**Course Descriptions:**
- **Tradition and Inquiry in the Classical World:**
  - Course explores approaches to the themes of nature, knowledge, and membership in the ancient Greco-Roman culture, as revealed in ancient texts, archaeological evidence, and works of art. Regular writing assignments are designed to aid students in their exploration of the issues.
- **Tradition and Inquiry in the Medieval and Renaissance Worlds:**
  - Course explores approaches to the themes of nature, knowledge, and membership in western culture from 980 C.E to modern culture. These themes are explored in literary and philosophical texts, work in the social and physical sciences, as well as art and film. Regular writing assignments are designed to aid students in their exploration of the issues.
- **Career Planning in the Liberal Arts:**
  - Course provides an overview of career planning and development, including assessment of interests, skills, values, and motivations; understanding the necessary employability skills needed to succeed in the workforce; and learning the steps of an effective internship/job search process. Students will participate in guided self-exploration, career choices, understanding the relationship between education and the World of Work, and the career decision making process.
- **Introduction to Sustainability:**
  - Course introduces students to sustainability concepts, issues, and trends from the local to the global levels. Students will investigate the interrelationships between biophysical limits, human welfare, and social justice by analyzing several major sustainability problems of the 21st century. Team-taught by professors from diverse academic fields, the course equips students with the foundational knowledge to explore the social, economic, and environmental sustainability challenges and opportunities of the Anthropocene Epoch.
- **War, Peace and Security:**
  - Course examines the dynamics of war, peace, and security from an interdisciplinary perspective. After forming a solid conceptual basis on theories of war and peace, students learn conflict resolution, negotiation, mediation, and peacebuilding skills. The course prepares students for higher level courses on conflict, peace, and violence.
- **Experience Ohio: Gaining a Sense of Place:**
  - Course introduces students to the Great State of Ohio, including its history, people, culture, industry, environmental issues, landscape, and arts.
- **Foundations in Forensic Studies:**
  - Course provides an overview of forensic studies by exploring the natural science components of criminal investigation and criminal justice processes. Students are given the opportunity to understand how diverse fields are interconnected through the methods and approaches of criminal investigation and are provided with the essential knowledge of forensic science from multiple perspectives. Students learn how evidence is collected, processed, and interpreted in the fields of chemistry, toxicology, biology (botany, zoology, and microbiology), DNA analysis, blood spatter analysis, entomology, and forensic death investigation and how this is used to solve criminal cases. The support of other fields such as sociology, psychology, criminology, anthropology, linguistics, accounting, and cyber/data security to the presentation of scientific evidence is also explored. The understanding of these fields is essential for the critical analysis, evaluation, and presentation of scientific evidence and data.
- **The Big Idea:**
  - Course explores approaches to nature, knowledge, community, leadership, and virtue as they are revealed in a wide variety of texts and works of art focused around a particular theme (e.g. science, economics, politics). Discussions, writing assignments, and quizzes aid students' understanding of the issues.

<td>This course equips students with the tools necessary to identify potential internships and helps them develop the requisite skills and documents required for internships. This course is designed to promote self-reflection, assist students in developing a strategy to gain professional experience, and facilitate the creation of a professional portfolio, including formal employment documents and a professional development plan in order to apply for internships in their field of interest during the following semester. Students develop short and long term career goals. Topics include internship searching resources, how to prepare an effective set of application documents for an internship, and how to prepare to be a professional team member.</td>

<td>This course introduces students to the principles and practice of food justice. The course explores the intersections of social, racial, and economic justice and nutrition and food security. Barriers to food access and food sovereignty are also investigated. Food Justice explores strategies to create a more sustainable, just, and equitable food system. Poverty, ownership and control of land, the rights of farmworkers and food service laborers, and the agroecological impacts of food production are some of the issues that impact food justice discussed in the course. By participating in food focused activities like food drives, food bank and pantry work, and community meals, students will put food justice principles into practice.</td>

**COURSE DESC:**
Seminar in How Food Works in the Community
The course provides a discussion forum for students who wish to understand how food works in the community. No prior background or training in food studies is required. The seminar will comprise a broad set of issues connected to food security, production, processing, marketing, distribution, consumption, composting, food choices, and food culture.

**ELIGIBLE GRADES:**
GEC6: CR, REQUISITE: CAS 4911 concurrent

**COURSE DESC:**
The Art of Craft Brewing: The Athens Case Study
In this course, students learn how the craft brewery movement in Athens, Ohio, demonstrates a return to fermentation -- one of humanity's earliest technologies -- and how liquid bread can become a catalyst for community economic development. Students learn the basics of starting a brewery and a tap-room by reference to the rich craft brewing scene in Athens, and how the elemental aspects of place, local traditions, fruit and indigenous yeasts, are expressed in Athens beer-making.

**ELIGIBLE GRADES:**
GEC1: A-F REQUISITE: Jr or Sr

**COURSE DESC:**
College of Arts and Sciences Internship
The course provides internship opportunities for students who wish to understand how food works in the community. No prior background or training in food studies is required. Students work with local organizations on a broad set of issues connected to food security, access, production, processing, marketing, distribution, consumption, waste, composting, food choices, and food culture.

**ELIGIBLE GRADES:**
GEC6: CR, REQUISITE: PR, F

**ELIGIBLE GRADES:**
GEC6: CR, REQUISITE: PR, F

**COURSE DESC:**
Data and Knowledge
This course introduces students to the theory and practice of data-informed knowledge. It focuses on the challenges and rewards of learning from data. Research problems are drawn from publicly available datasets and students analyze data by way of hands-on computer programming. Clear communication of findings is emphasized throughout the course.

**ELIGIBLE GRADES:**
GEC1: A-F REQUISITE:

**COURSE DESC:**
Introduction to Data Analysis
This course introduces students to a comprehensive array of basic descriptive and inferential statistics. Emphasis is placed on inference through a variety of methods including probabilistic approaches, Bayesian analysis, and resampling methods (bootstrapping and jackknifing). Statistical software and an open-source computer programming language are used to reinforce theoretical principles. A strong emphasis is placed upon data visualization and technical graphics for communication of results.

**ELIGIBLE GRADES:**
GEC1: A-F REQUISITE:

**COURSE DESC:**
Data Visualization and Communication
This course offers students a project-based approach that provides a framework for developing and managing data-centered projects from inception to formal presentation. Emphasis is placed on written and visual communication of results for decision-makers. Projects are self-identified and the selection of research questions, data sets, and analytic techniques are critical to the final product.

**ELIGIBLE GRADES:**
GEC1: A-F REQUISITE:

**ELIGIBLE GRADES:**
GEC6: CR, REQUISITE: PR, F

**COURSE DESC:**
Practices in Engineering, Mathematics, and Science
This introductory course will offer a general overview of the frameworks and methods used by STEM practitioners used to identify and solve problems in their respective domains of expertise, with an eye towards viewing middle school and high school lessons through the lenses of these disciplines. In particular, the Fellows will examine both the distinguishing and common features of science, mathematics, and engineering, and the factors that drive each type of investigation, including societal, economic, philosophical, and political factors.
### Course Descriptions

#### LJC 6800 Research Capstone in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 4
- **Repeat Hours:** 0
- **General Education:** N
- **Level:** U30
- **Subsidy:** 0

This research capstone seminar guides students through the process of independent empirical research in law and society studies. The course culminates in a significant research paper focusing on a topic of interest relating to law, legal actors, legal mobilizations, and/or legal institutions.

#### LJC 6500 Research Methods in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 1
- **Repeat Hours:** 0
- **General Education:** N
- **Level:** U30
- **Subsidy:** 0

This course introduces students to the possible forms of interdisciplinary law and society research and the methodological tools that can be deployed in conducting such research. It considers the sociological, anthropological, historical, and political methodologies applied to law, regulation, justice, and social order. The course focuses primarily on empirical research and qualitative methods, with special attention to issues of interpretation, context, meaning, culture, and narrative.

#### LJC 6000 Proseminar in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **General Education:** N
- **Level:** U30
- **Subsidy:** 0

This course introduces the research, writing, and analytical skills that legal professionals need in their legal practice, including the basics of legal research and legal reference for a variety of print and electronic media.

#### LJC 4910 Legal Internship in Law, Justice & Culture
- **Component:** Internship
- **Cred Hours:** 1 to 6
- **Repeat Hours:** BLD
- **General Education:** D
- **Subsidy:** U30
- **Level:** D

The Legal Internship in Law, Justice & Culture provides students with an opportunity to interact with and learn from legal professionals through a placed legal internship. Additionally, the Legal Internship provides students with an opportunity to explore an area or various areas of law and provide an experiential learning experience. The students then reflect on what they have learned during their internship.

#### LJC 4930 Independent Study in Law, Justice & Culture
- **Component:** Ind Study
- **Cred Hours:** 1 to 3
- **Repeat Hours:** 6
- **General Education:** I
- **Subsidy:** U30
- **Level:** I

This independent study course is designed to expand understanding in a selected area of interdisciplinary law and society scholarship not covered in regular course offerings.

#### LJC 4911 Legal Internship Seminar in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 1
- **Repeat Hours:** 0
- **General Education:** I
- **Subsidy:** U30
- **Level:** I

This seminar course serves to prepare students interested in a career in law and provide supplemental instruction to students enrolled in LJC 4910. The seminar provides students an opportunity for additional instruction, discussion, and reflection related to their practical internship experiences and assistance with challenging and ethical issues that students may encounter in their internships.

#### LJC 4915 Post-Externship Seminar in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 1
- **Repeat Hours:** 0
- **General Education:** N
- **Subsidy:** U30
- **Level:** N

This course is designed for students who have completed LJC 3910: Externship in Law, Justice & Culture. LJC 4915 provides students with opportunities for collective reflection and guidance on how their externship experiences can be integrated into their current and future academic and professional development. The course focuses on discussions and exercises that enable students to (1) reflect on and discuss the experiential, academic, and professional dimensions of the program they participated in; and (2) produce a tangible final externship project that can be used to support ongoing educational and professional pursuits.

#### LJC 4940 Independent Research in Law, Justice & Culture
- **Component:** Research
- **Cred Hours:** 1 to 3
- **Repeat Hours:** 6
- **General Education:** I
- **Subsidy:** U30
- **Level:** I

This independent research course is designed for research in interdisciplinary law and society studies under faculty supervision. Students select research topics or are directed to possible research topics of interest to both the student and faculty member.

#### LJC 4945 Externship in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 1 to 3
- **Repeat Hours:** 3
- **General Education:** BLD
- **Subsidy:** U30
- **Level:** BLD

The Externship in Law, Justice & Culture provides undergraduate students with an opportunity to interact with and learn from legal professionals through a placed legal internship. Additionally, Externship in Law, Justice & Culture provides students with an opportunity to explore an area or various areas of law and provide an experiential learning experience. The students then reflect on what they have learned during their internship.

#### LJC 4955 Legal Practice Workshop
- **Component:** Lecture
- **Cred Hours:** 2
- **Repeat Hours:** 0
- **General Education:** I
- **Subsidy:** U30
- **Level:** I

This course introduces the research, writing, and analytical skills that legal professionals need in their legal practice, including the basics of legal research and legal reference for a variety of print and electronic media.

#### LJC 6000 Proseminar in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 4
- **Repeat Hours:** 0
- **General Education:** N
- **Subsidy:** G40
- **Level:** G40

This proseminar exposes students to sociological study from an interdisciplinary perspective. Students learn the theoretical and methodological traditions of law and society scholarship through readings from anthropology, criminology, history, political science, and sociology, among others. The wide range of readings provides students with knowledge of varied approaches to the study of law while demonstrating a common appreciation of the mutually constitutive relation of law and society.

#### LJC 6500 Research Methods in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 4
- **Repeat Hours:** 0
- **General Education:** N
- **Subsidy:** G40
- **Level:** G40

This course introduces students to the possible forms of interdisciplinary law and society research and the methodological tools that can be deployed in conducting such research. It considers the sociological, anthropological, historical, and political methodologies applied to law, regulation, justice, and social order. The course focuses primarily on empirical research and qualitative methods, with special attention to issues of interpretation, context, meaning, culture, and narrative.

#### LJC 6800 Research Capstone in Law, Justice & Culture
- **Component:** Seminar
- **Cred Hours:** 4
- **Repeat Hours:** 0
- **General Education:** N
- **Subsidy:** G40
- **Level:** G40

This research capstone seminar guides students through the process of independent empirical research in law and society studies. The course culminates in a significant research paper focusing on a topic of interest relating to law, legal actors, legal mobilizations, and/or legal institutions.

**COURSE DESC:** Africana Media Studies is an introduction to the Africana experience (primarily in the U.S) through media. This course is designed to enable scholars the opportunity to explore, critique and understand images, stereotypes, myths and counter-imaging of the Africana experience. Contemporary as well as historic notions of race, class and gender through the prism of media will be examined.

In the exploration of these various themes attention will be paid to the social, political, and economic contexts that have shaped the media. The media includes, though not limited to radio, television, film, newspapers and the internet.

This course will attempt to include all aspects of the media to facilitate the examination of the Africana experience. However primary attention will be given to television, film and radio. The course will follow a loose chronological approach from early media to contemporary media. While the primary focus is on Africana media it does not preclude discourse on other related media studies issues, it is however the emphasis for this course.

**COURSE DESC:** Unlike most established disciplines, there is to be a lack of consensus among Africana Studies scholars as to what exactly is African American/Afro-American/Africana/Pan African/Black Studies, and/or what constitutes the nature and scope of the discipline. The National Council for Black Studies, the leading organization of Black Studies professionals in the world, defines it as a discipline that investigates African peoples' experiences from the perspective of their interests, aspirations, possibilities, and envisioned destinies. Experiences that range from the earliest human civilizations to the tragic era of enslavement, colonization, forced migration, displacement and the reconstruction of African peoples humanity and life ways.

This introductory course investigates the foundation, nature, scope, and structure of African American/Africana Studies in African Universities. The course will basically explore various descriptions, definitions, and meanings of the discipline/field, as well as approaches to understanding its interdisciplinary, multidisciplinary, and trans-disciplinary nature; survey major disciplinary literature written about it, and the perspectives advanced by scholars. The course also critiques and systematically outlines essential components of and/or arguments advanced about, for, or against the discipline. Finally, a comparative exploration of the interrelationship between African American/Africana Studies, Area Studies, and Ethnic Studies, as well as some emerging intellectual developments in Africana Studies research, teaching, and service activities will help guide us later into the semester as we engage in our focused discussions and discoveries of a satisfactory definition of the discipline, and an operational description of its basics and essentials.

In the exploration of these various themes attention will be paid to the social, political, and economic contexts that have shaped the media. The media includes, though not limited to radio, television, film, newspapers and the internet.

This course will attempt to include all aspects of the media to facilitate the examination of the Africana experience. However primary attention will be given to television, film and radio. The course will follow a loose chronological approach from early media to contemporary media. While the primary focus is on Africana media it does not preclude discourse on other related media studies issues, it is however the emphasis for this course.

<td>Will cover the African American slave narrative, from the eighteenth to the nineteenth centuries, along with free-woman and free-man writings of the later nineteenth century and possibly the early twentieth century. Readings typically include works by such authors as Frederick Douglass, Harriet Jacobs, William Wells Brown, and Solomon Northup. The course will consider contemporary debates pertaining to how the slave narrative challenges conventional notions of autobiography and how the early black novel confronts received and developing notions of the U.S. novel.</td>

<td>African-American workers have had a profound effect on U.S. labor and its history. This course will examine the transformation of the African-American working class from the post-Civil War period through the late twentieth-century. African American workers and their community organizations played an integral role in shaping the American working class experience from the maturing industrial period through post-industrial period of U.S. history. We will analyze the changing relationship between capital and labor, employers and employees while evaluating the shifting meanings of &quot;owners&quot; and &quot;workers&quot; over time. Through the lenses of race, gender, and sexuality we will also analyze the developments in African American working-class culture and politics.</td>

</table>

The course is interdisciplinary by design and necessity. Encourages a shift of hermeneutics from the black life world to black visual and expressive culture in the terms of blackness. This means repurposing the study of black art in ways other than fidelity to the social category of race and an ethics of positive and negative representation that tacitly encourages the idea of film as cultural policy. Details a commitment to how new paradigms for form and aesthetics, historiography, and intertextuality constitute blackness as the unfinalizable encounter between the idea of race and the idea of art rather than blackness as merely sociology.

The approach of this course is primarily that of visual culture and post-structuralist work devoted to difference. In this way, the method is twofold. Firstly, this is an introduction to the idea of race as enacted in the arts and an introduction to critical theory.
### Course Descriptions

**History of Injustice in the United States**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U10
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**:
Designed to give a socio-legal-historical perspective respecting the patterns of injustice in various areas of African American life. American Blacks are, of course, not the only victims of racism/injustice, but in the past they have been - by far - the largest and the most active of the country's minorities and thus the appropriate focus for review of the law and injustice.

**Special Topics in African American Studies**
- **Component**: Lecture
- **Cred Hours**: 1 to 15
- **Repeat Hours**: 999
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**:
Specific course content will vary with offering.

**Postmodern Blackness: Identity and Culture in Contemporary African American Literature**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**:
Relying on contemporary literary criticism and theory, this course focuses on Postmodern African American literature of the 1960s and later. Typically concerns writers who emerged as major figures during this period, including such authors as Toni Morrison, Alice Walker, and Ishmael Reed. Attention also given to major literary, theoretical, cultural, and aesthetic developments that developed among black writers, critics, and theorists.

**Harlem Renaissance: African American Literature of the Early 20th Century**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**:
Focuses on the extraordinary yield of interwar period (c. 1915-1940) African American authors, placing the literary study in the context of political and cultural history. The course will explore such questions as how the Renaissance may be seen in terms of modernist aesthetics and transnational culture. Also of interest will be the question of the renaissance and radical politics. The class will consider the Harlem Renaissance, what's more, vis-à-vis the sexual and gender revolution of 1920s. Typically readings will include works like Langston Hughes's *The Weary Blues*, Zora Neale Hurston's *Their Eyes Were Watching God*, Claude McKay's *Home to Harlem*, Alain Locke's *The New Negro*, Nella Larsen's *Passing*, and Jean Toomer's *Cane*, along with criticism on the Harlem Renaissance. Students will write a critically researched paper and be administered essay exams. The aim of the course is to equip the student with a strong academic knowledge of Harlem Renaissance literature in its historical context.

**The African American Community Since World War II**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**:
Explres how, when and why people of African descent use the concept "community" to express those social practices that make group life meaningful. This course focuses on how people of African descent in the United States respond to public policies and create social practices that affect collective efforts to build and sustain everyday life as a social and cultural collective.

**African American Personality**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**: Examination of organization and structure of African American personality within American and African sociopsychological contexts. Special emphasis on various forces that shape African American personality.

**The Black Woman**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**: This course investigates representations of black women throughout U.S. history. Students pays particular attention to the ways in which black womanhood is historically characterized through the paradigms of race, gender and social class. Students explore how selected scholars render black women in ways that re-envision, perpetuate, contest, and/or subvert stereotypical images of black women.

**Black Men and Masculinities**
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: E
- **eLearn Options**: Majors Set Aside

**Course Description**: Black Men and Masculinities is an interdisciplinary course that examines the diverse experiences of black men and the public discourses about black masculinities primarily in the U.S. The major thrust of the course is to examine how the gendered social order influences black men's actions and the way black men perceive themselves, other men, women, and social situations. We will use an intersectionality perspective to explore the relationships between multiple dimensions of social relations and inequalities: gender, race/ethnicity, class, and sexual orientation. We will also consider how black masculinities are produced in various physical/social sites. This course evaluates the prospects for social change in how black men think, feel, and act. It addresses issues such as: black male socialization and boyhood/guyland culture, the black male body image, black male friendship, black male sexuality and fertility, black men's experiences as fathers and their involvement in volunteer and paid youth work, male aggression and violence, the social construction of masculinities in different historical and cultural contexts, and men's movements and networks.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** One course in Tier II Fine Arts or Humanities

**COURSE DESC:**
- African American Arts and Artists: The class is an intensive study of a specific topic/theme of Black visual and expressive culture. The course will be structured around this specific topic/theme to illustrate the methods and traditions of black visual and expressive culture. The content of the course will rotate but always address the relationship between art practice and the idea of race. Such topics might include feminist art, the racial grotesque, Chester Himes and the noir tradition, passing and the black embodiment index, historical consciousness and Civil Rights America, hip-hop modernism, or an analysis of one literary text (Ralph Ellison's Invisible Man or Ishmael Reed's Mumbo Jumbo) and its influence of black visual and expressive culture.

- Blacks in Contemporary American Cinema: Explores the representation of African Americans in contemporary American cinema since the 1970s. It also examines the contributions of African Americans on both sides of the camera, as well as various themes conveyed in the films of the period. This class will not only understand film as a text, it will also critique, analyze and investigate the social and political messages within the film text.

- Survey of Black Independent Cinema: Black Independent Cinema is a course about seeing. Many look but few see. We will build a consciousness of the Africana experience in independent filmmaking with particular emphasis on independent filmmakers from the United States. This aim will be achieved by examining the body of work produced by independent filmmakers from the early 1900s up until present day.

- Black Music Criticism: Hiphop history, culture and politics: Designed to engage scholars in a process of discovering and developing critical analytical skills within the context of Hip-hop history, culture, and politics. This course will explore Hip-hop culture as a manifestation of Africana visual, performance and oral traditions. It will explore Africana cultural practices that have given rise to the numerous manifestations of Hip-hop over its thirty-plus year history in the United States and abroad.

Hip-hop has affected/infected all facets of popular culture from the classroom to the corporate boardroom. This course examines the development, contradictions and various representations of Hip-hop culture. This course is designed to increase students' depth of knowledge of Hip-hop within the context of Africana cultural practices, the history and various positions about what Hip-hop is/is not and provide opportunities for dialogue and further study.

Toward accomplishing the goal of investigating Hip-hop history, culture, and politics, film, various media texts and possibly guest lecturers will be used to facilitate this learning experience. Scholars will be expected to submit papers, complete oral reports, and participate in class projects for successful completion of this course.

ELIGIBLE GRADES: GEC1: A-F, GEC2: A-F, GEC4: A-F, REQUISITE: Soph or Jr or Sr

**COURSE DESC:** What does it mean to be a black child in America at the beginning of the 21st century? We will consider how the meaning of childhood changes over time, place, and social context for African Americans. By moving children to the center of focus, we will see that there is no singular definition of African American childhood, but instead many different ways in which African Americans experience childhood and adolescence. Typically African American children are only studied as victims or perpetrators of social problems, but in this course we will consider African American children in many additional contexts. We will begin by examining the meaning(s) of childhood and adolescence and how they have changed over time. Throughout the course we will see how African American children's lives are shaped by broader systems of inequality. We will also examine how African American children are active in the construction of their own peer cultures and popular culture, as well as why the relationship between Black youth and popular culture is routinely viewed as problematic, and how African American children are discussed within the popular press. Finally, we will examine how public policies shaping African Americans children and adolescents' lives are formulated and how they sometimes serve to replicate various inequalities.

---

ELIGIBLE GRADES: GEC1: A-F, REQUISITE: Jr or Sr

**COURSE DESC:** This course explores the tremendous influence that popular culture, in the form of films, television, music video, and print media, has on how we conceptualize what it means to be African Americans experience childhood and adolescence. Typically African American children are only studied as victims or perpetrators of social problems, but in this course we will consider African American children in many additional contexts. We will begin by examining the meaning(s) of childhood and adolescence and how they have changed over time. Throughout the course we will see how African American children's lives are shaped by broader systems of inequality. We will also examine how African American children are active in the construction of their own peer cultures and popular culture, as well as why the relationship between Black youth and popular culture is routinely viewed as problematic, and how African American children are discussed within the popular press. Finally, we will examine how public policies shaping African Americans children and adolescents' lives are formulated and how they sometimes serve to replicate various inequalities.

---

ELIGIBLE GRADES: GEC1: A-F, REQUISITE: Soph or Jr or Sr

**COURSE DESC:** Focusing on the history of ideas and approaches that have shaped and defined our understanding of Black families. This course offers an interdisciplinary approach to the study of African American social and family life. You will be introduced to historical and socio-cultural circumstances that affect the Black family and the diverse nature of Black culture. Specifically, the course will provide a sociological perspective for understanding and analyzing topics and challenges that impact the Black family. The discussion is also designed to encourage and stimulate critical thinking beyond “common sense” interpretations of the Black family.

---

**COURSE DESC:** Legal Policy and Disparities in the American Health Care System

Intended to examine the disparities in health care experienced by women, children, the elderly, Blacks, Latinos, Native Americans, Appalachians, and the poor in the American health care system, in the spirit of open, scholarly inquiry. Dr. Martin Luther King, Jr. once said, Of all the forms of inequality, injustice in health care is the most inhumane. He worked to raise awareness about public health concerns, particularly relating to issues that disproportionately affect minorities, people of color, and low-income communities.

---

**COURSE DESC:** Special Topics in African American Studies

Specific course content will vary with offering.

---

**COURSE DESC:** Independent Study

Primarily for students interested in concentrated study in specific area in cooperation with advisor.

---

**COURSE DESC:** The Black Child

Specific course content will vary with offering.

COURSE DESC:

A&S AAS 6900 Special Topics in African American Studies
ELIGIBLE GRADES:
GEC4: A-F, CR, PR

Specific course content will vary with offering.
COURSE DESC:

A&S AAS 6930 Independent Research
ELIGIBLE GRADES:
GEC2: A-F, PR

For students desiring to pursue independent research projects under supervision of a faculty member and resulting in term paper or equivalent. Usually a sequel to previous subject-matter course.

A&S AAS 4691 U.S. Constitutional Law: Post-Civil Rights Movements
ELIGIBLE GRADES:
GEC1: A-F

By studying key decisions of the Supreme Court of the United States, students taking this course will learn how said Court applied the Constitution to uphold the Civil Rights Acts of 1964 and other laws passed to secure for African Americans the Constitutional rights they had been denied for nearly two centuries. Students will also examine Supreme Court cases that helped to foster further desegregation of America’s public schools. Finally, students will learn how other Americans have benefited from the legal paths forged by African Americans in their struggle to obtain the Constitutional rights to which all Americans are entitled.

<td>Humans have always been interested in animal behavior. During our early history, much of that interest was based on practical need. Today studies of animal behavior help us understand our own behavior as well as our interactions with all other animals. Explore both how and why some animals migrate, live in groups, fight, have mating preferences, provide parental care, and communicate. Lectures will address some controversial issues in animal behavior, such as &quot;Do animals have emotions?&quot; Provides you with a new way of thinking about, observing, and interacting with the animals.</td>

<td>From DNA to fossils billions of years old, the evidence for evolution is all around us. This course is an introduction to the science of evolutionary biology for those not majoring in the life sciences. Topics covered include the mechanisms of evolution, such as natural selection, adaptation, and the formation of species; the patterns of evolution, such as mass extinction and the chronic of life on earth; and applications of evolutionary principles to human society, such as medicine, agriculture, and biodiversity conservation. The overriding aim of the course is to educate students on evolutionary biology as a science.</td>

Principles of Evolution
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: (C- or better in BIOS 1710 and (BIOS 3100 or concurrent)
Course Desc: Study of the microevolutionary and macroevolutionary processes and patterns that explain and characterize the history and diversity of life on Earth.

Neutral Basis of Behavior
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in BIOS 1710
Course Desc: Overview of how animal nervous systems generate behavior. The first half introduces brain and neuronal physiology and anatomy, sensory and motor systems, sensory-motor integration, and motivational states. The second half uses exemplar neuroethological case studies to integrate this information.

Principles of Physiology
Component: Laboratory
Cred Hours: 2
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: BIOS 3430 or concurrent
Course Desc: Lab experiences designed to complement material covered in BIOS 3430/5430. Lab introduces students to physiology related skills and techniques used in research settings. This course satisfies half of the Tier I Junior Composition Equivalency requirement via a series of lab reports throughout the semester. Lab reports strengthen understanding of formal writing in Biological Sciences, including the ability to synthesize primary literature, report results of experiments, and edit and revise reports.

Human Physiology
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in ((BIOS 2030 and 2035) or (3010 and 3015))
Course Desc: Covers basic cell physiology through most organ systems, particularly those of humans. Emphasis on physiological regulation and physiological responses to various stresses.

Human Physiology Laboratory
Component: Laboratory
Cred Hours: 2
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: BIOS 3450 or concurrent
Course Desc: Lab experiences designed to complement material covered in 3450. Lab introduces students to physiology related skills and techniques used in both research and clinical settings.

Forensic Biology
Component: Laboratory
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in (ANTH 4470 or BIOS 3100 or GEOL 4730 or PBIO 3300) and (Jr or Sr)
Course Desc: Provides experience in microscopic techniques; identification of hair, fibers, and bones; identification and grouping of blood; entomological and anthropological technologies in forensics; and identification of semen.

Forensic Biology
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in (ANTH 4470 or BIOS 3100 or GEOL 4730 or PBIO 3300) and (Jr or Sr)
Course Desc: Provides experience in microscopic techniques; identification of hair, fibers, and bones; identification and grouping of blood; entomological and anthropological technologies in forensics; and identification of semen.

Wildlife Habitat Management
Component: Laboratory
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or Better in BIOS 1710 and 1715
Course Desc: A course covering theoretical and practical aspects of management of wildlife and their habitats; it examines ecological, social, economic and regulatory (policy) perspectives of managing wildlife population and wildlife habitat management aimed towards sustainable use of wildlife. After completing this course, students have a better understanding of the ecological principles for managing and restoring wildlife populations and their habitats in line with local, state and federal policy mandates.

Wildlife Habitat Management
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or Better in BIOS 1710 and 1715
Course Desc: A course covering theoretical and practical aspects of management of wildlife and their habitats; it examines ecological, social, economic and regulatory (policy) perspectives of managing wildlife population and wildlife habitat management aimed towards sustainable use of wildlife. After completing this course, students have a better understanding of the ecological principles for managing and restoring wildlife populations and their habitats in line with local, state and federal policy mandates.

Animal Ecology
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: (C- or better in BIOS 1710 and 1715) or (PBIO 1150) and (MATH 2301 or 266A or 263A or concurrent)
Course Desc: An exploration of empirical and theoretical aspects of how animals interact with their environment. This mechanism-oriented class will evaluate ecological processes at the individual, population, community, and ecosystem levels.

Field Ecology
Component: Laboratory
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in (BIOS 1710 and 1715)
Course Desc: Quantitative analysis of field problems in ecology; consisting of design of field experiments and hypothesis testing, graphic and statistical analysis of data; interpretation of results and report writing.

Field Ecology
Component: Lecture
Cred Hours: 3
Repeat: 0
ELIGIBLE GRADES: A-F
REQUISITE: C- or better in (BIOS 1710 and 1715)
Course Desc: Quantitative analysis of field problems in ecology; consisting of design of field experiments and hypothesis testing, graphic and statistical analysis of data; interpretation of results and report writing.

