-verbal delivery techniques and both self- and peer-assessments.

- **EXPH 5170**: Clinical Exercise Physiology for Nursing. Provides nursing students with a foundation of the physiological responses to exercise, the assessment of fitness, and the prescription of individualized fitness programs specific to clinical populations.

- **EXPH 5180**: First Aid and CPR II. This course is intended for individuals who have been certified in first aid, cardiopulmonary resuscitation (CPR) and automated external defibrillation (AED) use. The topics covered in this course will include a review of the skills and knowledge of first aid, CPR and AED. Re-certification will be issued for successfully passing all components of the course.

- **EXPH 5185**: Instructional Experience. A supervised practice/instructional experience in organizing and teaching activities within the program.

**COURSE DESC:**
- **Introduction to Nutrition:** Lecture 3 units, 0 repeat hours, 2AS general education, Perm N, Subsidy Level U10. ELIGIBLE GRADES: A-F. REQUIREMENT: GEC1: A-F. Course description: Nutrients, their food sources and functions in the body; application to planning adequate diet through life cycle.

- **Introduction to Food Systems:** Lecture 3 units, 0 repeat hours, 2AS general education, Perm N, Subsidy Level U10. ELIGIBLE GRADES: A-F. REQUIREMENT: Components of the food system and all processes that maintain our food supply, including growing, harvesting, processing, packaging, transporting, marketing, consuming, and disposing of food/food packages. Interaction of the food system with social, political, economic and natural environments. Sustainability of the food system. Impact of the food system on nutritional well-being.

- **Science of Cooking:** Laboratory 3 units, 0 repeat hours, 2NS general education, Perm N, Subsidy Level U10. ELIGIBLE GRADES: A-F. REQUIREMENT: An experiential and hands-on introduction to the basic scientific principles underpinning cooking and food preparation methods, the physiology of taste and flavor, and the chemical and physical changes that occur in foods during food preparation and cooking.

- **Personal Nutrition for Active Individuals:** Lecture 1 unit, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: This course will provide dietary principles on a wide variety of topics including macronutrients, micronutrients and fluid replacement for active individuals. Pros and cons of popular ergogenic aids, recommendations for pre and post competition meals and snacks, and recommended nutritional strategies to reach optimal weight and body composition will also be explored.

- **Menu Planning and Preparation for Active Individuals:** Lecture 1 unit, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: The course provides application of menu planning strategies that effectively meet the energy needs of active individuals. The student plans and procures healthy meals and snacks that support health and prevent chronic disease.

- **Lifespan Nutrition:** Lecture 4 units, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: Examination of nutritional needs and unique concerns to foster optimal growth and development during the lifespan. Application of nutrition principles, as supported by current research, to plan and implement recommendations for dietary change throughout the life cycle.

- **Science of Food I:** Laboratory 3 units, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: Scientific principles applied to selection, storage and preparation of foods with emphasis on food macromolecules. Introduction to consumer food regulation and sensory analysis.

- **Science of Food II:** Lecture 3 units, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: Scientific principles applied to selection, storage and preparation of foods with emphasis on food macromolecules. Introduction to consumer food regulation and sensory analysis.

- **Science of Food II:** Lecture 3 units, 0 repeat hours, Perm N, Subsidy Level U30. ELIGIBLE GRADES: A-F. REQUIREMENT: Scientific principles applied to selection, storage, and preparation of foods.
### Principles of Food Science
- **Title:** Principles of Food Science
- **Component:** Lecture
- **Cred Hours:** 4
- **Permutation:** N
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in NUTR 1000 and (CHEM 1205, 1210, 1500, or 1510) and RHT 1330 and WARNING: No credit for both this course and the following (always deduct credit for the first course taken): NUTR 2200 or 2220
- **Course Description:** Scientific principles of food science applied to food components and complex food systems. Connects production, processing, cooking, and preservation to health and wellness for future food and nutrition professionals.

### Principles of Food Science
- **Title:** Principles of Food Science
- **Component:** Lecture
- **Cred Hours:** 4
- **Permutation:** N
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in NUTR 1000 and (CHEM 1205, 1210, 1500, or 1510) and RHT 1330 and WARNING: No credit for both this course and the following (always deduct credit for the first course taken): NUTR 2200 or 2220
- **Course Description:** Scientific principles of food science applied to food components and complex food systems. Connects production, processing, cooking, and preservation to health and wellness for future food and nutrition professionals.

### Special Topics in Nutrition
- **Title:** Special Topics in Nutrition
- **Component:** Lecture
- **Cred Hours:** 1 to 15
- **Permutation:** 999
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC3: A-F, CR
- **Requisite:** Specific course content will vary with offering.

### Food Production Practicum
- **Title:** Food Production Practicum
- **Component:** Practicum
- **Cred Hours:** 1 to 2
- **Permutation:** 4
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** NUTR 1100 and RHT 2990
- **Course Description:** Emphasizes application of knowledge in different areas of a large scale food production environment. Through first-hand experience, case study work, and professional mentorship, the student gain an understanding of the scope of a large scale food production environment.

### Nutrient Metabolism
- **Title:** Nutrient Metabolism
- **Component:** Lecture
- **Cred Hours:** 3
- **Permutation:** N
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** (CHEM 123 or 1220 or 153 or 1520) and C or better in (NUTR 128 or 1000)
- **Course Description:** Examination of the macronutrients from a scientific standpoint, including their digestion, metabolism, and utilization at the cellular level. Evaluation of the recommended intake for the prevention of chronic disease and health maintenance.

### Medical Nutrition Therapy I
- **Title:** Medical Nutrition Therapy I
- **Component:** Lecture
- **Cred Hours:** 3
- **Permutation:** 0
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** (BIOS 1310 or 3450) or concurrent and C or better in NUTR 3000
- **Course Description:** Medical nutrition therapy associated with the prevention and treatment of disease, including overweight/obesity, hypertension, hyperlipidemia, diabetes mellitus, and kidney disease.

### Fundamentals of Nutrition for Athletic and Physical Performance
- **Title:** Fundamentals of Nutrition for Athletic and Physical Performance
- **Component:** Lecture
- **Cred Hours:** 3
- **Permutation:** 0
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in NUTR 1000
- **Course Description:** Explores the fundamentals of nutrition for athletic and physical performance, including the nutrient requirements for high-quality training and competition.

### Principles of Quantity Food Production and Purchasing
- **Title:** Principles of Quantity Food Production and Purchasing
- **Component:** Lecture
- **Cred Hours:** 3
- **Permutation:** 0
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in NUTR 1100 and (NUTR 2250 or NUTR 1100 and RHT 1200) or (NUTR 1000 and RHT 2990)
- **Course Description:** Food purchasing and preparation principles applied to large quantity food production, menu planning, recipe standardization, food cost, and service in institutions.

### Introduction to Food Production
- **Title:** Introduction to Food Production
- **Component:** Laboratory
- **Cred Hours:** 4
- **Permutation:** N
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in (NUTR 333 or 3900) or concurrent
- **Course Description:** Application of food purchasing, quantity food production, and food management principles in a commercial kitchen. Apply food safety and sanitation principles by participating in HACCP plan. Use standardized recipes and food service equipment in production of foods.

### Contemporary School Nutrition
- **Title:** Contemporary School Nutrition
- **Component:** Laboratory
- **Cred Hours:** 3
- **Permutation:** 0
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** NUTR 1000 and (2000 or 2100) and 3300 and 3350
- **Course Description:** Contemporary issues affecting school nutrition programs, including dietary factors and management of child nutrition programs. Contribution of nutrition education and school lunch program in school curriculum and includes food and menu development.

### Contemporary School Nutrition
- **Title:** Contemporary School Nutrition
- **Component:** Laboratory
- **Cred Hours:** 3
- **Permutation:** 0
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** NUTR 1000 and (2000 or 2100) and 3300 and 3350
- **Course Description:** Contemporary issues affecting school nutrition programs, including dietary factors and management of child nutrition programs. Contribution of nutrition education and school lunch program in school curriculum and includes food and menu development.

### Nutrition Counseling
- **Title:** Nutrition Counseling
- **Component:** Lecture
- **Cred Hours:** 1
- **Permutation:** N
- **Level:** U30
- **Repeat:** 0
- **Subsidy:** 0
- **General Education:** 0
- **Eligible Grades:** GEC1: A-F
- **Requisite:** C or better in NUTR 3000
- **Course Description:** Introduction to the theory of medical nutrition therapy (MNT); communicating health and nutrition advice to consumers; and behavior change models used in MNT.

**COURSE DESC:**
- **Food and Nutrition Sciences Study Tour**
  - Exposure to the latest trends in nutrition, food, and health that impact the fields of nutrition and applied nutrition.

- **Field Experience in Culinary and Environmental Nutrition**
  - The purpose of field experience is to provide an opportunity for undergraduate students to apply knowledge through work in the field of culinary nutrition or environmental nutrition. Through first-hand experience, case study work, and professional mentorship, the student will gain an understanding of the scope of culinary or environmental nutrition.

- **Dietetic Field Experience**
  - Professional experience in acute healthcare, long term care, community nutrition programs, school nutrition programs, and/or food industry under daily supervision of a Registered Dietitian (RD) or another food and nutrition sciences/applied nutrition professional.

- **Nutrition in the Community**
  - Application of the Nutrition Care Process in the community, including: 1) assessment of community nutrition needs; 2) policies and interventions to prevent and improve nutritional wellness of individuals, families, and community; and 3) agencies providing services. Role of the environment, food, food systems, and nutrition on community nutritional health. Public and health care policy affecting nutritional care.

- **Advanced Nutrition**
  - An in-depth examination of advanced topics in nutrition, including integrative and functional nutrition, nutritional genomics, dietary supplements, complementary and alternative medicine, and micronutrients.

- **Medical Nutrition Therapy II**
  - Medical nutrition therapy associated with the prevention and treatment of disease, including gastrointestinal, pulmonary, and wasting diseases. Enteral and parenteral nutrition.

- **Experimental Foods**
  - Factors which affect results of different methods used in food preparation. Research techniques and food product development using subjective and objective evaluation of products.

- **World View of Nutrition**
  - Survey of world food situation with consideration of environmental, cultural, governmental, and economic factors that relate to food production and consumption. Evaluation of these patterns in meeting dietary needs.

- **Diabetes From Bench to Bedside**
  - An exploration of the underlying genetics and physiology of diabetes and clinically relevant issues surrounding diabetes from medical, self-management, and prevention perspectives.

- **Research Design and Methods in Food and Nutrition Sciences**
  - Overview of research design and methodology with practice application to the fields of food and nutrition sciences. A group research project will be carried out.

- **Special Topics in Nutrition**
  - Specific course content will vary with offering.

- **Food and Nutrition Sciences Senior Seminar**
  - Examines the latest trends in the fields of food, nutrition, and applied nutrition. Provides an opportunity for majors in nutrition and applied nutrition to demonstrate personal and professional growth by investigating a topic and presenting it in class. Students lead discussions on topics that affect the professions and share professional experiences gained.

REQUISITE: Fr or Soph

COURSE DESC:
Provides an overview of health-related topics that are relevant to college-aged students (e.g., safer sex, nutrition, physical activity). Students have the opportunity to critically assess their current health behaviors in an effort to make positive health decisions. This is a designate service learning course.

Interprofessional Experiential Learning

COURSE DESC: This course is intended for students to study and/or do research in selected fields related to the Department of Interdisciplinary Health Studies' certificates or majors under the direction of a Department affiliated faculty member.

ELIGIBLE GRADES: CR, PR

Quality, Safety and Service in Healthcare Leadership

COURSE DESC: This course examines the issues related to the leaders role in developing and executing quality, safety and service and the interdependence of these strategies on outcomes in healthcare.

ELIGIBLE GRADES: CR, PR

Financial Innovation and Growth Strategies in Healthcare

COURSE DESC: This course examines the basic financial management skills and accounting processes unique to the healthcare delivery system and the responsibilities of managers and leaders in applying them. In addition, this course will explore the specifics of revenue generating strategies through growth and innovation in healthcare.

ELIGIBLE GRADES: CR, PR

Vulnerable Populations in Healthcare

COURSE DESC: The social, emotional, and psychological considerations of vulnerable populations in healthcare are addressed. Vulnerable populations, groups that are not well integrated into the healthcare system, are often identified by ethnic, cultural, economic, geographic or health characteristics.

ELIGIBLE GRADES: CR, PR

Identifying Abuse in a Healthcare Setting

COURSE DESC: Course addresses various forms of abuse including; psychological, physical, verbal, sexual, and substance abuse. Course materials focus on increasing awareness of theories associated with abuse, education leading to prevention and reporting, the ethical decision making required and the implications of reporting suspected cases of abuse in the healthcare setting.

ELIGIBLE GRADES: CR, PR

Secondary data analysis in global health and development

COURSE DESC: This applied research course utilizes secondary analysis of existing data to analyze research questions in global health and development. Students develop a research plan, obtain IRB approval and analyze publicly available and faculty generated quantitative and qualitative data on critical health issues among various cultures. By the end of the course, students complete a research project utilizing an existing global health data source. Students are strongly encouraged to have completed a basic research methods course prior to enrolling in this course.

A Service or research project integrating aspects of global health that impact developing countries and/or vulnerable populations. Combines field work with theoretical knowledge and analytical skills gained through coursework. Students will either complete a research or clinical project dealing with global health issues. Students are encouraged to pursue a project in their discipline of interest.

