

**The John J. Kopchick Molecular and Cellular Biology/Translational Biomedical Sciences
Undergraduate Student Support Fund
Academic Year 2020-2021**

Proposal Receipt Deadline: 4:00 p.m., Thursday, September 24, 2020

Notification of Award: beginning November 2020

STATEMENT OF PURPOSE

The John J. Kopchick Molecular and Cellular Biology/Translational Biomedical Sciences Undergraduate Student Support Fund (Kopchick MCB/TBS UG Fund) was established by a generous gift provided by John J. Kopchick, PhD, Goll-Ohio Eminent Scholar and Distinguished Professor of Molecular Biology and Char Kopchick, Assistant Dean of Students. The goal is to promote a rich interdisciplinary and entrepreneurial environment that fosters discovery research resulting in intellectual property that will bring about the development of new technology and transfer of that technology to the private sector, where it might be deployed for the benefit of human health and well-being.

The Kopchick MCB/TBS UG Fund provides funding (up to \$1,500) for Ohio University undergraduates working with faculty members in the Molecular and Cellular Biology/Translational Biomedical Sciences programs and conducting translational biomedical sciences research and scholarly activities. Support may be used for research supplies, equipment, and travel costs to attend appropriate scientific meetings. Note, funds may not be used for conference travel only.

The Kopchick MCB/TBS UG Fund provides support for research activities for 12 months following notification and account establishment.

ELIGIBILITY

Applicants must be undergraduate students reporting to Molecular and Cellular Biology (MCB) or Translational Biomedical Sciences (TBS) program faculty members conducting translational biomedical science research and scholarly activities.

For the purposes of this program, translational biomedical sciences is defined as the translation of basic research effectively into enhanced healthcare outcomes for the entire population in fields such as biomedical research, bioengineering, drug development, informatics, communications, health policy and planning.

Students must be enrolled and maintain student status during the proposed project period.

REVIEW AND EVALUATION/SELECTION CRITERIA

Proposals will be reviewed by a committee that will include: the directors of the TBS and MCB programs, the chairs/directors of the Department of Biomedical Sciences, the School of Applied Health Sciences and Wellness, the Biomedical Engineering program, and the Edison Biotechnology Institute, and the Vice President for Research and Creative Activity. Note: if the director of the MCB program is a faculty member outside of the College of Arts and Sciences (A&S), the dean of A&S will select a representative from the college to serve on the committee.

The scholarly merit of a proposed project is the primary criterion used for proposal evaluation. In addition, the following criteria, as well as other factors as special circumstances dictate, are considered in the proposal review:

1. The relevance of the proposed research to translational biomedical sciences.
2. The strength of the scientific rationale.
3. The probability that the research will lead to new and relevant scientific information and may result in patent-protected intellectual property and/or know-how.
4. The probability of positioning the student for success in subsequent 'real-life' professional activities.
5. Evidence, when applicable, that funding is not a duplication of other internal or external support.

PROPOSAL PREPARATION GUIDELINES

Please review the guidelines before submitting a proposal. Very meritorious proposals are often not funded because these guidelines are not followed and information needed to make an informed, objective decision is not available to the committee. Many reviewers feel that the care with which a proposal is prepared indicates the care with which the work will be done by the investigator.

The proposal must be written by the student with the review and approval of the mentor (as signified by the signature on the cover page and the mentor's endorsement included in the proposal).

****Please Note: The committee has the right to return without review any proposals that do not conform to these format requirements.****

The goal of the requirements for type size, spacing, and margins is to provide legible documents of roughly similar length. The use of unusual typefaces defeats the goal the committee hopes to achieve. Please review all electronic attachments before submitting.

Questions concerning the proposal preparation process should be directed to Roxanne Male'-Brune, Office of the Vice President for Research and Creative Activity, 101A RTEC, Ohio University, Athens, OH 45701-2979, E-mail: male-bru@ohio.edu.

PROPOSAL SECTIONS

- Number pages to facilitate the review process.
- Do not submit any hard copies in any form.
- Proposal **must** be submitted as a single PDF document, including scanned images of the fully signed cover page, and checklist.

Assemble the PDF in the following order with the following formatting/page limits:

NEW! The bibliography is now separated from the Project Narrative.