**Course Descriptions:**

- **Bioethics: Bioethical Problems in Biology and Medicine**
  - **ELIGIBLE GRADES:** CEC, CORRESPOND
  - **COURSE DESC:** Ethical problems arising from rapid advances in biological and biomedical research. Topics can include human experimentation, fetal research, informed consent, euthanasia, reproductive advances, fetal sex determination, public policy and bioethics, health care delivery, mental health, and genetic screening.

- **Biology and the Future of Man**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** Covers human sexuality, physiological effects of environmental pollutants, drugs of abuse, and introduction to advances in biological technology that influence future of humans.

- **Undergraduate Research Inquiry & Analysis in Ecology and Evolutionary Biology**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** Uses a weekly research seminar series as the basis for research lectures and directed discussions of current research topics, research methods, and experimental design in ecology and evolutionary sciences.

- **Clinical Laboratory Observation**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** Gives students the opportunity to observe activities characteristic of clinical lab. Observations made in hospital setting so that, along with other background information provided, students may be better able to evaluate lab work as career choice.

- **Teaching Vertebrate Anatomy**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** Students receive advanced training in vertebrate anatomy via lectures and dissections and give presentations while assisting in teaching vertebrate anatomy courses.

- **Developmental Biology**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** Students receive advanced training in vertebrate anatomy via lectures and dissections and give presentations while assisting in teaching vertebrate anatomy courses.

- **Biological Pharmacology**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson’s disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.

- **Neuroscience**
  - **ELIGIBLE GRADES:**
  - **COURSE DESC:** This course is an overview of the structure and function of the human nervous system. It provides students with a basic understanding of the molecular and cellular basis of neural communication, the development of the nervous system, the brain systems underlying human behavior (e.g., sensation and perception, movement, memory, sleep and arousal, and emotion) and the consequences of neurological damage to these systems.

**COURSE DESC:**

- **Senior Honors Thesis:** Independent departmental honors research thesis under supervision of staff member. Student should enroll semester he or she expects to complete thesis. Registration with director of departmental honors program is required.
- **Tutorial Senior Thesis:** Special course offered to students in Honors Tutorial program.
- **Human Anatomy:** Provides basic and advanced training in body structure/function relations for students who have only limited undergraduate exposure to Human Anatomy. Beyond the basic course requirements, graduate students will be assigned an additional, in-depth survey or research paper on an advanced topic in functional human anatomy.
- **Comparative Vertebrate Anatomy:** Extensive lab work covers each of the major classes of vertebrates and includes dissection.
- **Developmental Biology:** Integrates genetics, cell biology, and molecular biology.
- **Molecular and Cellular Neurosciences:** An over-arching synthesis of concepts already learned in cell biology, genetics, physiology and chemistry are applied to the biological principles of drug action. Designed as a capstone experience for students in the sciences, especially the biological sciences. Covers the pathophysiology and therapeutic uses of drugs, for certain human diseases (e.g., heart failure, diabetes, Parkinson's disease, and infectious diseases). A select group of the most commonly prescribed drugs are discussed in terms of their cellular mechanisms of action and how drug actions alter disease states. After successfully completing the learning activities students are better prepared for biomedical careers after graduation. Toxicology and medicinal chemistry of various drug classes are not discussed.
- **Neuroscience:** This course is an overview of the structure and function of the human nervous system. It provides students with a basic understanding of the molecular and cellular basis of neural communication, the development of the nervous system, the brain systems underlying human behavior (e.g., sensation and perception, movement, memory, sleep and arousal, and emotion) and the consequences of neurological damage to these systems.
- **Human Neuroscience Laboratory:** Students will learn human brain anatomy and consequences of neurological damage by completing a human brain dissection, studying cross-sectional anatomy of normal and diseased brains (e.g., via magnetic resonance images), and analysis of clinical cases.
- **Introduction to Molecular and Cellular Neurosciences:** Topics include morphology, excitable properties of neurons, mathematical modeling, synaptic function, molecular biology, signal transduction, gene expression, and neuronal development.

**COURSE DESC:**
- **A&S BIOS 5150**: Systems and Cognitive Neuroscience
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Neutral mechanisms of sensation (vision, hearing, touch, etc.), movement control (balance, locomotion, orienting, reaching, etc.), and cognitive processes (memory, emotion, decision making, etc.). In each class, students hear a lecture and discuss assigned articles from the research literature. A major goal is to train students in critical analysis of primary journal articles."

- **A&S BIOS 5160**: Biogeography
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "An examination of historical, environmental, and biotic influences that shape spatial patterns of plant and animal distributions and community structure in the contemporary landscape."

- **A&S BIOS 5180**: Methods in Computational Neuroscience
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Lecture, discussion, and computer lab. Introduction to mathematical and computational techniques for modeling single neurons and networks of neurons. Cable theory; Rall's model; compartmental models; introduction to available software for simulating neurons and networks of neurons; modeling of action potentials, Hodgkin-Huxley equations, synaptic conductances, and voltage-dependent conductances; Hebbian synapses; synaptic modification rules; quantal analysis; neural networks. Students are expected to complete a simulation project using one of the available software packages."

- **A&S BIOS 5210**: General Microbiology
  - Laboratory 4 0 N G50 0
  - Component: Laboratory
  - Cred Hours: 4
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Overview of bacteria, protista, viruses, and their relationship to us and our environment. Lab training in common microbiological methods."

- **A&S BIOS 5220**: Pathogenic Bacteriology
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "An molecular approach is used to discuss bacterial pathogenesis and disease manifestations. Topics include aspects of immunity and pathogen control."

- **A&S BIOS 5230**: Pathogenic Bacteriology
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "A molecular approach is used to discuss bacterial pathogenesis and disease manifestations. Topics include aspects of immunity and pathogen control."

- **A&S BIOS 5240**: Virology
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Intended to familiarize students with the principles of virology and focuses on human and animal viruses. Emphasis is placed on the molecular events following virus-cell interaction, which are critical to viral replication and pathology. Topics also include viral evolution, novel infectious agents, use of viruses for gene therapy, and modern methods of studying viruses."

- **A&S BIOS 5250**: Evolutionary Genetics
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Basic concepts of population genetics (mutation, gene flow, natural selection, genetic drift). Rates, patterns, and processes of molecular evolution at the population and species level."

- **A&S BIOS 5260**: Molecular Genetics
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Topics will emphasize the interaction of microbial genetics with molecular biology and biotechnology. Genetics of selected bacteria, their bacteriophages, and yeast are covered. Topics include the genetic elements of bacteria, bacteriophage, and yeast; mutations and mutagenesis, mitochondrial genetics and prions, mechanisms of gene transfer and recombination, regulation of gene expression, and recombinant DNA. Students are recommended to take BIOS 3210."

- **A&S BIOS 5270**: Mechanisms of Gene Regulation
  - Lecture 3 0 N G50 0
  - Component: Lecture
  - Cred Hours: 3
  - Repeat Hours: 0
  - General Education: N
  - Perm: G50
  - Subsidy Level: 0
  - eLearn Options: 
  - Majors Set Aside: 

  "Class is intended for upper-level undergraduates and graduate students. An in-depth discussion of the molecular events that regulate eukaryotic gene expression. Topics also include gene regulation during differentiation and development, aberrant transcription and disease, generation and utility of transgenic animals, and genomics-based analysis of gene expression."

**COURSE DESC:**
- **Clinical Anatomy III:** Consists of lectures and laboratories focusing on the physician-oriented gross anatomy of the head and neck. Prepares the student for the application of anatomy to the clinical sciences. The primary resource is the human cadaver dissection; additionally, imaging studies, models, cross-sections, plastinated specimens will be used as study guides. Clinical correlations and case studies will be used to enhance the understanding of human anatomy.
- **Microanatomy I: Architecture of Cells and Tissues:**
  - The purpose is to train Master's and Ph.D. level graduate students in molecular and cellular aspects of human tissue structure and function. This course is also intended to train graduate students to teach in the microanatomy laboratories offered in a standard medical curriculum. Complements graduate courses in clinical gross anatomy and provides credit for students pursuing a Master's or Ph.D. in Biological Sciences. A formal and structured approach to teaching students in microanatomy of human tissues and will be taught in conjunction with anatomy-based courses in the Department of Biological Sciences, including Clinical Gross Anatomy I (Back and Extremeties), Clinical Gross Anatomy 2 (Thorax, Abdomen, Pelvis, and Perineum), and Clinical Gross Anatomy 3 (Head and Neck).
  - Lectures and laboratory exercises will involve examination of prepared slides and discussion of molecular and cellular composition of the basic tissue types and organs of the human body, as well as an introduction to pathology. Each laboratory will address a specific area and associated clinical questions and correlates that will require discussion among students.

In addition to weekly quizzes and practical examinations covering the course material on cell and tissue architecture and introductory pathology, students will be required to formally develop and present detailed audio-visual demonstrations of selected histopathological specimens to graduate students and graduate faculty within Biological Sciences.

- **Microanatomy II: Organ Systems:**
  - The purpose is to train Master's and Ph.D. level graduate students in the Department of Biological Sciences in microanatomical structure of human organ systems and how this relates to their physiological functions. Also intended to train graduate students to teach in the microanatomy laboratories offered in a standard medical curriculum. Complements graduate courses in clinical gross anatomy and provides credit for students pursuing a Master's or Ph.D. in Biological Sciences. A formal and structured approach to teaching students in microanatomy of human tissues and will be taught in conjunction with anatomy-based courses in the Department of Biological Sciences, including Clinical Gross Anatomy I (Back and Extremeties), Clinical Gross Anatomy 2 (Thorax, Abdomen, Pelvis, and Perineum), and Clinical Gross Anatomy 3 (Head and Neck).
  - Lectures and laboratory exercises will involve examination of prepared slides and discussion of molecular and cellular composition of organ systems of the human body, their interrelationships, and selected pathologies. Each laboratory will address a specific area and associated clinical questions and correlates that will require discussion among students.

In addition to weekly quizzes and practical examinations covering the course material on structure and function of organ systems and selected pathologies, students will be required to formally develop and present detailed audio-visual demonstrations of selected histopathological specimens to graduate students and graduate faculty within Biological Sciences.

COURSE DESC:
Application of multivariate statistics to biology; multiple regression and correlation, principal components, canonical correlation, discriminant function, and factor analysis. Project in experimental design and analysis of data.
Specific course content will vary with offering.
Research directed toward doctoral degree.
Specific course content will vary with offering.
Introduction to Neuroscience. An examination of the history of ideas about the mind, the biological basis of behavior, and the origins of Neuroscience, from the convergence of biology, philosophy, and psychology. Exact course materials will be updated on a regular basis, but will typically be based on reading books such as "Neurophilosophy" by Patricia Churchland.
Fall semester tutorial on neuroscience topics for sophomore HTC students in the neuroscience program.
Theory and Experiment in Neuroscience. An examination of the logic and adequacy of various experimental approaches used in neuroscience and the problem of placing mind, brain, and behavior in a common empirical framework. Exact course materials will be updated on a regular basis, but will typically be based on reading books such as "Theoretical Neuroscience", by Peter Dayan and Larry Abbott.
Spring semester tutorial for sophomore HTC students in the Neuroscience Program
Fall semester tutorial on neuroscience topics for junior HTC students in the Neuroscience program.
Spring semester tutorial on neuroscience topics for junior HTC students in the Neuroscience program.
Specific course content will vary with offering.
Senior thesis for HTC students in the neuroscience program.
Senior thesis for HTC students in the neuroscience program.

<td>Provides a broad overview of the archaeology of the Mediterranean world from the time of the Old Kingdom in Egypt (3rd millennium BC) to the early Byzantine period (6th century AD). Organized around iconic structures from the main cultures and time periods covered. Each site will be used individually as a vehicle for studying broader aspects of the society that produced it. Explores why it is particularly significant and representative of that society. Questions include: Why were lists of &quot;wonders&quot; made in the first place? What was the political significance of creating a &quot;wonder&quot;? What effect did the original Seven Wonders have on the monuments that came later? What effect did the wonders have on the modern imagination and the archaeologists devoted to rediscovering them?</td>

<td>This course provides an introduction to Greek society and culture through investigation of its material culture and the archaeological contexts in which they are found. It explores the history of Greek archaeology and different approaches to investigating particular kinds of material evidence. The course examines the growth and collapse of complex civilization in Bronze Age Greece, the reemergence and growth of city-states from the Early Iron Age, and the development and spread of Hellenic cultural institutions to the Near East and Italy.</td>

<td>GEC1: A-F</td>
<td>REQUISITE:</td>
<td>This course focuses on the intersection of material culture and the writings of the Judeo-Christian Bible within the broader framework of interpreting texts and the material record. The course introduces students to archaeological methods as well as to the critical study of texts. This approach involves the examination of coherence and divergence between historical documents and material culture, and it also involves the examination of advantages and limitations of both types of data. The regional and chronological focus is the eastern Mediterranean of the first half of the first millennium BCE, although reference will be made to the second millennium BCE and to the turn of the Christian Era. In addition to major political developments, course also includes what the material and textual evidence report about the lifeways of Iron Age people in the Eastern Mediterranean. Finally, the course reflects comparatively on cases and issues in Historical Archaeology outside the main regional and chronological focus of the course.</td>

<td>REQUISITE:</td>
<td>Focuses on the people of the Greek city of Athens during an extraordinarily creative period of history—the century and a half from 480 B.C to 323 B.C—when the Athenians undertook the world's first democratic experiment. Examines textual sources (literature, philosophy, history, speeches and public documents) and archaeological sources (architecture, sculpture, painting) for the light which they shed on the ancient Athenians' political, intellectual, and artistic problems, concerns, and achievements. Explores how the Athenians dealt with those fundamental questions about life that face all thinking humans in a democracy.</td>

<td>REQUISITE:</td>
<td>In this course we look at life and thought in ancient Rome from Augustus through Marcus Aurelius (30 BC - AD 180) based on material, documentary, and literary sources. We investigate humanistic questions across cultural boundaries. The primary focus is on how the inhabitants of Rome lived and what they thought about fundamental issues such as: How did elites and the common people function in a hierarchical society? Was it the role of religion or education of an art? How did Romans deal with death? What ultimately made life worth living for an ancient Roman? We will study the political lives of Roman elites, the rituals of daily life, and the art and architecture that made up the environment in which these people lived. These issues are then compared with our own attitudes in modern America in an attempt to understand differences and commonalities shared by human beings in different cultures.</td>

<td>Attempts to approach the city of Jerusalem and the complex interaction of political, social, and above all religious realities that continue to define the city. The course focuses on Jerusalem as a mythic as well as a historical entity; attempts to disentangle some of the threads that make Jerusalem the rich tapestry of meaning it has become. It does this by a careful reading of textual material from Jewish, Christian, and Islamic sources, as well as of archaeological and art-historical data. The course focuses especially on the Temple Mount as a site of religious practice, transformation, myth, and conflict because of the long shadow it casts over the traditional landscape of Jerusalem.</td>

<td>Focuses first on Alexander himself, a man who became a myth even before his death. Next examines the Hellenistic world, the world that Alexander created out of his conquests. Alexander's conquests helped spread Greek civilization over the whole of the eastern Mediterranean. Many of the issues that people living in this world confronted are still relevant today: the nature of celebrity, for Alexander was arguably the first celebrity; the challenges of emigration, of living in a society that was culturally and ethnically diverse, of assimilating a foreign culture, and living under an autocracy.</td>

<td>Is it enough to merely live? This course introduces students to how ancient authors and thinkers explored deep questions about life and the human condition, exploring their views of what it means not only to live, but to live well. Studying famous classical works of drama, literature, history, philosophy, and religion, the course explores what it means to be human, and how great thinkers have described the human experience and the goals to which humans aspire. These writers believed that the world does not get better through random chance, but by deliberate action that grows out of carefully reasoned beliefs about how life should be. This course explores how these aspirations arose in the ancient Greek and Roman worlds, how they developed over time, and how they still shape much of modern thought about humanity and the human condition. The course has no prerequisites.</td>

<td>This course examines the rise and fall of the Athenian Democracy and the Roman Republic, placing particular emphasis on understanding the social, political, and cultural attitudes and developments that contributed to the development and collapse of these types of government. Because both types of government conveyed substantial political power and responsibility to the citizenry as a whole, the course takes a broad interdisciplinary approach to understand the views and experiences of the people who lived under these governments. Focusing on ancient sources, the course seeks to understand how ancient Greeks and Romans described and conceived of their types of government, and how they understood the erosion and collapse of those governments. The course uses a wide range of evidence, including architecture, art, drama, history, literature, and philosophy.</td>

<td>Through myth, literature, religion, art and archaeology, this course investigates different kinds of evidence for the food cultures of the ancient Near East, the Greek world and the Roman Empire. Specific types of food and drink and occasions at which they were shared formed the social and religious ties at the heart of these civilizations, and helped shape modern Western values concerning food production and consumption. Food security, human fertility, sense of community, relation to the gods and proper social order are all themes that reappear in the myths, literature and art of these major civilizations.</td>

<td>This course surveys the visual and architectural material culture of the ancient Middle East, defined loosely as the geographic region stretching from Anatolia to Iran--including Mesopotamia and the Eastern Mediterranean. It spans the time period ranging from the emergence of civilization in the fourth millennium BCE to the arrival of Alexander the Great in the 4th century BCE. After an orientation to history, geography, and chronological trends in content and style, definitions of and relationships between &quot;art&quot; and architecture, scholarly approaches to text-image relationships, and the role of archaeology and the understanding of provenance and provenience in the study of visual material culture in these periods and places. We conclude with a look at the role of this material in the creation and development of modern national narratives and identities.</td>

<td>Introduces Islam as a religious and cultural system. Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shar'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also place ‘insider’ perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that ‘humanity consider from what it is created’.</td>

<td>Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors—the ‘ulama’, lay activists, social movements—responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context—Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by ‘political Islam’—but also the politics of Islam, and what the implications are for a wider globalized modernity.</td>

<td>How can a book that seeks to justify extreme violence inspire a man whose name is synonymous with peaceful protest? To answer this question, we will examine the life and thought of M. K. Gandhi through the lens of religion, focusing on the text that served as one of his chief inspirations, the Bhagavad Gita. The Gita is an ancient philosophical poem in which the god Krishna convinces the reluctant warrior Arjuna to initiate a war that will annihilate most of the human race. But to Gandhi, this text was the blueprint for the most successful nonviolent resistance movement in history, the campaign to free India from British control. By reading the Gita and works by and about Gandhi, students will examine the confluence of religion and politics that gave rise to Gandhi and to modern India.</td>

<td>COURSE DESC: This course is intended for all CARS majors as a capstone covering the topics of magic, witchcraft, and sorcery in classical civilizations as well as in the world's religious traditions, past and present. Engaging with primary and secondary sources, archaeological data, historical narratives, and comparative studies, students develop an inclusive humanistic view of the range of subjects taught in the department by looking at them all through the prism of magic. Magical beliefs, objects, and practices covered in the course may include the Salem Witch Trials, Greek curse tablets, Sanskrit mantras, Egyptian amulets, Islamic alchemy, Jewish Kabbalah, and sex magic. This course also emphasizes the development of oral presentation skills.</td>

<td>COURSE DESC: Some Muslims have turned to religion as a source for political identity in the modern world. How should we describe this phenomenon? Which groups have embraced the religio-political renewal? Why have they done so? What forms have the movements taken? How have they developed? What role, in particular, have modernizing states played in the instrumentalizing of Islamic institutions for purposes of control and legitimacy? How have non-state actors--the ‘ulama’, lay activists, social movements--responded to the conditions created by modernizing states? Addresses these questions by exploring a range of case studies in different national/cultural context--Africa (Morocco, Sudan, Somalia), Southeast Asia (Indonesia), Western Europe (France, Germany, the Netherlands), and North America (US and Canada). Through these case studies, probes what we mean by ‘political Islam’--but also the politics of Islam, and what the implications are for a wider globalized modernity.</td>

<td>COURSE DESC:</td>
<td>Introduces Buddhist doctrines, practices and institutions. Focuses on the spread and development of Buddhism across Asia and beyond, with an eye toward examining how foundational Buddhist ideas and practices have taken shape in specific places and in particular historical contexts. Selectively surveys the foundational teachings, history and diversity of Buddhism, from the lifetime of the Buddha in fifth century BCE India to contemporary Buddhist communities in Southeast Asia, East Asia, and North America. Along the way, considers some important questions raised and addressed in the critical study of religion.</td>

<td>COURSE DESC:</td>
<td>Since the end of World War II new movements have arisen in every major religious tradition. This resurgence of religion as a political and social force responds to a widespread and profound concern at the failure of modernity and secular nationalism to bring prosperity and provide meaning for life. Looks at the New Age Movements and Liberation Theology in the 1960s, movements generally called fundamentalist that arose in the 1970s, and militant movements that justify the use of violence that have emerged in the last two decades. Research paper on a major thinker or contemporary movement in one of the great world religious traditions--Hinduism, Buddhism, Judaism, Christianity, and Islam required.</td>

<td>COURSE DESC:</td>
<td>This course aims to explore the overlapping categories of myth, ritual and symbol and understand their role in creating systems of meaning, both local and cross-cultural. We ask questions about the ways these categories function to integrate or disintegrate individual personalities, authorize and undermine social hierarchies, and shape the way we think and act in ways that are often hidden. Above all, we seek to comprehend the ways in which myth, ritual and symbol do not belong solely to ancient or non-industrial cultures but are present and active in almost every aspect of our world today.</td>

<td>This course is designed to give students firsthand experience in an active archaeological excavation of an ancient Mediterranean site. Students learn field techniques and methodologies, including survey, excavation, recording and measurement, plan drawing, onsite ceramic analysis, stratigraphic analysis, among others. Students are required also to connect the excavation activities to the broader context of the site and region through directed readings, onsite lectures by specialists (e.g., zooarchaeologists, paleobotanists, geologists), and to draw this knowledge and experience together in a final paper.</td>

COURSE DESC: Designed to survey organic chemistry and biochemistry and their impact upon daily existence.

COURSE DESC: General course in fundamental chemical principles. Atomic structure, periodic classification, bonding, mole concept, stoichiometry with problem solving, thermochemistry, equilibrium, and gases. Recommended for majors in chemistry, engineering, biological sciences, plant biology, clinical laboratory science, geological sciences, secondary education (B.S.Ed. in biological sciences, chemistry, physics, and integrated science), and preprofessional (biological science) areas.

COURSE DESC: General course in fundamental chemical principles. Intermolecular forces and phase changes, solutions and colligative properties, chemical kinetics, chemical equilibrium, acid-base equilibria, thermodynamics (entropy and free energy), electrochemistry, descriptive chemistry, and nuclear chemistry. Recommended for majors in chemistry, engineering, biological sciences, plant biology, clinical laboratory science, geological sciences, secondary education (B.S.Ed. in biological sciences, chemistry, physics, and integrated science), and preprofessional (biological science) areas. Credit not allowed for both 1220 and 1520.

COURSE DESC: This course introduces quantitative techniques including volumetric and gravimetric methods of analysis and data processing, and analysis and modeling using mathematical tools, as well as modern electrochemical techniques and instrumentation with an emphasis on their applications in analytical chemistry. Topics include potentiometry, ion selective electrodes, amperometry, cyclic voltammetry, hydrodynamic voltammetry, pulse voltammetry, and stripping voltammetry.

COURSE DESC: Laboratory work to accompany 2410.

**COURSE DESC:** The overall goal of this course is to integrate basic scientific principles across multiple disciplines with small business ownership and entrepreneurship through the practice of craft beer brewing. Through a series of lectures, students learn the science behind craft beer brewing. Hands-on lab activities, special guest lecturers, and field trips help reinforce and supplement the concepts invoked in lecture. This course exploits a general public interest in craft beer and its production to demonstrate fundamental scientific concepts using a hands-on approach. As such, this course outfits students with a wide range of key scientific concepts, coupled with basic business and entrepreneurial skills that can be broadly applied to one's career.

**COURSE DESC:** This course focuses on the chemical principles involved in small molecule drug discovery, design and development. The organic chemistry of drug design and drug action is studied in detail. Starting from strategies for finding a lead compound through optimizing target interactions and drug efficacy, to ultimately bringing the drug to market, the impact of each step on the drug design process is discussed. Drug design tools and approaches such as combinatorial chemistry, molecular modeling, structure-activity-relationships and other strategies are analyzed in detail along with selected topics in the medicinal chemistry of both classic therapeutic agents and newer therapeutic breakthroughs.

**COURSE DESC:**
- **Fundamentals of Brewing Science:** Lecture 3, 0, 1, 0
- **Physical Chemistry:** Lecture 4, 0, N, G50
- **Physical Chemistry I:** Lecture 4, 0, N, G50
- **Fundamentals of Brewing Science:** Continuation of 5530. Kinetics, Quantum theory with applications to simple systems which model the electronic structure of atoms and molecules.
- **Spectroscopic Methods in Organic Chemistry:** Lecture 4, 0, N, G50
- **Nuclear Magnetic Resonance Spectroscopy Training:** Seminar 2, 0, N, G50
- **Graduate chemistry research training:** Laboratory 2, 0, N, G50
- **Graduate chemistry research training:** Lecture 2, 0, N, G50
- **Modern Inorganic Chemistry:** Lecture 4, 0, N, G50
- **Advanced Organic Chemistry:** Lecture 4, 0, N, G50
- **Advanced Organic Synthesis: Reactions and Mechanisms:** Lecture 4, 0, N, G50
- **Medicinal Chemistry and Drug Discovery:** Lecture 4, 0, N, G50

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**
- A-F for chemical engineering students;
- B or better in CHEM 5800 or 5805 for non-chemistry students.

**Semester:** Spring 2023

**Credit Hours:**
- 1 N 0 G50 0

**Notes:**
- Students carry out research activities in the three host laboratories, and attend their respective group meetings.
- Students are introduced to proper work practices related to literature searches, lab work, lab safety, lab report writing, and presentation of data to peers and faculty. Students carry out research activities in the three host laboratories, and attend their respective group meetings.
- This course is designed for the advanced undergraduate or beginning graduate student who desires a deeper understanding of organic synthesis as initially presented in the typical undergraduate organic course.
- This course focuses on the chemical principles involved in small molecule drug discovery, design and development. The organic chemistry of drug design and drug action is studied in detail. Starting from strategies for finding a lead compound through optimizing target interactions and drug efficacy, to ultimately bringing the drug to market, the impact of each step on the drug design process is discussed. Design strategies for each critical step, including molecular modeling, structure-activity-relationships and other strategies are analyzed in detail along with selected topics in the medicinal chemistry of both classic therapeutic agents and newer therapeutic breakthroughs.

<td>GEC1: A-F REQUISITE: Survey topics, which are not included in CHEM 4870 or law enforcement technology (LET) courses, relevant to the modern crime lab. These topics will be focused on arson and explosives analysis and DNA analysis. The DNA section will survey the techniques and instrumentation used in the identification, extraction, and analysis of DNA obtained from forensic evidence with an emphasis on electrophoretic methods of analysis. Topics include the identification and extraction of blood stains, DNA analysis by restriction fragment length polymorphisms, PCR amplified length and sequence polymorphisms, STR systems, Amelogenin markers, Y-chromosome markers and mitochondrial DNA sequencing. Electrophoretic techniques and statistical interpretation of data will also be covered. Other topics may also be included.</td>

</table>

Chemistry Internship: Students perform supervised work in an approved scientific lab or industry equivalent to gain practical experience. Students are responsible for identifying and arranging internship opportunities that include a faculty advisor and an industry supervisor. Written and/or oral evaluations are administered by an internship committee.

Chemistry Teaching Practicum: This class is a mentored teaching experience for graduate student teaching assistants in the Department of Chemistry & Biochemistry.

Science Engagement Practicum: In this course, students gain practical experience in applying evidence-based strategies for effective science communication and public engagement in informal learning environments. Particular emphasis is placed on an interdisciplinary approach incorporating the arts and humanities with science topics. Practicum experience site is as arranged by the instructor or as arranged by student with prior approval from instructor.

Special Topics in Chemistry: Specific course content will vary with offering.

Research and Thesis: Specific course content will vary with offering.

Advanced Organic Chemistry I: Organic methodology and syntheses.

Physical Organic Chemistry: Application of modern concepts to structure and reactivity in organic reactions of various mechanistic classes.

Modern Heterocyclic Chemistry: Theoretical and synthetic aspects of heterocyclic chemistry.

Organometallic Chemistry: Structure and reactivity of organometallic compounds.

Natural Products Chemistry: Terpenes, steroids, alkaloids, and other natural products.

Protein Chemistry: Examination of seminal discoveries in the fields of protein and carbohydrate chemistry. Includes detailed study of the work of Nobelists like Fred Sanger, Gunter Blobel, and others.

Advanced Special Topics in Biochemistry: Seminar contents vary.

Enzymology: A study of the subjects and techniques relevant to the structure and function of enzymes. Topics include enzyme kinetics, purification, characterization, and active site chemistry. Current research directions such as the construction of catalytic RNA molecules (ribozymes) and catalytic antibodies are emphasized, along with the recent role molecular biology techniques have played in the enzymology field.

**Course Descriptions:**

- **Chemical Biology:**
  - ELIGIBLE GRADES: GEC1: A-F
  - REQUIREITE: CHEM 5902 or permission.
  - COURSE DESC: A study of the concepts and methods of applying chemical tools to study problems in cell and molecular biology. Specific topics include chemical genetics, directed evolution, diversity oriented synthesis, microarray-based protein profiling, photoaffinity labeling, and native chemical ligation. Emphasis is placed on current research objectives in chemical biology such as modulating biomolecular interactions using chemical tools, developing bioorthogonal fluorescent reporters, and applications of small molecules in developmental biology.

- **Electroanalytical Chemistry:**
  - ELIGIBLE GRADES: GEC1: A-F
  - REQUIREITE: CHEM 5860
  - COURSE DESC: Fundamentals and applications of potentiometry, conductometry, coulometry, voltammetry, amperometry, cyclic voltammetry, chronocoulometry, and spectroelectrochemistry.

- **Spectrochemical Analysis:**
  - ELIGIBLE GRADES: GEC1: A-F
  - REQUIREITE: CHEM 5310 or 5860
  - COURSE DESC: Modern instrumental methods of molecular spectroscopy including Raman, FT-IR and NMR, circular dichroism, and mass spectrometry; recent methods of atomic spectroscopy including plasma sources and X-ray methods of analysis.

- **Chemical Applications of Group Theory:**
  - ELIGIBLE GRADES: GEC1: A-F
  - REQUIREITE: CHEM 5760
  - COURSE DESC: Develops foundations for application of elementary group theory to organize or simplify problems in quantum chemistry. Applications include molecular orbitals, molecular vibrations, and ligand field environments.

- **Chemical Kinetics:**
  - ELIGIBLE GRADES: GEC1: A-F
  - REQUIREITE: CHEM 5510
  - COURSE DESC: Experimental methods of obtaining reaction rates, interpretation of rate data, and relationships between mechanism of reactions and rate equations of reactions.

- **Solid State Chemistry:**
  - ELIGIBLE GRADES: GEC2: A-F
  - REQUIREITE: CHEM 5510
  - COURSE DESC: Develops foundation of basic surface science concepts and techniques. These concepts include structure of clean and adsorbate covered surfaces, chemical bonding of adsorbates, energy transfer mechanisms on surfaces, and catalyzed surface reactions.