## IHS 5403 Female Veterans' Health

**Course Description:** An introduction to interprofessional theoretical models and clinical practices of health promotion. An emphasis is placed on taking an interprofessional approach to assess health behaviors, identifying major resources to address these behaviors, and promoting practices that will improve health and wellness. Course meets the College of Health Sciences and Professions interprofessional education (IPE) undergraduate requirement.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## HSP IHS 5402 Veterans Affairs System: Healthcare

**Course Description:** The United States Department of Veterans Affairs (VA); including mission, organizational structure, history and evolution are explored with an emphasis placed on veterans' health and healthcare services.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5401 Diseases and Conditions in Veterans:

**Course Description:** This course examines the current literature and epidemiological data on numerous biological, psychological, social diseases and conditions in military veterans and their families. This course also investigates the challenges regarding diagnosis and treatment of current and former military personnel and their families in comparison to civilian patients.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5400 Veterans Health: United States Military Culture and History

**Course Description:** Emphasize the importance of healthcare providers understanding of military culture and history, in order to be effective providers for this population.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5350 The Impact of Social Determinants on Health

**Course Description:** Provides students with a broad understanding of how a person's life and health are impacted by social and community context. Students learn to link the social, mental, and physical health of an individual to the larger societal factors with an interdisciplinary mindset by exploring how various sectors approach interventions to mediate the impact of inequality and disparities. Course satisfies the College of Health Sciences and Professions interprofessional education (IPE) undergraduate requirement.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5303 Secondary data analysis in global health and development

**Course Description:** This applied research course utilizes secondary analysis of existing data to analyze research questions in global health and development. Students develop a research plan, obtain IRB approval and analyze publicly available and faculty generated quantitative and qualitative data on critical health issues among various cultures. By the end of the course, students complete a research project utilizing an existing global health data source. Students are strongly encouraged to have completed a basic research methods course prior to enrolling in this course.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5302 Health Policy: Current Issues, Trends and Emerging Topics

**Course Description:** Current issues in local, state and national health policy are presented. The emphasis of this class is the analysis and evaluation of current trends and emerging topics in health policy.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5301 The Health Policy Making Process

**Course Description:** Elaborating on the processes required for health policy making from conception to evaluation. Emphasizing the contrast of roles, perceptions of, and impact on individuals versus organizations; with a vested interest in the policy positions.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5300 Fundamental Health Policy: Concepts, Components and Systems

**Course Description:** Exploring health policy from a systematic approach; linking public health and healthcare issues to policy processes. Examination of policy formation, individuals, organizations, and systems involved in this processes; in relation to various issues in population health, health promotion, and healthcare delivery.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400

---

## IHS 5250 Interprofessional Health Promotion

**Course Description:** This course emphasizes the importance of increasing healthcare provider awareness of unique healthcare challenges female veterans encounter as they seek treatment across various healthcare agencies.

**Eligible Grades:** GEC1: A-F

**Requisite:** IHS 5400
### COURSE LISTING

#### Master Curriculum File

**COURSE DESC:** Best practices in healthcare emphasize a strong connection between practice and research. This course provides a cross-disciplinary overview of research-informed practice and practice-informed research for the allied health professions. Includes the role of the health professional as a consumer of research with concern for the ethical considerations in the research process. Basic elements of research design, concepts and statistical tests are covered.

<td>This course introduces different approaches to health systems strengthening in low and middle income countries (LMIC), including monitoring and evaluation, continuous quality improvement, community health workers, health workforce development and research capacity building. A case based approach is used to evaluate the extent to which health systems address health equity in a sustainable manner. Students explore how translational research can convert health research to action and policy. The class examines contextual and cultural explorations of different LMIC settings that act as facilitators and/or barriers for high performance in LMIC settings.</td>

<td>This course provides a conceptual framework to understand the process of global migration and human health. Students critically examine the social and political construction of displaced people (migrant and refugee), and the resultant state and humanitarian responses surrounding health and social services. This course frames global health in broad terms to include underlying social and economic conditions, including climate change, economic underdevelopment, and political instability, which displace people around the world and present barriers to achieving health and well-being in displaced communities. In order to sharpen skills in critical analysis of health problems and to better understand their underlying causes, students draw upon various fields including: global health, development studies, public health, anthropology, and other social sciences.</td>

**COURSE DESC:** Specific course content will vary with offering.

**ELIGIBLE GRADES:** GEC1: A-F, GEC3: A-F

**REQUISITE:**
- NRSE 2111 and 2121
- NRSE 2102, 2111, 2122, and 2132
- NRSE 2111 and 2121 and 2231
- NRSE 2102, NRSE 2111 and 2121, NRSE 2122, NRSE 2132
- NRSE 2111 and BSN major
- NRSE 2111 and 2121
- NRSE 2111 and 2121 and 2231
- NRSE 2102, NRSE 2111 and 2121, NRSE 2122, NRSE 2132.

**WARNING:** No Credit if NRSE 2241

**CR:**
Specific course content will vary with offering.

**INFOMATION:**
- Provides an introduction of basic concepts and principles related to pharmacology, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.
- The nurse's role in drug therapy. Major classifications of drugs will be examined and issues associated with drug therapy in society discussed.

**COURSE DESC:** Students integrate theory, standards, and knowledge from nursing, public health, and other disciplines to guide population-focused nursing practice. Students collaborate with interprofessional teams to apply health promotion and disease prevention strategies to diverse individuals and groups across the lifespan. Human diversity will be identified through a spectrum of race, ethnicity, gender, sexuality, religion, physical ability, and/or social class with an emphasis on the analysis of equity. Emphasizes understanding of and sensitivity to culturally diverse populations and recognition of the potential health disparities experienced within these groups. The study of cultural groups and their interrelationships relative to health and illness is included. The impacts of local and global health policies and laws on population health outcomes are examined. Emphasis is placed on identifying social determinants of health, empowering clients and communities, advocating for vulnerable populations, and engaging in effective partnerships to improve the health of populations and reduce health disparities. Students will apply and evaluate approaches or modes of inquiry used to analyze diversity and equity and the social barriers to these goals. Strategies to advance preparedness to protect population health during disasters and public health emergencies are introduced. This course meets the General Education requirements for Bridge: Diversity and Practice.

HSP NRSE 4212 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Professional Nursing Practice Capstone
Students apply clinical judgment and clinical reasoning to the concepts of person-centered care for adults experiencing acute, chronic, and complex physical health alterations. Students integrate concepts of quality and safety, professionalism, interdisciplinary care, and systems-based practice into the care of adult clients with health alterations. Laboratory and clinical experiences assist students in comprehensive development of skills and integration of theory into practice. This course meets the University BRICKS requirement for Capstone and Bridge: Learning and Doing.

HSP NRSE 4222 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Health Economics and Healthcare Policy for Contemporary Nursing Practice
Contemporary issues in healthcare are explored with a focus on the role of the nurse and professional healthcare organizations in policy development, revision, and advocacy. Principles of health economics including financial and payment models and their impact on delivery, access, and quality of care are discussed within an equity and social justice framework. Students participate in critical analysis of healthcare policies, regulatory agencies, and economic constraints that impact professional nursing practice and healthcare delivery systems.

HSP NRSE 4401 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Professional Practice in Nursing
Focuses on care of adult clients with complex alterations in health like cancer, multisystem failure, multiple system trauma, and diabetes. Students work with a preceptor in a specific agency setting. Emphasis is on refined clinical judgment, communication skills, and integration of a range of therapeutic interventions into nursing practice including those appropriate to individual clients, their families/significant others, and relevant population-based groups.

HSP NRSE 4401 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Professional Practice in Nursing
Focuses on care of adult clients with complex alterations in health like cancer, multisystem failure, multiple system trauma, and diabetes. Students work with a preceptor in a specific agency setting. Emphasis is on refined clinical judgment, communication skills, and integration of a range of therapeutic interventions into nursing practice including those appropriate to individual clients, their families/significant others, and relevant population-based groups.

HSP NRSE 4510 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Professional Nursing Practice
Provides an acclimation to the RN to BSN program by addressing the concepts, scope, and standards of professional nursing practice, including legal foundations of nursing practice, cultural diversity and competency, and inclusivity. Includes an introduction to principles of public speaking as well as active and passive verbal communication amongst a healthcare team with an emphasis on communication around social determinants of health. Introduces ethical concepts and theories impacting nursing practice, including personal values and beliefs and ethical reasoning. This course meets the Bridges for Ethics and Reasoning and Oral Communication.

HSP NRSE 4520 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Health Assessment and Promotion
Reviews and develops skills associated with cephalocaudal assessment; strengthens the registered nurse’s ability to draw valid inferences from the data collected, and examines the design of health promotion interventions to address identified health issues.

HSP NRSE 4530 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Family Nursing
Focuses on nursing care of the family system throughout the life cycle. Emphasizes the synthesis of family theory and application of the nursing process for families.

HSP NRSE 4540 ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Community Health Nursing
Focuses on nursing care of aggregate systems within a community. Topics include community health nursing roles and basic concepts of community health. Addresses the implementation of population-focused care through the nursing process, collaboration, and interdisciplinary skills. Includes the importance of health promotion, along with disease and injury prevention, throughout the lifespan and the assistance of individuals, families, groups, communities, and populations to prepare for and minimize health consequences of emergencies, including mass casualty disasters.

HSP NRSE 4541 ELIGIBLE GRADES: GEC6: CR, PR, F
COURSE DESC: Public Health Nursing Clinical
Clinical course designed for students completing the RNtoBSN program who live in California in order to meet the more extensive California Board of Nursing clinical clock hour requirements. Focuses on nursing care of aggregate systems within a community, public health nursing roles and basic concepts of public health. Addresses the implementation of population-focused care through the nursing process, collaboration, and interdisciplinary skills. Includes the clinical importance of health promotion, along with disease and injury prevention, throughout the lifespan and the assistance of individuals, families, groups, communities, and populations to prepare for and minimize health consequences of emergencies, including mass casualty disasters.

<td>A synthesis course designed to enhance knowledge of the relationship between healthcare policy and professional nursing practice. Explores the broader context of healthcare including how patient care services are organized and financed, and how reimbursement is structured. Regulatory agencies define boundaries of nursing practice and students need to understand the scope and role of these agencies. Discusses how healthcare issues are identified, how healthcare policy is both developed and changed, and how that process can be influenced through the efforts of nurses, other healthcare professionals, and lay and special advocacy groups. Addresses issues related to vulnerable populations, delivery and financing of healthcare, the impact of technology, and client advocacy. An experiential learning project is developed and implemented by the end of the course which demonstrates actual engagement with patients/stakeholders to impact outcomes.</td>

COURSE LISTING
SORTED BY College, Department/School, Prefix

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: CR
Specific course content will vary with offering.

Provides the registered nurse with the opportunity to review literature related to issues of human sexuality associated with specific disease states as encountered in the practice of nursing. Students will choose a specific population (e.g., school-aged children) or a specific disease category (e.g., cardiovascular disease) as their focus of study.

Examines social, political, and historical factors that impact the delivery of health care and the development of the nursing discipline. Emphasizes the review and application of selected concepts, models, and selected theories relevant to the health care system and nursing.

Focuses on analysis of theories relevant to the development and functioning of the family. Includes identification of health care needs across family life span. Emphasizes assessment, intervention, and evaluation of family-focused care. Explores strategies to enhance, maintain, and restore family health.

Focuses on analysis of theories relevant to the development and functioning of the family. The course includes identification of health care needs across the life span of family members. Emphasis will be placed on assessment, intervention, and evaluation of family-centered care through exploration of evidence-based strategies to enhance, maintain, and restore family health.

Focuses on concepts and issues related to the critical care environment. Include the identification of physical and psychological needs of this critical care patient population as well as family members. Emphasis is be placed on assessment, intervention, and evaluation of the critically ill or injured patient using evidence-based strategies.

Focuses on research design and methodology with an emphasis on evaluation of published clinical outcome studies in nursing. Utilizes strategies for application of research findings to practice. Introduces nursing information management, cognitive science, and technology in health care delivery.

Focuses on evidence-based practice and the translation of evidence into practice. Content prepares professional nurses to initiate evidence-based practice models in their practice and to increase use of information management and patient care technologies in specified clinical areas.

Focuses on analysis of concepts of physiology and pathophysiology and relationship to nursing interventions across lifespan of humans at the advanced practice level.

Focuses on project planning, implementation and evaluation in a healthcare setting. Includes analysis of processes required to manage and develop a project team from a nursing administrative perspective. Examines outcome metrics related to project value and dissemination. This course includes integrative immersion experiences outside of class time related to project planning in the healthcare setting.

Focuses on advanced physical assessment skills for nurse practitioner students that moves from the normal to the abnormal and uses a body systems approach. Comprehensive health history coupled with physical examination skills provide a foundation for the indepth assessment of clients.

COURSE DESC: This is the second of two courses encompassing advanced assessment techniques for the diagnosis and management of psychiatric mental health disorders throughout the lifespan. Included is the development of differential diagnoses, planning, and evaluation of care using psychotherapeutic modalities, psychopharmacology, and community resources. Addresses the influence of family dynamics as well as societal influences on mental health and recovery. The concepts of both acute and chronic treatments for personality disorders, substance abuse, schizophrenia, medical issues with mental health, and other select disorders as they apply to advanced practice nursing are discussed.