- | | |
|--|---|
| 1. Cover page | use Kopchick MCB/TBS UG Fund form |
| 2. Biographical Sketch | one page |
| 3. Project Narrative | 4 double-spaced pages |
| 4. Bibliography | one page |
| 5. Mentor's Endorsement | one page |
| 6. Budget and Justification | no limit specified |
| 7. Appended Materials/Multimedia Files | 5 pages; and no more than 10 minutes of footage |

The project narrative **must be double-spaced and use 12-point type** that is clear and legible, standard size. Figures, charts, tables, figure legends, footnotes/endnotes in these sections and the bibliography may use a smaller font size and may be single-spaced but **must** be clear and readily legible. **Margins must measure one inch (1") or greater on all sides.**

All other sections: biographical sketch, mentor's endorsement letter, budget and justification, and appended materials may be single-spaced in a legible typeface.

****Please note: The committee has the right to return without review any proposals that do not conform to these format requirements.****

1. Cover Page

Prepare a cover page (see form below). Signatures **must** be obtained by the applicant and are required on the submitted proposal. The cover page **must** be the first page of the proposal.

FY21, if needed, applicants may submit cover pages with electronic signatures or multiple cover pages for individual signatures.

2. Biographical Sketch

Include a one-page biographical sketch of the student's scholarly interests and activities.

The biographical sketch should include the following, preferably in tabular/bulleted format:

- Applicant's Name
- GPA
- Educational training of the student, including: institution, degree, date of completion/anticipated date of graduation
- Publications and presentations
- Relevant coursework
- Language skills (if applicable to the research)
- Honor and awards
- Current, pending, and previous funding

The biographical sketch **must** also include a brief statement of the applicant's long-term plans and how this award will help in achieving these goals.

3. Project Narrative

The narrative should discuss the main objectives of the research, a brief discussion of the materials and methods to be used to conduct the experiments, and any preliminary data generated.

Importantly, the application must demonstrate the relevance of the proposed research to translational biomedical sciences. For the purposes of this program, translational biomedical sciences is defined as the translation of basic research effectively into enhanced healthcare outcomes for the entire population in fields such as biomedical research, bioengineering, drug development, informatics, communications, health policy and planning.

1. **Objective and scope** of work: *"What do you intend to do?" "What will this research, scholarship, or creative activity accomplish?" "What problem does this project address?" "Why does this project need to be done?"*

Remember, it is important to contextualize your project in relationship to others' works and to explain how the project differs from previous, related work. *"What has previously been done in the area?"*

2. **Materials/methods:** *"How will the work be accomplished?"*

Discuss the hypotheses or research questions, operationalization and instrumentation, research sites or context, research design, data collection, preliminary results, and data analysis.

The applicant should clearly state how this project will produce new and relevant scientific information and how this work may result in patent-protected intellectual property and/or know-how.

3. **Significance** of the project: *"Why is the work important to your field?"*

4. **Intellectual Property:** *"How might this research lead to new innovations?"*

NOTE: For FY21, in light of the COVID19 pandemic, it is imperative that applicants ensure that all projects are designed such that (1) the project methodology complies with all current restrictions and (2) that the project can feasibly be concluded within a year. Applicants with concerns should contact Roxanne Male'-Brune, malebru@ohio.edu, prior to submission.

4. Bibliography: The narrative may include up to 10 references. A carefully selected bibliography can strengthen a proposal by indicating to the reviewer that the applicant is aware of significant and current literature in the field.

Confidentiality: If the proposal discloses ideas, practices, or processes for which patent protection will be or is being sought, the word "Confidential" should be placed at the top and bottom of each page that contains such information. Also, the following statement should be placed on the cover sheet immediately above the signature section.

"The data contained in this proposal is confidential and proprietary and shall not be duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate the proposal without the written permission of the author. Permission is hereby granted to the review committee to evaluate this proposal in accordance with its normal procedures, which may include evaluation by evaluators both within and outside the University, with the understanding that written agreement not to disclose the information shall not be required of or obtained from any such evaluators. This restriction does not limit the right of any such evaluators to use information contained in this proposal, if it is obtainable from another source without restriction."

5. Mentor's Endorsement

The mentor's endorsement must include: (1) an assessment of the student in relationship to the proposed project and (2) a description of his/her role in the project proposed by the student.

6. Budget and Justification

Budget expenditures encumbered before the award date will not be reimbursed.

Funds are available for 12 months following notification and account establishment and can cross fiscal years.

This section should include the breakdown of the budget by line items, total budget request, sources of matching funds (if appropriate), and budget justification.

The maximum award is \$1,500.

Students must be enrolled and maintain undergraduate student status during the proposed project period.

Travel: Travel expenses **must** be broken down into transportation, meals, and lodging categories, and the basis for the figures must be provided. Where appropriate, use the OU Travel Reimbursement Policy 41.121 to determine limits on travel expenses. Budget requests are scrutinized carefully, and requests, especially for long periods of travel, should reflect efforts to economize.