**COURSE DESC:**

- **Craft and Technology in the Roman World**: Examines the relationship between the development of technology and political/economic factors that affected changing attitudes and desires of the Roman people in different parts of the Roman Empire. Explores the tools and processes used for making objects, building structures, and supplying water and food to urban masses as well as the organization of labor that makes such accomplishments possible. Various types of modern analysis are discussed to show how advances in technology affect our understanding of the ancient world. Counterpoints made with Classical Greek and Hellenistic cultures since many technologies were borrowed by the Romans. Modern parallels also discussed.

- **Archaeology and Art: Contexts and Controversies**: The course focuses on the archaeological context of selected objects usually described as examples of Greek art. It examines where they were found, what significance they had in the culture that produced them, how they were excavated, how they have been conserved, and what ethical issues surround the modern conservation and acquisition of them. Each object has its own story yet also fits into a larger context. Above all, this is a course that emphasizes the importance of establishing clear methodologies and its purpose is to provide students with tools to explore the contexts of objects, ultimately on their own. What questions do they need to ask? To what types of sources can they reliably turn for information? How might they interpret the ethical arguments raised by the excavation and acquisition of some objects? The core material for the course will comprise twenty objects. Chronology will provide the organizational principle for the study of the objects. The focus of each class will be a single object; readings will discuss some aspects of its context and part of the in-class presentation will provide comparative material/objects.

- **Religious Experience**: Introduces Islam as a religious and cultural system. Topics include pre-Islamic Arabia, the Prophet Muhammad and the first Muslims, the Qur'an and shari'a, basic ritual practices, mysticism, theology and philosophy, Shi'ism, the visual and musical arts, women, modernism, fundamentalism, and Islam in the USA. Draws on historical, sociological, anthropological, and literary-critical approaches and utilizes a range of primary and secondary material to examine the development of Islamic religious practices and ideals as they interact with larger social and cultural processes. While we will be concerned to understand how practitioners of Islam interpret their beliefs and actions, we will also put ‘insider’ perspectives in a broader social and historical context. Religion is a segment of culture, and thus we undertake our inquiry into Islam in the spirit of the Quranic injunction that ‘humanity consider from what it is created’.

- **Hinduism**: Explores Hindu concepts and practices through readings, films, and slide presentations. Traces the origin and development of Hinduism from its roots in Vedic ritual and the indigenous civilizations of Mohenjo Daro and Harrapa. Introduces the Upanishads (perhaps the earliest philosophical texts), the great Hindu Epics, Mahabharata and Ramayana, the Sastras (manuals on Hindu life dating from the early centuries of the current era), the Puranas (medieval compositions telling the stories of the gods), Tantra (an esoteric form of Hinduism), the artistic traditions of Hinduism, and modern Hindu political movements. Special emphasis placed on the Gandhi’s interpretation of Hindu teachings of non-violence, Hinduism, the artistic traditions of Hinduism, and modern Hindu political movements. Graduate students write a research paper on a topic of their choosing with approval from the professor.

- **Beginning Greek I**: Introduction to reading classical Greek. Focus on Greek grammar and reading Greek texts adapted from classical originals.

- **Beginning Greek II**: Introduction to reading classical Greek, continued. Conclusion of study of elementary grammar and reading classical texts that are increasingly complex and less adapted. At completion, ready to begin reading Homer, Plato, the New Testament, or other Greek classics.

<td>What was it like to be a slave in the Roman world? No first hand account describing slavery which was written by a slave has survived. To understand what a slave's life was like we are forced to reconstruct slavery from the materials that do survive. These include: descriptions of slavery and slaves by the slave owners; literature which features characters who are slaves; archaeological remains which illustrate the conditions of slavery. An important concern will be the special demands made in the reading and interpretation of texts that are over two-thousand years old. Finally, the experience of African-American slaves in the 18th and 19th centuries, a period more richly documented than the Roman, helps us to imagine much more about the Roman institution than what we could infer from the ancient sources alone.</td>

**COURSE LISTING**

**SORTED BY College, Department/School, Prefix**

---

**A&S ECON**

**ECON 1000**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** A survey of economics class that covers both microeconomics and macroeconomics. Intended for students who seek to fulfill the Tier II Social Science requirement and do not intend to take any other economics course. Students study an overview of important economic topics, from microeconomics and macroeconomics, using online course materials and assignments.

**ECON 1030**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** Basic theory of national income analysis. Causes of unemployment and inflation. Monetary and fiscal policies of the federal government.

**ECON 1040**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** Basic theory and economic analysis of prices, markets, production, wages, interest, rent, and profits. Analysis of how the capitalist system determines what, how, and for whom to produce.

**ECON 2020**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** This course introduces students to basic economic theories and applies theory to current economic problems with emphasis on public policy implications.

**ECON 2130**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** This course introduces programming and statistics to students from different majors and teaches techniques that apply across many disciplines. No prior programming or statistics experience is necessary. The course introduces students to Python programming language to develop the ability to apply economic analysis and prediction techniques to real-world scenarios through working with real-world data sets. Topics covered include data types, tables, sequences, visualization, causality and experiments, testing hypotheses, estimation, prediction, and inference for regression.

**ECON 2150**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** This course is an in-depth exploration of novel policy issues confronting economists today. It considers cutting-edge issues in economics that are relevant to public policy. It explores divergent thought on the issue and considers strengths and weaknesses of differing policy objectives and related proposals. There is a special emphasis on the role innovation can play in addressing these issues. While topics and analysis stem from economics, the course also provides a setting for students to engage in critical thinking by identifying innovative solutions to cutting-edge problems.

**ECON 2200**  
**ELIGIBLE GRADES:**  
**COURSE DESC:** This course examines the basic principles that govern international trade and their current applications. The emphasis is on the empirical evidence of world trade patterns and trade policies of both developed and developing nations. Topics include: the principle of comparative advantage; tariffs and non-tariff trade barriers; industrial policies; World Trade Organization (WTO); regional trade agreements; multinational enterprises.

**Course Description:**

- **ECON 2510 Global and Local Food Economies:**
  - This is an introductory course on the global and local food economy. The class includes an overview of global food production and agriculture with particular focus on the developing regions of the world. Topics range from an examination of the inter-relatedness of economic growth, population growth, and environmental degradation to analyses of food security, agricultural policies, and innovations relevant to the food economy. Introductory economic theory provides the backdrop used to analyze these complex, multidisciplinary issues. The class includes a field component with visits to local farms and food distribution networks.

- **ECON 2500 Economics of Health Disparities:**
  - This course explores health disparities from an economic point of view. The term health disparities in health economics refers to differences in health across two groups of people. The course applies economic theory to analyzing public policy issues regarding differences in health outcomes. We explore why health disparities occur and how economic policy could be used (or could not be used) to correct for these disparities. Topics include social and economic determinants of health and discrimination in health care.

- **ECON 2650 Fundamental Health Economics:**
  - This course introduces students to the economic perspective on health and the provision and use of health care. Basic economic principles are introduced and applied to topics relating to health. Topics include the effect of insurance on health and innovation in the market for pharmaceuticals.

- **ECON 2700 Economics of Conflict:**
  - This course applies basic economic toolkits to study conflicts. Topics include but are not limited to economic causes and consequences of conflicts, conflict types and resource allocation decisions, economic choices in anarchic environments, economic incentives and bargaining failures.

- **ECON 2900 Economic Data Analysis with Excel and SAS:**
  - The course teaches students how to use Excel and SAS software packages to analyze economic data. Students learn how to locate real-world data from various online sources. They also learn how to use statistical software to analyze the data using basic statistical and econometric methods. Students also work on empirical projects in Excel and SAS to investigate important policy issues that face societies.

- **ECON 2970T Economics Tutorial:**
  - Tutorial on topics in microeconomics.

- **ECON 2971T Economics Tutorial:**
  - Tutorial on topics in advanced microeconomics.

- **ECON 2980T Economics Tutorial:**
  - Tutorial on topics in macroeconomics.

- **ECON 2981T Economics Tutorial:**
  - Tutorial on topics in advanced macroeconomics.

- **ECON 3000 Mathematics for Economists:**
  - Mathematical analysis is commonly used in economics. This course covers calculus and matrix algebra techniques that are used in economic literature. Students learn these techniques and how to apply them to selected problems in economics.

- **ECON 3010C Economics of Altruism:**
  - This course is an introduction into behavioral economic theory and methods as they pertain to concepts of altruism, generosity, and giving. The course will contrast economic theories that predict selfish behavior to those that attempt to explain kindness and generosity. Recent research in behavioral economics shows a plethora of surprising and often, conflicting evidence on the existence of altruism. Students will become familiar with the altruism literature and related economic experiments and games. The role of humanitarianism in society will be explored as students perform service learning projects with local non-profit organizations. Students will learn project evaluation techniques to give insight into effective philanthropy.

<td>GEC1: A-F, REQUISITE: This course presents tools and theories used by investors to identify and evaluate equities and examines in depth the relationship between investment risks and returns. It has two modules. The first module is based on financial management. It covers finance and investment decisions from the profit-maximizing firm's perspective. The second module is based on equity valuation. It covers the principles of valuation for common stock (equities) and the principles of portfolio management for equity portfolios.</td>

<td>GEC1: A-F: This course is built on the Classical and Keynesian views of the economy. It focuses on international macroeconomics and financial markets. In particular, it analyzes the benefits of international trade and examines the role of trade policies such as tariffs and quotas. The course also examines exchange rates and interest rates and how equilibrium is reached in the foreign exchange markets. It takes a closer look at the structure of international capital markets and discusses international banking and the difficulties associated with regulating international banking.</td>

<td>GEC1: A-F: This course is based on the Chartered Financial Analyst (CFA) Code of Ethics and Standards of Professional Conduct (Code and Standards) that CFA Institute members or CFA Program candidates are required to follow. High ethical standards are critical to maintaining the public's trust in financial markets and in the investment profession. This course examines the inter-connectedness of the aspirational and practical principles and provisions of the Code and Standards. It also teaches students how to apply the ethical decision-making framework according to the complex ethical requirements in relation to the investment industry.</td>

Course descriptions and eligibility notes:

Developmental Writing Skills: Introduces students to different forms of poetry and drama. Students acquire and deploy a critical vocabulary in learning to read and analyze these texts.

Fundamental English Usage Skills: Intended to assist non-native English speaking students in becoming more skilled writers in their undergraduate coursework. Students practice their ability to organize, develop, and write up their ideas; use sources in their writing without plagiarizing; revise and proofread their own writing; and become more aware of their own strengths and opportunities for development in writing. Helping students use correct grammar and vocabulary is also very important in this course.

Crossing Cultures with Text: Provides foundation for writing through attention to coherence, mechanics, syntax, and writing conventions and is taken concurrently with ENG 1510. Does not satisfy Tier I or Arts and Sciences Humanities requirements, but rather offers instructional support for students enrolled in ENG 1510.

Writing and Rhetoric I: Practice in composing and revising expository essays that are well organized, logically coherent, and effective for their purpose and audience. Topics from personal experience, nonfiction reading, and research material.

Introduction to Shakespeare in Film: Through close reading of Shakespeare's plays and through viewing films in class, students will gain an understanding of Shakespeare's artistry and ideas.

Freshman Composition: Writing and Rhetoric: For non-native English speaking undergraduate students is designed to instruct such students in higher-level writing skills. Practice in composing and revising expository essays that are well organized, logically coherent, and effective for their purpose and audience. Topics from reading, research, and academic content. Fulfills the requirements for a freshman composition course (ENG 1510). Native English speakers should take ENG 1510.

Introduction to Prose Fiction and Nonfiction: Introduces students to different forms of fiction and non-fiction prose (novels, short stories, essays, life-writing). Students acquire and deploy a critical vocabulary in learning to read and analyze these texts.

Introduction to Poetry and Drama: Introduces students to different forms of poetry and drama. Students acquire and deploy a critical vocabulary in learning to read and analyze these texts.

Critical Approaches to Popular Literature: Introduction to genres of popular literature (romance, science fiction, detective novel, etc.) as well as to relation between film and popular literature.

Honors Experience: Critical Approaches to Reading, Writing, and Playing Fantasy: NJ

Introduction to Literature and Health: Introduces students to analyzing how literary texts, including poetry, drama, fiction and non-fiction prose, and film, construct normative understandings of the human body through representations of medicine, wellness, illness, disability, and death.

COURSE DESC: Our readings, film screenings, discussions (oral and online), research and composing will be focused on relations between people and the environment, primarily but not exclusively, in our regional environment. We will explore mountaintop removal coal mining in Appalachia, the natural history of the region's forests, industrial food systems and "locavore" (agri)culture. Our approach will be "ecological" in the sense of attempting to understand our complex interrelationships with the natural and artificial systems we rely on and of which we are a part. We will take a similar approach to environmental rhetoric and use rhetorical analysis as the main means of mapping connections among informative, persuasive, and creative discourse on these topics.

A&S ENG

ENG 3290

Title: Rhetoric and Law

COURSE DESC: Rhetic and law were interdependent in Ancient Greece. This course introduces students to rhetorical concepts and appeals that remain critical to the practice of American law as they arise out of western rhetorical history. Legal concepts from other cultures will provide further context. The course will also introduce rhetorical analytical methods for understanding the textual features of law and policy through concepts such as stasis theory, audience, appeals, and common ground. Assignments might include rhetorical analyses of legal documents, presentation of legal cases, analyzing an important legal decision, analyzing the impact of particular laws on issues of race, class, gender, orientation or disability. Students will study written rhetorical and textual features of legal genres.

ENG 3300

Title: Ecological Discourses in English Studies

COURSE DESC: Explores the discourses, theories and practices of ecologically-oriented movements, genres, and intellectual areas that are influencing English Studies. Examines a range of ecological positions, including mainstream environmentalism, deep ecology, ecofeminism, and social ecology. Our method will be to discuss and practice criticism of literary and cultural texts, including rhetorical studies of ecological texts, rhetoric, and popular culture expression. Course study will employ rhetorical theories as a productive tool for identifying recurring motifs, conflicts, concepts, and material realities at stake in artistic and rhetorical expressions about the ecology and human relations within it, and how writers and film makers make strategic appeals to specific audiences. Topics may include issues of representing nature, the separation of nature and culture, relationships between place and identity, issues of development, technology, indigenous cultures, and environmental justice. Our readings will include book excerpts, environmental writing, and rhetorical, fiction, poetry, visual, and online texts.

ENG 3340

Title: Israeli Literature

COURSE DESC: Israeli Literature is a young country whose writers have inherited an old, complex history. We will study the role of memory, ethics, the diaspora, and aesthetics in Israeli literature.

ENG 3350

Title: Irish Literature

COURSE DESC: The course focuses on the rich literary tradition of Ireland. For such a small country, Ireland boasts some of the biggest names in literary history, including four Nobel Prize winners: George Bernard Shaw, W.B. Yeats, Samuel Beckett and Seamus Heaney. This class focuses on introducing students to the rich literary tradition of Ireland beginning with an examination of Irish myths and legends as well as examining texts from the Irish Literary Renaissance through the twentieth century. Irish literature is haunted by its political, linguistic and cultural history as well as the geography of Ireland itself, and therefore, this course explores the shaping influences of politics, language, culture and geography alongside the exploration of examples of Irish literature. Readings include early Irish legends and myths as well as texts from the eighteenth through the twentieth century. Some of the authors explored in this course include W.B. Yeats, Lady Gregory, Edna O'Brien and Seamus Heaney.

ENG 3370

Title: Black Literature from 1930 to the Present

COURSE DESC: Explores authors, works, genres, and topics in Black literature in the Americas up to 1930.

ENG 3380

Title: Ethnic American Literature

COURSE DESC: Focuses on ethnicity and/or race in American literature. Through reading works by writers from historically marginalized communities, students explore ways in which literary representation and self-representation reflect, construct, and challenge ethnic and national identity.

ENG 3390

Title: Black Literature from 1930 to the Present

COURSE DESC: Explores authors, works, genres, and topics in Black literature from 1930 to the present.

ENG 3400

Title: Introduction to Analysis of Moving Image

COURSE DESC: Introduction to analysis of moving image texts including film, television, and video.

ENG 3450

Title: Intercultural Adaptations: Answering the Anglo-American Literary Canon

COURSE DESC: Students read texts from the Anglo-American literary canon and examine adaptations of or "answers" to those texts created within the context of entirely different cultures, some of which were the objects of English/European cultural influence or dominance. Discussion and written assignments focus on the revision, transformation, or decentering of the primary literary works when "read" or revised by creative artists from outside of the Anglo-English cultural tradition. The culturally-diverse adaptations of canonical texts might take the form of literature, film, or any other creative artifact (such as a graphic novel); students analyze the connections between paired texts in order to identify the contradictions within their foundational assumptions and value systems and develop strategies to interpret and appreciate the creative achievements of distinct cultures.

ENG 3490

Title: History of Books and Printing

COURSE DESC: Introduction to history of the book and its place in development of Western culture from ancient world to present. Approach is primarily historical, cultural, and aesthetic.

- Politics and Literacy: Issues of Race, Class and Gender: Lecture 3, Cred Hours: 0

**Course Description:** Designed to explore political, social, historical, and educational perspectives of literacy. Students will read about how historians and theorists have defined the impact of literacy on cultures and individuals. They will read and discuss how literacy has been used as a tool for empowerment and for oppression. An important focus of the class entails examining how a student's experiences with literacy are often shaped by race, social class, and gender. The collection of readings on literacy also covers broad themes, including technologies and literacy, histories of literacy in the U.S., power, privilege, and discourse, and literacy in the workplace.

<td>How does writing work to create and shape cultures? How do cultures represent and preserve themselves through writing and other composing practices? In this course on the rhetorics of marginalized cultures, students read, analyze, and write about the cultures and rhetorical practices of marginalized groups with a focus on the culture of one or more groups historically underrepresented or misrepresented in popular and academic cultures. Writing assignments comprise the majority of the grade in this dedicated writing course.</td>

**A&S ENG HUM 2170**
**ELIGIBLE GRADES:**
**COURSE DESC:**
Explores the cultures of India, China, and Japan through literature and relevant philosophies; major texts of other Asian countries may be added or substituted as well.

**A&S ENG HUM 2900**
**ELIGIBLE GRADES:**
**COURSE DESC:**
Specific course content will vary with offering.

**A&S ENG T3 4071**
**ELIGIBLE GRADES:**
**COURSE DESC:**
What is the literacy crisis? Our environment bombards us with increasing amounts of information: images, words, text. Those who speak of a literacy crisis assert that a large portion of the United States' population is overwhelmed by rising demands made on them and handicapped by inadequate literacy skills.

This problem can be demonstrated by the poor performance of students on international tests of reading and writing, and employers' charges their workers cause accidents and decrease production because of limitations in their reading and writing skills.

To assess the validity of these claims, this course reviews the historical development of literacy: the personal and professional applications of literacy; the power of literacy to effect change within the developing world; the educational strategies employed by U.S. schools to foster literacy skills; and the performance of students and workers on reading and writing tasks. The course also addresses the tensions that complicate efforts to establish a definitive standard for writing and reading skills. Some of these tensions arise from the evolving nature of reading and writing skills and from the demands made by various activities and professions on these same skills. Beyond the tensions produced by changes within literacy itself, other changes might arise from employers' efforts to acquire the most highly skilled workers at the lowest possible wage.

Students critique the arguments for and against the existence of this crisis and suggest responses based on their views. Students also study literacy practices within their areas of study and propose solutions to literacy problems that arise within their disciplines.

**A&S ENG T3 4110**
**ELIGIBLE GRADES:**
**COURSE DESC:**
This course explores American detective fiction and film noir, a term that refers to certain "black" or darkly-lit American films of the 1940s and 1950s. It will examine classic examples of detective fiction and film noir as well as more contemporary examples of neo-noir. Although the emphasis will be on the aesthetic character of the texts under discussion, we will also investigate their historical and socio-cultural conditions of possibility as well as related issues of race and class, gender and sexuality, nation and ethnicity.

### Course Listing

**A&S GEOG**

#### GEOG 3050: Physical Meteorology
- **Title:** Physical Meteorology
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC7: CR, F

**COURSE DESC:** This course is a survey of atmospheric physics, with a focus on radiation balances, radiative transfer, cloud microphysics, and boundary layer meteorology.

**REQUISITE:** GEOG 3010 and MATH 2301 and PHYS 2051

---

#### GEOG 3150: Biogeography
- **Title:** Biogeography
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC7: CR, F

**COURSE DESC:** An examination of historical, environmental, and biotic influences that shape spatial patterns of plant and animal distributions and community structure in the contemporary landscape. The course also explores the role of disturbance as a shaper of biological communities, and students will be introduced to field, laboratory and statistical means of analyzing ecological data. The role of human activities in altering biogeographic patterns is informed by our understanding of how and why biological diversity varies over the surface of the earth.

**REQUISITE:** (BIOG 1700 or GEOG 1100 or PBIO 2090) and WARNING: not BIOS 3160

---

#### GEOG 3160: Population Geography
- **Title:** Population Geography
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** BDP
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC1: A-F

**COURSE DESC:** Survey of global population concerns emphasizing contemporary patterns of population change, fertility, international migration, and the impact of these on the environment and economic resources. Examines critiques (feminist/equity) of population change as a development problem and explores development consequences and human experiences of migration. Examines the political nature of population change by exploring multiple perspectives on population change and socio-environmental change. Teaches students to confront their own preconceived notions of fertility, migration, and consumption, and develop greater curiosity about the causes and consequences of demographic change.

**REQUISITE:** GEOG 1200 and Jr or Sr

---

#### GEOG 3200: Urban Geography
- **Title:** Urban Geography
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC7: CR, F

**COURSE DESC:** Geographical survey of the processes and forms of urban settlements. Examines urban origin, urban system, urban spatial structure, suburbanization, urban planning, (de)industrialization, inner-city decline, gentrification, entrepreneurial politics, cultural economy and globalization. This course includes significant writing and revision.

**REQUISITE:** Ohio Honors student and GEOG 3260 concurrently

---

#### GEOG 3210: Geography of Religious Space and Place
- **Title:** Geography of Religious Space and Place
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC1: A-F

**COURSE DESC:** Systematic and regional survey of religious cultural landscapes of the world in comparative perspective. Emphasis on religion as a cornerstone of culture and its manifestations in the cultural landscape. Focus on sacred space and place, pilgrimage, and holy sites in selected religious belief systems.

---

#### GEOG 3220: Honors Experience in Urban Geography
- **Title:** Honors Experience in Urban Geography
- **Component:** Ind Study
- **Cred Hours:** 0
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEOG 3260 concurrently

**COURSE DESC:** OHIO Honors Curricular Experience in Urban Geography

**REQUISITE:** CR, F

---

#### GEOG 3250: Political Geography
- **Title:** Political Geography
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC1: A-F

**COURSE DESC:** Political Geography is a critical examination of the spatial expression of geopolitics. Topics covered include formation of the state as a sovereign space, nationalism in discourse and practice in both current and historical contexts, the relationship of neoliberalism to globalization and devolution in both developed and developing-world contexts, and the linkages between global and local scale political processes, especially regarding electoral politics.

**REQUISITE:** GEOG 1200

---

#### GEOG 3260: World Economic Geography
- **Title:** World Economic Geography
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC7: CR, F

**COURSE DESC:** Geographic survey of the capitalist world economy. Examines the rise and fall of great economic powers, (under)development in the periphery, global economic restructuring, regional blocs, multinational firms and national governments.

---

#### GEOG 3270: Geographies of Social Justice
- **Title:** Geographies of Social Justice
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **Permit:** BER
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEC1: A-F

**COURSE DESC:** This class provides a geographic analysis of social relations, social identities, and social inequalities. The course examines the geographies of social justice from the perspective of distinct identity groups (including race, gender, class, sexuality, ability, and nationality). We discuss the way that place plays a role in constructing and giving meaning to these identity groups. We explore the role of social justice as it relates to various geographic themes, particularly focusing on: the constitution of public and private space; housing, homelessness, and the meaning of home; memorialization; urban structure and design; gentrification; the use of public space; mobility; geographies of fear; and resistance.

**REQUISITE:** GEOG 1200 or WSSS 1000

---

#### GEOG 3290: Honors Experience: World Economic Geography
- **Title:** Honors Experience: World Economic Geography
- **Component:** Ind Study
- **Cred Hours:** 0
- **Repeat Hours:** 0
- **Permit:** N
- **Subsidy Level:** U30
- **Elearn Options:** 0

**ELIGIBLE GRADES:** GEOG 3290 concurrent and student in the OHIO Honors program

**COURSE DESC:** OHIO Honors curricular experience in World Economic Geography.

**COURSE DESC:** This course focuses on the political, economic, and social drivers of water access in a globalized world. These factors are examined using case studies in developed and developing contexts in relation to uncertainties of climate change. Course topics include water privatization, scarcity, pollution, urbanism, indigeneity, the state, habitat, and human displacement. Social and environmental justice dimensions of these themes are explored and analyzed.

**COURSE DESC:** This course provides an introduction to research design and methodology in geography. The course emphasizes the development of a research project from its earliest stages through the identification of emerging research foci within geography's sub-fields. Students interact independently with faculty to define a research focus for the capstone project, which they undertake the semester following the completion of this course in GEOG 4800: Capstone Experience in Geography.

**COURSE DESC:** Knowing the geography of one's community, from the distribution of parks and schools to the location of healthcare and social services providers to the assessment of walkable downtowns and neighborhoods, is a hallmark of an engaged citizenry. Community Geography examines a variety of place-based challenges and opportunities that are found within and between communities through the lens of geo-spatial analysis. It engages students in real ways through documenting, evaluating, and mapping the community they live in and care about. University-community partnerships are built from the bottom up around social issues such as income inequalities, food insecurity, educational disparities, limited access to transportation and healthcare, and more.

This course offers a unique combination of collaborative mapping, spatial understanding of community issues, and interaction with and participation in the community from the bottom up, as engaged members of the Athens community. Students will be introduced to real-world problems and best practices, and encouraged to explore creative solutions. Community geography helps students better understand the spatial nature of these issues, how to evaluate both local and global forces which transform communities, and assists them with evaluating actionable solutions which promote sustainability at the local level. This course is designed to engage students with the Athens area, to build collaboration between students, residents and community groups, and to develop marketable skills and expand student awareness of community issues.

COURSE DESC: Examines the Asian region with emphasis on intra-regional economic integration through trade, investment and labor migration flows and on inter-regional relations with other parts of the world through colonialism, political engagement, and globalization. Studies issues of economic development, regional bloc, Cold War conflicts, nationalism, and urbanization in Asia. Examines and dispels stereotypes about the geographical, cultural, and economic characteristics of Asia and Asians by educating students about the many ideologies and worldviews that shape the nations and international relations of Asian countries within and beyond Asia. Prepares students to respect and have meaningful interactions with people of Asian origin. Conduct in-depth research on an Asian country of choice.

<td>Provides students a foundation for understanding and interpreting changing global and regional patterns of hunger and food security. Environmental, political, economic, and demographic dimensions of hunger and food security are examined. Social and policy interventions aimed at reducing hunger are evaluated through examination of case studies from the developing and industrialized world.</td>

<td>This course explores frameworks linking gender and the environment and examines how they have influenced the practice of development in various geographic contexts. Case studies are drawn from Africa, USA, Latin America, and Asia. Topics include gendered access to resources, health and inequality, men and masculinities, the body and the environment, non-governmental organizations, and grass root organizing. This course also includes a significant focus on effectively developing, supporting, and communicating research findings in written and oral forms.</td>

A&S GEOG GEOG 6380 Seminar in Regional Geography: Asia  Seminar 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: This seminar course critically examines both the changing geography of contemporary Asia and the history of Asian Studies as an academic discipline. Specific topics will include the geographical conception of Asia, the making of modern Asia, Cold War conflicts, economic development in contemporary Asia, and international trade, investment and migration within and beyond Asia. Particular attention will be paid to how the peoples and countries of Asia have changed geographically and how their changes have been understood in the study of Asia.

A&S GEOG GEOG 6410 Seminar in Development: Environment and Development Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: The seminar examines the myriad interactions between development processes and environmental change in the developing world. Theoretical developments in political ecology provide a foundation for examining case studies. Topics include: indigenous knowledge, environmental discourses, environmental degradation, people and protected areas, environmental governance, and environmental social movements.

A&S GEOG GEOG 6420 Seminar in Development: Theories of Development Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: Examines how different concepts and theories of (under)development have been produced, maintained and contested in different regions of the world and in different times.

A&S GEOG GEOG 6430 Seminar in Development: Gender and Development Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: Advanced topics and readings in gender and development.

A&S GEOG GEOG 6470 Seminar in Resource Management Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: Seminar contents vary.

A&S GEOG GEOG 6470 Seminar in Resource Management Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: Seminar contents vary.

A&S GEOG GEOG 6500 Seminar in Environmental Justice Research 4 8 N G40 0
ELIGIBLE GRADES: GEC2: A-F, PR
COURSE DESC: In this seminar environmental justice will be examined in both theory and praxis. Our discussions will range from contested ideas and discourses about environmental justice, to more grounded examples of political movements that seek to contest (in)justice in both urban and rural environments. Specific topics will likely include the conceptual genesis of environmental/social justice movements, distributional inequity of toxics proximity in poor/minority communities, overcoming procedural inequities of white privilege, negotiating urban amenities like forests and parks, overcoming urban food deserts through enhanced food security, the rights of nonhuman species to the city, among other topics.