<td>This course emphasizes synthesis of the American Association of Colleges of Nursing (AACN) Essentials of Master's Education. The Commission on Collegiate Nursing Education (CCNE), the Master of Science in Nursing (MSN) program accrediting body, mandates that these Essentials are incorporated into all MSN programs. These Essentials represent the core competencies for preparation of movement of students into advanced nursing practice regardless of specific practice setting. Students will engage in focused self-reflection on achievement of these competencies and a comprehensive final program exam.</td>

### HSP NRSE
#### NRSE 6903:
**Capstone Experience for Nurse Practitioners**
- **Component**: Seminar
- **Cred Hours**: 1
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 6834 or concurrent, NRSE 6828 or concurrent, NRSE 6831 or concurrent
- **COURSE DESC**: Focuses on theoretical and evidence-based clinical principles for advanced health assessment for APRNs using a body systems approach. Emphasis is on acquisition of advanced skills to perform comprehensive and episodic health assessment. Includes culturally competent patient education, health promotion and clinical prevention related to risk factors for the individual or family.

#### NRSE 6935:
**Capstone Experience for Nurse Leaders**
- **Component**: Seminar
- **Cred Hours**: 2
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 6929 or concurrent and Nursing Leadership majors only
- **COURSE DESC**: This course emphasizes student self-evaluation of meeting specific program outcomes and professional competencies through portfolio development. Nurse Practitioner students also complete a comprehensive final program exam that includes concepts from all program courses pertaining to the population foci of the student NP Track Option and is based on national certification body domains of practice. Students complete an integrative care simulation exam with a standardized patient.

### HSP NRSE
#### NRSE 7001:
**Professional Presence and Writing for the Advanced Nurse**
- **Component**: Lecture
- **Cred Hours**: 1
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on professional presence for the advanced practice and advanced-level nurse. Emphasis is on concepts of professionalism, advanced communication and inclusive language, scholarly and professional writing, and professional presence in the dissemination of knowledge and scholarship.

#### NRSE 7002:
**Application of Statistics to Evidence Based Projects**
- **Component**: Lecture
- **Cred Hours**: 2
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on the use of health assessment data to identify health status of clients by graduate students in the educator and nurse leadership options. The data will be used to document assessment findings and to differentiate between normal and abnormal assessment data. Emphasizes the performance of complete health histories and physical examinations on adult and pediatric clients.

### HSP NRSE
#### NRSE 7210:
**Advanced Pathophysiology for Advanced Practice Nursing**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on pharmacotherapeutics across the lifespan with emphasis on clinical decision making by advanced practice nurses. Laws governing prescriptive authority and privileges of advanced practice nurses are addressed. Emphasis on prescriptive decisions with the context of outcomes, safety, quality and costs.

#### NRSE 7211:
**Advanced Pharmacology and Pathophysiology for Nurse Educators**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on integrating knowledge of advanced physiology with pathophysiology and clinical implications across the life span. Includes analysis of health disparities and outcomes resulting from genetic, environment and stress related causes. Emphasis on systems-focused mechanisms of disease.

#### NRSE 7220:
**Advanced Pharmacology for Advanced Practice Nursing**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on the use of health assessment data to identify health status of clients by graduate students in the educator and nurse leadership options. The data will be used to document assessment findings and to differentiate between normal and abnormal assessment data. Emphasizes the performance of complete health histories and physical examinations on adult and pediatric clients.

#### NRSE 7221:
**Advanced Health Appraisal for NE**
- **Component**: Laboratory
- **Cred Hours**: 3
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on integrating knowledge of advanced physiology with pathophysiology and clinical implications across the life span. Includes analysis of health disparities and outcomes resulting from genetic, environment and stress related causes. Emphasis on systems-focused mechanisms of disease.

#### NRSE 7222:
**Advanced Health Appraisal for NE**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat**: 0
- **General Education**: N
- **Perm**: G40
- **Subsidy Level**: 0
- **ELIGIBLE GRADES**: A-F
- **REQUISITE**: NRSE 7211
- **COURSE DESC**: Focuses on the use of health assessment data to identify health status of clients by graduate students in the educator and nurse leadership options. The data will be used to document assessment findings and to differentiate between normal and abnormal assessment data. Emphasizes the performance of complete health histories and physical examinations on adult and pediatric clients.

The course focuses on the application of knowledge to implement an intervention strategy to improve individual, community or population health in the clinical project setting. An emphasis is placed on the implementation process including the role of the inter-professional team, barriers, facilitators and outcomes. The course includes residency hours outside class time in the clinical project setting.

<td>The focus of this medical surgical course is to introduce the learner to the scope and practice of medical-surgical nursing. Emphasis is placed on pathophysiological disturbances and related nursing skills for selected topics of this course. The student will be introduced to and practice the safe administration of medications. Skills once learned may be applied in the clinical setting under the supervision of the clinical instructor. This course validates prior learning, updates and enhances student's knowledge of nursing, continues the process of role transition, and prepares the student to progress in the associate degree nursing program. Content includes, perioperative nursing, fluid and electrolyte and acid base imbalances, integumentary problems, burns, and wound care; management of patients with problems of the endocrine, gastrointestinal, and hepatobiliary systems; cancer and hematological concepts and intravenous therapy.</td>

**Course Descriptions:**

**Child and Adolescent Nursing**
- Focuses on the role of the associate degree nurse as a member within the discipline of nursing, a provider of health care, and a professional who manages care for infants, children, and adolescents with health alterations. Emphasizes establishing a caring relationship between the child, family, and nurse. Utilizes collaboration, communication, and critical thinking within the framework of nursing process to promote health and well-being of pediatric clients. Applies knowledge regarding the influences of culture, family dynamics, resources for children, and case management in the care of children.
- Eligible Grades: GEC1: A-F
- Requisite: BIOS 1310 and ENG 1510 and NURS 1210 and 1220 and PSY 1010 and ((BIOS 2010 and NURS 2110 and 2120 and (EDEC 1600 or PSY 2410)) or concurrent)

**Pediatric Nursing**
- This course focuses on patient-centered care for the pediatric patient experiencing common acute and chronic physical health alterations. The student will build on fundamental concepts of collaboration, evidence-based practice, and safe, effective quality care.
- Eligible Grades: GEC1: A-F
- Requisite: NURS 1211, 1231, 1221, and BIOS 1310

**Adult Health III: ADN**
- The focus of this third medical-surgical course; addresses content of immunology, infectious disease, men/women's health, nervous system, musculoskeletal system, multi-system failure, and end of life issues. Students develop and implement care plans using the nursing process and evidence based practice guidelines.
- Eligible Grades: GEC1: A-F
- Requisite: BIOS 2010 and NURS 2120 and 2130 and (EDEC 1600 or PSY 2410) and (NURS 2220 concurrent)

**Medical-Surgical Nursing III**
- This course focuses on patient-centered care for adults experiencing common acute and chronic physical health alterations. The students build on fundamental concepts of collaboration, evidence-based practice, and safe, effective quality care. Topics include care of patient with problems related to the neurological, musculoskeletal, and integumentary systems, sensory, visual, auditory, and connective tissue problems. Men's, women's, and transgender health issues.
- Eligible Grades: GEC1: A-F
- Requisite: NURS 2111, 2121, 2131, and BIOS 2210

</tbody>
</table>

Students must either complete DSI 1110 and DSI 1120 or receive a Survival Plus rating on the Sign Language Proficiency Interview (or equivalent testing) before beginning the intermediate American Sign Language series.

<p>| HSP RCS | DSI  | 2120 | Intermediate American Sign Language II | Lecture | 3 | 0 | N | U20 | 0 |
|         |      |      | Continuation of DSI 2110. Continues to work toward fluency in ASL. Focuses on ASL idioms, ASL and English comparisons, advanced classifiers, current news, and conversational ASL. |
| HSP RCS | DSI  | 2130 | American Sign Language Linguistics | Lecture | 3 | 0 | N | U20 | 0 |
|         |      |      | Introduction into the broad study of linguistics, as well as, the linguistics of ASL and the grammatical structure of the language. Looks at what constitutes a language and compares English and ASL through an examination of ASL's structure, acquisition and sociolinguistic aspects. |
| HSP RCS | DSI  | 2140 | Educational Interpreting | Lecture | 2 | 0 | N | U20 | 0 |
|         |      |      | Looks at educational interpreting, its practices and idiosyncrasies from both a current and historical perspective. Examines such things as the IEP/MIE process, educational laws, technology (i.e., hearing aids, cochlear implants, and other assistive technology), and deaf students with special needs. Also focuses on the EIPA examination. |
| HSP RCS | DSI  | 2150 | Fingerspelling and the Interpreter | Lecture | 1 | 0 | N | U20 | 0 |
|         |      |      | Explores both expressive and receptive aspects of fingerspelling in a communicative context. Appropriate usage of such things as lexical signs, abbreviations, and the grammatical importance of fingerspelling discussed. |
| HSP RCS | DSI  | 2160 | Seminar in Interpreting | Lecture | 1 | 0 | N | U20 | 0 |
|         |      |      | Capstone course for the interpreting program. Prepares students for the NAD-RID national certification NIC knowledge portion of the exam. In addition, students prepare a professional portfolio and discuss opportunities for future employment. |</p>

<td>REQUIREITE: HSLS 5120 or 5860</td>
<td>This is the third in a sequence of six American Sign Language (ASL) courses. Intermediate level ASL classes provide students opportunity to develop more complex expressive and receptive conversational skills. Emphasis is placed on expressive ASL using classifiers in ASL storytelling. Topics revolve around sharing information about the environment and everyday communication. Grammar is targeted in context with an emphasis on further development of discourse skills. Students learn conversational strategies to maintain more complex ASL conversations. This is a continued study of Deaf community and more complex ASL literature. Registered students attend a section of the second-year undergraduate course.</td>

**Course Descriptions:**

- **Special Topics in Communication Sciences and Disorders:**
  - ELIGIBLE GRADES: GEC4: A-F, CR, PR
  - COURSE DESC: Specific course content will vary with offering.

- **Research Methods in Hearing, Speech and Language Sciences:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Designed to teach students to be critical consumers of published group and single subject design research in speech-language pathology and audiology. Topics include the scientific method, generating relevant research questions, various study designs, different data types, data analysis, and data interpretation.

- **Child Language Disorders I: Birth to Five:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: First course in child language disorders sequence. In-depth study of language assessment and intervention strategies for young children with language delays and disorders. Therapy areas include prelinguistic communication skills, pragmatic as well as semantic and grammatical aspects of comprehension and production. Early child cognition and emergent literacy will also be addressed.

- **Neurosciences of Communication:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Provides complete study of neuroanatomy of the central nervous system and detailed instruction in anatomical structures and pathways of the central somatosensory, motor, auditory, vestibular, and visual systems. Hands-on experience in a neuroanatomy laboratory is emphasized. Functional aspects at the systems level are included and consequences of pathological lesions are discussed in forms of case studies.

- **Child Language Disorders II: School-age Language and Literacy:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Second course in child language disorders sequence. This course covers assessment and intervention theory and practice in the language domains for school-age children with language disorders. Emphasis is on language-literacy connections and language underpinnings in relation to academic content standards.

- **Speech Sound Development and Disorders:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: This course covers speech sound difficulties associated with overall language disorders. There is an emphasis on theories of speech sound acquisition, stages of development, description of deviant systems, methods of data collection and analysis, and treatment approaches.

- **Disorders of Fluency:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Focus is on the speech disorder of stuttering as related to theory, research, assessment, and remediation.

- **Speech Language Pathology in Public Schools:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Warning: No credit for both this course and the following (always deduct credit for first course taken): HSLS 6190

- **Disorders of Phonation:**
  - ELIGIBLE GRADES: GEC1: A-F

- **Child Language Disorders III: School-age Psycholinguistic Perspectives:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Third course in child language disorders sequence. This course explores the psycholinguistic underpinnings of language impairment in school age children.

- **Diagnostic Procedures in Speech-Language Pathology:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: Study of theory and practice pertaining to the diagnostic process, including topics on models of diagnosis, family-centered assessment, multicultural issues, tools and methods, as well as assessment in selected areas of disorders.

- **Neuromotor Disorders of Speech:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: In-depth study of nature and habilitation of speech disorders of organic etiology. Primary focus on articulation disorders resulting from structural lesions, muscle incoordination, and weakness.

- **Pediatric Feeding: Assessment and Intervention:**
  - ELIGIBLE GRADES: GEC1: A-F
  - COURSE DESC: This course addresses the theoretical, clinical and multicultural aspects of the role of the speech-language pathologist with children with feeding and/or swallowing disorders.

COURSE DESC: Students initiate, execute and complete, and orally defend an independent research project in an area of research interest and experience (under the guidance of a primary faculty mentor). The project includes generating relevant research questions, developing an appropriate study design and methods/procedures, selecting appropriate analysis schemes and properly interpreting the results, and defending a written product of the project.

ELIGIBLE GRADES: GEC2: A-F, B-F, C-F, D-F, E-F, F-F, PR

PR REQUISITE: PA 5210, PA 5250, PA 5420, PA 5540

COURSE DESC: The second in a series of four courses that focuses on the application of knowledge for basic medical science for recognition, diagnosis, and management of commonly presenting conditions in clinical medicine. Systems and disorders discussed in the course include integumentary system, gastrointestinal system, hematologic disorders and oncologic disorders.

COURSE DESC: The third in a series of four courses that focuses on the application of knowledge of basic medical science for the recognition, diagnosis, and management of commonly presenting conditions in clinical medicine. Systems discussed in the course include cardiovascular, endocrine, genitourinary and renal.