- For domestic travel: Meal expenses will be reimbursed as per the U.S. General Services Administration per diem rates, www.gsa.gov/perdiem.^{*} Federal employees are only eligible for 75 percent of the total M&IE rate for the location to which they are traveling on the first and last day of travel; all other days are reimbursed at 100% the rate.

**unless the applicant stipulates a lower reimbursement through the Concur system.*

- For international travel: Any international travel will need to be fully justified.

The Travel Registration Form (TRP) is required of all students who are participating on an educational experience abroad affiliated with Ohio University. Students may be earning credit from Ohio University but will not be receiving transfer credit. These activities include but are not limited to: independent study or research abroad, volunteer or service-learning abroad, international conference travel, or work abroad. These may be non-credit or for-credit experiences. The TRP will register students for international health insurance, International SOS, a security services that provides support to students while they are traveling abroad, and ensure they are registered appropriately with their embassy.

The completed TRP is required to be turned in four weeks prior to departure and must include the students flight itinerary and a copy of their passport. For more support on international travel, risk ratings for destinations and planning an international experience students may contact the Office of Global Opportunities global.opportunities@ohio.edu.

- - Meal expenses and hotel rates will be reimbursed as per the U.S. Department of State per diem rates, https://aoprals.state.gov/web920/per_diem.asp.^{*}
**unless the applicant stipulates a lower reimbursement through the Concur system.*
 - The following must also be addressed in the justification for international travel:
 - i. What are potential safety concerns in the region (as noted on the U.S. State Department's travel warning page: www.travel.state.gov), and how do you propose to take precautions?
 - ii. According to CDC recommendations (<http://wwwnc.cdc.gov/travel/>) what immunizations must you get prior to arriving in the country and what other measures do you need to take to ensure that you remain in good health abroad? When do you plan on getting these immunizations?

Please Note: For all travel arrangements, hotel and airfare must be booked using a p-card and the Concur system. If the vendor does not accept the p-card, then you may pay for the expense out-of-pocket and be reimbursed through the Concur system.

Equipment: All major items of equipment, including computers, which are to be purchased with Kopchick MCB/TBS UG funds, should be listed with the estimated cost of each item and components of each item if applicable. Because of limited funds available to the committee, requests for equipment should be made only after a conscientious search has been conducted to determine whether this equipment is already on campus and available through a loan or share arrangement. The duration of use and percent time used, project-based activities supported and inability to secure through other resources should be addressed. For computers, the specifications and capabilities must be stated and justified. Any equipment purchased is the property of Ohio University.

12. Appended Materials/Multimedia Files

All appended materials must be submitted electronically as part of the electronic application unless otherwise approved prior to submission. The Appendix is an appropriate place to provide copies of test instruments, questionnaires, survey forms, and letters of collaboration or financial support.

All materials included in the Appendix should be briefly referenced in the Project Narrative section.

Applicants are strongly advised to write the Project Narrative such that it is a "stand-alone" document without the reviewer needing to refer back and forth to the Appended Materials.

Supplemental text and figures in the appended materials are not permissible if they clearly seek to circumvent the page limits of the Narrative.

PROPOSAL SUBMISSION

Submit one **(1) one electronic copy*** of the proposal (with required signatures) to Roxanne Male'-Brune, Office of the Vice President for Research and Creative Activity: male-bru@ohio.edu.

Proposals must be received no later than 4:00 P.M. on the deadline date.

*Electronic copies **must** be submitted as a **single file** in Adobe Acrobat format (Mac users must include the file extensions .pdf in the file name) and emailed to male-bru@ohio.edu by 4:00 p.m. on the deadline date.

Electronic copies **must** contain the entire proposal, including appendix, unless authorized prior to the deadline.

SPECIAL INSTRUCTIONS

If there is anything about your proposal that requires special handling or consideration, it is essential that you contact Roxanne Male'-Brune, Office of the Vice President for Research and Creative Activity, 101A RTEC, Ohio University, Athens, OH 45701-2979, E-mail: male-bru@ohio.edu.

REPORTING REQUIREMENTS

A final report that describes significant outcomes, discoveries, or results must be submitted to Roxanne Male'-Brune, male-bru@ohio.edu, within four months following expiration of the award. If this award results in additional, external funds, please list the sponsors and amounts. **No future VP for Research and Creative Activity-funded internal awards will be made to the applicant without receipt of the final report.**

***NEW - TRAVEL BOOKING/PAYMENTS**

As per University policy, 41.121, all recipients **must** work with their respective department in order to book their travel through Concur utilizing Ohio University's travel service. Funds will not be dispersed directly to recipients.