### GEOL 1010 - How The Earth Works

**Course Description:** An introduction to the forces affecting our planet's surface and interior features. Topics include the origins of volcanoes, earthquakes, and mountain belts along with the ways they impact people's lives. Topics also include the roles of landslides and streams in shaping the Earth's surface, and the formation of earth materials and mineral resources. Intended for both science and nonscience majors seeking a nontechnical overview of the Earth's always changing and sometimes dramatic geology.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 2830

**Component:** Laboratory

**Credits:** 4

**Hours:** 0

**General Education:** 2NS, PNS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 1200 - The Mobile Earth

**Course Description:** An examination of the Earth's dynamic systems including continental drift, sea floor spreading, mountain building, volcanic activity, and earthquakes, and their explanation in terms of plate tectonic theory. Intended for both science and nonscience majors seeking a nontechnical overview of plate-tectonics.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2NS, PNS

**Permit:** N

**Level:** U30

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 1350 - Geology of the National Parks

**Course Description:** Survey of the geologic features of the national parks of the United States, emphasizing the history of their geologic development.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2AS, PNS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 1400 - Dinosaurs and the Mesozoic

**Course Description:** This course is an introduction to the systematics, anatomy, physiology, ecology, evolution, and extinction of dinosaurs and other Mesozoic life, as well as a review of the science of paleontology and basic Earth history during the Mesozoic including climate, geography, tectonics, mass extinctions, and other major geologic events. The course begins with an introduction to the sciences of paleontology and geology including an overview of the theories of plate tectonics and evolution, geologic time, relative and absolute age dating, and the fossil record. The history of the science of paleontology is explored as well as the different methods and techniques employed by modern paleontologists to ask and answer scientific questions about ancient life including dinosaurs. Additional topics focus on the physical, biological, and chemical conditions of the Mesozoic world and a general introduction to dinosaurs including their classification, anatomy, physiology, and behavior. The three major groups of dinosaurs, the Ornithischia, Sauropoda, and Theropoda, are discussed in detail in addition to other major components of Mesozoic ecosystems including marine reptiles, pterosaurs, mammals, insects, and plants. The course concludes with an overview of the evolution of terrestrial and marine ecosystems during the Mesozoic and the causes and effects of the end Cretaceous mass extinction.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2NS, PNS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 1700 - Metal, Stone, Energy, and Society

**Course Description:** Survey of a broad array of Earth resources with the goal of examining the impact of those resources on society. The influence of plate-tectonic processes and Earth's evolution on resource distribution are considered. The manner in which technological changes in mineral processing are changing recycling rates and are fostering closer connections between industries, the environment, and society will be explored.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Laboratory

**Credits:** 1

**Hours:** 0

**General Education:** 0

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 2020 - Introductory Geology Lab

**Course Description:** Laboratory covering mineral and rock identification, topographic and geologic map reading, and geologic time for students planning to major or minor in the geological sciences.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710 and WARNING: No credit for this course if taken after the following: GEOL 1010 or 2830

**Component:** Laboratory

**Credits:** 1

**Hours:** 0

**General Education:** 0

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 2080 - Geology of the Solar System

**Course Description:** Students can experience the thrill of geologic exploration of solid planets and moons in the solar system through the study of samples and knowledge obtained by manned and robotic spacecraft missions. Focuses on changing perceptions and advancement of knowledge with each new mission and discovery.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2NS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 2090 - Gems, Jewels, and Crystals

**Course Description:** An exploration of the Earth's most valuable minerals, gems and jewels, with close study of how, where, and why they form. Topics also include how earth scientists discover, extract, and process the crystals on their way to their ultimate destination, the jewelry store. The course culminates in a close look at the geological and contextual origins of the world's most famous and valuable crystals.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 1200 or 1300 or 1350 or 1400 or 1700 or 2080 or 2110 or 2150 or 2210 or 2310 or 2710

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2NS, PNS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

### GEOL 2110 - Introductory Oceanography

**Course Description:** Survey of physical, chemical, biological, and geological aspects of oceanography.

**Eligible Grades:** GEC1: A-F

**Prerequisite:** GEOL 2830

**Component:** Lecture

**Credits:** 3

**Hours:** 0

**General Education:** 2NS, PNS

**Permit:** N

**Level:** U10

**Subsidy:** 0

**E-Learn Options:**

**Majors Set Aside:**

<td>This course provides an introduction to principles of stratigraphy and sedimentation. Topics include the interpretation of depositional environments and their relation to plate tectonic setting. Students will engage in scientific writing to deepen their understanding of how professional writing in Geological Sciences is undertaken, strengthen their abilities to analyze, evaluate, and synthesize primary literature sources in sedimentary geology journals. Writing and editing drafts will strengthen student skills in construction of compelling and logical arguments as well as critical assessment of the written work of other scientists.</td>

<td></td>
<td></td>
<td>An introduction to the classification, distribution and characteristics of metallic and industrial ore deposits. The course emphasizes the geologic conditions and environments leading to the formation of various ores, and examines economics of ore deposits, mining methods, hazards, and remediation techniques. The tectonic settings of ore deposits are considered within the context of the plate tectonic paradigm, and we will discuss ore deposits with respect to geologic time and changes to the Earth system. Laboratory assignments focus on identifying common economic minerals, exploration practices, and ore characterization techniques.</td>

<td>COURSE DESC:</td>
<td></td>
<td></td>
<td>Radiogenic and stable nuclides are a critical tool for dating materials, understanding planetary differentiation, and tracing provenance and process in all spheres of the earth. This course examines the theory and application of isotope geochemistry to a broad range of geologic topics. Radiometric isotope techniques (dating and geochemical tracing) are introduced through a discussion of atoms, isotopes, and radioactive decay systems, followed by systematic discussion of a number of specific systems (e.g., uranium-lead). Applications of stable isotopes to investigating volcanism, and meteoric-hydrothermal systems are discussed. Concepts of mass-balance, mixing theory, and open and closed systems are introduced.</td>

<td>Radiogenic and stable nuclides are a critical tool for dating materials, understanding planetary differentiation, and tracing provenance and process in all spheres of the earth. This course examines the theory and application of isotope geochemistry to a broad range of geologic topics. Radiometric isotope techniques (dating and geochemical tracing) are introduced through a discussion of isotopes, isotopes, and radioactive decay systems, followed by systematic discussion of a number of specific systems (e.g., uranium-lead). Applications of stable isotopes to investigating volcanism, and meteoric-hydrothermal systems are discussed. Concepts of mass-balance, mixing theory, and open and closed systems are introduced.</td>

<td>In second year geology, you are starting to build a breadth of knowledge in the geological sciences. More importantly, you are starting to learn the material which will make you a practicing geoscientist. All subjects are related and interconnected; you must now build on the knowledge learn in previous courses. An introduction to the basic concepts of rock-forming processes in igneous and metamorphic environments. This includes concepts related to identification, classification and origin of volcanic rocks, igneous intrusions, and metamorphic rocks associated with plate collisions, burial and intrusions. More importantly, you will gain an overview and understanding of the fundamental geologic processes that form these rocks. While what we (mostly) see at the Earth's surface is sedimentary units; the mantle and major portions of the Earth's crust have been formed and modified by igneous and metamorphic activity. Therefore, an understanding of these activities is essential as a starting point for understanding the Earth. Also, the processes that formed these rocks are exciting and fun to study!</td>

<td>GEOL 5500 Paleopedology</td>
<td>GEOL: A-F</td>
<td>REQUISITE:</td>
<td>This course provides an introduction to principles of stratigraphy and sedimentation. Topics include the interpretation of depositional environments and their relation to plate tectonic setting. Students will engage in scientific writing to deepen their understanding of how professional writing in Geological Sciences is undertaken, strengthen their abilities to analyze, evaluate, and synthesize primary literature sources in sedimentary geology journals. Writing and editing drafts will strengthen student skills in construction of compelling and logical arguments as well as critical assessment of the written work of other scientists.</td>

**Description**

- **A&S GEOL 5960 Field Geology**: Laboratory component. Eligible grades: A-F. REQUISITE: GEOL 5960. COURSE DESC: Introduction to and application of geologic field mapping techniques. Satisfies the departmental field camp requirement.

- **A&S GEOL 6530 Sequence Stratigraphy**: Lecture component. Eligible grades: A-F. REQUISITE: GEOL 6530. COURSE DESC: Principles governing the use of relative changes in sea level to interpret sedimentary sequences with an emphasis on field and core examples.

- **A&S GEOL 6650 Basin Tectonics and Hydrocarbon Exploration**: Laboratory component. Eligible grades: A-F, CR, PR. COURSE DESC: Overview of sedimentary and structural basins in passive, convergent, and transform settings with application to their potential for hydrocarbon accumulation.

- **A&S GEOL 6900 Special Topics in Geological Sciences**: Lecture component. Eligible grades: A-F, CR, PR. COURSE DESC: Specific course content will vary with offering.

- **A&S GEOL 6901 Geologic Studies**: Seminar component. Eligible grades: A-F, CR. COURSE DESC: Individual or small group independent study arranged with faculty members.

- **A&S GEOL 6902 Advanced Seminar in Geology**: Seminar component. Eligible grades: CR. COURSE DESC: Permission required. Intensive study of selected geologic topics by special groups. (Several seminars may be held concurrently.)

- **A&S GEOL 6921 Colloquium in Geology**: Seminar component. Eligible grades: CR. COURSE DESC: Advanced seminar on current research in geology.

- **A&S GEOL 6940 Research in Geology**: Research component. Eligible grades: CR. COURSE DESC: Individual research projects arranged with faculty members.

- **A&S GEOL T3 4090 Geologic Resources**: Lecture component. Eligible grades: A-F. COURSE DESC: Examination of metals, industrial minerals, gems, and energy resources and their role in shaping the history of civilization, its current issues, and its future challenges.

A&S HIST 1330 | ELIGIBLE GRADES: COURSE DESC: 
Introduction to World History Since 1750 
This course explores global issues related to the interaction of European empires with venerable and powerful civilizations in the Americas, Africa, and Asia in the early modern and modern world (1700s-present), the prevalence of wars throughout modern history, the evolution of the modern state, the rise of capitalism and its challengers, the importance of technology and innovation, the effects on ecology and the environment, and the significance of national, cultural, and religious identity for the peoples of the modern world. HIST 1330 challenges students to think about their lives in a wider world, to consider where the United States fits in a global narrative, and to ponder how interpretations of the past shape their understanding of the present and their expectations for the future.

A&S HIST 2000 | ELIGIBLE GRADES: COURSE DESC: 
Survey of United States History, 1600-1877 
A survey of American history from colonial origins through Reconstruction. The major political, social, cultural, and economic developments are discussed.

A&S HIST 2010 | ELIGIBLE GRADES: COURSE DESC: 
Survey of United States History, 1865-present 
A survey of American history from Reconstruction to the present. The major political, social, cultural, and economic developments are discussed.

A&S HIST 2200 | ELIGIBLE GRADES: COURSE DESC: 
A Global Military History from Antiquity to the Present 
This is a survey on war in world history from ancient kingdoms and empires to present-day conflicts. These themes are central: war and the state; war and society; war and culture; war and trade; and conflict resolution. In the twenty-first century, the definition of "war" has broadened from our modern understanding as an armed conflict between states. Today, war is better defined as an armed conflict between organized groups, which includes states, terrorist groups, militias and warlords, and crime syndicates. "World," too, has taken on broader meaning: it is not simply a geographic term, but connotes connections between states and people. Studying war in history allows students to consider how societies have responded to change under duress, how technology has spread across the globe, how empires were built and how they collapsed, how ancient empires became modern states, and how modern technology emerged from the rubble of wars.

A&S HIST 2220 | ELIGIBLE GRADES: COURSE DESC: 
Europe in the Twentieth Century 
This course presents a survey of the history of Europe (including Great Britain and Russia) in the "short twentieth century," from the start of World War I in 1914 to the end of the Cold War in 1989, as well as a survey of developments since 1989, with an emphasis on ideologies, state and national transformations, and political and social change.

A&S HIST 2270 | ELIGIBLE GRADES: COURSE DESC: 
The Middle East and the World 
This course offers students an opportunity to critically explore the historical connections between Middle East history and other parts of the world. Structured as a chronological survey spanning the period of 600-1990 AD, the course covers events and processes related to developments in politics, economics, social organization, religion, science and technology, and culture. It highlights key moments in which dynamics in the Middle East shaped other parts of the world. Equally important are those moments in which developments in other parts of the world helped shape the region. The survey draws on connections between the Middle East and multiple other regions: Africa, South Asia, Southeast Asia, Europe, and the Americas.

<td>This course traces the ideas and practices that created the capitalist system in early modern Europe, saw its eventual rise to dominance by the late nineteenth century, and in so doing generated and continues to generate considerable criticism and a vibrant debate. This course both engages contemporary concerns and provides an historical account of the ideas and patterns of practice that shaped western and world economic culture from the sixteenth to the end of the twentieth century. It challenges students to understand capitalism less as a hegemonic, clearly-defined force, but rather as a multi-faceted concept that has, throughout history and in our own time, informed the beliefs and actions of kings, philosophers, economists, producers, consumers, and citizens.</td>

<td>This course is an introduction to intercultural influences, conflicts, and stereotypes in medieval and contemporary societies. It includes the critical interpretation of historical texts and modern films dealing with major topics in medieval history, especially race and ethnicity, foreignness, religion, masculinity, sexuality, economic and social class, and violence. Students examine and discuss a wide variety of modern perceptions of the Middle Ages, including those of extremist groups, and look for better ways popular media might use the medieval past to communicate with different cultures about topics of historical and contemporary relevance.</td>

<td>This course explores life in medieval Europe through the interpretation of contemporary sources, including saints' lives, chronicles written by conquerors and the conquered, first-hand murder accounts, and how-to guides composed for lovers, monks, knights, and architects. Lectures will also introduce evidence from archaeology and the visual arts to complement the literary record. This is a thematic course rather than a chronological survey. General topics include The World Around Them, Rules of Love, Culture of Violence, and Visions of the End.</td>

<td>This course examines the history of food and drink production, consumption, and exchange in the pre-modern West. Religious practices and beliefs, social structures, infrastructure, climate and seasons in the pre-modern world all shaped foodways. The control of food and food practices, methods of preservation, the ritual and medical significance of products like alcohol and spice are explored, as well as the impact of colonialism (for example, the Romans in Britain) and exploration (the Portuguese in Goa).</td>

General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Student in the OHIO Honors program
OHIO Honors curricular experience in History of American Radicalism

A&S HIST
HIST 3144 US Social History in the 20th century
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
Social life, work, and gender and family roles in 20th-century America. Special focus on everyday life in the 1920s and during the Depression, experiences and responses to World War II and the Vietnam War, families and mass culture of the 1950s and 60s, and the development of environmentalism.

A&S HIST
HIST 3146 American Ideas, 20th Century
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
A study of big ideas in the American past. Moves chronologically from the Progressive Era up to the present while examining themes that include liberalism, conservatism, democracy, secularization, the role of religion in American life, theology, the threat of totalitarianism abroad, the rise of postmodernism and relativism, and other key issues. Ideas will be explored in historical context and related to key events and developments.

A&S HIST
HIST 3147 History of Now: America, 1989-Present
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
Lecture 3 0 N U30 0
This course examines contemporary American history (politics, culture, and ideas) from the end of the Cold War to the election of Donald Trump and then analyzes current events through the lens of historical inquiry.

A&S HIST
HIST 3148 Cultural Rebels in the Modern U.S.
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
Examines the history of cultural rebellion (or radicalism) in the 20th-century. Surveys rebellion from Greenwich Village at the turn of the century to the punk rock explosion of the 1970s and '80s. Larger questions include: How do people rebel in a culture that often seems to embrace rebellion? How do cultural rebels communicate their anger to the wider society? What impact does cultural rebellion make in American history?

A&S HIST
HIST 3150 Survey of African American History
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
Survey of African American History from the middle passage to the present. The development of African society in the American diaspora. Different societies under slavery. The abolitionist movement with the role of Black abolitionists. The Civil War and its impact on slavery. Examines the interaction between the African American community and the larger society. Reconstruction and its impact; the wars of the 20th-century and their continuing effects on African Americans, migration to the North, the Civil Rights movement, and the problems of equality.

A&S HIST
HIST 3162 History of U.S. Involvement in World Affairs, 1898-1945
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
Examines United States involvement in world affairs from the Spanish-American War through the end of World War II, with particular emphasis on the emergence of the United States as a superpower. In addition to analyzing U.S. policies, it will also give attention to nongovernmental organizations and actors.

A&S HIST
HIST 3164 History of U.S. Involvement in World Affairs, 1945-Present
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
Examines United States involvement in the Cold War and the post-Cold War World, with emphasis on the causes and consequences of major wars and the use of major instruments of foreign policy, including foreign aid, covert intervention, and public diplomacy. In addition to analyzing U.S. government policies, it will also give attention to nongovernmental organizations and actors.

A&S HIST
HIST 3170 Survey of Ohio History
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
A survey of Ohio history, from the time of the Mound builders, through the conflicts between the British and French empires, to the creation of Ohio as a state. Much of the focus is on the events of the 19th-century, as Ohio was a central battleground in conflicts over slavery and abolition, and labor and industrial groups. Also examines the process of deindustrialization in the later half of the 20th-century.

A&S HIST
HIST 3200 Women in American History Before 1877
Component: Lecture
Cred Hours: 3
Repeat Hours: 0
General Education: N
Perm: U30
Subsidy Level: 0
Level: Majors
Set Aside: eLearn Options: Majors

ELIGIBLE GRADES: Soph or Jr or Sr
GEC1: A-F
American women's history from the colonial era through Reconstruction. Topics include the traditional life of Native American women, witchcraft in colonial New England, women in the American Revolution, African-American women in slavery, early American childbirth customs, the early women's rights crusade, women on the trans-Mississippi frontier, and women in the Civil War.

<td>Examines a pivotal decade, which has helped to shape the politics and culture of contemporary America. The focus will be on the presidency of Ronald Reagan and the growth of conservatism as well as liberal criticism of Reagan's social, economic, and international policies. Special attention will be given to the decade's &quot;culture wars&quot; as well as the ways that new technology and cable networks such as CNN and MTV created new celebrities such as Madonna and helped blur the lines between entertainment and politics. The course also examines the end of the Cold War and its effects on the U.S. world role.</td>

<td>Beginning in the third century, the mighty Roman Empire began its slow but inevitable decline and fall, brought to a decisive end by the barbarian invasions of the late fourth and fifth century, epitomized by the sack of Rome by Goths in 410 and Vandals in 455, and terminated with the deposition of the last western emperor in 476. That is one vision of the period sometimes called Late Antiquity. The other vision is the transformation of classical culture, closely related to the emergence of Christianity, and diverse political and social changes that would live on long after the imperial political order disappeared in the west. This course will take account of both these visions, with a strong preference for continuity over decline. Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.</td>

<td>Middle East history from the rise of Islam to the contemporary period, with particular attention to changing practices and discourses regarding women, gender, and sexuality. A key topic of concern is the changing Islamic legal interpretations on seclusion, veiling, marriage, divorce, inheritance, and abortion. Also important will be the experience of free and enslaved women of ruling families and elite households. The course will conclude with the changing nature of gender identities, practices, and roles in the 19th-century transformations, colonial rule, nationalist and labor movements, literary genres, authoritarian state formation, various modes of economic development, political Islam, occupation, and war.</td>

<td>This course provides an exploration of the history of mass politics in the modern Middle East. It takes as its central concern the emergence of popular politics and mass mobilizations in the 19th century and subsequent attempts to organize and manage them. Topics include late 19th-century workers and peasant movements, early 20th-century constitutional revolutions, the introduction of electoral politics, the formation of labor unions, suffragist movements, political parties, and various struggles and strategies to shape state policies, take control of states, or contain the threat posed by rival movements. The course considers both secular and religiously-inspired movements, as well as those across the right and left. No prior historical or regional knowledge needed.</td>

<td>COURSE DESC: Present-day Chinese political, intellectual, and cultural leaders frequently claim that China has the longest continuous history of any nation in the world. Implicit in this statement is the argument that an appreciation of the deep Chinese past is necessary for any considered understanding of contemporary China. This course provides a narrative of that past by tracing the history of pre-dynastic and dynastic China from antiquity to the early modern era. The continuities and discontinuities between different historical periods are emphasized. The course concludes with a re-evaluation of what the Chinese past reveals about the Chinese present.</td>

<td>What is life, and where did it come from? This course presents a historical survey of how people have attempted to answer that question since 1800, by situating the revolutionary impact of Victorian British naturalist Charles Darwin and the theory of evolution in its age. Beginning with key moments in the development of evolutionary theory, the course then explores its reception in Britain, Europe, and Asia. Emphasis is on the social and historical context of ideas as well as controversies and religious disputes, the relationship between ideas and the public especially through popular media, and the various uses of evolutionary ideas in wider arguments about humanity and society. It concludes with a consideration of how historical debates on evolution resonate with debates in the present.</td>

<td>Explores the social, cultural, political, and economic roles of women in Europe from the 15th- through the 18th- centuries. Students will examine women as monarchs, nobles and peasants; as actresses, musicians, and playwrights; as mothers, wives, and daughters; as Christians, Jews, and Muslims; as scientists and scholars; and as witches, prostitutes, and criminals. Key issues will include women's political power and participation in politics; sexuality and the body; women's spiritual and religious roles; and women's interactions with men. The Early Modern period sets the stage for a changing history of women in Europe, and the class will thus underline the ways in which women's roles evolved and changed over the course of early modern Europe.</td>

HIST 5390 Women in African History

A&S HIST

ELIGIBLE GRADES: GEC2: A-F

COURSE DESC: Will examine the variety of women's experiences and contributions to African history. Using examples from across the continent and different chronological periods, topics to be

PR

historical or regional knowledge needed.

ELIGIBLE GRADES: GEC2: A-F

Lecture 4 0 N G50 0

HIST 5372 Protest, Rebellion, and Revolution in the Modern Middle East

A&S HIST

ELIGIBLE GRADES: GEC1: A-F

COURSE DESC: This course provides an exploration of the history of mass politics in the modern Middle East. It takes as its central concern the emergence of popular politics and mass mobilizations in

PR

Readings and lectures will explore important aspects of political, intellectual, religious, and social change. Discussions and written assignments will depend on the interpretation of primary sources, including a wide variety of literary and material evidence. The course is a bridge between the courses on the Roman Empire and Barbarian West, but students are not expected to have taken either course.

ELIGIBLE GRADES: GEC2: A-F

Lecture 4 0 N G50 0

HIST 5390 Women in African History

A&S HIST

ELIGIBLE GRADES: GEC2: A-F

COURSE DESC: Will examine the variety of women's social, economic, and political roles and opportunities and changes over time and place; women's labor, including slavery; and debates concerning economic production vs. biological reproduction, the gendered division of labor, the control of women, and women's exploitation of women.

<td>This course examines the relationship between the United States and China by tracing its history from the eighteenth century to the present. An exploration of the political, diplomatic, cultural, and economic history of the complex and consequential interactions between the two countries is balanced with a consideration of the impact of US-China ties on the lives of ordinary individuals.</td>

<td>Historical introduction to Roman law, interpretation of legal sources, and especially the role of law in Roman society and culture. Chronological focus is on the Empire through the age of Justinian. After a survey of the origins of Roman law, lectures and readings use legal sources to look in two directions: downwards to the way law affected social life; upwards to how politics and governance affected law. Attention will be given throughout to how the nature of different types of legal evidence affect our interpretation of the purpose and effectiveness of law. Specific topics of focus will include the bearing of law on marriage and family life, slavery and freedom, surveillance, and religion.</td>

<td></td>
<td>Beginning with the end of the western Roman Empire in 476, this course surveys major legal systems emerging around the Mediterranean and western Europe over the next 500 years. The legacy of imperial Roman law affected all these systems, whose own legacies would endure for centuries. Featured in the survey are the reforms of Justinian and the Corpus Iuris Civilis, early Frankish law, the Visigothic Code, the formation of Islamic jurisprudence, Carolingian legal reforms, and Anglo-Saxon law before the Norman Conquest. Focal topics allow comparison between different legal systems and the societies they affected, e.g. sources of legal authority (human and divine, oral and written); status and rights of women; slavery and minority groups; vengeance and restitution. Students analyze these topics through case studies, based on primary sources in translation.</td>

<td>This course examines the formation of Germanic societies in the wake of the Roman Empire's collapse in western Europe. We begin by surveying major transformations in political and legal institutions, economy and trade, and religious conversion. Our focus then shifts in turn to Franks in modern France and Germany, Saxons in Britain, and Scandinavians (better known as the Vikings) at home and abroad. Along with lectures and a textbook, we read primary sources including contemporary chronicles, saints' lives, and sagas.</td>

<td>This course is an interdisciplinary course on the political, religious, and topographical history of the city and its environs over a long time span. The focus is on periods of dramatic change, both political and physical, including the time around the reigns of the first Roman emperor, Augustus, and the first Christian emperor, Constantine; medieval and Renaissance Rome under papal Rome; and the Fascist excavation and recasting of the ancient city. This course is taught as part of a Spring Break study abroad program.</td>

<td>Will consider key themes in the history of postwar Europe. We will explore Europe's division and ethnic cleansing in 1945, efforts of pan-European State Socialist and Atlanticist integration, Europe's imperial/colonial struggles and cultural-religious transformations. We will also consider the impact of the collapse of the Soviet Empire in Europe and the emergence of newly independent states in former Soviet spaces as well as the wars of Yugoslav disintegration and European integration. We will conclude with a survey of current issues in European political, cultural, and social life.</td>

<td>This course situates Germany in European history, and focuses on the political, social, and cultural history of Germany since 1945. After a brief overview of the Nazi regime, World War II, and the Holocaust, the course explores the Allied occupation of Germany, denazification, the Cold War division into West and East Germany, and each state's political, social, and diplomatic development. Themes explored include ideological developments, gender relations, generational change, labor migration, and the public memory of the Nazi past. West and East Germany are also explored within the context of the Western and Soviet Blocs in the Cold War. The course concludes with the revolutions of 1989, German reunification, and political and social developments from 1990 to the present</td>

<td>Explores sexuality, deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with &quot;real&quot; crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in process of criminalization in European history, 1200-1800. Traces long-term changes in the definition, incidence and prosecution of particular crimes to changes in economy, social structure, government, religion and culture.</td>

<td>Focuses on the Balkans from the beginnings of the Ottoman Empire's collapse to the present. We will examine the political, military, social and cultural history of the Balkans paying special attention to how the region's people and states responded to the challenges of both World Wars, their brief interwar independence, their post-Second World War absorption into the United States and Soviet blocs. We will conclude by examining the collapse of Communism, the region's post-1989 transformation, and the sources and impact of Yugoslavia's collapse and division as well as the efforts of other countries in the Balkans to take part in European integration.</td>

<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Studies ethnic cleansing as a central issue in European history - including Europe's colonies. Ethnic cleansing (for much of the 20th century termed &quot;population transfer&quot; or &quot;expulsion&quot;) was a policy initiated by numerous great and minor powers from the beginning to the end of the 20th century and provides important perspective on the development of human rights law and state and nation building (or empire breaking) throughout this time. Also considers how the legacy of ethnic cleansing lives on in international relations, politics, the arts, and the popular attitudes and culture of the victims and perpetrators of ethnic cleansing, and their relations toward one another and in the broader international community.</td>

<td></td>
<td>Surveys English history from the Wars of the Roses until the death of Queen Elizabeth I in 1603. During this period, England went from a country ravaged by internal war and depression to one characterized at home by peace, law and order, a rising prosperity, artistic and intellectual excellence, and abroad by war as its people and power spread beyond the shores of the British Isles. Major themes to be considered include the establishment of legal and social order in the wake of the Wars of the Roses; the Tudor revolution in government; the Henrician and Protestant Reformations and their effects on English political, social, and cultural life; the economic disaster of the mid sixteenth century; overseas exploration; the flowering of English culture and the arts; war with Spain; relations with Scotland and Ireland; and the ways in which England was governed.</td>

### Art and History: 1950s and 1960s

- **Title:** Art and History: 1950s and 1960s
- **Component:** Lecture
- **Cred Hours:** 3
- **Repeat Hours:** 0
- **General Education:** N
- **Perm:** U30
- **Subsidy Level:**
- **eLearn Options:**
- **Majors Set Aside:** 0

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** Completion of Tier II Humanities and Fine Arts and Sr only

An interdisciplinary examination of the years from the late 1940s to late 1960s that includes examinations of art (from Abstract Expressionism to Pop), film (from Film Noir to the influence of the counterculture), literature (from neo-realism to postmodern), and intellectual life (social criticism). Students will examine key documents and learn how to interpret them by placing them in historical context. They will write a synthetic paper on a key topic covered in the class.

**Course Description:**

- **TELT Teaching Practicum:** This course provides students with supervised opportunities to develop teaching materials and to assist with online instruction for teacher training for international faculty. Students apply practices related to language teaching methods, materials design, and computer assisted language learning. They are also responsible for creating instructional materials and environments used in the practicum. Students have opportunities to focus on a variety of teaching methods and English language skills, including writing for academic purposes, English as a medium of instruction (EMI), pronunciation, and other foci as appropriate.

- **Research Experience in Linguistics:** In this research practicum, students work with faculty on the professor's research projects. By collaborating on the implementation of a research design, and the evaluation and presentation of the results, students have the opportunity to reflect on how this research capstone connects with everything they have studied in linguistics.

- **Directed Research in Linguistics:** Working under the direction of a faculty member, students will undertake their own research.

- **Special Studies in Linguistics:** Independent study of particular area of interest in linguistics.

- **Grammar in Language Learning and Teaching:** An online self-paced introduction to grammar.

- **Distributed Learning Courseware - Basics:** First course in a sequence designed to provide training in developing instructional courseware. Investigation into language teaching related to use of media, focusing on media integration and portability. Video, audio, and multimedia, including audio and video recording, editing, integration into web pages, animations, and other means of distribution, including synchronous and asynchronous audio, video-conferencing, streaming, and experimentation with audio and video related portable devices.

- **Distributed Learning Courseware - Interactive Design:** Second course in a sequence designed to provide training in developing instructional courseware. Investigation into language teaching related to interactive technologies, targeting each of the various language skills: listening, speaking, reading, writing, and grammar. Each of these skills will be addressed through use of CMC, such as weblogs, chat, virtual audio boards, textual discussion boards, as well as web-based materials, course management systems, video-conferencing, telephony, portable devices, and other related technologies as appropriate.

- **Forensic Linguistics:** This course is an overview of the field of Forensic Linguistics, or linguistic science applied in legal settings. The class covers various topics including the language of police and suspects, language crimes, and linguistics as evidence in speaker/author identification.

- **Introduction to Linguistics:** Technical introduction to linguistics, devices of language description, and methods of linguistic analysis.

- **Technology Enhanced Language Teaching I:** This course explores key terms and concepts related to computer-assisted language learning, a range of technology-assisted language learning tools, and practical considerations of how to use technology for teaching regarding various language skills.

- **Technology Enhanced Language Teaching II:** TELT II is a project-based course that emphasizes instructional design and user experience approaches to the development of online/hybrid courses and educational products/platforms that focus on student/user engagement, creativity, digital citizenship and digital age learning experiences from linguistics/applied linguistics perspectives.

</table>

**Course Descriptions:**
- **Introduction to Phonetics**: Introduces the key concepts of Semantics and Pragmatics, explores their interface, and examines their application to second language teaching.
- **Introduction to Phonology and Morphology**: Introductory course in analysis of sound systems of natural languages.
- **Syntactic Description of English**: Focuses on the prominent structural patterns observed in various phrases and sentences in English. The approach is descriptive rather than explanatory. The students learn how to analyze syntactic patterns of English objectively and how to express them in grammatical terminology.
- **Grammar and Syntax**: This course familiarizes students with philosophical foundations and theoretical argumentation of Chomskyan generative grammar known as the Principles and Parameters Approach with some reference to its later development called the Minimalist Program. The approach is explanatory as well as descriptive. Students learn how to develop theoretical hypotheses to account for syntactic phenomena and how to improve the accounts by continuous testing and revision of the hypotheses. They are also introduced to seminal research papers written on first and second language acquisition in the theoretical framework of Chomsky's syntax.
- **Language Learning**: This course provides an introduction to some of the major theories, hypotheses, principles, and areas of empirical inquiry traditionally and currently being investigated in the field of second language acquisition (SLA) research. This course also provides a background regarding first language acquisition, but the primary focus is on second language acquisition. The course aims to develop student awareness of how SLA theories apply to second language learning situations and teaching practices.
- **Second Language Acquisition Research and Theory**: Research and theories of second language acquisition.
- **Introduction to Psycholinguistics**: Study of linguistic behavior and psychological mechanisms responsible for it.
- **Methods and Materials in TEFL**: Second language teaching theory and methodology, with emphasis on teaching English as foreign language and language materials and course design.
- **Introduction to English for Specific Purposes**: English for Specific Purposes (ESP) refers to the branch of language teaching and research in which course content and teaching approaches are derived from an analysis of language use in a specific context. In contrast to general purposes language courses, in which purpose is broadly defined, ESP courses are designed to prepare learners with the specific language requirements they need in order to participate appropriately in particular academic, occupational, and professional communities. This course surveys the literature that has contributed to the growth of the field of ESP and examines the key theories, principles, and ideas that form the basis of current approaches to ESP. Included in the course are more practical questions of needs analysis, curriculum design, materials development, and assessment.
- **Assessing Language Abilities: Proseminar in TEFL Testing**: Advanced research in special problems in testing English as a second or foreign language.
- **Historical Linguistics**: Study of genealogical and typological classification of languages, methods of historical analysis, and change in language systems.