COURSE DESC: The fourth in a series of four courses that focuses on the application of knowledge of basic medical science for recognition, diagnosis and management of commonly presenting conditions in clinical medicine. Systems discussed in this course include musculoskeletal, rheumatologic and neurologic.

COURSE DESC: The first in a series of four courses that uses basic medical science for recognition, diagnosis and management of commonly presenting conditions in clinical medicine. Systems discussed in this course include eyes, ears, nose, throat, infectious disease, dermatologic and neurologic.

COURSE DESC: The second in a series of four courses that uses basic medical science for recognition, diagnosis and management of commonly presenting conditions in clinical medicine. Systems discussed in this course include musculoskeletal, hematologic and oncologic.

COURSE DESC: The third in a series of four courses that uses basic medical science for recognition, diagnosis and management of commonly presenting conditions in clinical medicine. Systems discussed in this course include musculoskeletal, hematologic and oncologic.

COURSE DESC: The fourth in a series of four courses that uses basic medical science for recognition, diagnosis and management of commonly presenting conditions in clinical medicine. Systems discussed in this course include: Gastrointestinal, Endocrine, Genitourinary and Renal.

COURSE DESC: Physician assistants role in assessment and treatment of mental health disorders and psychosocial issues including clinical skills to provide care for patients with psychiatric disorders. Emphasis on communication skills needed in difficult patient interactions.

COURSE DESC: Introduction to the principles of emergency medicine for physician assistants. Emphasis on developing critical thinking skills to identify and develop treatment plans for a variety of medical and surgical conditions that present to the emergency department.

COURSE DESC: This course builds upon the knowledge obtained in the clinical medicine series and introduces the physician assistant student to the principles of pediatric medicine. Students will be tasked to utilize critical thinking skills to identify and develop treatment plans for a variety of medical and surgical conditions affecting pediatric patients with an emphasis on injury and disease prevention.

COURSE DESC: Introduction to the principles of women's health for physician assistants. Emphasis on developing critical thinking skills to identify and develop treatment plans for a variety of medical and surgical conditions that affect the female patient with an emphasis on prenatal and gynecologic care.

<td>This survey course of medical physiology provides students with an overview of basic cellular processes and their impact in disease models in several key organ systems: integumentary, renal, genitourinary (GU), hepato-biliary, and gastro-intestinal (GI). In-depth examination of the physiology of diabetes is included as an example of a multi-system disorder. Emphasis is placed on the role of the physical therapist in applying signs and symptoms in the differential diagnosis of musculoskeletal conditions within the scope of PT practice from those arising from impairments of other systems.</td>

<td>This course provides the theoretical foundation for physical therapy evaluation and treatment of patients with cardiopulmonary conditions. Course content includes examination, evaluation of systems and clinical laboratory values, assessment and physiologic monitoring, discharge planning, determining patient equipment, and combating the effects of bed rest and deconditioning. Specific emphasis will be placed on evaluation, treatment, and management of the cardiovascular and pulmonary patient across all spectrums of care.</td>

<td>COURSE DESC: Provides students with an overview of topics from a cellular to a systems level. Gastrointestinal, genitourinary, hepatobiliary, renal, endocrine, and metabolic systems will be covered. Additionally, the role of physical therapy in acute care and the Intensive Care Unit (ICU) will be covered. For each topic area or system, the student will be presented with the pathophysiology focused at the cellular and tissue level. The role of physical therapists in differential diagnosis, by recognizing the signs and symptoms associated with impairments of the systems, will be presented. Prepares the student to identify the patient with systemic pathologies requiring further consultation or referral to other health care providers.</td>

**ELIGIBLE GRADES:** GEC2: A-F, PR

**COURSE DESC:** Covers a systems approach to neural basis of motor, sensory, cognitive, affective, and homeostatic processes that underlies behavior with emphasis on the motor control and motor learning of locomotion, postural control/balance, and skilled movement. Students will apply content to evaluating neural origins of movement dysfunction and the physiological basis for strategies to improve skilled motor performance.

#### PT 7520 Physical Therapy Mgt of Brain Injury and Balance Disorders

<td></td>
<td></td>
</tr>
</tbody>
</table>

**ELIGIBLE GRADES:** GEC2: A-F, PR

**COURSE DESC:** Course content addresses the synthesis and application of didactic knowledge regarding clinical presentation of focal and diffuse brain lesions and movement dysfunctions after neurological insult. Course emphasizes the effective performance of a physical therapy examination and assessment. Design and implementation of task-specific and activity based prevention and interventions with the goal of promoting optimal functional recovery and neural reorganization is also covered.

#### PT 7525 Balance and Vestibular Conditions in Physical Therapy

<table>
<thead>

<td>Discusses biological, histological and biomechanical principles of connective tissues, bone, and muscle as applied to physical examination and therapeutic exercise. There is presentation of medical imaging of the listed tissues as they appear on plane x-ray, MRI, fMRI, CT scan, PET/SPECT scan, and ultrasound as related to physical therapy practice. Basic principles of exercise prescription will be discussed to achieve optimal outcomes for the patient based on the pathology, biomechanical principles of tissues, impairment, and the desired level of performance.</td>

ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: Various topics in physical therapy will be examined.

ELIGIBLE GRADES: GEC2: A-F, PT 7532 and 8761
COURSE DESC: Explores topics in neuroscience, particularly new scientific discoveries that can be important to management in physical therapy.

ELIGIBLE GRADES: GEC2: A-F, PT 8411 and 8412
COURSE DESC: Provides additional knowledge and skills in selected areas of pediatric physical therapy.

ELIGIBLE GRADES: GEC2: A-F, PT 7731 and 7732
COURSE DESC: Continues the student's theoretical knowledge of orthopedic physical therapy through critical review of current literature.

ELIGIBLE GRADES: GEC1: A-F
COURSE DESC: Emphasizes patient case scenarios and the role that various professionals play in the health care of the simulated patient. The professions may include, but is not limited to the following: nursing, physical therapy, occupational therapy, speech language pathologists, audiologists, dieticians, health care administrators, exercise physiologists, family studies, and athletic trainers.

ELIGIBLE GRADES: GEC2: A-F, PT 7531 and 7532
COURSE DESC: This course presents an intensive whole body amplitude-based training protocol for individuals with Parkinson's disease. The research and clinical rationale for this treatment approach is discussed. Portions of the course are spent on developing treatment skills designed to drive neural restoration and adaptation.

ELIGIBLE GRADES: GEC2: A-F, PT 7721 and 7722
COURSE DESC: This course is designed to build on and enhance the student's theoretical knowledge and experience in working with orthopedic and athletic populations. Advanced movement analysis is used as a foundation for client evaluation and treatment. Emphasis is placed on a multi-disciplinary approach to the management of the runner incorporating knowledge of coaching philosophy and physiologic demands.

ELIGIBLE GRADES: GEC2: A-F, PT 7525
COURSE DESC: The physical therapy student gains advanced knowledge and skills in vestibular rehabilitation that are beyond entry-level expectations as described by the American Physical Therapy Association's (APTA) guidelines. Topics include surgical and pharmacological management of vestibular disorders, advanced vestibular function tests, interpretation of video-oticoculography (VNG), and less common vestibular diagnoses.

ELIGIBLE GRADES: GEC2: A-F, PT 7531 and 7532
COURSE DESC: Designed to enhance the student's foundational knowledge and skills with concepts important to consider in the older adult relevant to physical therapy. Concepts discussed, which are integrated into physical therapy management of the older adult, include aging demographics, frailty, quality of life issues, physiology of aging, aging and pharmacology, nutrition, psychosocial issues, environmental safety issues, falls, and health promotion.

ELIGIBLE GRADES: GECS: CR, PT 7920 and completion of 50% of Professional Development portfolio hours
COURSE DESC: Provides students with a supervised experience at a selected acute care or outpatient orthopedic clinical site. Students are given the opportunity to develop basic clinical skills in assessment and management of patients with elementary clinical conditions under the direct supervision of clinical faculty.

<td>This introductory course provides a foundational overview of gerontological concepts by exploring the processes and meanings of “growing old” in today’s society. Specifically, attention is given to understanding how developmental and life course aspects influence the aging experience and inform individual, familial, and societal conceptions of and actions concerning old age. This cultivates a richer insight into, and an appreciation for, the significance of older persons in shaping family and societal dynamics.</td>

<td></td>
<td>An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and transformative. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities.</td>

<td>This course explores the intersection of the health and aging services industry and the older adult population, with specific attention paid to how older adults experience and influence various mechanisms of commerce. Among the topics addressed are the impact of demographic trends, globalization, and diversity on the aging experience and how these phenomena influence various business strategies such as product development, advertising, and workforce development. Topics are explored from the perspectives of multiple stakeholders, including consumers, caregivers, employers, product designers, community service providers, and policy makers.</td>

<td>This is the child and family studies capstone course in the assessment of children, individuals, couples and families, and the acquisition of helping skills needed to facilitate these processes; all necessary in preparing students for their final internship experience. It is designed to help students acquire practical helping skills, techniques, and theoretical foundations that define and support assessment and effective helping relationships for human services professionals working in a wide range of settings. Highly experiential in nature and includes multiple opportunities for practice, demonstration, and discussion of methods and techniques drawn from the text, lectures, and supplemental materials. It also includes an introduction to group process. Specific emphasis is placed on integrating previous and concurrent course content and experiences, and bringing an enhanced level of skill to the helping relationship. Additional considerations include an emphasis on a student's personal beliefs, values, and spirituality and their impact on the helping process and developing an awareness of multicultural issues and other significant topics that impact the helping relationship, such as ethics, gender, race, religion, disability, ageism, and sexual orientation.</td>

<td>An introduction that explores human sexualities with a focus on the ability to form relationships that are integrative, creative, and recreational. There is also an emphasis on realizing personal potential within the context of life patterns, based on scientific research. Approaches human sexualities from a developmental perspective and considers historical, biological, physiological, social, cultural, and familial factors that impact human sexual development, values, beliefs, and behaviors. There is a strong emphasis on the socio-cultural construction of sexualities and the ways in which gender scripts, sexism, and heterosexism impact individual development and functioning. Relationship, sexuality, and spirituality are deeply intertwined, which is why the course considers these elements in addition to the biological and physiological aspects of sexualities.</td>

<td>- Explores the nature of parenting and parent/child relations over the lifespan from a historical, theoretical, and developmental perspective. It examines attachment, practical parenting strategies, the unique challenges faced by families in today's complex society, and the behavioral, emotional, social, spiritual, and relationship factors that help parents to create positive, nurturing family environments. The dynamics of parent/child interactions are analyzed from a systemic perspective that considers the reciprocal impact of children on parents as well as the impact of parents on their children.</td>

<td>- The purpose is to help students understand the nature and impact of traumatic experiences on children, adolescents, adults, and families. Examines the history, scope, and impact of human trauma, resiliency, and adaptation. It explores traumatic stress syndromes, vicarious trauma, and universal traumatic response patterns. Considers the impact of these experiences from a biopsychosocial and developmental perspective; psychological trauma has somatic consequences. Treatment, intervention, adaptation, resiliency, recovery, attachment, personal meaning, and the spiritual aspects of trauma are explored. Intended to provide students with a clear understanding of the physical and psychological processes involved in adaptation and integration and how untreated trauma can lead to lifelong pathology and dysfunction.</td>

COURSE DESC:
- Food Quality and Vector Control: Emphasizes the topics of foodborne diseases and regulatory programs relative to sanitary inspection and control of food service and processing systems. Describes vector borne diseases of importance from a control perspective in environmental health.
- Occupational Safety and Health: Provides knowledge and understanding of processes involved in the development and implementation of environmental health and safety programs. Focuses on design, implementation, maintenance, and evaluation of workplace safety programs, with emphasis on inspection programs, planning, administration, and communication. Extensive coverage of OSHA regulations and OSHA 30- and 40-hour safety training.
- Special Topics in Environmental Health: Specific course content will vary with offering.
- Climate Change and Public Health: Many environmental scientists, public health professionals, and policymakers believe that climate change poses one of the greatest threats to global health; this course explores the possible public health outcomes of climate change. Topics covered include human health effects from vector-, water-, and foodborne diseases; disaster and weather-related health effects; and possible solutions.
- Special Topics - Environmental Health: Provides a forum for students interested in environmental health, safety, and industrial hygiene to express their views on current topics in the profession. Instructors will facilitate reviews of current research, emerging interest areas, graduate education, the job market, and other topics.
- Environmental Engineering Instrumentation and Computation: Emphasizes the principles of data treatment, including experimental error recognition, statistical analysis, and graphical data techniques using up-to-date computer software. Computers and programmable calculators required for writing lab reports.
- Environmental Engineering Instrumentation and Computation: Emphasizes the principles of data treatment, including experimental error recognition, statistical analysis, and graphical data techniques using up-to-date computer software. Computers and programmable calculators required for writing lab reports.
- Environmental Engineering Instrumentation and Computation: Emphasizes the principles of data treatment, including experimental error recognition, statistical analysis, and graphical data techniques using up-to-date computer software. Computers and programmable calculators required for writing lab reports.
- Environmental Engineering Instrumentation and Computation: Emphasizes the principles of data treatment, including experimental error recognition, statistical analysis, and graphical data techniques using up-to-date computer software. Computers and programmable calculators required for writing lab reports.
- Environmental Engineering Instrumentation and Computation: Emphasizes the principles of data treatment, including experimental error recognition, statistical analysis, and graphical data techniques using up-to-date computer software. Computers and programmable calculators required for writing lab reports.

COURSE DESC:
- Environmental Chemistry as applied to aquatic, atmospheric, soil, and hazardous waste systems. Topics include environmental chemical cycles; aquatic, atmospheric, and soil chemistry; environmental chemistry of hazardous wastes; and toxicology.

**COURSE DESC:**
- **Intervention Design and Implementation in Rural Public Health:** Focuses on intervention design and implementation in rural public health. Builds on information covered in HLTH 6000 related to conducting health-related needs assessment and program planning. Includes specific strategies and activities for designing and implementing interventions to be responsive to public health needs.
- **Gerontechnology:** An analysis of the health and environmental problems confronting an aging society and ways in which technology can be harnessed to address them. Topics and problems focus on existing technologies and their applicability for use by and for the elderly, and the identification of new technologies to enhance elderly independence both in the community and in healthcare settings.
- **Health Promotion and Health Behavior:** Theory and application of health promotion/education planning, implementation, and evaluation by health professions in a variety of settings. Emphasis on research related to determinants of health behavior, plus strategies and techniques used by professionals to foster human health.
- **Aging and Health:** Theories of aging involving changes in structure and performance presented. Emphasis on normal aging changes, positive mental health and aging, health promotion and maintenance of wellness, and community health.
- **Rural Health Disparities:** Includes factors influencing health outcomes in rural areas of the United States. Focuses on examining the disparities of access and availability of public health services, medical services, and other health-related services, in rural undeserved populations. Other issues include examining how socioeconomic status, ethnicity, geographic location, and cultural factors affect health outcomes in rural areas as well as how to reduce the existing rural health disparities.
- **Maternal and Child Health in Africa:** Examination of the health of mothers, infants, and children and the strategies for improving maternal and child health in the context of African health and sociocultural issues.
- **Health Care and People of Africa:** Examination of health care delivery services in the context of African cultures, population-based public health practice and the provision of health practice and the provision of health care facilities for the people of the African regions.
- **HIV/AIDS in Africa:** Examination of contemporary pandemic HIV/AIDS and the opportunistic infections as they affect morbidity and mortality rates in Africa and the complex interwoven factors underlying control and prevention, social concerns, and policy implications in African cultures.
- **Health Care Finance:** Financial administration concepts and tools (such as financial statement analysis, time value of money, cost analysis and rate-setting, budgeting, portfolio theory, asset pricing models, valuation methods, and cost of capital) essential in sustaining viability of various health care organizations.
- **Health Care Reimbursement:** Examination of payment mechanism characteristics and their effects on leadership decisions in various health care delivery organizations and systems.
- **Community Health Programs:** Institutional framework and activities of various agencies promoting and maintaining health of people of community, state, and nation.

<tr>
<td></td>
<td></td>
<td></td>
<td>Designed for social work students and other students interested in human services. Explores child abuse and neglect within an ecological and family systems perspective. Emphasizes an interdisciplinary viewpoint and incorporates experiences in the community. Examine theories of causation of child abuse and neglect, issues in recognition, assessment, intervention, treatment, follow-up, and related issues of family violence and substance abuse. Incorporates discussion of social work values, ethics, and historical traditions in child welfare practice, including understanding issues of diversity for individuals and families. Consider child welfare policy issues, including advocacy issues, in relation to child protection, intervention with diverse populations, and treatment. The questions we are asking in this course are: Using an ecological perspective, what are the meanings of child abuse and neglect to individuals, to families, and to society? Understanding some of these meanings, what are some recommendations for social policy response?</td>

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

- **SW 4921 Field Seminar I**
  - GEC3: A-F, REQUISITE: CR
  - Specific course content will vary with offering.

- **HSP SW 4224 Child Welfare II**
  - GEC1: A-F, REQUISITE: 12 Hours in Tier II Social Sciences and Sr only

- **HSP SW 4223 Child Welfare I**
  - GEC1: A-F, REQUISITE: SW 4223 and 12 hour Tier II Social Sciences and Sr only

- **HSP SW 4900C Special Topics in Social Work**
  - GEC3: A-F, REQUISITE: CR

- **HSP SW 4802 Social Work Practice II**
  - GEC1: A-F, REQUISITE: Sr and Social Work major (BS6605 or BA6601) and SW 4801

- **HSP SW 4801 Social Work Practice I**
  - GEC1: A-F, REQUISITE: Sr and Social Work major (BA6601 or BS6605)

- **HSP SW 4921 Field Seminar I**
  - GEC1: A-F, REQUISITE: First of a two semester series, taken concurrently with SW 4960 and 4920. Provides an opportunity to integrate field experience with coursework and personal reflection. Through discussion and journaling, students process activities, questions, and concerns related to the field practicum. Students develop analytical, written, and presentation skills through assignments focused on use of self within the context of a social service organization. A variety of practice issues are addressed in a regional context including diversity, social justice, social work values and ethics, self-understanding, and professional development. NOTE: this course may be retaken only once (excluding withdrawals) with permission.
### Field Seminar II
- **Title:** Field Seminar II
- **Component:** Seminar
- **Cred Hours:** 2
- **Repeat Hours:** 0
- **General Education:** N
- **Perm:** U30
- **Subsidy Level:** 0
- **ELearn Options:**
- **Majors Set Aside:**

#### Course Description:
The first of a two-course series that provides knowledge, concepts, and fundamental skills needed for beginning level practice in public and private child welfare. Focuses on understanding the mission and scope of child welfare practice, articulating the underlying philosophy and values that drive child welfare practice, and addressing cultural and relationship issues when working with families. The first course provides conceptual and practical information on identifying child maltreatment, assessing family needs and strengths, and determining both immediate and long-term risk to children of future maltreatment. The second course extends assessment process and folklore to include the role and impact of social welfare institutions and the services they provide.

#### Eligible Grades:
- **GEC1:** A-F

#### Requisite:
- MSW student with clinical concentration

<td>First of a two-course sequence providing foundation knowledge and skills for social work practice. Provides a conceptual framework for generalist practice. Maintaining a person-in-environment focus, students utilize a strengths-based problem-solving model that incorporates awareness of the impact of social work values and ethics on all levels of practice. Students develop an understanding of how various aspects of diversity impact practice and formulate a range of practice interventions based on empowerment and social and economic justice within a rural environment. Also integrates content on social work practice methods and biological, psychological and social theories of human behavior to enable students to assess individuals and families. The professional role, the nature of self-knowledge, self-discipline, and availability of other resources required for professional performance are emphasized.</td>

<td>Emphasizes agency-based practice focused on bringing about planned change in the organization. Encourages students to be as analytical about their organizations as they are about individuals, groups, and communities, and emphasize the partnership that should exist between direct service practitioners and managers to develop a supportive and open problem-solving environment in the social service agency. Problem definition, problem assessment, identification of intervention, design of interventions, use of staff, intervention costs and intervention effectiveness are covered.</td>

**Course Descriptions:**

**Advanced Social Work Assessment:** This course introduces students to the assessment and accurate diagnostic understanding of mental disorders. Includes a focus on treatment interventions. Additionally, includes a focus on biopsychosocial spiritual assessments, the impact of difference and diversity, the impact of rural culture, and the implications of this knowledge for relationship building and treatment planning. Ethical issues related to assessment and diagnosis are also covered.

**Direct Practice with Children, Adolescents, and Groups:** Develops skills for social work practice with children and adolescents living in rural communities. Students will learn to evaluate a variety of intervention methods and theories, as applied to working with children and adolescents in individual and group settings. Focuses on diversity, gender and rural communities as contributors to child and adolescent development and incorporates environmental and systems perspectives.

**Social Work Administration:** Provides students with fundamental knowledge and skills in management and social work administration. Management theories consistent with social work values are provided for students to understand the roles and responsibilities of the social work administrator. Agency planning, program design, information management, decision making, leadership, supervision, staff development, board operations, and program evaluation are studied in the context of the rural environment, politics, ethics and values, race, and gender.

**Designing Rural Services:** Prepares students specializing in the administration of rural social service agencies to practice community development skills, including resource enhancement. Focus is on community-wide planning and implementation processes to develop and improve the delivery and impact of social services in rural communities. Emphasizes social work values and ethics as a basis for empowering and including diverse populations in community decision-making.

**Special Topics in Graduate Social Work:** Prepares students specializing in the administration of rural social service agencies to practice community development skills, including resource enhancement. Focus is on community-wide planning and implementation processes to develop and improve the delivery and impact of social services in rural communities. Emphasizes social work values and ethics as a basis for empowering and including diverse populations in community decision-making.

**Advanced Field Practicum I:** This field practicum course assists the student in progressively building upon the substructure of knowledge, skills, values, and ethics of social work practice which was acquired during the foundational field experience. Occurs within the context of academic work in the four curricular areas in conjunction with an individual placement in an agency in rural Appalachia and a close mentoring relationship with a field instructor. The specialized clinical or administrative field practicum prepares the student for advanced social work service delivery in their area of specialization.

**Advanced Field Practicum II:** This field practicum course builds upon the skills acquired in the first field practicum course. Students continue to progressively build upon the substructure of knowledge, skills, values, and ethics of social work practice. Occurs within a context of academic work in the four curricular areas in conjunction with an individual placement in an agency in rural Appalachia and a close mentoring relationship with a field instructor. Within this framework, the specialized clinical or administrative field practicum prepares the student for advanced social work service delivery in their area of specialization.

<td>Prepares students to write a research proposal, in conjunction with their field supervisors, to address a problem of concern to their field agency. Explores quantitative and qualitative research methods, and the components of research proposal, including: problem formulation, development of hypotheses, and design of a sound, ethical study that conforms to IRB standards. The course also foreshadows data collection, analysis, interpretation and report writing.</td>

<td>This course builds on previous course SW 6610, where students reviewed to basics of social work research methods to write a research project proposal. During the course, students will learn statistical analyses including descriptive and inferential statistics to complete the proposed research project approved by OU IRB and/or ethical guidelines of conducting social work research. Students will complete collection of data, and analysis of data using selective procedures. Students will use the appropriate analysis skills to analyze data collected for their evaluative or explanatory projects. Students will get experience of presenting their study verbally to their peers and other academic visitors such as field instructors and faculty members as well as write a publishable manuscript using APA style.</td>

**Course Descriptions:**

- **HC 2600 Introduction to Ethical Community Engagement**
  - This course introduces students to fundamental principles of ethical community engagement that begin with an understanding of how first to engage with a community through the identification and elevation of its assets. Students are asked to reflect on their perceptions of communities with which they have no previous relationships, encouraged to interrogate the factors that have influenced those perceptions, and challenged to expand their understanding of those communities through research and engagement with community members. Through that process of self-reflection, students also are challenged to consider ways of engagement that are mutually beneficial to themselves and their community partners. In addition, this class explores the tension associated with navigating structural and cultural differences to find common goals and create partnerships that facilitate the achievement of community partners’ missions as well as academic expectations for the students.

- **HC 2400 Introduction to OHIO Honors**
  - This study-abroad course introduces students to the people and culture of the Andes through direct engagement with members of the community of Cusco. Students contribute to a community project in addition to exploring Cusco and nearby sites such as the Sacred Valley and Machu Piccu. To allow for more meaningful engagement on site, students study the culture and history of the region through texts and discussions prior to and during their time in Peru.

- **HC 2401 OHIO Honors Engagement Lab**
  - This project-based course provides students with an opportunity to explore the three OHIO Honors Program pathways - community engagement, research/creative activity, and leadership - in an applied context. Students are assigned to small, interdisciplinary groups, and each group works with a campus or community partner on a defined project over the course of the semester. In-class lectures focus on ethical approaches to each of the three pathways in addition to the theoretical foundations of experiential learning and interdisciplinarity.

- **HC 2420 OHIO Honors Engagement Lab in Health & Social Sciences**
  - This course uses interdisciplinary, team-based problem solving to introduce OHIO Honors students to the foundations of the three honors engagement pathways: leadership, community engagement, and research/creative activity. The activities and product align with a relevant university-related health and wellness initiative, as will be defined. Students work in an interdisciplinary team to research the campus context and needs related to the initiative topic, propose a relevant project, test and refine the proposal, and execute it. Lectures provide academic background on the topic and introduce students to a variety of problem-solving methods, such as evidence-based practice, systems thinking and design thinking, a creative, empathy-driven process for developing user-friendly solutions to everyday challenges people encounter. The lab sections guide students through the practical application of these problem-solving tools, help to explore ideas from lecture, and provide time and space for the team to work on the project.

<td>This course introduces students to fundamental principles of ethical research and creative activity. Students are asked to reflect on their perceptions of how research and creative activity contribute to new knowledge and insights, encouraged to interrogate the factors that influence those perceptions, and challenged to expand their understanding of how individuals can ethically contribute to these endeavors through a multidisciplinary perspective. Through this process of self-reflection and peer discussions, students also are challenged to consider ways that their engagement in research/creative activity can be mutually beneficial to themselves, their field, and the greater public. In addition, this class explores the tensions associated with navigating the research/creative process, including interrogating personal, social, and cultural values, applying rigorous, systematic processes, and properly citing/acknowledging others' works to ensure that the knowledge and insights gained are rigorous, ethical, and contribute to the existing body of knowledge.</td>

### GLC 3010 Global Economic Trends and Strategic Inst

**COURSE DESC:** Focuses on how strategic alliances are shaping and changing economic and political relations among the countries of the world, and the impact of such changes on society and culture. To foster contacts between American and international students in order to learn about other countries and cultures. To encourage teamwork and collaboration among students and faculty from different disciplines—both face to face and by using Intranet communication software.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** GLC 2030 or (GLC 203 and 204 and 205)

### GLC 2010 Business and Communication in Transitional Inst

**COURSE DESC:** Continuation of GLC 2020. Three weeks of 1st Summer Session. Working in conjunction with international students from partner university, GLC students finalize research begun in GLC 2020, prepare appropriate documents and reports, and make final presentation to clients.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** Continuation of GLC 2020. Three weeks of 1st Summer Session. Working in conjunction with international students from partner university, GLC students finalize research begun in GLC 2020, prepare appropriate documents and reports, and make final presentation to clients.