### A&S LING LING 6610 Second Language Listening and Speaking

**Component:** Lecture  
**Cred Hours:** 4  
**Repeat Hours:** 0  
**General Education:** N  
**Perm:** G40  

This course introduces students to the theoretical understanding of the nature of second language listening and the evidence-based principles underlying the development of effective and engaging pedagogical materials for the teaching of second language listening and speaking in ESL/EFL settings.

### A&S LING LING 6710 Grammar in Use

**Component:** Lecture  
**Cred Hours:** 4  
**Repeat Hours:** 0  
**General Education:** N  
**Perm:** G40  

This course allows students to develop their own understanding of English grammar as well as explore and practice techniques to help non-native English speakers (NNEs) develop their own grammar. This includes the form, meaning, and use of several of the major grammatical structures NNEs commonly study as well as best practices within teaching. Students of this class gain experience with explaining, teaching, coaching, and assessing various grammatical structures in addition to gaining insight into current theories in second language instruction. The role of World Englishes in grammar education and communicative competence is explored as well.

### A&S LING LING 6850 An Introduction to the Teaching of Second Language Reading and Writing

**Component:** Lecture  
**Cred Hours:** 4  
**Repeat Hours:** 0  
**General Education:** N  
**Perm:** G40  

This course introduces learners to Swahili vocabulary and grammar. These are used as the foundation for promoting the four skills of reading, writing, listening and speaking. Emphasis will be on reading tasks and lab work. Specific course content will vary with offering.

### A&S LING LING 6900 Special Topics in Linguistics

**Component:** Lecture  
**Cred Hours:** 1 to 15  
**Repeat Hours:** 999  
**General Education:** N  
**Perm:** G40  

Specific course content will vary with offering.

### A&S LING LING 6950 Linguistics Graduate Capstone: Culminating Experience Professional Portfolio Seminar

**Component:** Seminar  
**Cred Hours:** 1  
**Repeat Hours:** 0  
**General Education:** N  
**Perm:** G40  

As a culminating experience, this course provides students with the opportunity to reflect on and synthesize the knowledge and skills they have obtained throughout the graduate program in a way both meaningful and relevant to their professional goals. Students develop an electronic portfolio consisting of various documents and materials and learn strategies for effective presentations of their professional and scholarly expertise. Flexibility in the format is available depending on the student's degree goals.

### A&S LING SWAH 1110 Elementary Swahili I

**Component:** Lecture  
**Cred Hours:** 4  
**Repeat Hours:** 0  
**General Education:** 2CP  
**Perm:** N  
**Subsidy Level:** U10  

This is the second course of two-semester first-year sequence. A continuation of 1110 covering the different types of nouns in Swahili. By now, students will have covered all the noun classes and will begin to see their relevance to various aspects of Swahili grammar. It will become clear that once you know the class of noun in question, the grammar can easily be derived from a consistent pattern. Learners will also broaden their vocabulary and they will be able to engage in more complex dialogues. Although some dialogues will be tailored to accomplish grammatical ends, also do dialogues for the sake of it in order to promote confidence in oral communication. Learners are encouraged to pay attention to the way the sample dialogues are structured and try to model their dialogues along similar lines. Learners are encouraged to test your skills to the limit without focusing too much on grammatical mistakes. The best language learners are the adventurous people who are willing to test anything they have learned, even when they do not do it correctly. In addition, listening tasks and lab work will be assigned to ensure that students are increasing their knowledge of Swahili. Some time will be set aside to do pronunciation drills to ensure that learners get their pronunciation right. To promote reading skills, the instructor will introduce some basic Swahili booklets to be used as class readers. Attempts will also be made to invite classroom guests who will speak in Swahili in order to give learners a chance to listen to accents other than their instructor's. A lot of the classroom exercises will involve conversation with a colleague. Attempts will be made to ensure that students speak with different people in each speaking task. Finally, updating of portfolio will continue. Material from new topics must be integrated into the students' portfolio in a creative way.
**Intermediate Swahili**

EC1: A-F  
REQUISITE: SWAH 3110

First course of two-semester intermediate-level sequence. Although this course will rely on the basic knowledge learned in the previous year, it is designed to take the learner deeper into Swahili structure and grammar as well as deepen their understanding and appreciation of Swahili culture. The reading passages will be longer, the written compositions longer, and the concepts more abstract. Promoting communicative competence is the main goal of this course. Students will be expected to develop their abilities in debating and expressing abstract ideas and concepts. Students will also begin working on group or individual projects that demonstrate their understanding of East African cultural issues. Students will also be encouraged to make the connections or draw comparisons between East African and American culture. In addition, students will be expected to try to integrate their majors with what they are learning in class.

**Intermediate Swahili II**

EC1: A-F  
REQUISITE: SWAH 2110

Continuation of 2110. Second course of two-semester intermediate-level sequence. Although this course will rely on the knowledge gained in the fall semester, it is designed to take the learner deeper into Swahili structure and grammar as well as provide a deeper understanding of Swahili and East African culture in general. The reading passages will be longer, the written compositions longer and more abstract. Students will be expected to develop their abilities in debating and expressing abstract ideas and concepts. A lot of emphasis will be placed on communicative skills and comprehension of Swahili material both written and oral.

**Special Topics in Swahili**

EC1: A-F  
REQUISITE: SWAH 2120

Specific course content will vary with offering.

**Advanced Swahili I**

EC1: A-F  
REQUISITE: SWAH 2120

The first of a two-semester series course of advanced Swahili. Intended for students who have completed two years of Swahili or equivalent. Focuses on discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. In addition, learners are exposed to various elements of Swahili culture through authentic texts. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructors. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes practical application of Swahili in the learner’s field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

**Advanced Swahili II**

EC1: A-F  
REQUISITE: SWAH 3110

The second of a two-semester series of advanced Swahili. Intended for students who have completed two years of Swahili or equivalent. The class focuses on discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructor. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes practical application of Swahili in the learner’s field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

**Special Studies in Swahili**

EC1: A-F  
REQUISITE: Permission required

Intended for students who have completed Advanced Swahili and would like to expand their knowledge of a specific topic or area in the language. There might be circumstances where student who have only had two years of Swahili would be allowed to enroll in the course. Students with a previous background in Swahili are also eligible to enroll in this course. The student who wishes to enroll in this course must come up with a topic, plan, and goals. Students work on their own and only meet with the instructor once a week.

**Elementary Swahili I**

EC1: A-F  
REQUISITE: CR

This course introduces learners to Swahili vocabulary and grammar. These are used as the foundation for promoting the four skills of reading, writing, listening and speaking. Emphasis will be on promoting the learners’ ability to express themselves, describe their daily experiences and engage in basic conversations. Although East African texts (reading passages, music and poems) will be used to promote learners’ understanding and appreciation of Swahili language and culture, non East African texts in Swahili might be sparingly used to achieve certain objectives. While the main focus of the course will be on enriching the students understanding of African culture through the learning of Swahili, students are expected to relate the Swahili culture with their everyday experiences. Learners will be involved in a semester long portfolio project comprised of biographical information about their everyday activities, or activities of other people, whether actual or fictional with an intention of applying all aspects of the materials covered in class. Specific information on this will be provided in the syllabus.

**Course Descriptions:**

**SWAH 5320 Intermediate Swahili I**

Study of spoken and written Swahili. The course focuses on discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. In addition, learners are exposed to various elements of Swahili culture through authentic texts. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructor. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes on practical application of Swahili in the learner's field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

**SWAH 5330 Advanced Swahili II**

SWAH 5330 is the second of a two-quarter series course of advanced Swahili. It is intended for students who have completed SWAH 5320 or its equivalent. The class focuses on discourse Swahili and rhetorical devices as used in East Africa by Swahili speakers. In addition, learners are exposed to various elements of Swahili culture through authentic texts. Little attention is paid to grammar, but some aspects of grammar may be taught if the students identify problematic areas they would like to review with their instructor. Students study Swahili literary texts from East Africa and are able to engage in discussion on complex issues and topics. The background on Swahili culture is handled through the eyes of various authors as well as contemporary sources such as newspapers, movies and audio clips. In addition, different registers of Swahili are introduced with an aim of empowering students to be functional in a variety of communicative contexts. The course also emphasizes on practical application of Swahili in the learner's field of study. To accomplish this, vocabulary and terminologies of various disciplines are also introduced. At this level, students should begin using Swahili for academic purposes. In other words, they should be able to read literary texts (novellas, dramas, poetry and short stories), listen to Swahili news on the radio, make presentations in Swahili as well as write factual and fictional essays.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:** 3 hours in (ANTH or LING or PETE or REC or SASM) and Sr only

In this course, we will explore the interface of language and culture. Language is a symbolic system through which we communicate our experience of the world to others. Culture is a set of beliefs and actions through which we, in concert with others in a community of practice, enact a common understanding of our experiences of the world as they are now, as we understand them to have been in the past, and how we imagine them to be in the future. The context of culture that this course uses to illustrate the connection between language and culture is that of sport. Sport is a community of practice in which language is used to report on sporting events, express opinions, and express support for a team through chants, etc. We are interested in how language is used in the specific culture of sport and how it expresses both individual, group and national identity. By the end of this course, students will be better able to understand how culture is expressed through language.
### MATH D003 Elementary Algebra

**Component:** Lecture 2, 0 M
**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** Math placement level DV and WARNING: (no credit for this course if taken after any other MATH course including developmental MATH courses) and (not ND9955 or ND9956 College Credit Plus)
**COURSE DESC:** Developmental course for students who need preparation for Intermediate Algebra and covers review of Pre-Algebra concepts including whole numbers, integers, fractions, decimals, ratio and proportion, percentages, linear equations, exponents, simplifying and evaluating linear and quadratic polynomials, and other related topics. Warning: Does not meet any graduation requirements.
**PERM:** N
**CRED:** 0
**HOURS:** 0M
**LEVEL:** V00
**SET ASIDE:** 0

### MATH D004 Intermediate Algebra with PreAlgebra

**Component:** Lecture 5, 0 M
**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** Math Placement Level DV and WARNING: (No credit for this course if the following is taken (keeps credit for the following course, as defined by department): MATH course above D004) and (not ND9955 or ND9956 College Credit Plus)
**COURSE DESC:** Developmental course in algebra for students in need of preparation for math placement level PL1. Review of arithmetic operations with whole numbers, integers, fractions, and decimal numbers. Operations and equations with rational expressions, equations of a line, introduction to functions, introduction to systems of linear equations in two and three variables, absolute-value equations and inequalities, rational exponents, operations and equations with radicals, introduction to complex numbers, quadratic equations and various application problems on these topics. Same as Math D005, but with more review of basic pre-algebra material. No credit for this course if taken after any higher level MATH course.
**PERM:** N
**CRED:** 0
**HOURS:** 0M
**LEVEL:** V00
**SET ASIDE:** 0

### MATH D005 Intermediate Algebra

**Component:** Lecture 4, 0 M
**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** Math placement level DV and WARNING: no credit for this course if taken after any other MATH course and not ND9955 or ND9956 (not College Credit Plus)
**COURSE DESC:** Developmental course in algebra for students in need of preparation for math placement level PL1. Operations and equations with rational expressions, equations of a line, introduction to functions, introduction to systems of linear equations in two and three variables, absolute-value equations and inequalities, rational exponents, operations and equations with radicals, introduction to complex numbers, quadratic equations and various application problems on these topics. No credit for this course if taken after D004 or any higher level MATH course.
**PERM:** N
**CRED:** 0
**HOURS:** 0M
**LEVEL:** V00
**SET ASIDE:** 0

### MATH D300 Peer-Led Team Learning Laboratory for Pre-Calculus

**Component:** Laboratory 1, 0 M
**ELIGIBLE GRADES:** GEC6: CR, PR, F
**REQUISITE:** MATH 1300 concurrent
**COURSE DESC:** Small groups of students concurrently enrolled in MATH 1300 Pre-Calculus meet in weekly workshops with a peer mentor. Together, they work on problem sets, reading, and team-based learning projects to master the material in MATH 1300 and the mathematical reasoning it requires.
**PERM:** N
**CRED:** 0
**HOURS:** 0M
**LEVEL:** V00
**SET ASIDE:** 0

### MATH D301 Peer-Led Team Learning Laboratory for Calculus I

**Component:** Laboratory 1, 0 M
**ELIGIBLE GRADES:** GEC6: CR, PR, F
**REQUISITE:** MATH 2301 concurrent
**COURSE DESC:** Small groups of students concurrently enrolled in MATH 2301 meet in weekly workshops with a peer mentor. Together, they work on problem sets, reading, and team-based learning projects to master the material in MATH 263A and the mathematical reasoning it requires.
**PERM:** N
**CRED:** 0
**HOURS:** 0M
**LEVEL:** V00
**SET ASIDE:** 0

### MATH 1060 Quantitative Reasoning

**Component:** Lecture 3, 0 1M; FQR
**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** ((C or better in MATH D004 or MATH D005) or (Math Placement Level 1 or higher) or (Math Placement DV plus MATH 1060L co-requisite)) and (Warning: No credit if Math 1250 or any higher have been completed. Cannot be used for College of Arts and Science's Natural Sciences Area Requirement.)
**COURSE DESC:** This course develops critical thinking and problem solving skills in a variety of mathematical and quantitative contexts. The course focuses on framing real-life problems mathematically and quantitatively and then using logical and quantitative techniques, such as linear and exponential growth modeling and statistical literacy, to make predictions and decisions and to solve problems. Not recommended for students with majors in STEM areas. No credit if Math 1250 or any higher have been completed. Cannot be used for the College of Arts and Science's Natural Sciences Area Requirement.
**PERM:** N
**CRED:** 0
**HOURS:** 10

### MATH 1060L Support for Quantitative Reasoning

**Component:** Laboratory 1, 0 M
**ELIGIBLE GRADES:** GEC6: CR, PR, F
**REQUISITE:** MATH 1060 concurrent
**COURSE DESC:** The course is a co-requisite course for MATH 1060 Quantitative Reasoning for students who need extra support. It is taken concurrently with MATH 1060 and provides just-in-time support/ review of concepts and skills needed to successfully complete MATH 1060. This course develops skills to support student engagement, critical thinking, and problem solving in a variety of mathematical and quantitative contexts. Additionally, the course develops organizational skills, spreadsheet skills, word-processing skills, a growth mindset, self-efficacy, and means to overcome various forms of anxiety. Not recommended for students with majors in STEM areas. No credit if MATH 1250 or any higher have been completed. Cannot be used for College of Arts and Science's Natural Science Distribution Requirement.
**PERM:** N
**CRED:** 0
**HOURS:** 10

### MATH 1090 Consumer Mathematics

**Component:** Lecture 3, 0 1M
**ELIGIBLE GRADES:** GEC1: A-F
**REQUISITE:** C or better in MATH D005 or MATH 102 or MATH D004 or Math Placement Level 1 or higher and WARNING: No credit for this course if taken after MATH 1250 or higher
**COURSE DESC:** Applications of elementary mathematics to day-to-day problems. Special emphasis on consumer topics such as compound interest, mortgages, and installment buying. Scientific calculator required. Does not apply to arts and sciences requirements. No credit for this course if taken after MATH 1250 or higher level MATH course.

<td>COURSE DESC: Elementary Topics in Mathematics I and II develop mathematical topics usually taught in grades preK-5 to a depth required for future elementary and middle grades educators (and related fields) to establish professional expertise. The courses are taught through an inquiry approach that focuses on problem solving and discussion. Key themes of Elementary Topics in Mathematics include 1) explaining and justifying standard and nonstandard algorithms for basic arithmetic operations on whole numbers, rational numbers, and integers that are learned in grades preK-5; 2) students' construction and critique of their own ideas and others' ideas; and 3) using manipulatives to represent and justify algorithms. Topics include counting and cardinality, the development of the base-10 number system, properties of and operations on natural, whole, signed, rational, and irrational numbers; and number theory. Satisfies Tier I requirement for elementary education majors only. Does not apply to Arts &amp; Sciences Natural Science requirements.</td>

<td>COURSE DESC: This is a continuation of MATH 1101. Elementary Topics in Mathematics I and II develop mathematical topics usually taught in grades preK-5 to a depth required for future elementary and middle grades educators (and related fields) to establish professional expertise. The courses are taught through an inquiry approach that focuses on problem solving and discussion. Key themes include 1) explaining and justifying standard and nonstandard algorithms for basic arithmetic operations learned in grades preK-5; 2) students' construction and critique of their own ideas and others' ideas; and 3) using manipulatives to represent and justify algorithms. This emphasis on the standard algorithms for basic operations taught in K-8 mathematics and their comparison to children's invented algorithms allows students to engage with the cultural aspects of mathematics and see how our approach to computation and teaching mathematics reflects our greater access to technology and our evolving values of broader society. The mathematical content is focused on topics of fundamental importance for understanding, reasoning about, interpreting, and constructing arguments with quantitative data. The specific topics include ratios and proportional reasoning, algebraic reasoning, functional and non-linear relationships, and measurement. Properties of two-dimensional and three-dimensional geometric objects are explored including area, congruence, similarity, symmetry and translations. Foundational ideas of probability and statistics are addressed including data displays, measure of central tendency, comparing populations and samples, experimental and theoretical probability, and relationships in bivariate data. Does not apply to Arts &amp; Sciences Natural Science requirements.</td>

<td>An axiomatic approach to Euclidean geometry. A core batch of theorems of Euclidean geometry are proven, and interesting geometric problems are solved using the axioms and theorems. Additional concepts and techniques -- such as similarity, transformations, coordinate systems, vectors, matrix representations of transformations, complex numbers, and symmetry -- are introduced as ways of simplifying the proofs of theorems or the solutions of geometric problems. Hyperbolic geometry is introduced from an axiomatic standpoint, primarily to illustrate the independence of the Parallel Postulate. Computers are used to produce dynamic drawings to illustrate theorems and problems.</td>

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 6231

This course surveys various approaches to the structure theory of convolutional codes. They are considered as vector spaces over fields of Laurent expansions, as modules over rings of polynomials and as graph codes. All necessary algebraic background beyond linear algebra is presented in the class, including concepts related to modules over principal ideal domains and ideas regarding trellises and other relevant types of graphs. The course also addresses topics on algebraic coding theory over ring alphabets.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5302 or 5700

Abstract measure and integration, Lebesgue measure on real line; Lp-spaces; Fubini and Radon-Nikodym theorems; differentiation theory.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 6301

Continuation of Analysis I.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5302 or 5310

A graduate course in complex analysis focused on classical results for analytic and harmonic functions. Many of the techniques explained in the course, e.g. integrals along paths and the residue theorem, are useful in applications. Topics will include: Analytic and harmonic functions, Cauchy's theorem and Cauchy's integral formula, classification of singularities, and entire functions.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 6301 and (MATH 5330 or 6302)

An introduction to the basic results of functional analysis in the setting of Banach and Hilbert spaces. Key topics include the weak and weak* topologies, distributions, and an introduction to the Spectral Theorem. Theorems covered include the Hahn-Banach theorem, the Principle of Uniform Boundedness, the Closed Graph theorem, and the Open Mapping Theorem.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 6301

A rigorous, proof based course on ordinary differential equations and systems.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5400 and (MATH 5302 or 5330)

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: (MATH 5302 or 5330) and 5400 and 5410

An advanced course in dynamical systems with an emphasis on canonical examples and mathematical theory.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 6411

Advanced functional analytic methods in partial differential equations

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5302 and 5400

A basic course in calculus of variations and optimal control of systems governed by differential equations.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5400 or 5470

An advanced course in dynamical systems with an emphasis on canonical examples and mathematical theory.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5510 and 5302

Different types of convergence, consistency, sufficiency and completeness of estimators, theory of hypotheses testing, asymptotic theory.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5510

Simple linear and multiple regression models, one-sample and one-factor analysis of variance, analysis of residuals, generalized linear models, analysis of deviance as a generalization of the analysis of variance.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: MATH 5510

Randomization, blocking, Latin squares, balanced incomplete block designs, factorial experiments, confounding and fractional replication, components of variance, orthogonal polynomials, response surface methods.

<td>COURSE DESC:</td>
<td>This course offers an introduction to German cinema from its beginnings to the present. Through discussion of key films, students gain an understanding of the historical development of German cinema and its relation to relevant historical, political, and cultural contexts and related artistic movements. Students develop their German language proficiency through assigned readings, participation in class discussion, and completion of writing assignments, many of which entail revisions. Students acquire skills in the analysis of cinematic form. Proceeding chronologically, the course is structured around representative films, screened outside of class. Class time is devoted to lectures and class discussion.</td>

<td></td>
<td>A study of a controversial and resonant creation of Western literature: the first of Dante Alighieri's tripart Divine Comedy, The Inferno. Dante's medieval masterpiece relates his epic journey through the afterlife, spanning the entire cosmos. Dante's multiple-leveled Hell is located in the center of the earth and peopled with demons, his political enemies and contemporaries. Students &quot;pass through&quot; the afterlife, participating in it, thus fulfilling the poet's original intent in writing his blockbuster poem. They wrestle with timeless questions about culture, right and wrong behavior, the nature of evil, the possibility for spiritual improvement, and the experience of true happiness. The turbulent world of Dante's medieval Florence has surprising parallels with our own time, including runaway inflation, personal and political accountability, the breakdown of family values, and self-indulgence.</td>

German Literature in English
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: 2HL
- **Perm**: N
- **Subsidy Level**: U30
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Survey of masterpieces of German literature, presented in English. No knowledge of German necessary.

Russian Literature in English
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: 2HL
- **Perm**: N
- **Subsidy Level**: U30
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Selected literary works from Russia (or former Soviet Union) in English translation. Topic varies. No knowledge of Russian necessary.

Caribbean Literature in English
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: 2HL
- **Perm**: N
- **Subsidy Level**: U30
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Study the literature of the Caribbean in English translation. No knowledge of foreign languages required.

Elementary Italian I
- **Component**: Lecture
- **Cred Hours**: 4
- **Repeat Hours**: 0
- **General Education**: 2CP
- **Perm**: N
- **Subsidy Level**: U10
- **eLearn Options**: CCE
- **Majors Set Aside**: 0

WARNING: No credit for this course if taken after the following: ITAL 1120 or ITAL 2000 or 3000 level course

Beginning course of first-year sequence.

Elementary Italian II
- **Component**: Lecture
- **Cred Hours**: 4
- **Repeat Hours**: 0
- **General Education**: 2CP
- **Perm**: N
- **Subsidy Level**: U10
- **eLearn Options**: CCE
- **Majors Set Aside**: 0

C- or better in ITAL 1110 and WARNING: No credit for this course if taken after the following: ITAL at 2000 or 3000 level

Second course of two semester first-year sequence.

Intermediate Italian I
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: 2CP
- **Perm**: N
- **Subsidy Level**: U30
- **eLearn Options**: CCE
- **Majors Set Aside**: 0

C- or better in ITAL 1120 and WARNING: No credit for this course if taken after the following: ITAL 2120 or course in ITAL at 3000 level

First course of intermediate-level sequence.

Intermediate Italian II
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: 2CP
- **Perm**: N
- **Subsidy Level**: U30
- **eLearn Options**: CCE
- **Majors Set Aside**: 0

C- or better in ITAL 2110 and WARNING: No credit for this course if taken after the following: ITAL course at 3000 level

Second course of intermediate-level sequence.

Special Topics in Italian
- **Component**: Lecture
- **Cred Hours**: 1 to 15
- **Repeat Hours**: 999
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: 0
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Specific course content will vary with offering.

Independent Study in Italian
- **Component**: Ind Study
- **Cred Hours**: 1 to 2
- **Repeat Hours**: 6
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: 0
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Reading and discussion of assigned materials (books, periodicals, films, tapes) on specific topics involving Italian language. Does not count toward major or minor. Does not satisfy language requirement.

Advanced Conversation and Composition I
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: 0
- **eLearn Options**: 0
- **Majors Set Aside**: 0

First course of advanced level sequence.

Advanced Conversation and Composition II
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: 0
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Second course of advanced level sequence.

Italian Civilization and Culture
- **Component**: Lecture
- **Cred Hours**: 3
- **Repeat Hours**: 0
- **General Education**: N
- **Perm**: U30
- **Subsidy Level**: 0
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Study of Italian culture and civilization topics.

Internship in Italian
- **Component**: Internship
- **Cred Hours**: 1 to 4
- **Repeat Hours**: 8
- **General Education**: BLD
- **Perm**: I
- **Subsidy Level**: U30
- **eLearn Options**: 0
- **Majors Set Aside**: 0

Practice using the language in a work environment. Does not count for major.
Special Topics in Italian (ITAL 4900)
- Component: Lecture
- Credits: 1 to 15
- Hours: 999
- General Education: N
- Permission: U30

Italian for Graduate Reading Requirement I (ITAL 5110)
- Component: Lecture
- Credits: 1 to 4
- Hours: 8
- General Education: N
- Permission: G40

Italian for Graduate Reading Requirement II (ITAL 5120)
- Component: Lecture
- Credits: 1 to 4
- Hours: 8
- General Education: N
- Permission: G40

Italian for Graduate Reading Requirement III (ITAL 5210)
- Component: Lecture
- Credits: 1 to 3
- Hours: 8
- General Education: N
- Permission: G40

Italian for Graduate Reading Requirement IV (ITAL 5220)
- Component: Lecture
- Credits: 1 to 3
- Hours: 8
- General Education: N
- Permission: G40

Italian for Graduate Reading Requirement V (ITAL 5310)
- Component: Lecture
- Credits: 1 to 3
- Hours: 3
- General Education: N
- Permission: G40

Italian for Graduate Reading Requirement VI (ITAL 5320)
- Component: Lecture
- Credits: 1 to 3
- Hours: 6
- General Education: N
- Permission: G40

Special Topics in Italian (ITAL 5900)
- Component: Lecture
- Credits: 1 to 15
- Hours: 999
- General Education: N
- Permission: G40

Graduate Study in Italy (ITAL 5940)
- Component: Research
- Credits: 1 to 4
- Hours: 8
- General Education: N
- Permission: G40

French Gastronomy: An Introduction to the History and Development of French Gastronomy (ML 2300)
- Component: Lecture
- Credits: 3
- Hours: 0
- Subsidy: 2CP
- Permission: U30

<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Pragmatics is a field of linguistics which investigates the interpretation of meaning in contexts. It examines and theorizes about how speakers use language to communicate in social interactions. After a general introduction to pragmatics, students explore relevant basic concepts, delve into current theories in the field. These include pragmatic theories on implicatures (the implied or suggested meaning), speech acts, principles of cooperation, politeness, and pragmatic variation. Next, conversations in Spanish are analyzed to connect theory to practice. The goal is to offer students an overview of current pragmatic theory with a focus on Spanish, to teach them methods of analyzing and observing pragmatics in everyday Spanish conversations, and to apply the pragmatics of Spanish to improve their own Spanish conversation skills. Students develop proficiency in reading and summarizing scientific articles in pragmatics, and are thereby prepared for advanced studies in Hispanic Linguistics.</td>

<td>COURSE DESC:</td>
<td>This course examines literary and cinematic products in Spain from 1939-1975 in their socio-historical context. Students explore how Spanish cinematic and literary production, both within and outside of Spain, reflected the realities of Spanish society during the Franco dictatorship. Students read plays, short stories, essays, and novels in addition to viewing various films and arrive at an understanding of the relationship between history, culture, and artistic production during these years.</td>

**COURSES DESC:**
- **Foundations in English CORE Skills:**
  12 contact-hour core component of a full-time (20 hours/week) course in English as a second language for students at the beginning level whose ultimate aim is academic study. Core Skills class focuses on basic grammar and communication skills. Writing sometimes included. Focus is on American English for effective communication both inside and outside the classroom.

- **Foundations in English Listening/Speaking:**
  This course is one component of full-time study of English as a second language for students at the beginning level whose ultimate aim is academic study. Four hours of classroom instruction are designed to provide students with instruction and practice in basic listening and speaking for everyday communication.

- **Foundations in Reading and Writing:**
  This course is one component of full-time study of English as a second language for students at the beginning level whose ultimate aim is academic study. Four hours of classroom instruction are designed to provide students with instruction and practice in reading, vocabulary development, and sentence-level writing. If necessary, students will be introduced to the conventions of English language writing, including the alphabet, spelling, capitalization, and sentence-level punctuation. Students build their reading skills by learning reading strategies and practicing with readings and exercises from the textbook. Students build their vocabulary by learning new words and learning to determine the meaning of words from context clues and word analysis. Students work to develop sentence-level writing skills.

- **Elementary Core Skills:**
  12 contact-hour core component of a full-time (20 hours/week) course in English as a second language for students at the elementary level whose ultimate aim is academic study. Core Skills class focuses on basic grammar and communication skills. Writing sometimes included. Focus is on American English for effective communication both inside and outside the classroom.

- **Elementary Listening/Speaking:**
  This course is one component of full-time study of English as a second language for students at the elementary level whose ultimate aim is academic study. Four hours of classroom instruction are designed to provide students with instruction and practice in basic listening and speaking for everyday communication.

<td>COURSE DESC: Twelve contact-hour core component of a full-time (20 hours/week) course in English as a second language for students aiming at academic study. Students at this level do not take academic courses. Paragraph level writing competency is developed as students expand grammatical knowledge and explore the process of writing. Instruction and practice includes an introduction to the three-paragraph essay. Students begin to incorporate understanding of appropriate grammatical structures, vocabulary, and organization into the development of short essays. Common rhetorical modes are introduced and practiced. Develop editing skills.</td>

<td>COURSE DESC:</td>
<td>The goal of this course is to improve students' oral communication skills in English for success in the U.S. academic community. Students explore aspects of language, the U.S. academic culture, and strategies for effective discussion and presentation. Students will have the opportunity to learn and practice the individual sounds, rhythm, intonation, and stress associated with spontaneous and planned spoken English. Students learn about the expectations for oral communication, including group discussion, teamwork, and formal presentations in the context of the American university classroom. Students learn about and practice appropriate ways to agree, disagree, interrupt, critique, offer alternative perspectives or suggestions and facilitate both group discussions and team decision-making.</td>

### Course Descriptions

- **Issues Through Film**: This is a developmental course. Permission required or Paper TOEFL: 500 minimum. IBT: 62 minimum. Composition Exam: 45 minimum.
- **Reading and Writing about Literature**: This is a developmental course. Permission required or TOEFL: 500 and Comp:4.
- **Exploring American Culture**: Permission required.
- **Special Studies in American English**: Course is developmental.
- **Academic Combined Skills 1**: This is a developmental course. Permission required or Paper TOEFL: 500 minimum. IBT: 62 minimum. Composition Exam: 45 minimum.
- **Academic Combined Skills 2**: Permission required.
- **Academic Combined Skills 3**: Course is developmental. Paper TOEFL: 525 minimum. IBT: 71 minimum. Composition Exam: 51 minimum.