### GLC 2020 Business and Communication in Transitional Societies

**COURSE DESC:** Team research and analysis of global issues, with an emphasis on business, communication, and international relations. Perform country, industry, and company analyses; recommend options and solutions; and present ideas orally and in writing. Focus on issues and challenges faced by companies, organizations, and nongovernmental organizations in transitional societies.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** Intro to GLC. Understanding barriers and opportunities in countries and regions at various stages of development, and the significance of cross-national alliances. Team research and analysis of global ventures in various fields, accounting for relevant legal, economic, political, and social factors. Research and analysis geared toward development in such areas as agriculture, education, public health, the environment, nation-building, cultural, political and social democracy. Examines changing definitions of development and places emphasis on understanding the historical, social, economic, and political circumstances that impact development and communication strategies used to promote development.

### GLC 2030 Business and Communication in Transitional Societies (Abroad)

**COURSE DESC:** Continuation of GLC 2020. Three weeks of 1st Summer Session. Working in conjunction with international students from partner university, GLC students finalize research begun in GLC 2020, prepare appropriate documents and reports, and make final presentation to clients.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** Continuation of GLC 2020. Three weeks of 1st Summer Session. Working in conjunction with international students from partner university, GLC students finalize research begun in GLC 2020, prepare appropriate documents and reports, and make final presentation to clients.

### GLC 3010 Global Economic Trends and Strategic Alliances

**COURSE DESC:** Focuses on how strategic alliances are shaping and changing economic and political relations among the countries of the world, and the impact of such changes on society and culture. Research the development of bilateral trade relations, regional economic groups, and the growth and interdependency of global financial markets. Analysis of how such economic alliances are reflected in geopolitics and international diplomacy, and in cooperative global initiatives in such areas as natural resources, space exploration, education, and sports. Sample project: research global mergers, joint ventures, and alliances in the airline, automotive, and telecommunications industries.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** GLC 2030 or (GLC 203 and 204 and 205)

**Course Descriptions:**

- **Global Competition and Industry Trends:** Understanding international trade and global industry structures by comparing and contrasting joint ventures, mergers, and acquisitions. Comparison of markets and industries to determine the advantages and disadvantages of global and cross-industry expansion, and assessment of strategies for entry into new markets or new industries. Broadly defined to include commercial products and services, not-for-profit initiatives in education, or social and economic development. Identification of target market/audience; analysis of competition or environmental assessment.

- **International Internship:** Allows students to apply the knowledge and skills obtained in two years of project-based learning on global issues. Taken after sophomore year, with faculty approval. Written report and oral presentation on internship experiences to sophomore and junior GLC students upon return.

- **Honors Experience in Elementary Hindi I:** Honors Experience in Elementary Hindi I

- **Honors Experience: Elementary Hindi II:** Honors Experience: Elementary Hindi II

- **Intermediate Hindi-Urdu I:** Intermediate Hindi-Urdu I

- **Intermediate Hindi-Urdu II:** Intermediate Hindi-Urdu II

- **Special Topics in Hindi-Urdu:** Specific course content will vary with offering.

**ELIGIBLE GRADES:**
GEC1: A-F

**REQUISITE:**
Permission required and HTC

In depth discussion of various issues explored in Area Studies (OR) War and Peace Elective courses

| INST    | INST | 4001 | Diversity and Democracy | Seminar | 3 | 0 | 3 | BDP; CAP | N | U30 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC3: A-F, CR, PR

**REQUISITE:**
One course in Tier II Social Sciences or Humanities OR One Pillar course in Social or Behavioral Sciences or Humanities and Sr only CR

Synthesizes the fields of diversity, and our democratic society's promise for transformation and social change. Studies the social, philosophical, ideological, and historical foundations of diversity in the United States and internationally and asks how we can become transformative change agents in creating and sustaining a more diverse and global citizenry.

| INST    | INST | 4900 | Special Topics in International Studies | Lecture | 1 to 15 | 999 | N | U30 | 0 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC3: A-F, CR

**REQUISITE:**
Specific course content will vary with offering.

| INST    | INST | 4905 | Special Topics in Advanced African Languages and Literature | Lecture | 4 | 0 | I | U30 | 0 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC4: A-F, CR, PR

**REQUISITE:**
Permission required

Serves as a 3rd-year African language study. Complete intermediate level of appropriate language as approved by instructor.

| INST    | INST | 4910 | Internship | Internship | 1 to 10 | 10 | BLD | I | U30 | 0 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC6: CR, PR, F

**REQUISITE:**
Permission required and INST major and (Soph or Jr or Sr)

Designed to allow for a practical experience in an international organization or corporation in the U.S. or abroad to complement the theoretical base supplied in area studies and comparative cultures courses. The applied experience will allow you to see the practical way in which cross cultural issues and second language usage are manifested in a work environment. The internship experience will also allow you to identify personal learning goals that will enhance your career prospects.

| INST    | INST | 4911 | Special Topics in Advanced Southeast Asian Languages and Literature | Lecture | 4 | 0 | I | U30 | 0 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC4: A-F, CR

**REQUISITE:**
Permission required

Serves as a 3rd-year Southeast Asian language study. Complete intermediate level of appropriate language as approved by instructor.

| INST    | INST | 4930 | Independent Study | Ind Study | 1 to 15 | 999 | I | U30 | 0 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC3: A-F, CR

**REQUISITE:**
Permission required

Content varies by student.

| INST    | INST | 4950 | War and Peace Studies Seminar | Seminar | 3 | 0 | 3 | CAP | N | U30 | 50 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC1: A-F

**REQUISITE:**
Sr only

The aim is of the course is to question the root causes of violence and to explore pathways to sustainable peace from a multidisciplinary perspective.

| INST    | INST | 4960 | Global Problems, Local Solutions | Lecture | 3 | 0 | BSL; CAP | N | U30 | 60 | 0 | 0 | 0 |

**ELIGIBLE GRADES:**
GEC1: A-F

**REQUISITE:**
1010, or ANTH 1010, or GEOG 2400 or POLS 2500 and SR only

In this course, students learn about complex global challenges that demand multiple and interdisciplinary solutions. These include human trafficking, challenges faced by refugees, climate change, loss of biodiversity, food insecurity and others. We use a global perspective to understand the extent of these problems, and focus our attention on how local communities around the planet come together to address them. As part of this consideration of human agency, we spend time learning about key local activists, their work, and the strategies they employ. We also evaluate ways in which the activities of such local communities can receive broader support. This course provides students with training on how to make effective oral presentations.

<td></td>
<td>This course provides graduate students with an introduction to the broad dimensions of Latin American Studies. It provides an overall perspective of the continent with the view to understanding similarities and differences in regional (and country-by-country) politics, history, cultures, social relations, and economy. Readings will be assigned to expose students to the current information on the topics above, write summaries of the critical points they provide, and come prepared to discuss the information in class with their peers. It is also intended to open up a space of interaction for students, the opportunity to meet regularly to exchange ideas about research, get feedback on their work, and explore together different academic and professionalizing opportunities.</td>

**COURSE DESC:**

- **Global Citizen Journalism**: Citizen or participatory journalists are making differences throughout the world, enjoying some of the same exposure and reach as professional journalists working for traditional news outlets. INST3600/5600: Global Citizen Journalism will examine this social movement and place it in its real-world context. It will also help train and educate potential citizen journalists on how the journalism process works. On one hand, this course will serve as a media literacy primer, explaining how journalists choose their stories, sources, and reach their audience. On the other, it will help students understand how to take advantage of the information explosion the Internet has created to share their own stories and help combat the spread of 'fake news.'

- **Global Governance**: This course introduces students to the norms, practices, and structures underlying global collective order. It examines shifts from governments to governance in the management of international affairs, as well as the policy debates and coordination challenges these entail and the core theoretical concepts we use to understand them. How has increasing interdependence shaped the ways in which modern states and non-state actors identify and respond to collective goods and harms? The course begins with a consideration of new risks and rewards created by contemporary globalization in areas of security, aid and development, trade and finance, and human rights. We consider who 'wins' and 'loses' in the international system by addressing issues of power, authority, and legitimacy as well as the changing roles of states, formal and informal institutions (e.g. The UN, WTO), NGOs, and transnational corporations. We conclude by examining the formation of an 'international community' and assessing its capacity in responding to collective challenges such as poverty and inequality, trans- and sub-national political violence, economic regulation, cyber, energy, and environmental security, and humanitarian intervention.

- **Professional Development in International Studies I**: The course introduces students to contemporary issues and challenges faced by an International Studies professional.

- **Professional Development in International Studies II**: The course assists students in identifying appropriate professional opportunities in international studies and preparing for international studies related job interviews.

- **Special Topics in Africa: Contemporary Issues in Africa**: Thematic seminar on African issues current in the literature, human rights, gender, and religion.

- **Special Topics in Africa: Literature, Media, and the Arts**: Thematic seminar on African issues current in the literature, media, and the arts.

- **Special Topics in Africa**: Thematic seminar on African issues current in the literature, politics, development concerns, and health policies.

- **Special Topics in African Languages and Literature**: To develop communicative skills oral and written to enable the learners to engage in meaningful activities with other speakers. There is no language proficiency requirement.

- **Special Topics in Intermediate African Languages and Literature**: Focuses on enhancing the communicative skills in African languages. More advanced grammar and expanding vocabulary aiming at fluency in speaking, reading and writing simple stories using standard African languages will be emphasized. Complete elementary level of appropriate language as approved by instructor.

### Special Topics in Bioethics and Society

**Title:** Special Topics in Bioethics and Society  
**Component:** Ind Study  
**Cred Hours:** 3  
**Repeat Hours:** 6  
**ELIGIBLE GRADES:** GEC1: A-F  
**REQUISITE:**  
This seminar course will cover various issues in Bioethics, such as questions related to infectious diseases (vaccinations, quarantines and population health management), death and dying, genetic ethics, bioethical issues in a global health context, human reproduction, religion and bioethics, to name a few.

### Bioethics, Society and Justice

**Title:** Bioethics, Society and Justice  
**Component:** Seminar  
**Cred Hours:** 3  
**Repeat Hours:** 6  
**ELIGIBLE GRADES:** GEC1: A-F  
**REQUISITE:**  
This seminar course will cover various issues in Bioethics, such as questions related to infectious diseases (vaccinations, quarantines and population health management), death and dying, genetic ethics, bioethical issues in a global health context, human reproduction, religion and bioethics, to name a few.

### Capstone Experience in Bioethics and Society

**Title:** Capstone Experience in Bioethics and Society  
**Component:** Lecture  
**Cred Hours:** 3  
**Repeat Hours:** 0  
**ELIGIBLE GRADES:** GEC1: A-F  
**REQUISITE:**  
This course provides an outline of the American judicial system, regulatory structure and policy making process in relation to bioethical questions. It also dwells into specific elements of the American health system, such as basic health economics, payment systems and quality issues, and prepares students to structure and write a bioethics policy analysis.

### Capstone Experience in Bioethics and Society

**Title:** Capstone Experience in Bioethics and Society  
**Component:** Practicum  
**Cred Hours:** 3  
**Repeat Hours:** 0  
**ELIGIBLE GRADES:** GEC1: A-F  
**REQUISITE:**  
This course is a research-based course that allows students to focus on the implications that the certificate program bring to their particular discipline or area of interest, drawing upon the various required and elective courses to address a particular issue in their selected area of interest.