### Eligible Grades

- GEC7: CR, F, NC

### Requisite

- This is a developmental course.
- Permission required.
- IBT: 71 minimum
- Paper TOEFL: 500 minimum
- Composition Exam: 45 minimum

### Notes

- Students in this part-time level five session per week course (ordinarily four contact hours plus two hours viewing the assigned film) will work to improve speaking, reading, and writing as well as listening skills through a study of some of the traditional themes of USA cinema, and of movies that exemplify those themes.
- Students will read classic and/or contemporary authentic works of fiction or non-fiction. They will analyze and discuss the texts, using various strategies to improve their comprehension and vocabulary, learn about the socio-cultural contexts in which the books are set, and write several papers, both academic and creative, on the content and themes of the books. The books may vary from semester to semester. While particular topics and contexts will be examined depending on the books used, the books will serve as a basis to discuss cross-cultural themes and topics as well.
- In this course, students read extended academic reading passages about selected traditional American mainstream values (individual freedom, self-reliance, equality of opportunity, competition, material wealth and hard work), including their development and influence on various aspects of American life. They analyze and discuss the texts, applying reading strategies to improve their comprehension. Students further expand their knowledge of the course content through a variety of activities, including guided observation tasks, speaking with Americans, in-class discussion, small-group projects, and watching movies.
- Academic Combined Skills 1 is a bridge level integrated course in English as a Second Language for students who are also permitted to take one academic course. Eight hours of classroom instruction (two hours a day, four days a week) are designed to provide students with high-level language skills development, with a specific focus on academic reading and writing skills, as well as listening and speaking will also be addressed.
- Academic Combined Skills 2 is a bridge level integrated course in English as a Second Language for students who are also permitted to take one or two academic courses simultaneously. Eight hours of classroom instruction (two hours a day, four days a week) are designed to provide students with high-level language skills development, with a specific focus on academic reading and writing skills, as well as academic performance and study skills.

**REQUISITE:**

**COURSE DESC:** This course is one component of full-time study of English as a second language for students at the intermediate level whose ultimate aim is academic study. Four hours of classroom instruction are designed to provide students with instruction and practice in reading, vocabulary development, and sentence-level writing. If necessary, students will be introduced to the conventions of English language writing, including the alphabet, spelling, capitalization, and sentence-level punctuation. Students build their reading skills by learning reading strategies and practicing with readings and exercises from the textbook. Students build their vocabulary by learning new words and learning to determine the meaning of words from context clues and word analysis. Students work to develop sentence-level writing skills.

**ELIGIBLE GRADES:** GEC7: CR, F, NC

**Lecture 4** 24 N G10 0

Twelve contact-hour core component of a full-time (20 hours/week) course in English as a second language for students aiming at academic study. Students at this level do not take academic courses. Paragraph level writing competency is developed as students expand grammatical knowledge and explore the process of writing. Instruction and practice includes an introduction to the three-paragraph essay. Students begin to incorporate understanding of appropriate grammatical structures, vocabulary, and organization into the development of short essays. Common rhetorical modes are introduced and practiced. Students begin to develop editing skills.

A&S OPIE 5714D
**Adventures in Mythology**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Students in this course will work on improving their academic reading, vocabulary development, writing, listening, and speaking skills through the study of mythology and its role in cultural construction.

A&S OPIE 5715D
**Oral Communication in University Classes**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
The goal of this course is to improve students' oral communication skills in English for success in the U.S. academic community. Students explore aspects of language, the U.S. academic culture, and strategies for effective discussion and presentation. Students will have the opportunity to learn and practice the individual sounds, rhythm, intonation, and stress associated with spontaneous and planned spoken English. Students learn about the expectations for oral communication, including group discussion, teamwork and formal presentations in the context of the American university classroom. Students learn about and practice appropriate ways to agree, disagree, interrupt, critique, offer alternative perspectives or suggestions and facilitate both group discussions and team decision-making.

A&S OPIE 5802D
**Reading for Academic Purposes**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Reading for Academic Purposes is an academic reading course for English as a Second Language students who are also permitted to take one academic course. Using authentic material, this course provides students with both an understanding of the reading process and practice in developing academic reading strategies and skills. The course is designed to improve reading comprehension, academic vocabulary, and awareness of text structures and rhetorical patterns.

A&S OPIE 5803D
**Advanced Grammar**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Through this OPIE part-time level elective class, students will increase their ability to use a variety of grammatical patterns and structures to express original ideas, to edit written text, and to paraphrase, summarize, and synthesize information and ideas in order to perform extended academic tasks orally and in writing.

A&S OPIE 5804D
**Grammar for Writing**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Through this OPIE part-time level elective class, students will increase their ability to use a variety of grammatical patterns and structures to express original ideas, to edit written text, and to paraphrase, summarize, and synthesize information and ideas in order to perform extended academic tasks orally and in writing.

A&S OPIE 5805D
**Composition**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Through this OPIE part-time level elective class, students will increase their ability to write about familiar or prepared topics (up to three typed pages) with some precision and sufficient support. They will increase their ability to synthesize, summarize, and paraphrase information from articles and academic texts. Students will perform various academic writing tasks such as writing persuasive essays and integrating paraphrased or summarized sources into a text. They will increase their ability to use a variety of grammatical patterns and structures to express original ideas in writing.

A&S OPIE 5806D
**Techniques for Gathering and Evaluating Research Information and for Research Writing**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
This OPIE bridge-level elective class on Information Gathering (Techniques for Gathering and Evaluating Research Information) and Writing aims at providing international students with basic and, in some cases, advanced level information gathering and evaluating skills while at the same time improving their English language ability, particularly in the areas of reading, listening/speaking, and classroom interaction skills. Students will incorporate source material into their academic writing and will practice citing their sources.

A&S OPIE 5807D
**Academic English Test Taking Strategies**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Academic English Test Taking Strategies is a part-time level integrated course in English as a Second Language for students who are also permitted to take one or two academic courses simultaneously. Four hours of classroom instruction (one hour a day, four days a week) are designed to provide students with high-level language skills development, with a specific focus on academic test-taking strategies for successful academic performance. Language skills are integrated and will include reading, listening, speaking, writing and grammar. Test-taking practice and strategy development will focus on open and closed-book exams, timed objective exams (including standardized tests), as well as both short-answer and full-essay exam formats.

A&S OPIE 5808D
**Issues Through Film**

**ELIGIBLE GRADES:**
GEC7: CR, F, NC

**COURSE DESC:**
Students in this part-time level five session per week course (ordinarily four contact hours plus two hours viewing the assigned film) will work to improve speaking, reading, and writing as well as listening skills through a study of some of the traditional themes of USA cinema, and of movies that exemplify those themes.

June 1, 2023  
Page 237 of 1005

This one-week long course is an intensive laboratory experience in soil science, biogeochemistry, and microbial ecology. Students will become familiar with techniques and instrumentation to estimate soil quality and the composition and function of soil microorganisms from a field experiment.

PBIO 4945H Thesis

COURSE DESC: Preparation of an honors thesis based on original research.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Previous research experience (PBIO 4940), 18 credit hours in PBIO courses, and Sr status
Repeat 2 to 4 4 3; CAP N U30 0

COURSE DESC: An independent research experience that includes a formal written presentation of the work. All work is done under the supervision of a faculty member.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: PBIO 4940 and 30 hours cumulative in BIOS, CHEM, GEOG, GEOL, & PBIO and Sr and permission required
Repeat 1 to 4 20 BLD I U30 0

COURSE DESC: Students perform original research in a research laboratory or field site in collaboration with a faculty advisor.

ELIGIBLE GRADES: GEC4: A-F
CR, PR
Repeat 1 to 4 20 BLD N U30 0

COURSE DESC: Capstone short-term field course for natural science majors, integrating principles across organismal plant biology and related disciplines, in a selected (often international) region.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: PBIO 1150 and 2090 and Sr
Repeat 3 to 6 0 3; CAP N U30 0

COURSE DESC: Capstone short-term field course for natural science majors, integrating principles across organismal plant biology and related disciplines, in a selected (often international) region.

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: PBIO 1150 and 2090 and Sr
Repeat 3 to 6 0 3; CAP N U30 0

COURSE DESC: Specific course content will vary with offering.

ELIGIBLE GRADES: GEC4: A-F
CR, PR
Repeat 1 to 15 999 N U30 0

COURSE DESC: Provides students with credit for work experience in various applied fields of botany and environmental biology. Overseen by a faculty member and evaluated by the on-the-job supervisor. Report culminates experience.

ELIGIBLE GRADES: GEC4: A-F
CR, PR
Repeat 1 to 15 15 BLD I U30 0

COURSE DESC: Undergraduate Research

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 12 Hours in PBIO and (Jr or Sr)
Repeat 1 to 4 20 BLD N U30 0

COURSE DESC: Undergraduate Research/Written Presentation

ELIGIBLE GRADES: GEC1: A-F
REQUISITE: PBIO 4940 and 30 hours cumulative in BIOS, CHEM, GEOG, GEOL & PBIO and Sr and permission required
Repeat 3 to 6 0 3; CAP I U30 0

COURSE DESC: An independent research experience that includes a formal written presentation of the work. All work is done under the supervision of a faculty member.

ELIGIBLE GRADES: GEC1: A-F
RePEAT 2 to 4 4 3; CAP N U30 0

COURSE DESC: Preparation of an honors thesis based on original research.

ELIGIBLE GRADES: GEC1: A-F
Repeat 2 to 4 4 3; CAP N U30 0

</table>

**COURSE DESC:** Molecular Genetics
- Genetic fine structure and function at the molecular level; biochemical aspects of heredity in micro-organisms, plants, and animals; recombinant DNA and genetic engineering.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Laboratory in Genomics Techniques**
- Genomics Techniques is a laboratory course to give hands-on experience in genomics techniques like DNA manipulation, DNA sequencing, protein and RNA analyses.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Plant Genetics**
- Basic principles of genetics as they relate to plants, including transmission, expression, and evolution of genetic materials.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Cell Biology**
- Biochemical, cytological, and ultrastructural aspects of the nucleus and cytoplasmic organelles, and cellular communication.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Restoration Ecology**
- Understand the philosophies, challenges, principles, and methods of ecological restoration. Course discusses several scales of restoration (organism to landscape), but emphasis is on a holistic approach to terrestrial ecosystem restoration.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Plant Population Biology and Community Ecology**
- Evaluates basic processes in plant demography leading to the organization and dynamics of plant communities. Emphasis on quantitative methods and modeling. Labs utilize numerical models, greenhouse experiments, and field exercises.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Soil Properties and Ecosystem Processes**
- This course covers the fundamental principles and concepts of soil and ecosystem ecology. The course will provide a foundation on the physical and chemical environment (i.e. soils) that mediates plant function. We then cover basic concepts in ecosystem ecology followed by the mechanisms (via biogeochemistry and ecological stoichiometry) that drive or limit ecosystem function, including temporal and spatial patterns. We will then integrate this information at several scales and discuss consequences of ecosystem function on human wellbeing. The lab portion will integrate concepts discussed in lecture, but emphasize analyzing soil and vegetation for metrics of ecosystem function. Data from the lab will be analyzed to investigate the influence of soil and plants on ecosystem-level processes.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Development and Evolution of Land Plants**
- Integrated view of land plant (embryophyte) lineages, including evolution of morphology, anatomy, development, and gene families, using model systems to explore mutants and gene expression patterns.

**ELIGIBLE GRADES:** GEC1: A-F

**REQUISITE:**

**Development and Evolution of Land Plants**
- Integrated view of land plant (embryophyte) lineages, including evolution of morphology, anatomy, development, and gene families, using model systems to explore mutants and gene expression patterns.

ELIGIBLE GRADES: GECS: A-F, Tier II completed and Sr only
COURSE DESC: Examines environmental issues in a tropical island ecosystem. The Bahamas provide a model for understanding the issues and processes impacting sustainability for the island's natural environments and biological diversity, the local people's livelihood and way of life, and the economic stability of the country. A wealth of diverse experiences provides students with firsthand knowledge of life at the land-sea interface. Weather conditions permitting, approximately 2/3 of the course will involve firsthand exposure to marine environments and 1/3, terrestrial environments.

**ELIGIBLE GRADES:**

**COURSE DESC:**
The proposed integrative course examines plants utilized commonly as food in a selected region of the world from a variety of perspectives including their biology and evolution, geographic origins and historical development, chemical properties related to their use, agriculture and harvesting, food products utilizing these plants, and how cultures have been modified by food plants. Students will learn how regional environmental conditions and topography, land use, political and ethnic groups, economics, and infusion of other cultures have dictated the food plants now utilized in particular areas within the region under study. Each week, food plants will be introduced and discussed both within a geographic context (e.g., Rhineland of W Germany and adjacent Belgium; and E Germany and Moravia) and a functional or product-based context (e.g., fermentation, grapes and wines; and cereal grains, salt and preservation methods).

<td>GEC1: A-F</td>
<td>REQUISITE: PSY 2710 or 3320</td>
<td>The philosophical and scientific presuppositions of Freudian psychology (including Freud's methodology) will be identified and subjected to rigorous philosophical analysis. Freud's early thought on hysteria, dreams, sexuality, and psychoanalysis will be emphasized. Recent attacks on the legitimacy of psychoanalysis will be examined. Alternative schemes for understanding human behavior will also be discussed.</td>

COURSE DESCRIPITIONS:

British Empiricism: Seminar contents vary.
Ethical Theory: Current literature in selected topics in moral and social philosophy.
History of Aesthetic Theory: Readings from Plato to Dewey and relation of these theories to selected arts and recent criticism.
Problems in Aesthetics: Writing drawn from modern sources on theory of art, aesthetic criticism, interpretation, creativity, truth in art, and aesthetic value.
Meaning in Music: Topics in the philosophy of music.
Kant: Kant's Critique of Pure Reason with attention given to his ethical theory.
Nineteenth Century European Philosophy: Introduction to the philosophy of Hegel, Nietzsche, and other 19th century European philosophers.
Contemporary Social and Political Philosophy: Consideration of any number of various issues in contemporary social, political, and legal philosophy. Possible topics: theories of distributive justice, culpability, causality and responsibility, legal and moral rights.
Philosophy of Law: Consideration of nature and justification of law and examination of some specialized topics in philosophy of law including ascription of responsibility, civil disobedience, theories of punishment, liberty, etc.
Liability and Responsibility in the Law: Study of some of major problematic areas in ascription of legal liability and responsibility. Chief areas of concern: (1) grounds on which courts determine who or what is causally responsible for what occurred; (2) extent to which finding of legal responsibility should take account of intentions, knowledge, recklessness, etc., of accused; and (3) whether only sane individuals should be held legally responsible.
Philosophy of Marxism: Philosophical inquiry into classical and contemporary Marxist thought stressing Marx, Engels, Lenin, Stalin, Mao, and several contemporary Marxists such as the "Praxis group" of Yugoslavia.

**COURSE DESC:**
- Stellar Astrophysics and Radiation: Introduction to radiative transfer, including radiation mechanisms, and formation of spectral lines; discusses the physics of the cold interstellar medium and its relationship to star formation; and provides an overview of stellar evolution and stellar remnants, including white dwarfs, supernovae, and neutron stars.
- Interstellar Medium and Galaxies: Analyzes the physics of the warm and hot interstellar medium, including photoionization, thermal equilibrium, and shocks; provides an overview of the structure and dynamics of the Milky Way and other galaxies; discusses Galaxy formation and evolution, and the relationship to galaxy clusters and large-scale structure; and provides an introduction to the physics of active galactic nuclei.
- Observational Astrophysics: Provides a high-level introduction to modern observational techniques and instrumentation. Topics covered include use of CCDs for optical observations; factors determining measurement signal-to-noise ratio; detection and measurement methods for optical imaging of astronomical sources; factors determining experimental design; and special considerations for radio and space-based observations. During the course of the semester students carry out an observational project, including project conception, data acquisition and analysis, and presentation of results.
- Special Topics in Astronomy: Specific course content will vary with offering.
- Preparation for College Physics: For students who have not had high school physics or have had inadequate preparation to enter regular physics sequence. Material presented includes metric system, review of mathematics, scientific method, representation of data, and problem solving. Will not satisfy any part of natural sciences requirement of College of Arts and Sciences.
- Peer-Led Team Learning for PHYS 2001: Content-appropriate discussion and problem-solving conducted by a peer mentor, graduate student or faculty member in a small-group setting. Credit applies as hours toward graduation but meets no other college requirement.
- Peer-Led Team Learning for PHYS 2002: Content-appropriate discussion and problem-solving conducted by a peer mentor, graduate student or faculty member in a small-group setting. Credit applies as hours toward graduation but meets no other college requirement.
- Physics Seminar: Overview of current topics in physics, based on readings, discussion, and student presentations.
- Introduction to Physics: First course in physics; open to students from all areas. Students should have a background in algebra, trigonometry and geometry, but no calculus required. Recommended for students in liberal arts, architecture, industrial technology, geological sciences, and premedicine. Mechanics of solids and liquids, oscillations, heat, thermodynamics. No credit for PHYS 2001 after PHYS 2051.
- Honors Experience in Introduction to Physics: OHIO Honors curricular experience in Introduction to Physics

**COURSE DESC:** Classical physics with calculus and vectors. Topics include: 1-D and 2-D vectors; 1-D and 2-D Kinematics; Newtonian mechanics; Work and Conservation of Energy; impulse, conservation of momentum, 1-D and 2-D collisions; rotational dynamics; Simple Harmonic Motion; Wave Mechanics; 1-D traveling waves, standing waves, and interference of waves; Thermodynamics: zeroth, first, and second law of thermodynamics, maximum efficiency of engines. Thermodynamics: zeroth, first, and second law of thermodynamics, maximum efficiency of engines.

COURSE DESC: The course develops the theory and applications of quantum mechanics. Topics include: formalism of general quantum theory (Dirac notation, representation theory, Hilbert vector space, operators, bases, measurement, uncertainty principle), quantum harmonic oscillator (ladder operators), formal theory for angular momentum (orbital, spin and generalized angular momentum operators), systems of identical particles, relation between spin and statistics (bosons and fermions). Introduction to interacting systems and mean field techniques.

A&S PHYS PHYS 6020 ELIGIBLE GRADES: A-F COURSE DESC: Quantum Mechanics 1 Lecture 5 0 N G50 0 ELIGIBLE GRADES: A-F REQUISITE: The course develops the theory and applications of quantum mechanics. Topics include: formalism of general quantum theory (Dirac notation, representation theory, Hilbert vector space, operators, bases, measurement, uncertainty principle), quantum harmonic oscillator (ladder operators), formal theory for angular momentum (orbital, spin and generalized angular momentum operators), systems of identical particles, relation between spin and statistics (bosons and fermions). Introduction to interacting systems and mean field techniques.

A&S PHYS PHYS 6021 ELIGIBLE GRADES: A-F COURSE DESC: Quantum Mechanics 2 Lecture 5 0 N G50 0 ELIGIBLE GRADES: A-F REQUISITE: The course develops the theory and applications of quantum mechanics. Topics include: formalism of general quantum theory (Dirac notation, representation theory, Hilbert vector space, operators, bases, measurement, uncertainty principle), quantum harmonic oscillator (ladder operators), formal theory for angular momentum (orbital, spin and generalized angular momentum operators), systems of identical particles, relation between spin and statistics (bosons and fermions). Introduction to interacting systems and mean field techniques.

A&S PHYS PHYS 6011 ELIGIBLE GRADES: A-F COURSE DESC: Statistical Mechanics 1 Lecture 5 0 N G50 0 ELIGIBLE GRADES: A-F REQUISITE: Addresses the equilibrium and non-equilibrium behaviors of systems with large numbers of particles or degrees of freedom. It will begin with a review of ensembles and partition functions to treat classical and quantum, non-interacting, non-relativistic systems obeying Boltzmann, Fermi and Bose statistics. A brief discussion of the extension to relativistic particles, as well as a description of interacting classical and quantum systems (e.g. using cluster and virial expansions) will be provided. Mean-field theories, phase transitions and critical exponents will then be treated. Some non-equilibrium phenomena, including the Boltzmann equation and transport coefficients, will also be discussed. Additional topics which may be covered include: an introduction to renormalization-group methods; continuum-model descriptions (hydrodynamic description) for classical and quantum systems; stochastic processes, e.g. random walk and master equation; and an introduction to disordered systems (hydrodynamic description) for classical and quantum systems; introduction to disordered systems.

A&S PHYS PHYS 6011 ELIGIBLE GRADES: A-F COURSE DESC: Statistical Mechanics 2 Lecture 5 0 N G50 0 ELIGIBLE GRADES: A-F REQUISITE: The course develops the theory and applications of quantum mechanics. Topics include: symmetry in quantum mechanics (space and time displacements; rotations and angular momentum, addition of angular momentum, tensor operators); scattering theory in 3D (cross sections, partial waves, optical theorem, Born approximation, resonances, Coulomb scattering); approximation methods for stationary states (non-degenerate and degenerate perturbation theory, Brillouin-Wigner expansion, variational methods); time-dependent approximation methods, golden rule; Second quantization (field theory, second quantization for fermions and bosons, electromagnetic field); introduction to relativistic quantum mechanics for electrons.

A&S PHYS PHYS 6021 ELIGIBLE GRADES: A-F COURSE DESC: Quantum Mechanics 2 Lecture 5 0 N G50 0 ELIGIBLE GRADES: A-F REQUISITE: The course develops the theory and applications of quantum mechanics. Topics include: symmetry in quantum mechanics (space and time displacements; rotations and angular momentum, addition of angular momentum, tensor operators); scattering theory in 3D (cross sections, partial waves, optical theorem, Born approximation, resonances, Coulomb scattering); approximation methods for stationary states (non-degenerate and degenerate perturbation theory, Brillouin-Wigner expansion, variational methods); time-dependent approximation methods, golden rule; Second quantization (field theory, second quantization for fermions and bosons, electromagnetic field); introduction to relativistic quantum mechanics for electrons.

<td>Consists of presentations of original research and topics of current interest by experts in the fields pertaining to nuclear and particle physics. Journal club where graduate students present and discuss selected refereed scholarly journal articles in the field of nuclear and particle physics under the guidance of faculty. All graduate students in nuclear and particle physics are required to attend. First year graduate students enrolled in this class are only required to attend the journal club, not the research seminar. First-year graduate students are not expected to present research articles. Because of their reduced participation, first-year graduate students qualify for only one credit hour.</td>

**COURSE DESC:**

- **Physical World:** Designed for non-science majors. Fundamental ideas of measurement, motion, energy, electricity and magnetism, heat, atomic and nuclear physics. Introduction to relativity and quantum phenomena.
- **Physical World:** Lecture component.
- **Color, Light, and Sound:** Designed for non-science majors. Physical nature of light and sound including transmission, absorption, reflection, interference, and resonance. Applications include analysis of musical instruments, acoustics, optical systems, perception of color and sound.
- **Color, Light, and Sound:** Laboratory component.
- **The Metric System:** Introduction to International (Metric) System of Units (SI). Topics include: history of and rationale for SI; SI and its rules for use; metric computation and conversion techniques. Not offered on Athens campus.
- **Nano-Science and Technology:** Introductory course covering an overview of the concept of scale, and of novel phenomena that arise as a function of scale, instrumentation that allows probing systems on the nanoscale, fabrication methods that yield nanoscale geometries, and the influence of this emerging field in our current and future lifestyles.
- **Energy in a Modern World:** Introduces students to the science of energy production, use and the subsequent consequences. Introduces students to the Laws of Thermodynamics: conservation of energy; limits on efficiency. Various energy sources will be investigated and their use and impact discussed. The sources discussed may include: solar; fossil fuel; nuclear; wind; hydro; biomass. The teaching method is primarily through exposition of concepts, the analysis of problems and the use of in-class questions. Assessment of students will involve students demonstrating both their abilities in quantitative and qualitative analysis of problems.
- **Observational Astronomy Laboratory:** Experience with telescopes and locating stars, planets, and deep-sky objects in the night sky. Also covers major constellations, seasonal variations, lunar cycles, and, when appropriate, eclipses and comets. Should be taken as ASTR 1400.
- **Life on Other Worlds?** An exploration of ideas relating to the possibility that life exists elsewhere in the universe, both on planets and moons within our solar system, and within other planetary systems. The course begins by considering our planet's formation and the conditions which may have led to life appearing here, then moves outward. Students will learn the scientific basis of the age of the Earth and the Universe and the physical conditions necessary for planets around other stars to harbor life as we know it. Astronomical observations are discussed regarding what we know about extrasolar planets.
- **Special Topics in Physical Science:** Specific course content will vary with offering.

<td></td>
<td>The course examines the experiences of African Americans in the American political system. It focuses on the historical and contemporary status of African Americans in American politics. African American politics in the post-civil rights era constitutes a major part of the course. African American political mobilization and participation, racial representation and leadership, partisan politics, and public policymaking are key topics. The course centrally details the influence and presence of African Americans within American political institutions. A defining theme of the course is an evaluation of the nature and evolution of African American politics within the context of a theoretical and practical paradigm which principally focuses on governmental institutions and political behavior.</td>

<td>Studies conflict management and peace in both international and civil conflicts. Addresses historical and current cases involving peaceful settlement of conflicts; the assumptions, norms, and rules informing the theory and practice of international mediation, conflict management, and the achievement of international peace; and the emerging role of both intergovernmental and non-governmental organizations in these areas. Combines concerns for formal diplomatic and institutional approaches with informal diplomacy and reconciliation initiatives. Focuses on analyzing the conditions that allow for peace rather than preparing prescriptive recipes for it.</td>

<td>The western enlightenment still shapes the parameters of much of what we take for granted about political life today. Beginning with the work of Immanuel Kant and John Locke as thinkers central to the western enlightenment, critically examines the relationships between power and knowledge, individual freedom and social and political order, reason and religion, progress and pluralism. Critical examinations draw from work ranging from early conservative responses to the enlightenment, to Marxist, psychoanalytic, existentialist, feminist and postcolonial work.</td>

**Course Description:**

Using a wide range of cases -- the Cold War, resource depletion, political campaigns, and legislative politics -- this course will engage students in the construction and analysis of strategic interaction. Students will assess the public value of private and official actions and learn to discover Nash Equilibrium and Subgame-Perfect Equilibrium.
The course POLS 4225 Law and Colonialism focuses on how law was a central instrument of European and American colonial projects during the 19th and 20th centuries. Students explore how the imposition of colonial law affected colonized societies and their preexisting legal systems; they also examine how western fears and apprehensions vis-à-vis 'native' societies affected western law and society in turn. Academic texts as well as a sampling of novels, poetry, plays, and movies provide students points of entry for tracing how law helped establish and manage colonial projects and ideology. This course has an experiential component: students engage in archival research to increase their knowledge about colonialism; they also complete a research paper on a primary source to hone their skills in assessing who a primary source was written by, for whom, and to what end.

The course POLS 4150 The American Presidency analyzes the organization and tactics of pressure groups and their impact on the policy-making process. Students are introduced to various components of public programs, including budget and tax policies, the national economy, and politics. This course also introduces various fiscal issues such as cost-benefit analysis, intergovernmental fiscal relations, and debt management.

The course POLS 4152 Public Sector Cost Accounting is designed to train students as skilled managers of financial and economic resources in public sector organizations. This course provides techniques to control and analyze short run and long run cost behaviors of public sector organizations in line with their goals, outputs, and outcomes, such as cash and debt management.

The course POLS 4155 The White House: Management and Administration analyzes governmental interventions in terms of efficiency, effectiveness, and responsiveness. It investigates how statistical methods can be applied to evaluations of governmental interventions and demonstrates how to operationalize various components of public programs in order to conduct statistical analysis.

<td>Examines the impact of religious values, beliefs, and organized faith groups on global politics. Considers how religious laypeople and leaders impact political processes in domestic politics and international relations, as well as how faith communities compete and coexist in the political sphere. Approach will be both contemporary and historical, as well as comparative. Cases might include the impact of religion on global and national law, the role of religious activists in governmental and non-governmental organizations, the relationship between individual and collective religious values and national political outcomes, and the impact of secularism on politics. Focus will be global, although U.S. cases may be considered in comparative perspective.</td>

Page 280 of 1005
POLS 4497: Capitalism and Democracy
COURSE DESC: Examines the politics of the world economy. Topics covered include the politics of international trade, the politics of the international monetary system, and international cooperation.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 6 hours in POLS or (Jr or Sr)
Lecture 3 0 N U30 0

POLS 4505H: Honors Seminar
COURSE DESC: Seminar on selected topics in political science in preparation for writing an honors thesis. Students explore thinking and writing like a political scientist: they reflect on their own research interests and analyze what kinds of questions political scientists ask, how they answer them, and what the elements of academic writing are. Throughout the seminar, students iteratively work towards creating a viable thesis proposal and bibliography.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Jr or Sr
Lecture 3 0 BLD N U30 0

POLS 4506H: Honors Thesis in Political Science
COURSE DESC: Research, writing, and preparing an honors thesis.
PR
ELIGIBLE GRADES: GEC2: A-F
Seminar 1 to 6 12 N U30 0

POLS 4550: International Law
COURSE DESC: Studies the contribution of international law to order, power, and justice in international politics. Explores historical origins and current problems in the field, with attention to classic debates over the sources, purposes, and interests associated with international law. Places formal aspects of law (centered on the United Nations and the International Court of Justice) within the wider context of global governance, including the influence of customary international law and the work of non-governmental organizations. Discussions and readings include critical perspectives on international law as a vehicle of power in a world of inequality.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 6 hours in POLS (POLS 2500 recommended)
Lecture 3 0 N U30 0

POLS 4555: Transitional Justice
COURSE DESC: Focused study of the emerging field of transitional justice, from war crimes tribunals and truth commissions to official apologies and reparations. Examines key challenges, such as: how uncovering truth should be balanced with providing justice; whether strategies focused on individual rights and criminal responsibility can alleviate social and economic injustices; and whether conflicting identities should be forgotten or transcended. Incorporates discussion of theoretical frameworks for addressing distributional conflicts, the politics of identity, and the politics of memory.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Jr or Sr
Lecture 3 0 N U30 0

POLS 4560: International Organization
COURSE DESC: Studies efforts by state and non-state actors to organize and institutionalize international politics. Considers classical explanations for why states cooperate to form international institutions, and how these wield authority in a world of sovereign states. Examines the rise of non-state actors, including international non-governmental organizations (INGOs), terrorist networks, and transnational religious organizations. Specific cases discussed, including: the United Nations; the European Union, ASEAN, and other regional organizations; and various INGOs.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 6 hours in POLS (POLS 2500 recommended)
Lecture 3 0 N U30 0

POLS 4565: International Human Rights
COURSE DESC: Studies human rights as a vehicle for moral and legal change in international politics. Considers various ways of thinking about what human rights are and how they work at the international level. With a focus on the United Nations system, the course assesses problems and debates concerning the implementation and enforcement of human rights. Addresses difficult questions such as: How well do treaties work in promoting human rights? How can human rights be enforced in the absence of higher authority? And what role do non-state actors play? Considers case studies in a variety of issue-areas, such as: the use of torture, war crimes, indigenous rights, women's rights, and the right to development.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Jr or Sr
Lecture 3 0 N U30 0

POLS 4570: National Security in the Contemporary Era
COURSE DESC: Examines the politics of the world economy. Topics covered include the politics of international trade, the politics of the international monetary system, and international cooperation.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 6 hours in POLS (POLS 2500 recommended)
Lecture 3 0 N U30 0

POLS 4580: Introduction to War and Its Causes
COURSE DESC: Introduces the concepts and problems of attaining international "security" in an ever-changing world. Profound changes at the international level have taken a major impact on how we conceive of security. Provides an overview of the traditional and new sources for insecurity and explores the consequences of states' quests for security in the contemporary era.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: 6 hours in POLS (POLS 2500 recommended)
Lecture 3 0 N U30 0

POLS 4590: Terrorism
COURSE DESC: The course introduces students to questions regarding ethics of violence, radicalization, extremism, terrorism and counterterrorism. Students explore various terrorist organizations, their ethical perspectives and methods they have employed, as well as counterterrorism operations including questions surrounding ethical decision-making.
ELIGIBLE GRADES: GEC1: A-F
REQUISITE: Jr or Sr

COURSE DESC: Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.
Politics of Race

Race plays a central role in shaping American national identity, political institutions, and distribution of resources. Beginning with the perspective that race is central to the U.S. political order, this course pays special attention to American political, economic, and legal institutions as products and sources of racial formation. This course investigates how politics and policy continually reproduce racial inequality and difference in the U.S. context and additionally analyzes how movements for racial equality and democracy likewise shape American politics. We explore the politics of race across four thematic areas: American politics: climatological and health crisis, immigration policy, elections and voting, and policing. The course additionally emphasizes speaking and listening through student-co-led roundtables designed to hone students’ public speaking, presentation, and discussion-directing skills.