### Capstone Experience in Bioethics and Society

<td>COURSE DESC:</td>
<td></td>
<td></td>
<td>This is the second of 8 courses in Health Systems Science and will build on skills from HSS1 in health systems. This will include examination of the health system function and failings. Further skills in teamwork and team communication strategies utilize information systems to evaluate the panel and community outcomes by zip code. These evaluations apply to team projects and quality improvement by team/panel. Initial education about community engagement and the use of executive management skills to address community partners round out HSS2.</td>

<tr>
<td>COURSE DESC:</td>
<td></td>
<td></td>
<td>The first course of the Open Book Project elective series explores issues of social justice and inclusion in medicine. Grounded in Rita Charon's (2007, 2017) narrative medicine methodology, the Open Book Project elective (OBP1) introduces preclinical medical students to a unique framework for understanding, interpreting and interacting with the lived experiences of others; skills and techniques for empathy building, self-reflection, and connecting to others at a deeper, humanistic level; and an approach to clinical practice in which narrative sensibilities inform how physicians listen to and provide care to their patients. Through practice in the process of close reading, radical listening and expressing our own stories, narrative medicine facilitates relationship building and a deeper understanding of physicians and patients alike. Students will participate in two sessions of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum.</td>

<tr>
<td>COURSE DESC:</td>
<td></td>
<td></td>
<td>The Open Book Project (OBP3) elective course builds upon the skills introduced in OBP1 and OBP2 (prerequisites) while maintaining a focus on issues of social justice and inclusion in medicine. The Open Book Project elective (OBP3) expects students to apply and demonstrate narrative competencies and develop group leadership skills. During the OBP3 students have the opportunity to author and facilitate sessions that apply the principles of narrative medicine learned in OBP1 and OBP2 focused on issues of social justice and inclusion. This course draws upon content in the Chronic Illness course, asking them to apply a narrative lens and, in this way, augments the clinical content delivered during their second year curriculum. Students will participate in one session of Visual Thinking Strategies (VTS) led by staff of the Kennedy Art Museum.</td>

<td>COURSE DESC:</td>
<td>This is the fourth of seven courses in Health Systems Science and serves as additional coursework across the UME curricula in health systems. We focus on population health management across multiple contexts, medical and otherwise. Activities include employing Electronic Health Records to manage population-level data, understand the connections between data and payment, as well as perspectives from payers about information exchange. Students also hear from experts about U.S. health systems history, community development impact on health and equity, public health approaches to populations, and patient advocacy. They address the public and population through the creation of a community-oriented project addressing a high-risk health population.</td>

<td>COURSE DESC:</td>
<td>This is the fifth of five courses in Health Systems Science and serves as framework for additional coursework across the UME curricula in health systems, which is incorporated into a combined course in clinical and health systems medicine. We focus on population health management across multiple contexts, medical and otherwise. Activities include employing Electronic Health Records to manage population-level data, understanding the connections between that data and payment, and describing the concurrent financial management practices used in complex delivery systems. Students also hear from experts about the history of community development, the intersection of behavioral health and criminal justice, as well as the role and function of ethics in clinical settings. They will address public and population health through the construction of a community oriented project addressing a high-risk health population leveraging the skills and knowledge developed over the course of the program in quality improvement, systems thinking and community based organizations and population medicine.</td>

|         |      |      |      | COURSE DESC: | The Primary Care Associateship (PCA) in Osteopathic Manipulative Medicine (OMM) and Family Medicine is a competitive undergraduate immersion in academic medicine. During their term of service, PCA's function as integral members of the Departments of Primary Care and OMM, assisting with all phases of department operations including teaching, assessment, facilitation, tutoring, and mentorship of preclinical medical students. In addition, students complete a structured faculty development and physician leadership program, advance scholarly work, and develop clinical skills in primary care, osteopathic manipulative medicine and specialty areas of interest. Teaching activities, clinical experiences and research options are contracted with the instructor to align PCA learning needs with the curricular needs of the College. The associateship program is designed to promote interest in osteopathic medical education, osteopathic primary care practice, and to support the ongoing development of selected students as leaders within their communities. |

|         |      |      |      | COURSE DESC: | Directed Studies in Pre-clinical Osteopathic Medicine is a course in which osteopathic medical students pursue directed independent work under the guidance of a faculty member. A student who undertakes this course usually does so to explore in more depth areas covered broadly in courses, to conduct research, to participate in sanctioned global health activities abroad, to prepare to remediate content or a COMLEX failure or to explore topics not ordinarily covered in the curriculum. |
|         |      |      |      | ELIGIBLE GRADES: | GEC5: CR, F |
COURSE DESC: Pediatrics is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. The purpose of this course is to provide an early research experience for students who have successfully completed the Year 1 medical school curriculum. This course will complement the current Patient-Centered Continuum (PCC) and Clinical Presentation Continuum (CPC) curricula currently offered by the College of Osteopathic Medicine. It will also better prepare the students to fulfill future research requirements, such as those in the CORE (Centers for Osteopathic Research & Education) and/or residencies and fellowships. Published research has shown that early research exposure for medical students improves their future attitudes and interest in research (Ley & Rosenberg, 2007), increases their productivity as physicians (Zier, Friedman, & Smith, 2006), better trains medical students to critically assess medical literature (Guillory & Sharp, 2003), and can help to interest medical students in research and academic careers (Solomon, et.al., 2003).

ELIGIBLE GRADES: GEC5: CR,

COURSE DESC: Internal Medicine is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. The purpose of this course is to provide a student with an opportunity to develop and enhance their knowledge and skills at the level of a beginning to intermediate researcher. The student, under the guidance of their research mentor, designs and execute an original research project as part of their preclinical medical training. Original research is designed specifically to allow a flexible approach for students to obtain first-hand experience on the design, development, and/or completion of activities that span a range of research topics, including but not limited to: basic science, clinical science, human subjects/patient based research, epidemiology, and health systems science.

ELIGIBLE GRADES: GEC5: CR,

PR, F

COURSE DESC: Family Medicine is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in family medicine through faculty- and learner-directed study. Additionally, course topics are reinforced through rotation-specific clinical experiences.

Throughout this course, students work to acquire and demonstrate the foundational knowledge and basic skills necessary to practice family medicine. They explore the attitudes and behaviors that enable excellent patient care, consider the principles underlying this field and discuss the value of family medicine as an integral part of any health system.

ELIGIBLE GRADES: GEC5: CR, PR, F

COURSE DESC: General Internal Medicine is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in internal medicine through faculty- and learner-directed study. Additionally, course topics are reinforced through rotation-specific clinical experiences.

In this course, students perform comprehensive evaluations of patients and develop differential diagnoses and treatment plans for the most common adult patient illnesses, using a team-based approach to patient care. Students also explore clinical situations and patient presentations that are relevant to internal medicine.

ELIGIBLE GRADES: GEC5: CR, PR, F

COURSE DESC: Pediatric Medicine is a four-week blended course that integrates biomedical, social, osteopathic, clinical, and health systems science into the clinical learning environment experience. Educational activities rely on the application and integration of foundational concepts in pediatric medicine through faculty- and learner-directed study. Additionally, course topics are reinforced through rotation-specific clinical experiences.

In this course, students perform comprehensive physical exams, calculate fluids and medications, and identify common pediatric diseases and emergencies. Furthermore, students practice communication skills, care of the special needs patient, pediatric osteopathic manipulative treatment, and explore health care systems.

<td>COURSE DESC:</td>
<td>Osteopathic Medicine, Manipulation and Principles 3A is a blended course that teaches students to incorporate osteopathic principles and practice into care of patients in hospitalized or ambulatory settings. Educational activities rely on the application and integration of foundational concepts of osteopathic medicine in both small and large group settings. Students are expected to participate in large group learning sessions and then demonstrate both osteopathic integration and manipulative skills related to specific patient presentations while in a small group lab setting.</td>

<td>Osteopathic Medicine, Manipulation and Principles 3B continues OCOM 8120 as a blended course that teaches students to incorporate osteopathic principles and practice into care of patients in hospitalized or ambulatory settings. Educational activities rely on the application and integration of foundational concepts of osteopathic medicine in both small and large group settings. Student are expected to participate in large group learning sessions and then demonstrate both osteopathic integration and manipulative skills related to specific patient presentations while in a small group lab setting.</td>

**Course Description:**

- **Elective - Continuity in Primary Care:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

- **Elective - Cardiology:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

- **Elective - Cardiovascular, Vascular and Thoracic Surgery:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

- **Elective - Otorhinolaryngology:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

- **Elective - Emergency Medicine:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

- **Elective - Family Medicine:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

REQUISITE: Offered only to OUCOM 3rd and 4th Year students

COURSE DESC: This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

ELIGIBLE GRADES: GEC5: CR,

PR, F

REQUISITE: Offered only to OUCOM 3rd and 4th Year students

COURSE DESC: This rotation introduces medical students to the state legislative process, state health policy development and implementation, and the role of physicians in developing and shaping health policy. Students will spend time with the Ohio Osteopathic Association (OOA) Executive Director and attend coalition strategy meetings, legislative committees that deal with healthcare issues, shadow a legislator who is a member of the House or Senate Health Committee, and assist the OOA in researching current topics, drafting policy statements and assisting with legislative and agency briefings.

ELIGIBLE GRADES: GEC5: CR,

PR, F

REQUISITE: Offered only to OUCOM 3rd and 4th Year students

COURSE DESC: Elective courses offer opportunities for the 3rd and 4th year student to attain knowledge and skill in one of more areas of special interest related to his/her development as a future osteopathic family physician. This course offers an opportunity for students to attain skill in caring for college students on a clinical rotation, for example at Campus Care on the Ohio University campus. The student's knowledge will be enhanced by direct patient care experiences and didactic lectures.

ELIGIBLE GRADES: GEC5: CR,

PR, F

REQUISITE: Year 3 or 4 Osteopathic Medical Student

COURSE DESC: Elective courses offer opportunities for the Year 3 and 4 students to attend knowledge and skill in one or more areas of special interest related to their development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

<td>The purpose of this rotation is to provide an opportunity for the student to explore issues in the delivery of health services in other countries. This rotation is not intended to transform the student into a specialist, but rather it is to provide a survey of the specialty. Students will need to use a logical and appropriate clinical approach to the care of patients in a developing country setting, utilizing locally available resources, and applying principles of evidence-based decision-making and problem-solving. These experiences are designed not only for students considering careers in international health, but for increasing the understanding of any future physician practicing in the United States who may care for patients from other countries. The experience is also designed to deepen the awareness of all participants regarding the determinants of health and illness and diverse methods of approaching health problems in settings with varied cultural, socio-economic and political characteristics. These experiences help students develop sensitivity to health disparities and their causes, including health, social, economic and environmental factors.</td>

### OCOM 8912 Elective - Academic Medicine
**Course Description:** The purpose of this elective rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

**Eligible Grades:** GEC5: CR,

**Component:** Tutorial

### OCOM 8921 Elective - Academic Osteopathic Manipulative Medicine
**Course Description:** The purpose of this elective rotation is to provide the student with the opportunity to enhance his/her knowledge and skills to a level appropriate for an intermediate student instructor in Osteopathic Manipulative Medicine. To accomplish this, the rotation provides a broad overview of Academic Osteopathic Manipulative Medicine. The student is expected to encounter and participate in a variety of experiences while working within the year 1 & 2 OMM academic curricula and in the supervised OMM clinic, with supervised hospital participation when feasible.

**Eligible Grades:** GEC5: CR,

**Component:** Practicum

### OCOM 8925 Health Policy and Systems
**Course Description:** Health Policy and Systems is a course to be completed in either the third or fourth year of students training. The course is comprised of structured components necessary to increase students awareness of the design and logic of the U.S. health care system; cost, quality, and access to health care services; the training of the American health care workforce; and how the U.S. compares to a selection of other health systems.

**Eligible Grades:** GEC5: CR,

### OCOM 8930 Directed Studies in Osteopathic Medicine
**Course Description:** This course offers opportunities for the 3rd and 4th year student to attain knowledge and skill in one or more areas of special interest related to his/her development as a future osteopathic family physician. A limited number of rotations may be scheduled in one-week blocks (EKG reading, nuclear medicine, radiology, anesthesiology, laboratory medicine, podiatry, house nights, substance abuse, pain management, Osteopathic Manipulative Medicine, palliative care, pharmacy, ophthalmology, wound care, introduction to research); the remainder may be scheduled in 2 or more week blocks with the understanding that only a total of 12 weeks of elective rotations may be spent in any specialty except primary care (including family practice, general internal medicine and pediatrics), excluding the time spent in assigned rotations.

**Eligible Grades:** GEC5: CR,

**Component:** Ind Study

### OCOM 8931 Elective in EKG Reading - Self Study
**Course Description:** The EKG Reading Self Study elective uses resources provided by OU-HCOM to assist student in learning the basics of reading and interpreting electrocardiographs (EKGs). A variety of EKGs will be presented to the student to learn from, and textbooks will be used to assist the student in understanding the interpretation of normal and abnormal cardiac rhythms. At the end of the week of self-study the student will be given an examination consisting primarily of rhythm strips to interpret and correctly identify.

**Eligible Grades:** GEC5: CR,

**Component:** Ind Study

### OCOM 8940 Research Elective - Introduction to Research
**Course Description:** The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher in preparation for engaging in an actual research study. This course is available for the student who wants to design and participate in specially selected research addressing questions derived from osteopathic clinical practice and philosophy under the direction of basic science or clinical faculty.

**Eligible Grades:** GEC5: CR,

**Component:** Research

### OCOM 8942 Research Elective - Critical Literature Review
**Course Description:** The purpose of this elective rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. Permission to participate must be given by the CORE Research Director and the Assistant Dean Clinical Education; the student must also be in good academic standing. This rotation provides a broad overview of critical review of literature via hands-on experience. In hospital and ambulatory settings (as appropriate), the student is expected to encounter a variety of experiences that may lead to a clinical question answerable through the conduct of an extensive and critical review of the literature. To achieve rotation objectives, the student is expected to apply research-based concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, research design, understanding basic statistical results and interpretation, human subject protection, manuscript writing, and dissemination of research findings as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of a critical literature review and to practice problem-solving skills.