Sexuality and Queer Theories

Explores intersections of gender and sexuality with other primary forms of identity including but not limited to race, ethnicity, religiosity, class and culture. Queer theorizing explored both as a critical tool and as a resource for a more transformative alternative politics.

Critical Race Theory

Examines, analyzes, and theorizes race and racism from a critical and politicized perspective. This rich theoretical perspective points out that racism is still a pervasive part of contemporary societies, and seeks effective ways to challenge racism's existence and impact on various groups and societies. Examines Critical Race Theory as a theoretical and political alternative for understanding and criticizing racism in contemporary settings. Critical Race Theory critiques perspectives that claim far-reaching progress has been made in combating racism. Challenges students to think in new ways about contemporary manifestations of racism. Explores innovative ways to challenge the widespread prevalence of racism.

The Politics of Intersectionality

Examines the emergence and prevalence of ‘intersectionality’ as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, but whose sex and class status are privileged according to societal norms and expectations.

American Whiteness

Engages Critical Race Theory and Critical White Studies in order to better understand how ‘whiteness’ perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants’ motivations to assimilate into whiteness, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.

Black Political Thought

Surveys various ideological traditions that have informed the political visions of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contexts. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.

Latinos and Politics

Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Assesses whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.

The Politics of Visibility

Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of visibility, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.
Race, Violence and Human Security

ELIGIBLE GRADES: CEC1: A-F

Course Description: Principles and techniques of social science research.

Eligible Grades: GEC1: A-F

Requisite: 6 Hours in AAS or 6 hours in POLS 4676 or 6 hours in WGS

Course Description: The aim of this course is to introduce students to the many political questions and themes that are explored in the medium of comics. The course begins by presenting the case for considering pop culture when studying politics, moves on to a general overview of comics as a medium, and narrows in on the subject at hand by providing a broad introduction to comics from the 20th century onward. Scholarly analysis is paired with comics to help deepen students' political analysis of these texts.

Course Description: Explores the complexities of interracial transgressions by analyzing the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of interracial relationships, transracial contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

Course Description: This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present: Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

Course Description: Explores multiple arenas of interracial transgressions. Explores the complexities of interracial transgressions by analyzing the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of interracial relationships, transracial contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

Course Description: There are few issues in contemporary politics more important than human security. There are also few forms of oppression and discrimination more important than racism. Yet, envisioning and seeing the various ways that racism leads to vast and deep human insecurity have generally been neglected as political problems and inquiries. Addresses racism and racial violence as human security issues, encouraging students to search out creative ways to reduce the varied hostile environments that emerge from racist forces.

Course Description: Explores the complexities of the effects of racism and the enduring political struggles of postcolonial societies.

Course Description: Examines the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of interracial relationships, transracial contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

Under the quarter system, POLS 490/590 B: Politics of Taxation has been offered for the past several years. This semester course is equivalent to the quarter course.

The White House is the center of American public administration. Introduces the White House as a "mini-bureaucracy" at the hub of the national government, to include the Executive Office of the President, the White House Office, and the far reaching extensions of presidential bureaucratic power as embodied in such operations as presidential travel. Explores the role of staff within the White House. Focuses on the questions: a) how does the White House work; b) what makes it different from other bureaucracies in the American system of government?

Analysis of LGBTQ political issues such as same-sex marriage, military inclusion, non-discrimination, and hate crimes.

COURSE DESC:

**Government and Politics of Brazil**: Surveys the politics and political institutions of Brazil. Includes an examination of the major historical developments in Brazilian politics; the country's governmental structure and political processes; the challenges and opportunities facing today's Brazil.

**Government and Politics in Britain**: A study of the major political processes, personalities, and institutions of British government, including key foreign policy issues.

**Government and Politics in Germany**: Major political processes, personalities, and institutions of contemporary Germany, including key foreign policy issues.

**Government and Politics in France**: Major political processes, personalities, ideas, and institutions of modern France.

**The Politics of Developing Areas**: Major theories and problems of political, sociocultural, and economic development in new states of Asia, Africa, and Latin America, with special emphasis on heritage of colonialism, struggle for independence, and political adjustments to rapid social and technological change.

**African Politics**: Development and structure of modern African states with emphasis on political processes in tropical Africa.

**Religion and Global Politics**: Examines the impact of religious values, beliefs, and organized faith groups on global politics. Considers how religious laypeople and leaders impact political processes in domestic politics and international relations, as well as how faith communities compete and coexist in the political sphere. Approach will be both contemporary and historical, as well as comparative. Cases might include the impact of religion on global and national law, the role of religious activists in governmental and non-governmental organizations, the relationship between individual and collective religious values and national political outcomes, and the impact of secularism on politics. Focus will be global, although U.S. cases may be considered in comparative perspective.

**Middle East Politics**: The course introduces history, politics, culture, economy, and beliefs and practices of the Middle Eastern communities and countries. It helps students identify their own biases when discussing Middle Eastern cultures and politics, and allows them to develop an understanding and appreciation for different Middle Eastern religious and political communities and cultures. The course also explores cultural differences in communications, and their implications in Middle Eastern politics and public sphere.

**East Asia in World Politics**: The course examines the evolution of East Asia in world politics in the post-WWII era, including both the historical antecedents and alternative theoretical perspectives, as well as a variety of contemporary, political, economic, and security issues related to this region. The course draws on a wide range of material representing the diverse views of East Asian scholars, political leaders, and activists who offer a non-western perspective on East Asian politics.

**Government and Politics of Japan**: Political institutions and processes of Japan with emphasis on developments since 1945.

**Government and Politics of China**: Political institutions and processes and major political developments in China, with emphasis on recent events.

<td></td>
<td>Examines the interaction between the economy and politics in a comparative context focusing on domestic issues and linkages, which in political science is called comparative political economy. Today most economies have a significant share organized along market capitalist lines, and these market capitalist economies are heavily shaped by the regime type whether democratic or non-democratic and variations within each sub-type, so comparative political economy is about capitalism and democracy or the lack thereof. Analysis takes a theoretical approach that emphasizes competing frameworks including liberalism, Marxism, and neo-mercantilism. Issues examined include welfare state politics, varieties of capitalism, market failure and the state, embedded capitalism, the role of business among others. Altogether examines the unique challenges facing less developed countries.</td>

There are few legal, normative, and political issues more important than the efforts and struggles surrounding rights. It could be argued that the emergence of democratic political systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others. Students think systems rested much of their legitimacy upon the claim that they guaranteed certain fundamental rights for citizens. Course examines the multifaceted character of rights discourse and struggles. The varied origins of rights narratives will be explored, as well as the controversies over the extension and effectiveness of rights to diverse populations. Students think critically about the rights they take for granted as well as the rights yet to be granted, to themselves and/or others.

<tr>
<td></td>
<td></td>
<td></td>
<td>COURSE DESC:</td>
<td></td>
<td>Political theorists are concerned with concepts of political agency. How does political action occur? Who can be political? What are the terms of political discourse? During the past 10-15 years, a &quot;post-humanist&quot; discourse has emerged. This has come from two main sources. First, a whole of host of studies in psychology and biology have challenged the idea of human exceptionalism (i.e. the idea that humans are a unique animal). In study after study, things once thought to be unique to humans are found in animals (use of tools, communication of relatively complex ideas that some call language acquisition, emotions, laughter, lying, making war, etc.). This is not coming from animal rights, but from science itself. Second, technology and experiments with artificial intelligence, computers, social networking, sex-change surgery, artificial insemination, etc. have challenged us to find new ways to conceptualize thought and the body. These also challenge what it means to be human. Given that an assumption about the stability of the category &quot;human&quot; has been the principle anchor for all theories of politics up till now, these scientific discussions pose important problems for politics, and consequently, for political science.</td>

<td>Examines the transnational origins, scope, and diffusion of racial ideas and materiality. Begins with a basic introduction to the concept of race, its origins and evolution in the global realm and its subsequent centrality to discourses of modernity, empire and capitalism. Explores race as a system of global power relations that has changed over time, manifests differently across space, and exists on multiple planes. Close attention is paid to the operation of racial politics along multiple geographic and temporal scales in order to discover how race can independently affect both domestic policy outcomes and international relations among nation-states.</td>

<td>Race plays a central role in shaping American national identity, political institutions, and distribution of resources. Beginning with the perspective that race is central to the U.S. political order, this course pays special attention to American political, economic, and legal institutions as products and sources of racial formation. This course investigates how politics and policy continually reproduce racial inequality and difference in the U.S. context and additionally analyzes how movements for racial equality and democracy likewise shape American politics. We explore the politics of race across four topics in contemporary American politics: climatological and health crises, immigration policy, elections and voting, and policing. The course additionally emphasizes speaking and listening through student co-led roundtables designed to hone students' public speaking, presentation, and discussion-directing skills.</td>

<td>COURSE DESC:</td>
<td></td>
<td></td>
<td></td>
<td>Examines the emergence and prevalence of 'intersectionality' as a theoretical framework, political practice, and terrain of lived experience. Intersectionality signifies the simultaneity of identities and is commonly considered a robust approach to examining complicated, lived experiences. Intersectionality illuminates how multiple forms of disempowerment intersect and interact with one another, and captures the ways such intersections lead to deeper and more complex forms of subordination. Examines how a person who suffers from racism, poverty, and sexism has a much different lived experience than a person who may experience racist oppression, whose sex and class status are privileged according to societal norms and expectations.</td>

<td></td>
<td></td>
<td>Engages Critical Race Theory and Critical White Studies in order to better understand how 'whiteness' perpetuates itself and racism as well. Critically examines the concept of whiteness, and what it has meant to the (white) public over time. To what extent is being white a biological, ideological, psychological, or political phenomenon? Introduces theories of whiteness as a legal construction, as a privileged status, and as a dynamic social identity. Aids understanding the political meaning of whiteness by examining the relationship of whiteness to American citizenship, immigrants' motivations to assimilate into whiteness, and by learning how politicians and governmental bodies have protected the interests of white Americans by inscribing white privilege into public policies. Investigates white American public opinion on political issues, their attitudes about people of color, as well as what they think about their own racial group and racial identity. Discusses the normative quality of white racial identity, and how colorblind ideology makes it difficult to see and understand whiteness as power and privilege. Examines the contexts in which whiteness is made visible, and how awareness of white racial identity can be cultivated.</td>

<td></td>
<td></td>
<td></td>
<td>Surveys various ideological traditions that have inspired the political visions and agendas of Black Americans. Though white supremacy has negatively affected the lives of Black Americans for centuries, the response to racial oppression has been far from monolithic. In challenging white hegemony and racial oppression, Black thinkers have addressed the contradictions inherent in the joint projects of egalitarianism and racial hierarchy. Some of the greatest contributions to American political thought emerged from competing ideological frameworks, such as the debate over accommodation versus full and immediate racial integration, nonviolence versus self-defense, and socialism versus capitalist entrepreneurship, just to name a handful of contests. In envisioning an optimal racial environment, generations of activists have inserted their concerns over other related social arrangements such as sexism, classism and heterosexism, and have consequently pushed Black and non-Black Americans alike to imagine their ideal political conditions.</td>

<td>Explores the histories and contemporary politics of the diverse and expanding Latino population. Focuses on people of Mexican, Puerto Rican and Cuban descent, but incorporates other groups where information is available. Covers how patterns of immigration and resources shape the foundation for Latinos' political incorporation and mobilization within the United States. Examines the political needs and goals of various Latino sub-groups by studying public opinion, voting patterns and non-electoral behavior, and will assess the extent to which these groups are able to achieve their visions. Reflects upon the unity and tension within this group. Examines whether Latinos have a set of political attitudes and behaviors that distinguish them from other racial groups.</td>

<td>Vision and visibility are key organizing features of political inquiry, responsibility, governability, and contestation. Particularly in a contemporary setting inundated with technologies for seeing and rendering a wide variety of subjects and phenomena visible, power and visibility have become intrinsically interconnected. Studies the various manifestations of vision, visibility, and invisibility. Racialized politics of visibility especially emphasized, along with the multifaceted ways that visible identities more generally render some bodies and subjects more susceptible to political surveillance, social control, and discrimination.</td>

<td>There are few issues in contemporary politics more important than human security. There are also few forms of oppression and discrimination more important than racism. Yet, envisioning and seeing the various ways that racism leads to vast and deep human insecurity have generally been neglected as political problems and inquiries. Addresses racism and racial violence as human security issues, encouraging students to search out creative ways to reduce the varied hostile environments that emerge from racist forces.</td>

<td>Seeks to conceptualize, explore and explain the complex relationships between race and the creation, implementation and evaluation of public policy. First half offers overview of some dominant theories of public policy, including rational actor models, institutionalism, policy framing and agenda-setting, causal stories, and policy networks. Second, applies these theories in order to complete a more in-depth examination of policy areas that have either implicitly or explicitly institutionalized racial difference and/or disadvantage. Focus will be comparative; though substantial examples drawn from the United States and the industrialized world, also draws insights from developing contexts as necessary.</td>

**COURSE DESC:**

Intercultural Transgressions
Explores multiple arenas of intercultural transgressions. Explores the complexities of intercultural transgressions by analyzing the role of politics, law, policy, literature, film, geopolitics and vernacular discourse in the construction of intercultural relationships, transnational contact zones and multiracial identities. Drawing from case studies in the United States, Canada, Great Britain, South Africa, Australia and Brazil, examines a wide variety of issues related to the construction of mixed-race as a social identity and mode of racial classification, and the potential for racial transgressions in areas of sex, love, friendship, media, dance, music and geography, paying particular attention to the complex relationships among race, gender, class, and sexuality.

American Political Thought
Origin and development of political ideas in the U.S. experience.

Postcolonial Politics
This course introduces students to the study of postcolonial politics. The course poses questions on how communities relate to one another across the global North and South, historically and in the present. Is the world best described as comprising independent sovereign states, transnational and global networks, or relations of power and hierarchy? How have religion, race, gender, and diaspora populations affected politics in postcolonial contexts? Whose experiences best exemplify what it means to be a global citizen in the twenty-first century? Readings include foundational texts and interdisciplinary approaches to postcolonial studies. Students complete the course with an understanding of the legacies of colonialism and the enduring political struggles of postcolonial societies.

Legal Theory and Social Problems
Examination of legal reasoning and normative values of judges, lawyers, and legal theorists, in shaping legal solutions to contemporary social problems.

Feminist Political Theories and Movements
Explores feminist work as both a vital critical perspective and a source of alternative and transformative visions. Examine mechanisms and manifestations of patriarchy as they play out across fields of struggle-cultural, social, economic, as well as traditional political spaces. The relationship between patriarchal forms of oppression and other practices of domination—race, sexuality, class, or ethnicity based critically analyzed. Normative visions generated from feminist perspectives explored as alternatives to patriarchal orderings.

Program Evaluation
Examines what factors affect the performance of public programs and organizations. Surveys the processes of policy formulation and implementation within the context of politics. Students expected to design evaluation methods and conduct statistical analysis of governmental interventions.

Political Science Fiction
Science fiction holds a mirror to the norms, rules and institutions that exist in the contemporary political world, engaging in fundamental comparisons about the way the world is, how it came to be, and what alternatives may exist for the political future. Examining and analyzing the prominent themes and issues in these fictional worlds sheds light on past, present, and future political phenomena of our real one. The course examines works of science fiction (both literature and film) side-by-side with political analyses of a variety of topics: state- and nation-building, war and peace-building, citizenship, race, gender, bio-ethics, revolution and rebellion, the military industrial complex, capitalism and democracy. For example, fiction works that may be used in the course include Foundations, Game of Thrones, the Hunger Games, World War Z, the Handmaid’s Tale, Battleship Galactica, Star Trek, etc. Science fiction literature and film are points of departure for a more substantive focus on these and other important issues in contemporary politics.

Introduction to Research Design
Principles and techniques of social science research.

The Politics of Sustainability
Political questions are interwoven throughout the discourse and practice of sustainability. Is there a difference between sustainability and sustainable development? Is environmental sustainability the paramount goal, or should natural capital be sacrificed to pursue economic prosperity and social equity? Analyzes the inherent ambiguities of the three dimensions of sustainability-environmental, economic and social sustainability-and the political challenges associated with achieving sustainability at the local, national and global scales.

<td>COURSE DESC: Introduces some of the latest theoretical innovations in theories of American political institutions (executive &amp; legislative). It explores how the make-up of executive and legislative institutions influences their behavior at the federal and state levels. Institutional actions that will be covered in the class include war-making, budgetary decision-making, and policy-making in the social and economic arenas. The impact of external actors--political parties, interest groups, the media--will also be investigated.</td>

**Course Descriptions:**

- **Seminar in Comparative Politics**: This course examines some of the main theories, concepts, approaches, and themes in comparative politics.

- **Seminar in International Politics**: A graduate-level introduction to the study of international politics and international affairs. Considers various frameworks and approaches from international relations and adjacent disciplines in the humanities and other social sciences. Applies both traditional and critical approaches (addressing race, gender, and other aspects of inclusion and exclusion as important aspects of international politics) to topics such as: causes of war; international norms and institutions; economic and political integration; role of non-governmental organizations, terrorist networks, and other non-state actors; humanitarian interventions and human rights; and the impact of globalization. Emphasis on critical assessment of how competing frameworks shape the way we understand these challenges.

- **Seminar in Law and Politics**: An introduction to scholarly approaches to the study of law and courts.

- **Seminar in Political Theory**: This course introduces students to key concepts in normative, western political theory. The course will begin with the development of the idea of democracy in ancient Greece, and will cover significant works up through the present. Concepts discussed may include ideas such as the political, humanism, the role of religion in politics, democracy and representation, political legitimacy, authority, political obligation, citizenship, equality, freedom, identity, the public, the private, the market, tradition, modernity, revolution and social change. Students will be encouraged to think about how these ideas are enmeshed with regimes of power, and how they have shaped political debates both historically and in the present.

- **Special Topics in Political Science**: Specific course content will vary with offering.

- **POLS Master's Thesis**: Research, writing, and preparing a Master's thesis.

- **Sustainability Citizenship**: Sustainability challenges of the 21st century require us to meet the needs of the present while safeguarding Earth's life-support systems on which the welfare of current and future generations depends. These challenges call for the reinvention of citizenship. Conventional models of citizenship are inadequate for tackling the social, economic, and environmental dimensions of sustainability problems; do not match the realities of social-ecological systems; and provide little guidance for addressing equity within and between generations. In this multidisciplinary course, students will investigate changing citizenship norms; the core principles of sustainability citizenship; and the practice of sustainability citizenship in the private and public spheres from the local to the global levels.

</table>

COURSE DESC: Tutorial experience on a wide range of topics.

ELIGIBLE GRADES: GEC4: A-F,

COURSE DESC: Specific course content will vary with offering.

ELIGIBLE GRADES: GEC3: A-F,

COURSE DESC: Development, organization, and assessment of personality, with evaluation of major theoretical perspectives and research on personality.

ELIGIBLE GRADES: GEC1: A-F REQUISITE: PSY101D or 1010 and WARNING: No credit for both this course and the following (always deduct credit for first course taken): EDEC 1600 or EDEL 2000

COURSE DESC: Basic principles of human development from the prenatal period through adolescence. Theory and literature on physical, cognitive, and socioemotional development. No credit awarded if HCCF 1600 or EDEL 2000 has been taken.

COURSE DESC: Theory and research on the ways that people think about, influence, and relate to one another. Specific topics include attitudes and behavior, social perception and cognition, conformity, persuasion, group influence, aggression, attraction, and helping behavior.

COURSE DESC: This lecture- and discussion-based course introduces undergraduate students to the ways in which psychology can be used to further the study of peace between individuals, groups, and societies. The course is divided into five sections: (1) What psychology can contribute to the study of peace; (2) The psychology of peace at the individual/dispositional level; (3) The psychology of peace at the interpersonal/relational level; (4) The psychology of peace at the intergroup/collective level; and (5) Achieving peace and building cooperation in society.

Students gain a greater appreciation of both psychological theories related to peace and application of these theories to real-world issues (e.g., how peace can actually be achieved).

COURSE DESC: Applications of psychological theories and models to educational settings (emphasis on schools). Major topics include goals of education; cognitive, social, and affective development in children; cognitive and behavioral models of learning; motivation; individual differences; effects of social class, ethnicity, gender, and cultural deprivation on learning and development; tests and evaluation. Emphasis is on the role of teachers and parents as facilitators of learning and development. No credit awarded if EDCI 2700 OR EDTE 2000 has been taken.

COURSE DESC: Theoretical and experimental investigations of learning in human beings: concept learning, problem solving, memory, motor skills, and language.

COURSE DESC: Students gain a greater appreciation of both psychological theories related to peace and application of these theories to real-world issues (e.g., how peace can actually be achieved).

COURSE DESC: Development, presentation, and assessment of psychological disorders, with evaluation of major etiological theories and research findings.

<td>This course presents the human factors and psychological dynamics of sports performance as it relates to individual and team sports. Students learn methods and techniques for developing psychological skills to enhance both individual and team performance. The course focuses on learning strategies to increase the ability to influence others' behavior such as leadership, motivation, flow, group cohesion, team dynamics, imagery, and goal setting. The course also addresses critical issues that can impact not only sport performance but also personal well being such as anxiety, eating disorders, aggression, and addiction.</td>

<td>Choices and Happiness synthesizes research from different areas of psychology and related fields (e.g., marketing, economics, nutrition) addressing our quest for happiness within an imperfect cognitive decision making system. The course elucidates judgment biases and errors that prevent us from making better life decisions, from poor food choices to the perils of oversharing social media. Choices and Happiness is a deep exploration into the science of self-control, goal attainment, and maintenance.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Students explore problems of problematic decision making such as planning fallacies, procrastination, and multi-tasking. Research in the psychology of judgment touches upon judgment fallacies that contribute to unhealthy life patterns in many areas, such as erroneous beliefs about the costs of eating nutritious foods. The class uses a decision architecture approach to address the development of systems that enhance well being in different life domains.</td>

**Course Descriptions**

- **Human Stress**: Stress is an inevitable part of human life, and how we think about and respond to stressors can dramatically influence our health and well-being. Human stress is an interdisciplinary topic, and is best understood from multiple perspectives, including social psychological, cognitive, developmental, physiological, environmental, sociological, and medical. As such, this course draws from material in complementary courses in psychology and related fields to synthesize and integrate ideas and information relating to human stress.

- **Evolutionary Psychology**: Capstone course providing an evolutionary perspective on the major subfields of psychology. Topics include the theory and methods of evolutionary psychology, evolved structures of the mind, and evolutionary perspectives on cognition, language, consciousness, emotions, motivation, and social behavior.

- **Psychology Honors Seminar**: Seminar on specific topics. See Schedule of Classes each semester.

- **Psychology Tutorial**: Special tutorial offered to students in Honors Tutorial program.

- **Honors Work in Psychology**: Special tutorial offered to students in the Honors Tutorial program.

- **Statistics for the Behavioral Sciences**: Introduction to descriptive and inferential statistics with emphasis on inferential statistics. No credit for both 2110 and any of the following: MATH 2500, QBA 2010, COMS 3520, ISE 3200, ET 2450.

- **Advanced Statistics for the Behavioral Sciences**: Continuation of 2110. Statistical techniques through multifactor analysis of variance and multiple regression analyses. Integration of experimental design with statistical analyses. Does not apply to Arts and Sciences social sciences or natural sciences requirement.

- **Research Methods in Psychology**: Training in scientific methods and techniques of modern experimental psychology with individual reports of experiments.

<td>COURSE DESC:</td>
<td></td>
<td></td>
<td></td>
<td>Formal modeling is an essential research tool in cognitive psychology and cognitive science. In this seminar we shall discuss and critically evaluate a wide variety of key formal models and modeling approaches to cognition (e.g., algebraic, geometric, analytic, qualitative, statistical, probabilistic, computational, connectionist, dynamical, structural, and process). We shall do this with three goals in mind: 1) to become aware of the wide range of modeling techniques at our disposal, 2) to achieve a basic understanding of these techniques and the modeling process in general, and 3) to get us to start thinking strategically and analytically about how to construct an effective formal model (i.e., one that predicts and explains our empirical results). Discussions will assume no previous modeling background.</td>

<tr>
<td>COURSE DESC:</td>
<td></td>
<td></td>
<td></td>
<td>The main goal of this course is for graduate students to gain expert knowledge about the psychology of social psychology, including social cognition, social relationships, and social behavior. This will be accomplished via lecture, and through reading classic and contemporary works in this area. One manifestation of students' mastering the material is their ability to take over the class for an hour and lead a class discussion on a selected topic. A final paper is required to demonstrate their mastery of the material; this involves either a critical review of one of the topics covered in the course or a research proposal on the topic. Upon completion of the course, students should be in a position to design research related to the psychology of social psychology and should also be able to teach this material to undergraduates.</td>

<tr>
<td>COURSE DESC:</td>
<td></td>
<td></td>
<td></td>
<td>The main goal of this course is for graduate students to gain expert knowledge about the psychology of the self, including how the self is constructed, maintained and regulated. This will be accomplished via lecture, and through reading classic and contemporary works in this area. One manifestation of students' mastering the material is their ability to take over the class for an hour and lead a class discussion on a selected topic. A final paper is required to demonstrate their mastery of the material; this involves either a critical review of one of the topics covered in the course or a research proposal on the topic. Upon completion of the course, students should be in a position to design research related to the psychology of the self and should also be able to teach this material to undergraduates.</td>

<td>COURSE DESC:</td>
<td></td>
<td></td>
<td></td>
<td>Individuals are complex systems behaving within complex organizational systems. This course will explore in depth the motivational, affective, and cognitive subsystems of humans, and how they are affected by and affect leaders, groups, and organizations. Attention will be paid to understanding the operation of the systems and the consequences of applications and interventions on these systems. The boundaries of the field's knowledge of these issues are explored and students are expected to describe how they could add to the field's knowledge store either empirically, theoretically, or both.</td>

**Course Descriptions:**
- **Employee Turnover and Retention:** Introduces doctoral students to the research literature on organizational withdrawal, notably turnover. As distinguished motivational scholars (Katz & Kahn, 1978) long noted, organizations must not only motivate their members to perform their work roles effectively but also induce them to remain in these work roles. Indeed, employees who quit obviously cannot be productive or contribute effectively to their organization's mission.
- **Performance Appraisal and Management:**
- **Select and Placement:**
- **Training & Development:**
- **Adult Assessment:**
- **Child and Adolescent Assessment:**
- **Adult Psychotherapy:**
- **Child and Adolescent Therapy:**
- **Interventions in Health Psychology:**
- **Fieldwork in Psychology:**
- **Practicum in Industrial and Organizational Psychology:** Supervised field experience in organizational settings.

COURSE DESC:
Clinical Practicum: Practicum experience for graduate students in clinical psychology. Psychological services provided under supervision in a clinical setting.

Advanced Clinical Practicum: Advanced practicum experience for doctoral students in clinical psychology. Psychological services provided under supervision in a clinical setting.

Practicum in Teaching of Psychology: Mentored teaching experience for graduate student instructors in the Department of Psychology.

Readings in Psychology: To broaden training of master's or doctoral students in areas in which they need further work, which cannot be obtained through specific courses.

Research in Psychology: Student assist in the planning, designing, data collection, interpretation, and writing of research projects.

Seminar in Teaching of Psychology: Issues in and approaches to teaching in the field of psychology. Includes such topics as characteristics of good classes and teachers, syllabus preparation, lecture and discussion techniques, exam preparation, and grading. Includes experiences with feedback.

Advanced Seminar in Psychology: Specific course content will vary with offering.

Advanced Seminar in Psychology: Physiological: Seminar contents varies.

Advanced Seminar in Psychology: Cognitive: Seminar contents varies.

Advanced Seminar in Psychology: Developmental: Seminar contents varies.

Advanced Seminar in Psychology: Social: Seminar contents varies.

Advanced Seminar in Psychology: Industrial/Organizational: Seminar contents varies.