**Eligible Grades:** GEC5: CR,

<td>The purpose of this rotation is to provide the student with the opportunity to develop or enhance his/her knowledge and skills to a level appropriate for a beginning researcher. To accomplish this, the rotation provides an opportunity to write a case report and submit it for publication. A case report is defined as an account of the signs, symptoms, diagnosis, treatment and follow-up of a patient that follows an unusual or noteworthy case presentation. A case report can consist of a single-case study or a multiple-case study (N&lt;11). In hospital and ambulatory settings (as appropriate), the student potentially may encounter unique or rare illnesses/diseases or treatment and therapy. To achieve the rotation objectives, the student is expected to apply the concepts of diagnosis and management to the patient, develop a working knowledge of both inpatient and outpatient treatment modalities, be familiar with human subjects protection and its implication on collection of patient information, write the paper following a target journal's submission guidelines, and submit the manuscript for publication as means of contributing to evidence-based medicine. Throughout the rotation, students should have multiple opportunities to perform different aspects of scholarly work and to practice problem-solving skills. The student should enroll for the research rotation only after they have found an acceptable case to report; the rotation should not be used to locate a case to report upon.</td>

<td>This capstone course provides the opportunity for Heritage College Dual Degree Program (DDP) students to demonstrate their ability to effectively integrate and successfully apply the knowledge and skills acquired during their DDP, in real-life situations. Students are asked to propose a culminating educational project on a defined scholarly question, or a problem of particular professional and/or personal interest, whose solution requires a multidisciplinary approach. The completion of this educational project takes into consideration each student’s distinct academic background and educational experience, and is performed under the guidance of a faculty mentor/advisor.</td>

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**
- Introduction to Law Enforcement Technology: GEC1: A-F
- Ethics and Legal Issues: GEC1: A-F
- Real Estate Principles and Practices: GEC1: A-F
- Real Estate Law: GEC1: A-F
- Real Estate Appraising: GEC1: A-F
- Real Estate Finance: GEC1: A-F
- Contemporary Issues in Real Estate: GEC1: A-F
- Approaches to Workforce Effectiveness: GEC1: A-F

**COURSE DESC:**
- Introduction to Law Enforcement Technology: Examines the philosophy and history of law enforcement, overview of crime and police problems, organization and jurisdiction of local, state, and federal law enforcement agencies, survey of professional career opportunities and qualifications required. Instructional goals are learner centered.
- Ethics and Legal Issues: Provides a fundamental base of knowledge concerning contemporary law enforcement ethical and legal issues such as use of force, corruption, professional behavior, code of ethics, ethical dilemmas, and historical cases of ethical misconduct.
- Real Estate Principles and Practices: Real property as the basic resource with which real estate professionals work is explored. Students examine land and its description, rights and interests in real estate, contract law and real estate contracts, title transfer, deeds, leases, financing and mortgages, taxes, home ownership, urban planning, brokerage operations, appraisal and value, applied real estate math, and Ohio requirements for real estate licenses.
- Real Estate Law: Real Estate Law and all legal areas which impact real estate professionals are explored. Students examine the law of agency as applied to real estate brokers and sales personnel, law of fixtures, estates, conveyancing of real estate, mortgages and liens, license laws of Ohio, and zoning.
- Real Estate Appraising: The real estate appraising course exposes students to the practice and process of appraising real property in Ohio. It provides students with information about the appraising profession, the methods of real estate appraisal, and the appraiser licensing process.
- Real Estate Finance: An introduction to the essential elements of real estate finance includes the current real estate market, the types and sources of real estate loans, the real estate residential and commercial loan process, the foreclosure process in Ohio, the role and function of the secondary market, the government involvement in real estate finance, and the construction and development lending process.
- Contemporary Issues in Real Estate: Students investigate current issues in the field of real estate affecting real estate professionals.
- Approaches to Workforce Effectiveness: Obtaining skills that employers need is vital to being successful. Two highly desirable skills of oral communication and listening skills are developed through this course. Students will also be introduced to the complex workplace and the skills necessary for the twenty-first century workplace.

<td>COURSE DESC: Course builds upon knowledge gained in MSC 2010. Further developing student's understanding of military leadership and leadership techniques. Topics discussed include the principles of war, warrior ethos and the army values. Students are introduced to the eight troop leading procedures and the squad orders process. Students continue to develop their map reading and land navigation skills through classroom practical exercises. Course also covers time management, terrorism awareness, team goal setting, and problem solving techniques. Students learn the basics of problem solving and operations execution from beginning to completion. Leadership traits and styles are covered with a capstone presentation and self analysis prior to the end of the course. Teaches the basic duties of the commissioned and non-commissioned officer. Some classes may be held outdoors. A two-hour optional Leadership Lab, MSC 2020L, is held once a week.</td>

**COURSE DESC:**

Leader's Training Course (LTC) is a four-weeks intensive classroom and field training program held in the summer at Fort Knox, Kentucky. By transforming yourself through this rigorous training, you will qualify for enrollment in the Army ROTC Advanced Course. At LTC you experience the Army firsthand by developing your potential in the most important ways—mentally, physically and emotionally. You will be grouped into squads where you will gain experience in all leadership roles—culminating in verbal and written feedback on your improvement. You will also receive a stipend, transportation to and from Fort Knox, housing and meals. The first phase begins with Physical Training (PT) and Drill and Ceremony (D&C) which instill self-discipline and prepare you for the rigors and challenges of the upcoming weeks. The second phase builds on the basics Cadets have learned by expanding into adventure training in the field. Combat Water Survival Training, rappelling, land navigation and marksmanship training provide physical challenges that test Cadets individually while developing teamwork skills.

In the third phase, Cadets learn squad-level operations by taking part in demanding field exercises.

<td>MSC 4010</td>
<td>Continuation of MSC 4010. Increased emphasis on critical thinking skills and ability to quickly identify and resolve complex leadership issues. Discussions and exercises to improve communication and networking skills while increasing knowledge of student's area of focus in the U.S. Army. Topics include career management, OER/NCOER /resume writing, unit letters of introduction/cover letters, interviewing, goal setting, presentation skills, public relations, and officiership. Students will also learn force protection, battle analysis, combat lifesaving techniques, and supply/maintenance management. Students will also learn about dealing with agencies and countries outside the U.S., equal opportunity in the workplace, the prevention of sexual harassment, and financial management. Outside the classroom all of the areas will be developed through assigned duties in the Cadet chain of command as well as planning and leading the activities of the Corps of Cadets to include physical training, Military Science Lab, and special events. A required Leadership Lab (MSC 4020L), a battlefield staff ride, and participation in three one-hour sessions for personal and organizational physical fitness will be conducted.</td>

**COURSE DESC:** Multicultural Policing: Cultural Perspectives in Criminal Justice develops within students a broad understanding of social justice from a criminal justice construct and the appropriate response of criminal justice practitioners performing criminal justice functions in an increasingly diverse society. Students explore emerging strategies for policing in a diverse society as well as the correct police response to emergent dimensions of social or cultural diversity including the homeless, mentally ill, gangs, documented and undocumented immigrants, and multicultural issues as they relate to terrorism and homeland security. Students examine, compare, and contrast the various characteristics of emergent multicultural groups in America including their history, politics, everyday life, behaviors, religion, and predict their potential impact on criminal justice functions.

Quantitative Applications in Criminal Justice Research

Course Description: Examine quantitative applications in criminal justice research. Introduces the student to the use of statistical inferences and tests of significance to answer criminal justice research questions. Explore the application of multivariate statistics from a criminal justice construct. Develop a working knowledge of statistical research applications such as SPSS in criminal justice research problems.

Eligible Grades: GEC1: A-F
Requisite: WARNING: not COMS 3520 or PSY 2110 or MATH 2500

Lecture 3 0 N U30 0

Chemistry and the Law

Course Description: Examines the role of chemistry in the courtroom. Rules of evidence, admissibility and expert testimony extensively examined. Explores the relationship of logic, ethics, and wrongful convictions from the perspective of a forensic chemist. Particular emphasis given to forensic chemistry related to the disciplines of latent fingerprints, fire debris and explosives, DNA, controlled substances and toxicology. Application of course content in a mock trial involving testimony as an expert witness required.

Eligible Grades: GEC1: A-F
Requisite: Jr or Sr

Lecture 3 0 N U30 0

Mass Murder in the United States of America: Implications for Criminal Justice

Course Description: The purpose of this course is to explore serial murder to include the distinctions between definitions, causes and motivations of homicide categories that are gleaned from a detailed analysis of case studies. From analysis of these case studies, students infer and analyze the implications of mass murder for criminal justice practitioners throughout the United States of America.

Eligible Grades: GEC1: A-F
Requisite: Jr or Sr

Lecture 3 0 N U30 0

Contemporary Issues in Criminal Justice Personnel Management

Course Description: The purpose of this course is to examine contemporary evidence based practices in criminal justice personnel management critical to the success and development of today's criminal justice practitioners. Through case studies and review of theoretical articles from the literature, students develop a foundational knowledge of personnel management principles, processes and strategies as they apply to the unique context of today's criminal justice organizations.

Eligible Grades: GEC1: A-F
Requisite: Jr or Sr

Lecture 3 0 N U30 0

Forensic Science Capstone

Course Description: This summative capstone experience provides students with the opportunity to demonstrate competency in the management of evidence from the crime scene to the courtroom through the application of professional knowledge, technology, critical thinking and analysis skills gained over their course of study in the B.S. Forensic Chemistry Program.

Eligible Grades: GEC1: A-F
Requisite: LET 3500, CHEM 4840 and 4840L

Lecture 3 0 N U30 0

Special Topics in Law Enforcement Technology

Course Description: Specific course content will vary with offering.

Laboratory 3 0 N U30 0

Criminalistics and Criminal Investigation for Forensic Chemists

Course Description: Examines the fundamental principles of criminalistics, forensic science, role of the laboratory and their relationship to the criminal investigation process; crime scene search and recording, collection and preservation of physical evidence; scientific aids, modus operandi, sources of information, investigative follow-up and case preparation which represent a partial list of topics. Instructional goals are teacher directed and learner centered.

Eligible Grades: GEC1: A-F
Requisite: LET 3500, CHEM 4840 and 4840L

Laboratory 3 0 N U30 0

Chemistry and the Law

Course Description: Examines the role of chemistry in the courtroom. Rules of evidence, admissibility and expert testimony extensively examined. Explores the relationship of logic, ethics, and wrongful convictions from the perspective of a forensic chemist. Particular emphasis given to forensic chemistry related to the disciplines of latent fingerprints, fire debris and explosives, DNA, controlled substances and toxicology. Application of course content in a mock trial involving testimony as an expert witness required.

Eligible Grades: GEC1: A-F
Requisite: Let 3500, CHEM 4840 and 4840L

Lecture 3 0 N U30 0

Fundamentals of Information Technologies

Course Description: Introduction to the fundamentals of computers with an emphasis on computer literacy. Topics include: history of computers, computer components, Internet and Web 2.0, computer security, ethics, and privacy, computer careers and certification, and electronic files management.

Eligible Grades: GEC1: A-F
Requisite: LET 3500, CHEM 4840 and 4840L

Lecture 3 0 N U20 0

Keyboarding I

Course Description: Introduction to touch keyboarding using a personal computer with emphasis on keyboard mastery, correct technique, and body position. Technique will be developed using straight copy, typical business correspondence, tabulation, and reports.

**ELIGIBLE GRADES:**
- GEC1: A-F, CR
- GEC3: A-F, CR
- GEC5, CR, PR, F
- GEC6, CR, PR, F

**REQUISITE:**
- (Fr or Soph)
- Permission required from eLearning OHIO and ENG 1510
- (Fr or Soph) and WARNING: No credit for both this course and the following: UC 1101 and UC 1102
- WARNING: No credit for both this course and the following: UC 1100

**COURSE DESC:**
- Helps students assess current study behaviors and attitudes and then adopt techniques that increase effectiveness in managing time, taking notes, reading and comprehending test material, and preparing for exams. Emphasizes regular practice and application of strategies discussed. Especially recommended for new students who did not study very much in high school and/or do not have a well-developed system of effective studying.
- Concentrates on managing time and preparing for and taking examinations.
- Improves ability to select important information in lectures, discussions, and textbooks, organize it in note form, and review it. Emphasizes regular practice and use of organized notetaking systems.
- The purpose of the Student Transition Seminar is to assist students in making a successful transition to their selected academic programs, both academically and personally. For those transferring to Ohio University, the course covers material on knowledge and skills necessary to navigate the institution. For those moving from one academic program to another, pertinent information regarding the new program is given. This course fosters a sense of belonging and promotes engagement in the curricular and co-curricular aspects of a student's academic discipline.
- The seminar course associated with thematic or discipline-specific learning communities. Topics may include introduction to disciplinary norms, academic expectations of specific colleges and programs and research and creative opportunities at Ohio University.
- Seminar designed to assist adult students in clarifying career, personal, and educational goals with emphasis on documenting college-level learning from prior experience and documenting this learning for assessment.
- This course guides students to clarify their academic and professional interests. This is accomplished through a combination of seminar style discussion and reflection activities. In addition, students gain and develop a set of skills, tools and practices intended to support students in being agents of change in their respective communities.
- This course focuses on understanding leadership, civic engagement and social change in the global, national and local contexts. We utilize the loci of our identities to frame the meaning we derive from leadership and civic engagement.
- This course introduces students to critical perspectives on leadership strategies and practices via readings, discussions, and experiential learning opportunities. Students develop self-awareness, knowledge and skills through exploring different leadership models, analyzing social and contextual environmental influences, and executing a community-focused project.
- The first-year seminar for Margaret Boyd Scholars is designed to introduce selected scholars to a variety of disciplines and approaches to women's scholarship at the university.
- Ohio Fellows Program Seminar and Activity is an individually tailored, interactive education encounter that fosters in-depth learning and engagement with students and faculty from all majors. Seminar sessions and scheduled activities challenge students to discuss important topics of the day and seek collaborative and multidisciplinary solutions while fostering skills in leadership, decision-making, and problem solving.