<td>Human responses to war are examined both from the subjective perspective of creators of literature of war and from the objective perspective of psychologists who study individual and group behavior in times of conflict. Topics include the nature of individual and organized aggression, perception of the enemy, disillusion and disenchantment, obedience to authority, the irony of war, victimization, and alternatives to war.</td>

<td>The overall objective of this course is to address how membership in specific social identity groups including ones that are based on the social categories of race, gender, sexuality, religiosity, socioeconomic status as well as others is related to physical and mental health. This course will provide an interdisciplinary framework for understanding the relationship between health and social identity group memberships. The disparities that exist in health status for many groups will be explored as well as how factors such as microaggressions, prejudice, stigmatization, poor access to and barriers to care as well as policies contribute to these disparities. Concurrently resiliency factors and intervention strategies to reduce such disparities will be reviewed.</td>

<td>COURSE DESC:</td>
<td>This course examines religion from an anthropological perspective through attention to healing systems, divinity, spirituality, the sacred, religious movements, religious leadership, ritual, magic, witchcraft, ancestor veneration and pilgrimage. The course considers the place of religion in everyday life, the study of religion in social science theory, moral and ethical reasoning, symbolism, ideology, idealism, materialism, individual and collective empowerment, and articulations between religion and other aspects of culture. The course considers a variety of religious systems around the world.</td>

<td>Human Rights, Law and Justice</td>
<td>Applies anthropological perspectives to issues relating to human rights, law, and justice with special attention to themes of peacekeeping and peace building, democracy and the rule of law, and the politics of truth, justice, and reconciliation in conflict and post-conflict countries. Examines particular cases from Latin America, South Asia, Africa, and Southeast Asia to consider some of the questions facing countries that are emerging from periods of significant human rights violations, including how to attribute responsibility and guilt, how to deal with perpetrators, and how to provide proper redress to victims.</td>

<td>History of Anthropological Thought</td>
<td>This course explores the ideas, actors, and institutions that have shaped the history of anthropological thought. The course considers how power-laden encounters between western and non-western societies framed the conceptions of human culture, society, economy, religion, politics, law, and personhood that continue to shape the horizons of anthropological thought today. Through examination of the historical development of the discipline, the course addresses the complexities of anthropology's analytical tools in the present.</td>

<td>Lithic Analysis: Stone Tools and Human Behavior</td>
<td>This course focuses on the study of stone tools in archaeology. We conduct laboratory analyses of artifacts, where students learn to describe stone tools and the debris of making stone tools. We also read foundational works in archaeology and anthropology, which relate to the use, manufacture, and interpretation of stone tools. This literature provides a theoretical foundation to allow students to better interpret prehistoric behavior and technology.</td>

<td>COURSE DESC:</td>
<td>This course approaches photography and film as modes for representing and interpreting culture. The course examines the genre of ethnographic cinema and its relationship to wider discussions about documentary and nonfiction film. The course also considers the place of the photo essay in anthropological scholarship. Building on this dual foundation, students apply theories and methods from visual anthropology to produce a multimodal (visual and verbal) ethnographic essay with a clearly defined visual approach. Combining photography and ethnography, students generate primary-source images to anchor an original social analysis through careful and critical attention to the ethics and politics of images in anthropological research and representation.</td>

<td>This course combines writing instruction with a focus on using the tools of social science to promote active citizenship and bring about systemic change on issues of vital social concern. Social justice topics considered range from access to education and healthcare; environmental degradation; poverty and economic power; discrimination based on race, gender, and sexuality; reforming and reimaging criminal justice; immigrant and refugee rights; ableism and disability justice; corporate globalization; settler colonialism; warfare, militarism, and conflict transformation; and community empowerment and transformative organizing, among others. Through a focus on written communication, the course trains students in effective writing for social transformation, with special attention to the emancipatory potential of social science.</td>

<td>This course focuses on the comparative study of law, legal institutions, and other modes of dispute processing and regulation, in both contemporary and historical societies. We read foundational works in legal anthropology, examine ethnographic studies of legal structures in non-Western cultures, and apply anthropological theories to facets of the U.S. legal system. Through the course, we explore legal pluralism, law and colonialism, law and culture, and law and everyday life. We also consider ethnographies of human rights, law, and justice in conflict and post-conflict settings.</td>

**Course Descriptions**:

- **Collective Behavior**: Examines the emergence and significance of collective behavior in its many forms. Topics may include but are not limited to behavior in crowds; behavior in panics, disasters, fads and fashions, protests, and riots; rumor and communication processes; and the impact of collective behavior on society.

- **Introduction to the Family**: This course examines the family system in the United States and across cultures, including the ways family structures both reinforce and challenge gender roles. Sociological and gender-based theories of the family are explored as well as the complex relationships among marriage, parenting, work, and family. Students use critical thinking and ethical reasoning to investigate these relationships and consider issues of family policy. Varieties of family experience are considered, with special attention given to issues concerning competing definitions of the family.

- **Social Inequalities and Social Change**: This course is a comprehensive survey of the sources, meaning, and consequences of social inequality in its multiple forms including age, class, gender, poverty/wealth, race/ethnicity, sexuality, and spatial dimensions. The course connects these forms to social change processes that can be both a source of and solution to inequality. Whether it is collective action, culture, development, the environment, globalization, population, social institutions, or social structure, social change has many sources, providing an arena for social inequality to play out and intersect in its various forms. In its breadth the course promotes critical analysis of the dynamics and presence of social inequality and social change in the larger society and everyday lives of students. Using a social injustice framework and an informed sociological imagination, the course is intended to prepare students for additional study in more focused and advanced topics in inequality.

- **Sociology of Health and Health Care**: This course uses a sociological perspective to explore issues of health, illness, and health care among diverse populations in contexts of social inequality. It explores social and cultural patterns of health and illness, the influence of the social environment on health behavior, social inequality and health status, medical education, the social organization of health care delivery in the United States, comparative health care delivery systems, complementary and alternative medicine, emerging social issues raised by new medical technologies, and health care policy. Students use critical thinking and ethical reasoning to evaluate and address inequalities in the practice of United States health care, including disparities in health care delivery, power dynamics in the physician-patient relationship, the ethical obligations of physicians, and discrimination in health care practice based on class, gender, race, and sexualities.

- **Sociology of Sport**: A sociological examination of sport in the United States and its social organization as a major American institution. The course will examine the nature of sport, its social functions, and attempt to situate it in the wider contemporary and historical context of our society. Focus on topics such as: sport and socialization, violence/deviance in sport, sport and academic institutions, gender and race in sport, and the business of sport.

- **Global Social Change**: What is driving global social change? How does social transformation occur? This course uses the tools of sociology to explore the complex ways that contemporary politics, economics, culture, technology, and new media are transforming our increasingly interconnected world. We begin by exploring how theories and research from sociology and related fields can help us make sense of these important global changes. We then turn to explore the dynamics of social change from different perspectives, including politically-driven change, economically-driven change, culturally-driven change, technology-driven change, and change driven by popular global protest and social movements. Along the way, we will consider a wide range of social issues and urgent social problems, including the effects of neoliberalism, the politicization of COVID-19 and other epidemics, the interplay between religion and law, how social media is transforming civic engagement, and movements for gender recognition and equality. Our course concludes by considering new forms of social movements that call for innovative solutions to the challenges of our changing global world.

- **Breaking the Law**: This interdisciplinary course explores central questions about law, crime, justice, social change, human rights, globalization, and technology in the new global era. The dominant global forces that have defined and contested in the 21st century have massively transformed law and legal frameworks, at both local and global levels. How is law's role in relation to patterns of discrimination and marginalization that produce social suffering and vulnerability? In relation to global human rights regimes and international justice mechanisms? In relation to inequalities in access to health care and other basic human goods? How are our understandings of our own bodies, lives, and futures shaped by law?

- **Applied Statistics in Sociology and Anthropology**: This course is an introduction to the quantitative statistical analysis in sociological and anthropological research and its substantive importance. Students learn how to apply and interpret statistical methods appropriate for answering research questions using archaeological, census, criminological, historical, paleontological, survey, and other secondary data in the social sciences. Through a series of hands-on projects, students apply statistical tests and methods of analysis to real-world problems using statistical tools and datasets commonly used by sociologists, criminologists, and anthropologists. Students learn how to communicate statistical analysis and results in likely professional situations.

<td>Course Desc:</td>
<td>This course examines the structures and decision processes of agencies that deal with crime and people involved in the United States criminal justice system, including criminal justice personnel, people apprehended and convicted of crimes, and victims of crimes. An emphasis is placed on how criminal justice practice is based on politically derived public policies and the use of discretion by criminal justice personnel. Students use critical thinking and ethical reasoning to analyze the practice of these agencies. Topics include but are not limited to criminal law, policing, court systems, sentencing, and corrections.</td>

<td>Course Desc:</td>
<td>Examines theory and research concerning the social processes through which behaviors and statuses come to be defined as deviant, individuals become identified as deviants, and social control practices are directed toward perceived deviants. Also investigates how individuals and groups manage deviant labels, embrace deviant identities, and use deviant behavior to challenge social norms and produce social change. Case studies of specific forms of deviant behavior, including criminality, substance abuse, and mental illness, will be explored.</td>

<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Course Desc:</td>
<td>This course explores the gendered nature of crime and criminal justice in the United States from a sociological perspective. Students investigate gendered pathways into criminal offending; gendered patterns and behaviors of offending and ceasing offending; gendered patterns and behaviors of victimization; gendered organization, behaviors, and experiences of policing, prosecution, punishment, and incarceration; and gendered work, behaviors, and representation within justice professions. The course employs sociological theories and methodologies that emphasize the social construction of gender, social structure and social inequality, and the intersections between gender, sexuality, race, class, and age.</td>

<td></td>
<td>Course Desc:</td>
<td>Appalachian, a region examined by sociologists for more than 100 years, continues to be a subject of study for academics seeking to demystify the region and foster positive change for its people and the land. The politics of the region, the persistence of poverty, and the development and sustainability of the economy, environment, and society are main themes in Appalachian studies that the course explores from a sociological perspective. Additional topics relevant to the sociology of Appalachia may include but are not limited to social movements and social media, transitional economies, and the dynamics of Appalachian culture and identity.</td>

**COURSE DESC:**

- **Sociology of Appalachia**: Examines the social and cultural determinations and consequences of changes in fertility, mortality, and migration. Current and historical national and international population policies and programs are also examined, incorporating sources of demographic data used in population analysis.
- **Social Identities**: Identity is a very complex concept that has personal, social, political, and cultural dimensions. This course explores the social construction of identity at each of these levels of interaction.
- **Sociology of Education**: School as social institution in relation to community and development of child; comparative systems of education; issues of access and inequality in delivery of educational services.
- **Race and Ethnic Relations**: Students explore race and ethnic relations from a sociological perspective. Topics considered include the development of ideas of race and ethnicity, sociological theories and scholarship that explain the social location of various racial and ethnic groups, how race and ethnicity intersect with other statuses, stratification and patterns of racial inequality and privilege, the experiences of different ethnic groups in U.S. society, the causes and consequences of prejudice and discrimination, media representations of race and ethnicity, and past and current social movements seeking to address racial and ethnic inequality.
- **Sociology of Poverty**: Critically examines how poverty is defined and measured, the competing theoretical perspectives and debates on poverty, the numerous forms of poverty and its consequences, the cultural frameworks through which poverty is lived and experienced, and strategies and policy solutions for fighting poverty.
- **Class and Inequality**: This course explores the causes and consequences of inequalities in power, privilege, and opportunities, which characterize the class structure of most societies. Students investigate how social forces shape where people are positioned in society and what resources they have access to.
- **Access to Justice**: This course examines how structural inequalities lead to regional, national, and global justice gaps. The course investigates needs and problems confronted by communities; disparities in access to information and legal resources; how groups perceive and employ the justice system; representation and inclusion within the legal profession; and the attainment of substantially just outcomes. The course then explores strategies to address these concerns, including approaches traditionally employed by the legal profession and innovative legal, social, technological, and architectural solutions designed to bridge gaps between communities and justice.
- **Veterans in Society**: This course examines the unique role that veterans play in society. Using a sociological perspective, students learn about veteran identity, how military service impacts the lives of soldiers and families, how service members reintegrate into society after service, the development of law and public policy related to veterans' needs, and how societies remember their veterans. Specific issues explored include official debates over the definition of veterans, military service and the life course, veteran service organizations, Post-Traumatic Stress Disorder and veterans' health care, veterans' law and veterans' rights, Veterans Treatment Courts, the meaning of the veteran in U.S. society, and remembrance movements to memorialize veterans, as well as other relevant topics.
- **Economic Sociology**: This course examines the social structural, cultural, and political foundations of market exchange, the production of goods and services in the formal and informal economies, and consumption. A variety of theoretical approaches drawn from the political economy, social behavioral, sociology of culture, and social network traditions in sociology will be used to explore non-economic dimensions of economic structure and action.
- **Population and Society**: This course examines the social and cultural determinations and consequences of changes in fertility, mortality, and migration. Current and historical national and international population policies and programs are also examined, incorporating sources of demographic data used in population analysis.
SOC 3620 Ethics in Law, Crime, and Justice

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
In this course, students investigate immigration in the United States and around the world. Students first explore the history of sociological research on immigration to the United States, as well as the sociological theories that help us understand why people migrate to other countries. We then consider diverse topics such as settlement patterns, education, identity, language, the second generation, religion, and integration. Students apply these topics to issues of public policy, addressing the shortcomings of past and present policies and considering potential future solutions based on social science research. Finally, students explore the challenges of global migration, especially in relation to social stratification.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: SOC 2600

Lecture 3 0 BDP N U30 0

SOC 3600A Honors Experience: Criminology

A&S SOC

ELIGIBLE GRADES: NC

COURSE DESC:
This course invites students to combine sociological reasoning with ethical theory to analyze and respond to ethical concerns prevalent in the practice of law, criminology, and public policy. Students investigate contemporary cases of judicial misconduct, police brutality, and the use of experimental drugs in executions, among many other topics.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: SOC 2600

Ind Study 0 0 N 0

SOC 3620 Ethics in Law, Crime, and Justice

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
This course invites students to combine sociological reasoning with ethical theory to analyze and respond to ethical concerns prevalent in the practice of law, criminology, and public policy. Students investigate contemporary cases of judicial misconduct, police brutality, treatment of prisoners, and the use of experimental drugs in executions, among many other topics.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: SOC 2600

Lecture 3 0 BER N U30 50

SOC 3560J Writing in Sociology & Anthropology

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
This course combines writing instruction with in-depth consideration of substantive topics such as famine, hunger/food insecurity, food justice, food politics, food sovereignty, and food systems. Students practice various styles of social science writing, including data analysis, field notes, abstracts, essays, grant proposals, position papers, and social media. Through a focus on written communication, students improve their academic writing while also reflecting on how and why sociologists and anthropologists tell their stories about the world in the way that they do.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: 9 Hours in (ANTH or SOC)

Seminar 3 0 1J; FAW N U30 0

SOC 3550 Elementary Research Techniques

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
An introduction to the techniques employed by social scientists to identify research problems, gather data, analyze data, and reach conclusions about research ideas. Topics include how to identify a research problem, ways to develop data gathering procedures, techniques of gathering data, ways to summarize data, and ways to analyze data. The overall goal is to provide the tools to be able to design and carry out a research project.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: SOC 1000 and (SOC 404 or SOC 3000) and (COMS 3520 or ECON 3810 or MATH 2500 or PSY 2110 or QBA 2010)

Lecture 3 0 BDP N U30 0

SOC 3561J Writing in Food, Hunger, and Inequality

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
This course combines writing instruction with in-depth consideration of substantive topics such as but not limited to famine, hunger/food insecurity, food justice, food politics, food sovereignty, and food systems as the foundation for developing one's writing abilities. Students develop skills in various styles of social science writing including book reviews, blogs, critical reflection essays, field notes, interview composition, policy briefs, and research papers, among others.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: 6 Hours in SOC including 1000

Lecture 3 0 1J; FAW N U30 0

SOC 3568J Writing for Social Justice

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
Planning, execution, and write-up of empirical study, utilizing skills developed in 3500. Limited class meetings, conferences with instructor, research report.

ELIGIBLE GRADES: GEC1: A-F

REQUISITE: SOC 1000 and (SOC 404 or SOC 3000) and (COMS 3520 or ECON 3810 or MATH 2500 or PSY 2110 or QBA 2010)

Lecture 3 0 1J; FAW N U30 0

SOC 3410 Sociology of Immigration

A&S SOC

SOC 3500 Field Studies in Sociology

A&S SOC

ELIGIBLE GRADES: CR

COURSE DESC:
This junior-level writing composition course provides writing instruction combined with consideration of substantive topics in sociology and anthropology research. The course addresses the disciplinary conventions that guide formatting, organization, and stylistic choices appropriate for the fields of sociology and anthropology. The course emphasizes the context and purpose of various genres of anthropological and sociological writing, with special attention to the politics and praxis of social science representation, argumentation, citation, and credibility. Students practice various styles of social science writing, including data analysis, field notes, abstracts, essays, grant proposals, position papers, and social media. Through a focus on written communication, students improve their academic writing while also reflecting on how and why sociologists and anthropologists tell their stories about the world in the way that they do.

**COURSE DESC:**
- Sociology Honors Tutorial: Honors tutorial on topics in Sociology for third year students. Topics vary.
- Sociology Honors Tutorial: Honors tutorial on topics in Sociology for third year students. Topics vary.
- Emergent Topics in Sociological Theory: This advanced theory course offers an in-depth examination of current issues in sociological theory.
- Media and Society: The proliferation of new media/technology and its impact upon social life; the dramatic impact of an intensely global visual culture upon social life; tensions in race, gender, and sexuality in representation; the resurgence and cultural functions of the real in box office documentary and reality television; ideological debates about media effects and violence; the limits of representation (images of death, torture, war, and genocide) and the end(s) of the social.
- Contemporary Social Movements: Examines the meaning of social movements and contentious politics and their significance for producing social change in contemporary world societies. Using case studies of typical movements, the course emphasizes both radical and reform movements and their various dynamics and components including emergence and participation, organization, culture, identity, tactical repertoires, and outcomes among others.
- Society and the Individual: An advanced examination of selected topics in sociological social psychology with emphasis on current theory and research.
- Group Processes: This course introduces a range of theories of group processes, discusses research applications to social groups, and encourages students to apply these theories to contemporary groups. Communication patterns, social networks, social roles, status processes, and solidarity are among topics covered. Current research literature is stressed.
- Comparative Studies of Family: The institution of marriage and family will be examined and analyzed with regard to families from different cultural, racial, and ethnic backgrounds. Special emphasis on the significance of social and cultural determinants of family life in the United States.
- The American Family System: Development of the family system throughout history with an emphasis on how changing patterns and conditions led to the formation of the American family. Problems and challenges, both at the micro and macro levels, faced by the American family today are also examined.
- Urban Sociology: Examines the social and cultural character of cities and how urban spaces shape, and are shaped by, social life. Draws on competing social theories of urban life to explore factors that have influenced the historical development of cities. Examines processes of industrialization, urbanization, and suburbanization. Other topics include ethnic segregation and the spatial patterning of inequality, uses of urban space, the social and moral order of the neighborhood, urban subcultures, urban imagery and symbolism, gentrification, and the impact of globalization on urban life.
- Sociology of Religion: Interrelationship between religious institution and social structure from comparative perspective and with particular reference to American society.
- Sociology of Organization: This course concentrates on the structure and process of formal organizations. We study various organizational forms, including bureaucracies and nonprofits, in detail. We will also explore the major theoretical perspectives for understanding how organizations function. The course will also explore the impact of organizations on individual identity, autonomy, and power.

**COURSE DESC:**
- **Sociology of Gender**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: This course explores the social and cultural construction of gender as a fundamental basis of social relations and institutions and narratives we tell about those interpersonal relations and institutions. Focus includes sociological theories of gender, and an examination of gender in areas such as sexuality, identity, the body, education, marriage, family, violence, health, paid and unpaid work, popular culture, politics, and the history of the discipline itself.

- **Gender and Justice**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Explores how the interpretation and application of criminal law reflects assumptions about men's and women's natures, appropriate roles, and positions in society. Readings examine changes and stability in the prosecution of violence against women; the prosecution, sentencing, and correction of women offenders; women's and men's access to the profession of law and other legal positions; and conceptions of justice. Readings highlight how race, class, and gender intersect and how structure and interpersonal interaction contribute to observed outcomes.

- **Environmental Sociology**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Examines the interaction between social systems and the natural ecosystems in which they reside. It considers the predominant cultural, demographic, economic, geographic, political, and social factors that modify and shape the environment and the human ecological footprint. Emphasis is on the prospects for the emergence of sustainable societies and links between environmental issues and conflict, development, globalization, inequality, social change, and social movements among others.

- **GRADUATE PROSEMINAR IN SOCIOLOGY**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: The proseminal is required for incoming sociology graduate students. It is designed to advance students' enthusiasm and commitment to sociology as an intellectual endeavor and as a profession. The course will also help graduate students acclimate to the rigorous requirements and culture of graduate school.

- **Internship in Sociology & Criminology**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Provides internship experience for students majoring in sociology, criminology/sociology, and sociology-prelaw. Students will have the opportunity to apply social science knowledge in working with law, business, criminal justice, non-profit, social service, and other organizations.

- **Research Problems in Sociology**
  - ELIGIBLE GRADES: CR
  - COURSE DESC: Individual research in specific problem areas in which student has demonstrated ability and interest.

- **Honors Thesis in Sociology**
  - ELIGIBLE GRADES: CR
  - COURSE DESC: Designed individually for students pursuing departmental honors. The work is undertaken under the supervision of a faculty member and may extend for up to one academic year. The student is expected to produce a thesis from the work.

- **Sociology Capstone**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Students apply and integrate knowledge and techniques from their coursework to complete a sociological research or applied project. Students review literature, collect and analyze data, engage in peer review, and learn skills for effective professional presentation of their work. Students also learn about careers in sociology, opportunities for advanced study, and communication skills to make their sociological training and expertise meaningful to the general public. Topics vary according to instructor.

- **Sociology Tutorial**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Honors tutorial thesis course for seniors.

- **Sociology Tutorial**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: Honors tutorial thesis course for seniors.

- **Media and Society**
  - ELIGIBLE GRADES: CR, PR
  - COURSE DESC: The proliferation of new media/technology and its impact upon social life; the dramatic impact of an intensely global visual culture upon social life; tensions in race, gender, and sexuality in representation; the resurgence and cultural functions of the "real" in box office documentary and reality television; ideological debates about media effects and violence; the limits of representation (images of death, torture, war, and genocide) and the end(s) of the social.

**COURSE DESC:**
Access to Justice examines how structural inequalities lead to regional, national, and global justice gaps. The course investigates needs and problems confronted by communities; disparities in access to information and legal resources; how groups perceive and employ the justice system; representation and inclusion within the legal profession; and the attainment of substantively just outcomes. The course then explores strategies to address these concerns, including approaches traditionally employed by the legal profession and innovative, legal, social, technological, and architectural solutions designed to bridge gaps between communities and justice.

**COURSE DESC:**
This course scrutinizes the ways women and men work in the United States and how the work we do affects our lives. Using a sociological perspective, we will critically examine the structure of work, major economic changes, and concerns of workers such as earnings, promotions, unemployment and the balance between work and family. In an effort to understand many of the inequalities related to work, we will challenge both the structure of our society as well as many of our commonly held unquestioned beliefs.

**COURSE DESC:**
This course examines the social and cultural determinations and consequences of changes in fertility, mortality, and migration. Current and historical national and international population policies and programs are also examined, incorporating sources of demographic data used in population analysis.

**COURSE DESC:**
This course combines writing instruction with in-depth consideration of substantive topics such as but not limited to famine, hunger/food insecurity, food justice, food politics, food sovereignty, and food systems as the foundation and inspiration for developing one's writing abilities. Students develop skills in various styles of sociological writing including book reviews, blogs, critical reflection essays, field notes, interview composition, policy briefs, and research papers, among others.

Students develop skills in various styles of sociological writing including book reviews, blogs, critical reflection essays, field notes, interview composition, policy briefs, and research papers, among others.

**COURSE DESC:**
This course examines media representations of crime and criminal justice, as well as the relationship between the media and criminal justice institutions. Students investigate moral panics, crime myths, and crime's contested cultural meanings; how media representations influence law and public policy; how media portrays special types of offenders; how media depicts and engages with crime victims; and how media represents and shapes our criminal justice institutions. Students learn and apply sociological theories regarding the relationship between media, crime, and criminal justice.

**COURSE DESC:**
This course is designed to introduce students to a sociological perspective on the importance and impact of the court system in American society. We will examine the court's structural and cultural features as well as how court officials create and move cases through to various institutional outcomes.

**COURSE desc:**
Explores the fundamental roles that law plays in organizing contemporary social life. Considers various ways of understanding law's complex presence: how law shapes and enables routine social interaction, how law constructs differences among people and their actions, how law mediates and enforces power relationships, and how law matters for the kind of societies we have. Our inquiries will examine official legal institutions and actors, but the class will emphasize how law works as a complex array of norms, symbols, discourses, and practices that intensify and shape all aspects of social life, from everyday social interaction to social movements and official legal institutions and actors. The course draws from the U.S. experience as well as historical, international, and transnational perspectives.

Office of the University Registrar
June 1, 2023
Page 333 of 1005
A&S SOC
SOC 5650
Eligible Grades: A-F
Course Desc: Dynamics and processes by which social change takes place; major theories of change; industrialization and modernization; social evolution and revolution; planned change; social impact of change.

A&S SOC
SOC 5660
Eligible Grades: A-F
Course Desc: In this course, students explore criminal justice policy, reform, and transformation. Students study historical and contemporary movements for criminal justice reform, consider perspectives and ideas of communities and criminal justice professionals, and consider perspectives of formerly incarcerated individuals. Students explore police abolition and prison abolition movements and consider tensions between advocates for gradual reform and groups seeking fundamental transformation of the criminal justice system. Students also learn how to use their sociological expertise effectively as a tool for change.

A&S SOC
SOC 5670
Eligible Grades: A-F
Course Desc: Upper-level undergraduate seminar designed to survey an emergent area of inquiry, the sociology of risk, in its multiple and varied forms, including the rise of world “risk society,” and the like. Students examine related forms of violence where women are the predominant victims, with a major emphasis on forcible rape and women physical abuse. Other forms of violence against women may be included, such as stalking, rape in marriage, incest and other related subjects. The place of masculinities, the development of a rape culture, and the role of the media, including pornography, will be examined. The course will include both theoretical and empirical findings and developments.

A&S SOC
SOC 5675
Eligible Grades: A-F
Course Desc: This course examines human trafficking and efforts to combat it. Students investigate the causes of human trafficking, how human trafficking unfolds, and its effects on victims; examine competing frames and social constructions of human trafficking; analyze and assess governmental, non-governmental, and social movement organizations' attempts to eradicate human trafficking; analyze media depictions of human trafficking; and critically evaluate anti-trafficking policies and programs and their effectiveness.

A&S SOC
SOC 5680
Eligible Grades: A-F
Course Desc: How social scientists, criminologists, and other intellectuals have sought to make sense of genocide and mass atrocity; the challenge of mass violence for criminology and law; and responses to mass atrocity by local, national and transnational actors.

A&S SOC
SOC 5685
Eligible Grades: A-F
Course Desc: This course examines human trafficking and efforts to combat it. Students investigate the causes of human trafficking, how human trafficking unfolds, and its effects on victims; examine competing frames and social constructions of human trafficking; analyze and assess governmental, non-governmental, and social movement organizations' attempts to eradicate human trafficking; analyze media depictions of human trafficking; and critically evaluate anti-trafficking policies and programs and their effectiveness.

A&S SOC
SOC 5690
Eligible Grades: A-F
Course Desc: How social scientists, criminologists, and other intellectuals have sought to make sense of genocide and mass atrocity; the challenge of mass violence for criminology and law; and responses to mass atrocity by local, national and transnational actors.

A&S SOC
SOC 5700
Eligible Grades: A-F
Course Desc: This course explores the social and cultural construction of gender as a fundamental basis of social relations and institutions and narratives we tell about those interpersonal relations and institutions. Focus includes sociological theories of gender, and an examination of gender in areas such as sexuality, identity, the body, education, marriage, family, violence, health, paid and unpaid work, popular culture, politics, and the history of the discipline itself.

A&S SOC
SOC 5710
Eligible Grades: A-F
Course Desc: Explores how the interpretation and application of criminal law reflects assumptions about men's and women's natures, appropriate roles, and positions in society. Readings examine changes and stability in the prosecution of violence against women; the prosecution, sentencing, and correction of women offenders; women's and men's access to the profession of law and other legal positions; and conceptions of justice. Readings highlight how race, class, and gender intersect and how structure and interpersonal interaction contribute to observed outcomes.

<td>This course provides a comprehensive analysis of sexualities from a sociological perspective. It investigates how sexual identities and sexuality are socially constructed and regulated, and how these constructions create social inequalities. The course also explores the influence of social movements that relate to sexuality and their effect on society. In addition, the course examines the intersections between sexuality and other social categories, such as gender, race, class, and place.</td>

<td>This course introduces students to the study of women, gender, and sexuality in a global context, with a focus on the experience of countries in the Global South. The course begins with an introduction to transnational feminist theory, challenging students to consider the way that their identity and nationality affects their understandings of WGSS issues globally. After a brief consideration of feminist thought in an historical context, the course explores issues of representation, geopolitics, health and reproduction, economic globalization, environmental justice, migration, militarization, and violence. The course also considers how activists are organizing to address these concerns.</td>

<td>Students in this course learn how to research, write, and produce radio, TV, text, web, and/or podcast content about LGBTQ+ issues relevant to local and regional communities. Students in the course receive access to and training in audio, video, and/or digital media production to address areas currently lacking news coverage and/or access to information, resources, and community in the southeast Ohio region. This class includes a praxis element that interrogates what stories get produced/disseminated and why, how we envision and create objectivity, and thus what our responsibility as advocates and activists is to those in our communities and those without similar access.</td>

**Course Description**

**Independent Reading**
GEC1: A-F
REQUISITE: Permission required
Directed individual reading and research.

**Gendered Bodies**
GEC1: A-F
REQUISITE: Students explore how gendered bodies are created within systems of power and how gender is embodied through beauty, race, sports and play, menstruation, sexuality, disability, cancer, intersex and trans bodies, and pregnancy.

**Medicine, Science & Sexuality**
GEC1: A-F
REQUISITE: This course studies how the history of medical and scientific approaches to sexuality, as well as contemporary medical practices, shape modern discourses of sexuality. Students examine how medicine shapes global discourses of sexuality within the context of the legacy of European colonialism. Students reflect on issues relevant to LGBTQ diversities, contraception and abortion, as well as sexual health, desire, and morality.

**Gender, Sexuality & Healthcare**
GEC1: A-F
REQUISITE: This course is an introduction to selected topics in the intersections of gender, sexuality, medicine, and health care. Students will learn how to think about medical issues intersectionally, from epidemiological trends based on gender and sexuality, to contemporary health policy debates.

**Sexual Violence and Survivor Advocacy**
GEC1: A-F
REQUISITE: Survey of the social scientific literature on the history of sexual violence and the evolution of its definitions; the social correlates of offending and victimization; the social patterns of different forms of sexual offending; the programs and policies aimed at reducing sexual violence, processing offenders, and meeting the therapeutic and social institutional needs of survivors.

COURSE DESC: This course provides an introduction to the rapidly growing field of forensic accounting and addresses the causes and consequences of white collar crime and explores implications within the financial reporting system. The course emphasizes the role of internal controls in forensic accounting and fraud prevention and provides an understanding of the role of forensic accountants in examining financial records. This course also provides the basic skills and tools required in fraud examination and recognition of the basic types of fraud schemes.
